CASUALTIES.

The Hero of Liverpool, Young, from Cardiff to Manila, with coals, arrived at Cadiz 10th Aug., making nine inches water per hour.

FREIGHTS AND CHARTERS.

A contract for 12,000 tons of coal, for Galle, is announced by the P. and O. Company. For China further engagements have been made this week for coals at 5s. 6d. Hong Kong from Cardiff; and one vessel has been taken by the French Government for the Shanghai River, from St. Nezaire, at 75 francs for miscellaneous stores. Tenders have been received by our own Government for 1,000 tons stores from the Thames to Hong Kong.

Rates of freight current for vessels on berth to Shanghai, 60s. per ton dead weight; 45s. per ton of 40-feet measurement. To Hong Kong, 50s. weight, 45s. measurement. To Singapore, 35s. to 40s. weight or measurement. To Manila, 35s. and 40s. To Japan, £5 weight, 90s. measurement. To Batavia, 50s. weight, 40s. measurement. At the United States: to Shanghai, coal and measurement goods, \$10 to \$11.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Nominal quotation for Jeddah, 70s. to 80s.

At Hamburg, for Batavia and Singapore, 45s. to 50s. China and Manila, 55s. to 60s.

At St. HELENA.—July 2, Agnes, Leitzman, from Penang. City of Boston, Vickers, from Manila, and sailed 4 for Liverpool. Everetts, Montgomery, from Manila, and sailed 4 for London. 3, Sigisbert Cezard, Roussan, from Macao, and sailed 4 for Havana. Sofia Adelaide, Kaulmann, from Shanghai. 4, Staghound, Hussey, from Swatow. Godefroy, Lecomte, from Hong Kong, for Havre. Courier Clinik, from Rangoon, and sailed 7 for Plymouth. Guadeloupe, Munroe, from Macao. Welvaart Mooi, from Batavia, and sailed 7 for Amsterdam; 7, Amazon, Daunbey, from Batavia; 14, Shackamaxon, from Rangoon.

PASSENGERS INWARDS.—Per *Alegone*, Capt. Haake, at the Texal from Batavia: Messrs. A. and H. Burgomeester. Per *Rotterdam*, Capt. Poort, at Brouwerhaven from Batavia: Colonel and Mrs. Meyer and family, Capt. Eckhardt, Ritmeister Podenkamp, Mr. and Mrs. van Coevorden, Mr. and Mrs. T. Meymann and family; Messrs. van Leeuwen and Babar, Miss van Coevorden and Mrs. Commissaris. Per *Joaquin*, Victoria, from Manila, Col. Guherez, wife and two children.

PASSENGERS OUTWARD.—Per *Gelderland*, Capt. Hellingman, from Amsterdam to Padang: Messrs. J. Stibbe, Van Gigh, and J. D. Andriess. Per *Ouderkerk*, Capt. Swart, from Brouwerhaven to Batavia: Messrs. Ultee, Albers, Plantema, and Suermont; Mrs. Prince and Miss Bitterberg.

LOSS OF THE "GANGES" STEAMER.—The *Athenian* brings intelligence of the total loss of the steamer *Ganges*, for the Oriental Inland Steam Navigation Company. The *Ganges* was intended for the navigation of the Indus river, and was a vessel of exceedingly light draught of water. She foundered in a sudden and unexpected manner on the 29th of July, in lat. 35 10 N., long. 13 W. She left Liverpool on the 12th June, bound for India. The crew, upon abandoning her, divided themselves into three small boats, and started a course for the island of Madeira, but in consequence of the high sea running at the time they all perished company during the night. One boat containing seven of the crew, in charge of the second officer, made Madeira after being exposed to a tremendous sea for four days; and as the *Athenian* was steaming out of port she passed another of the boats in charge of the chief officer. The captain arrived shortly after.

TRIAL TRIP OF THE P. and O. STEAMER ELLORA.—SOUTHAMPTON.—An official trial of the P. and O. Company's screw steamship *Ellora*, previous to resuming her place in the mail service, took place, and was attended with a very satisfactory result. She left the docks at eleven o'clock and proceeded to Stok's-bay, the following, among other gentlemen, being on board:—Captain Hall, R.N., director; Messrs. Luke and Denning, Admiralty surveyors; Captain Patey, R.N.; Captain J. B. Engledue, and Mr. A. Lamb, the marine and engineering superintendents of the P. and O. Company; Mr. George Rennie, jun., and Mr. Scott, from the firm of Messrs. G. Rennie and Sons, &c. The following are the results of the four runs at the measured mile:—Average speed, 12.791 knots; revolutions, 67; steam, 20 lbs. to the square inch; vacuum gauge, 24; temperature of steam on slide jacket, 340 deg. Her draught of water was 16ft. fore, and 17ft. 2in. aft; weight of coal, water ballast and spare gear on board, 530 tons. A higher rate of speed would doubtless have been made, had it not been blowing nearly a gale of wind all day, with a strong tide running. The *Ellora* takes out the Bombay mail to Alexandria, on her return from which voyage it is understood she will be despatched to the India station.

THE EUXINE AND MASILIA.—These two steamers of the P. and O. line are to relieve the *Valetta* and *Panther* on the Marseilles and Malta lines, and the *Alhambra* has been chartered to the French Government to convey 350 men as reinforcements for the China Expedition.

EXPORTS OF COAL.—The Coal Exports from Newcastle and Shields, from the 1st of January to the 31st of July, 1860, amount to—for Singapore, 2,491 chaldrons; Hong Kong, 562; and Shanghai, 400. The export from Swansea, Cardiff, and Newport—for Hong Kong, was 7,636 tons; for Shanghai, 11,810; for Singapore, 16,112, from the 1st of January to the 30th of June.

ASTOR HOUSE. SHANGHAI.

NOTICE TO PASSENGERS BY THE OVER-
LAND ROUTE via EGYPT.

PHILIP ZECH, Proprietor of the two well-known Hotels in Alexandria, the Hotel d'Europe, and the Peninsular and Oriental Hotel, begs to inform his friends, and Travellers in Egypt in general, that he has purchased SHEPHEARD'S HOTEL in CAIRO, which will still continue to bear the same name; and in returning thanks for the extensive patronage enjoyed by his two houses in Alexandria, hopes that the preference may likewise be extended to his house in Cairo, which will be managed in first-rate style, and in a manner intended to give every satisfaction to its frequenters, both as far as table, wines, internal and external service are concerned. Many alterations and ameliorations are being carried out at the present moment.

Curtis on Manhood.—New Edition.—A Medical Essay on Nervous Diseases.

Just published, the 120th thousand, with numerous plates in a sealed envelope, price half-a-dollar.

MANHOOD: the CAUSE and CURE of
PREMATURE DECLINE, with plain directions for
perfect restoration to health and vigour. By J. L.
CURTIS, 15, Albemarle-street, Piccadilly, London.

CONTENTS:

INTRODUCTORY CHAPTER on the Physiological
Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatocoeia and Impotence; Early Vicious Indulgences; Injurious Neglect.

CHAPTER III.—A Review of the various Disqualifications of Marriage—whether resulting from the Youthful Abuse, the Pollies of Maturity, the Effects of Climate or Infection.

CHAPTER IV.—The Author's plan of Treatment Medical and Moral, with observations on a new and successful mode of detecting Spermatocoeia and other Urethral discharges by microscopic examination.

CHAPTER V. and VI. on the modern Treatment of Gonorrhoea and Syphilis.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

"We feel no hesitation in saying, there is no member of society by whom the book will not be found useful—whether such person hold the relation of Parent, Preceptor, or Clergyman."—Sun.

Mr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by letter, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Mr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty Years; nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

7, GEORGE-YARD, LOMBARD-STREET, LONDON, E.C.

BLAIR'S GOUT and RHEUMATIC PILLS.

Price 1s. 1d. and 2s. 6d. per box.

This preparation is one of the benefits which the science of modern chemistry has conferred upon mankind; for during the first twenty years of the present century to demonstrate by unsolicited testimonials from persons speak of a cure for the Gout was considered a romance; but now the efficacy and safety of this medicine is so fully in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age.

These Pills require no restraint of diet or confinement during their use, and are certain to prevent the disease attacking any vital part.

Sold by all medicine vendors. Observe "Thomas Prout, 229, Strand, London," on the Government Stamp.

FOR FAMILY ARMS.—Send Name and

County to the Royal Heraldic Studio and Library; in a few days you will receive a Correct Copy of your Armorial Bearings. Plain Sketch, 3s.; in Heraldic Colours with written description, 6s.; Large Size, 12s. Family Pedigrees, with original grant of Arms, to whom and when granted, the origin of the name, all traced from authentic records, fee Two Guineas. An Index, containing the Names of nearly all persons entitled to use Arms, as extracted from the British Museum, Tower of London, Herald's College, &c. &c. The Manual of Heraldry, 400 Engravings, 3s. 6d., post free, by T. CULLETON, Genealogist, Lecturer on Heraldry at the Mechanical Institute, 25, Cranbourn-street, corner of St. Martin's lane, London, W.C. The Heraldic Colours for Servants' Liveries, 5s.

ARMS, CRESTS, &c., Engraved in the Best Style. Crest on Seals or Rings, 7s. On Steel Die, 6s. Initials, 1s. 6d. per Letter. Book Plate, Engraved with Arms, 10s.; or Crest, 6s. Postage and Registered Letter, 1s. extra.—T. CULLETON, Heraldic Engraver by Appointment to the Queen, 25, Cranbourn-street, corner of St. Martin's lane, London, W.C.

SOLID GOLD RING (18 Carat, Hall Marked). Engraved with Crest, 42s.; Large Size, for Arms, 75s. (On receipt of P.O. order the size will be sent to select from.—T. CULLETON, Seal Engraver, 25, Cranbourn-street, corner of St. Martin's lane, London, W.C.)

STAMP YOUR OWN PAPER—with Arms, Crest, Initials, or Name and Address, by means of CULLETON'S PATENT EMBOSSEING PRESS, 15s. Best Make 21s. Any person can use them.—T. CULLETON, Die Sinker to the Board of Trade, 25, Cranbourn-street, corner of St. Martin's lane, London, W.C.

Arms Quartered, Impaled, and Painted on Vellum, according to the laws of Heraldry. By T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's lane, London, W.C.

THE PEN SUPERSEDED.—Mark your Linen. The best and only method of Marking Linen, Silk, Stockings, Coarse Towels, or Books, so as to prevent the Ink washing out, is with CULLETON'S PATENT ELECTRO-SILVER PLATE. By means of this novel invention a thousand pieces of Linen can be marked in a few hours. Initials, 1s. each; Name, 2s. 6d. Set of Moveable Numbers, 2s. 6d.; Crest Plate, 6s., with the necessary directions for use. Post free. Certificate from the eminent Dr. Sheridan Muspratt, F.R.S., Professor of Chemistry, &c.

"Several trials with Mr. Culleton's Patent Electro-Silver Plates, for marking linen, induce me to pronounce them excellent; the letters are beautifully marked in a deep black colour, without blotting, and after a long boiling, with either potash or soda, they remain unaltered. Other plates which I tried decomposed the ink, and in many cases burned holes in the linen. I can testify Mr. Culleton's Plates are incorruptible, and will not hurt the finest fabric.—(Signed) "SHERIDAN MUSPRATT, College of Chemistry, Liverpool."

"May, 15, 1864." All orders to be sent to the Patentee and Sole Maker, T. CULLETON, 25, Cranbourn-street, corner of St. Martin's lane, London, W.C.

All Orders executed by Return of Post.

Per P. and O. str., 27th Sept., via Bombay.—From Southampton to Shanghai: Mrs. Marshall, Mr. Maclean. To Hong Kong: Mr. J. F. Callaghan. To Singapore: Mr. G. Lipscombe. From Marseilles, 5th Oct.—To Hong Kong: Mr. and Mrs. T. Borriandale, Mr. L. Josephs. To Penang: Mr. H. Reme.

Per P. and O. str., 4th Oct.—From Southampton to Hong Kong: Mr. G. Smith, Miss Harmer, Mr. and Mrs. Dixon, Veterinary Surgeon Appleton, Mr. C. H. Platt. From Marseilles, 12th Oct. For Hong Kong: Messrs. J. D. Gibb, E. F. Parker, and R. Westall. To Singapore: Mr. Matzen, M. and Madame Deschaux and infant. To Shanghai: Mr. and Mrs. J. P. Tate, Mr. Birt.

Per P. and O. str., 12th Oct., via Bombay.—From Southampton to Hong Kong: Mr. Hutchison.

Per P. and O. str., 20th Oct., from Southampton to Singapore: Mr. and Mrs. Gemmel, Mr. L. van Pabst, Miss Baumgarten. To Hong Kong: Mr. F. Pereira, Capt. Archer. From Marseilles, 28th Oct., for Singapore: Mr. and Mrs. C. Hill and infant, 3 children, Miss Symons and governess. To Hong Kong: Mrs. Murray. From Alexandria to Hong Kong: Mr. J. Hogg. To Singapore: Mr. R. B. Reed.

Per P. and O. str., 4th Nov.—From Southampton to Hong Kong: Lieut. Trunners. 12th Nov.—From Marseilles to Singapore: Mr. and Mrs. Heueneick and infant, one, lady and two children, Mr. and Mrs. E. Cunningham.

Per P. and O. str., 20th Nov.—From Southampton to Hong Kong: Mr. Padder, Miss Alexander. To Singapore: Messrs. J. Watson, and R. Henderson. From Alexandria to Penang: Mr. and Mrs. E. J. Leveson.

Per West Australian, from Gravesend for Hong Kong, on the 7th inst.—Mr. and Mrs. Harding and two children.

Per Harkaway.—From London for Shanghai: Mr. Lloyd, Mr. Muarid.

Summary of News from the Far East.

THIRD CHINA WAR.

(FROM A CORRESPONDENT.)

TALIENWAN BAY, July 12, 1860.

The mail closes to-morrow. Lord Elgin arrived on the 9th per *Feroze*. With Lord Elgin came his staff and *The Times* correspondent. Of course you must know long ere this that both English and French ambassadors were on board the *Mala-bar* mail steamer when she was lost at Galle and lost every thing. Many of the mail bags have been recovered, but most of the letters in a sad unseasonable state, envelopes off, &c., so that there were very many letters came to people they were never intended for. I believe all the official despatches were recovered. On the 8th a French gun-boat came in here to announce that the French force would be ready to move on the 23rd (they are all at Chefoo on the opposite side of the Gulf), and though not officially announced, it is understood that we are to start from here on the 23rd for the Peiho, and operations to commenced immediately. We have only been waiting for them. The weather has been beautiful until to-day—nice cool, dry weather, only rather hot in the sun for a few hours in the middle of the day, but there is every indication of a change by the barometer falling and a sudden change of wind to N.E. and thick weather. The troops are all in good health, notwithstanding their salt rations, occasionally varied with a little tough commissariat beef; for I am sorry to say that the murain got amongst the bullocks that have been brought up for the use of the troops, and great quantities of them died before they could be landed. These last few days fresh bread made in the divisional ambulating ovens has been served out, and very good it is. The 1st Division is encamped over in Victoria Bay, Sir John Michel in command, and Brigadiers Sutton and Staveley under him, the 1st brigade consisting of the 60th Rifles, 2nd Queen's, and 15th Punjab Regiment; the 2nd brigade, of the 1st Royals, 31st Regiment, and Major

Fisher's Engineers, with, of course, a large Coolie Corps. The 2nd Division is under General Sir Robert Napier, with Brigadiers Japhson and Reeves, commanding brigades of infantry; Crofton, artillery; and Pattle, the cavalry. They are all over on the opposite side of the bay, in several different small bays, where water is to be had. Fresh provisions are to be had in small quantities, pigs, fowls, and vegetables, on that side, Lord John Hay having established a market in Odin Bay, where the 2nd Division are, but nothing is to be got on the other side. The country people keep aloof from us as much as possible; they are not uncivil, but that is, I fancy, only because they stand in awe of us. Parties have been sent out to look at the country around, it is full of villages, and everywhere grain is growing, which in a couple of weeks will be fit for cutting; plenty of bullocks and ponies have been seen from the hills in the country beyond, but they are driven off directly any one approaches. There is a small Tartar camp reported a few miles from here, but nothing has been seen of any of them. Our whole force are living in hill tents, generals and all, with the exception of Sir H. Grant, who lives on board his steam-vessel the *Granada* with all his staff. The camps have not much improved the corn-fields in which they are pitched or have their field days either. On the 14th the 1st Division are to have races and all kinds of games, &c., for the troops, under the auspices of Sir J. Michel, who is as good a sportsman as he is a soldier, and beloved by everyone. Now for the fleet. They have all been scattered about in the different small bays with so many transports under each vessel's care, with the exception of the *Centaur*, which is at Shanghai loading with bullocks, &c.; the *Furious* is there also with Mr. Bruce. The *Snake* is at Chusan, *Nimrod* at Shanghai and remains there, *Acorn* at Amoy, *Camilla* at Japan, and *Roebuck* on the way up here with the expected mails; *Adæon*, with gunboats *Dove*, *Algerine*, and *Leven* away surveying a little to the northward. A sad thing has happened on board the latter vessel, commanded by Lieut. Hudson. On the morning of the 9th it appears he sent for a marine who had been acting as his steward to come down to the cabin—the man had made away with a great deal of wine and spirits and was still under the influence of his debauch—whilst Hudson was speaking he snatched down a small French breech-loading revolver that was hanging over head and shot Hudson through the back (it was supposed at first killed him); the report was so slight it was not heard on deck, so the marine went up the ladder and called down the Second Master Ashton into the cabin, saying the commander wanted him, and on his entering shot him also; by that time an alarm was given, and the marine seized. Captain Ward placed an officer on board, and sent the *Leven* in here. Lieutenant Hudson and Mr. Ashton were both sent on board the *Simoom* hospital ship, and I am happy to say accounts to-day from there say that there are hopes of the former, and that the latter officer is much better. A court-martial is sitting to-day on board the *Imperieuse*, with Rear Admiral Jones as president, to try the marine.

The Commander and Master of the *Assistance* were tried (for losing that vessel at the back of Hong Kong) last week, and got off very cheaply, merely a slight reprimand: the court-martial only occupied one day. Every one is kept pretty well at work here afloat, what with loading and unloading ship, embarking and disembarking stores—for there is going to be a depot formed, and 2,000 men, under Brigadier Reeves, left behind, because the French don't like our having a larger force than they have. The 99th, and a battery of artillery, with our native regiments, are to be left, it is said. Part of the 99th are left at Chusan. All looting, or ill-treatment of the peasantry, is strictly forbidden, and the Provost Marshal punishes it at once. Many of the natives are living close round, and in the camp. No one under the rank of a commissioned officer is allowed outside the outposts, and there are regular landing-places at which only boats can land. The twenty junks the *Encounter* took and brought in, by order of the Admiral, are being loaded with commissariat stores to go up the Peiho. They are manned with the crew of the lost *Assistance*: they draw very little water.

I have just heard of the death of Major Lumsden, an officer on Sir Robert Napier's staff; he was drowned last night by the upsetting of a boat in going from the *Granada* to the 2nd division camp. Another officer of engineers was drowned with him; his name I believe was Captain Gordon. The boat was picked up this morning, floating about the harbour, bottom up, with two men on her. Hopes are enter-

tained that Lieut. Hudson will recover; Mr. Ashton was well enough to give his evidence at the court-martial. It appears that it was expected that something of the kind would happen to Lieut. Hudson, and that though the shot *must* have been heard no one would acknowledge it. The court-martial is over, and the marine is sentenced to be hung.

JAPAN.

Our advices from Yedo and Kanagawa apprise us of difficulties which are thrown in the way of American missionaries at these ports. To hinder their studies in the language they are not allowed to acquire teachers, nor are any natives permitted to visit them. A more promising state of affairs attains at Nagasaki; no impediments exist as to the study of Japanese, no hindrances to native visitors, due, it is stated, to the favourable impressions made at these ports by Dr. Macgowan, who commenced the mission by rendering himself useful to the officials.

Business at all ports is now progressing satisfactorily, and nothing has occurred requiring the consul's remonstrances.

CHINA.

PEKING.

Not one word of intelligence has been received through the usual channels from this place, and nothing is known of a reliable nature. It is of course apparent, by the silence, that it is intended to resist our demands.

SHANGHAI.

Lord Elgin, whose arrival at this port was announced in our last, has sailed for the Gulf of Pecheli, a short interview with his brother sufficing to determine him on a war policy.

The Foreign Settlement remains nearly as before. The city is nearly deserted by the natives. Both are protected by British and French troops. Several foreign gentlemen have visited Soochow, and have been fortunate in obtaining audience with the high authorities there. The utmost friendliness was shown by them, and they appeared very anxious to be on good terms with the foreign authorities, and asserted that they were but too willing to come to some agreement by which the foreign trade with the interior might once more resume its regular course.

The rebellion has made no further advances, or at least no reliable intelligence has reached us of any movements. It is expected among the Chinese that Hangchow has either fallen or is in great danger. The rebels certainly intend to make another attempt on that important city. They seem to have almost relinquished the idea of coming to Shanghai, and a good deal more confidence is observable among the natives here. The walled town of Sung-kiang, a distance of only twenty-five miles, is however still in their possession, and the Taoutai of Shanghai is making most vigorous endeavours to drive them out. Some slight success of the country people, aided by a party of foreign mercenaries, have made the rebels cautious in their movements in this direction, and as they profess great respect for foreigners and fear for their fire-arms, it is hardly to be expected that they will approach much nearer.

The *North China Herald*, of the 7th July, contains a correspondence between the Chamber of Commerce—Mr. Bruce, the British Consul, and the foreign inspectors of Customs—in which it is alleged that Mr. Consul Meadows libelled Mr. H. T. Davies, one of the Inspectors.

The British merchants at Shanghai addressed Lord Elgin on his arrival, and we extract the most important clause:—

"While we do not assume to question the wisdom of Her Majesty's Government in entrusting the settlement of the difficulties now existing to an officer of greater rank and power than those possessed by the Minister who so ably represents Her Majesty in this country, we take upon us to express a hope that the vigorous policy, which we feel a want of means alone has rendered for the moment unsuccessful, will be firmly adhered to, and that no consideration for what may appear to be more immediately our interests as a mercantile community will deter your Excellency from the prosecution of those measures which, although they temporarily interrupt our trade, will in the end secure us against a repetition of those international misunderstandings which more seriously and permanently injure it."

HONG KONG.

The London mails of the 11th June arrived out on the 22nd July, 44 days *en route*. The dates received this morning are to the 26th July, 48 days *en route*.

All attention is now given to the "news from the North," as it is felt to be of very great moment, directing, as it will, the whole course of events in the South of China.

The action for libel by Mr. Caldwell against Mr. Murrow, the Editor of the *Daily Press*, resulted in an ample apology being given.

In consequence of a French missionary being seized near Swatow, H.M.'s gun-boat *Cockchafer* was despatched to that port, and it was reported that, failing redress, she was firing on the town.

Mr. Parkes, lately Commissioner at Canton, has proceeded to the North to join the suite of the Earl of Elgin.

Mr. Tarrant is, we regret to say, still in gaol, and subjected to the same kind of hardships and annoyances as we have before recorded. A large number of documents in connection with his case have come to hand by the present mail, but we are compelled to leave them for notice in our next issue; a copy of his petition to the Queen in Council has also been forwarded.

The *Hong Kong Register* on this case says:—

Our contemporary of the *Daily Press* publishes a gaol bulletin of more than usual horror—in fact, we fear partaking too much of the horrible to obtain general credence, however truthful it may be. The exposure of wrong, to be effectual, must be limited to the credulity of the public if it is to produce any effect; for if there is any suspicion of exaggeration, there results incredulity with regard to the whole. The extracts from the diary of Mr. Tarrant would show a system of torture, more adapted to the bagnios of Constantinople than the gaol of a British Colony, and we can but feel that there is a certain amount of high colouring in the narrations, which makes it difficult to place implicit faith in them. The Governor of the gaol may be a strict disciplinarian, even to a fault, but we do not believe that he is an inquisitor-general, or the Devil incarnate; nor do we believe that, even under the present imperfect system of prison inspection, such gross and unmitigated cruelties could be perpetrated. However this may be, the public will demand that these fearful charges of actual crime be fully inquired into; and whether or not true, such an investigation is imperatively required to clear the reputation of those upon whom the responsibility of the gaol discipline rests, if innocent, or to insure their speedy dismissal, if guilty. There is a minuteness about the revolting details given, which leaves no room for quibbling, and we wait anxiously to see what response comes from the other side. For the sake of humanity and common decency, we hope that some palliating circumstances may be made to appear.

From Mr. Tarrant's letter to the editor of the *China Mail*, dated 16th July, 1860, we quote the following:—"You say, in relation to extracts from my gaol diary, copied by Mr. Morrow at his request, and published in the *Daily Press* of the 10th instant, that 'under the circumstances' (of the astounding verdict of a jury empanelled to find how a Chinese in the gaol came to his death), 'you would prefer declining the evidence contained in said diary, or at least would receive it with suspicion. That I had divulged, or professed to divulge, some eighteen cases of flogging in six months, and that you suspected I managed to make myself disagreeable in gaol.'"

In plain language, you wish the public to infer that "to gratify my vengeance" I write untruths.

The remarks I make are these:—Gaol Regulations 43 ordains that the warden shall enter the hour in each day when floggings occur—while the doctor's book should have indications to those flogged for "shamming" or other connection with medical discipline.

"Analysing the extracts, then, it was fully within your power to certify yourself of the facts in my notes, before you throw out your insinuations against my veracity. It is in your power to do this now; and I call on you to withdraw your slanderous language, and let justice take its course."

The following passage from a series of minutes taken on an investigation into some complaints of mine, will best show how likely it is that I should descend so low as to think of attempting to visit an unoffending woman and her children for the wrong doing of others. "He (Mr. Tarrant) repeated he was ready to admit Mr. Scott's apparent desire to act with leniency; but where he was wrong was in being subservient to others. He (Mr. Tarrant) should regret the institution of an action against any one with a wife and family dependent on him; but the law left no alternative. Judge Hulme ruled, &c., &c., that an action did not lie against any one but the Gaol Governor (in similar connection)."

The intelligence from Cochin China confirms the accounts published already of the attacks made by the natives on the French with success.

BORNEO.

LABUAN.

A paragraph appeared in our issue of the 13th August, taken from a Singapore paper, in which Mr. Low was erroneously mentioned as the governor. Mr. Edwards is the governor.

MALACCA STRAITS.

SINGAPORE.

(FROM A CORRESPONDENT.)

There is very little news of importance from Siam or Java. In Borneo the disturbances at Banjermassing are gradually being quieted, but at great cost of life and treasure to the Dutch. From Boni we have no particular accounts, but the Dutch papers mention a scarcity of rice. There was a whisper of a third expedition, but it requires confirmation; the success of the second has, undoubtedly, been exaggerated.

Sarawak is quiet. The Rajah Meedah and his Europeans are away at Muka, chastising the chief there who has stopped the sago trade, and has made himself obnoxious by harbouring the refugees from the various states, and especially the murderers of the two Englishmen at the Sakawan fort. It is to be hoped that the villains will meet with their deserts.

There is an intriguing Belgian, a runaway from Java, named de Merode, who is visiting the native chiefs of the coast of Sumatra, and representing himself as special envoy of the Governor of Singapore. He is a dangerous character, and doing much mischief. He will probably be caught one of these days and creased.

We have had a very serious threatening of a riot here, but it has been checked in time. Had it broken out, it would probably have far surpassed that of 1854, since the Chinese are not only well armed, but, it is said, determined to resist all European interference in their faction or clan fights. Two encounters took place between the belligerent parties, which were stopped by the police, after a man had been killed, and several much hurt on each occasion. They were to have begun again the next day at about 2 P.M., but the appearance of the resident councillor, the superintendent of police, and several other well known "peace-at-any-price" men of rather pugnacious characters, and the able display and posting of the police force made the head men hesitate, and all irritation appears to have subsided.

His Prussian Majesty's steam-frigate *Arcona* has arrived here from Europe, and will remain for the Embassy of Siam, China, Japan, &c.

The cause of this turbulent feeling was rivalry between the old and the new opium farmers. The old farmer prepared a large quantity of Chandoo (the smoking composition) between the day of the sale, the 10th April, and the time he was to abandon his rights, the 1st May, and the last three days of his monopoly disposed of \$100,000 worth. The consequence of this was that the new man lost some \$50,000 the first two months. There remained still with the old farmer some \$70,000, with which he was trying to smuggle off, and of course the opposition was alert to prevent him doing so. Hence rivalry and disputes. The one then got his tribe, the Hokein, to take up his name, and the other engaged the Tai-chew, and so we had the old ill-spirit roused, with every probability of all the evil results.

We have also heard indirectly that Mr. Wilson's Income-tax is to be extended to the Straits settlements, and we are naturally not pleased at it, first, because it is the worst possible tax for this country, and secondly, because it is not required.

A public meeting was held, which was numerously attended, and the speakers showed that their experience and knowledge of the characters of the various inhabitants led them to view it as one of the most unpopular taxes, whilst the difficulty and expense of collecting it would be enormous. There are spoken in this place twenty-two languages, and books and accounts are kept in upwards of eighteen. The Income-tax commissioner will have no sinecure, even if it is polyglot, and, failing that, how is he to get on? Meanwhile we are looking anxiously for delivery from the rule of Bengal.

The following is an extract from the Petition to Parliament against this tax:—

Humbly sheweth, That a measure worked as one for levying an Income-tax must be, is certain to arouse the strongest opposition on the part of the inhabitants, and to impose a tax the collect on of which will produce such an effect, would, your Petitioners submit, be impolitic, and could not fail to deepen the distrust of the British Government and of its laws and institutions which at present unfortunately exists amongst the greater part of the population.

That immunity from direct taxation has been one of the great causes of the commercial prosperity of these entrepôts, and an impost, such as that proposed, would, in all probability, tend to drive from our ports the industrious classes of the inhabitants, to the evident and great detriment of the trade and revenue.

That your Petitioners view the proposed imposition with the greatest surprise, since it is well known that the transfer of the administration of these settlements from the Government of India to the Colonial-office, has been already resolved upon.

The *Straits Times* has the following amusing adventure:—

We last week announced the ill-success of Lewis' Equestrian troupe. The French Circus performances had commenced somewhat inauspiciously, as the following horse escapade will exhibit. At seven o'clock on the evening of the 24th one of the horses broke loose. The animal was quickly pursued by the proprietor and some natives. The savage horse collared two of the natives and left them almost senseless. The animal's next sally was against a carriage proceeding along the road, but he got beaten off. A native rider was afterwards attacked; he was seized by the waist, dragged to the ground, and then trampled upon and otherwise injured; the unfortunate rider's horse was nearly torn to pieces by his infuriated assailant. Having completed so much mischief, off went Mazeppa bolt into the garden of the Governor General, where he collared a native sentry, and then returned to the high road, where he attacked a carriage whose inmates, some gentlemen, scampered away for their lives. These alarming tricks continued about an hour, when one of the circus troupe, taking advantage of a favourable moment, leaped upon the horse's back, and led him away to the circus precisely as if nothing had happened. The prankish animal no doubt got well punished for his doings on reaching the circus, but we regret that one of his victims expired shortly after being attacked.

1. The *Singapore Free Press* says:—

In the beginning of April last nine large Lanun pirate prahus made their appearance in the Java sea, making descents upon several of the islands lying off the south coast of Madura, but they were not very successful in their attempts to obtain booty. They would appear to have been so far on their return home from one of their annual cruises through the Molucca, the Java and the China seas. We have received information of their having reached the China sea, and the probability is, that unless they should fall in with a Spanish force, they will reach their head-quarters unmolested, and with a large number of captives. In former years these islands and others on the coast of Borneo were frequently visited by fleets of Lanun pirate prahus, and the inhabitants suffered severely on such occasions, many being killed in the resistance which was very naturally offered, and large numbers being carried away. For a time, after the British naval forces during Sir Thomas Cochrane's command in these waters inflicted such signal chastisement upon the pirates, Lanun, as well as Dyak, destroying many of the strongholds of the former on the coast of Borneo, they were very cautious, and rarely showed themselves in the China sea. Of late years, however, they have been regaining confidence, and notwithstanding the efforts of the Dutch and Spanish authorities to suppress them, they are apparently becoming as audacious and destructive as formerly.

COMMERCIAL REPORT.

CHINA—EXPORTS.

TEA.—The comparative exports to Great Britain for the new season, commencing 1st July up to date of the mail leaving, are rather above the average.—At Foo-chow-Foo all descriptions have advanced on last quotations—say Congou, low and dusty, 2 taels; common to middling, 2 to 3 taels; Kysow scarce, and much higher; Oolongs are picked up as they arrive at advancing rates, common being very scarce; Souchongs are a little cheaper. The following are the settlements reported for the fortnight:—Congou: 25,000 chests and 24,000 half-chests at 9 to 14 taels for dusty and low, 15 to 19 taels for ordinary to good common, 20 to 24 taels for but middling to flavoury, and 25 to 29 taels for medium to fine Kysows. Oolongs: 17,000 half-chests at 17 to 19 taels for Foo-chow-Foo packed, 20 to 22 taels for inferior Ningyong, 22½ to 24½ taels for common to good cargo, and 25 to 27 taels for fine. Souchong: 6,000 chests at 23 to 36 taels for medium, 27 to 30 taels for good, and 35 to 45 taels for fine.—At Amoy the demand for shipment to the United States was very active, and the market had been nearly swept at \$2 advance on the opening rates.—At Canton only 80 chops have arrived, of which 56 have been taken at 27 to 36 taels. The price fell a little subsequently to the opening rates, but from the causes indicated seem disposed to rally again.—At Shanghai some Japan leaf is being manipulated and packed as green. Transactions for the fortnight (the whole being Shanghai packed): Blacks, 1,500 chests Hoochow Congou at 28 taels, a small lot of Ningchow at 24 taels; Greens, 600 packages Hoochow leaf, and 1,500 packages of Japan leaf.

SILK.—At Shanghai the export of foreigners (mentioned in last report) from the interior has been very successful in getting parcels to market; it is reported that sailors have been hired for this purpose. About 8,000 bales of the new crop have reached Shanghai. The holders in the interior require payment in Carolus dollars, which has caused that coin to obtain a premium equalling an exchange of about 9s. per dollar. The quotations and transactions are given at, for No. 1, Tsatlee Taels, 420 to 430; Taysaan, No. 1, 350 to 360. At Canton,

a sale of re-reeled Kumchook, at \$460, and scarce at that. An increased transit duty of ten taels per bale has been placed on silk at Shanghai.

DRUGS, &c., AT CANTON.—Cassia Lignea: The only sale reported at Canton is a lot of 250 piculs at \$18 to \$18.25; the stock is called 1,000 piculs. At Macao the sales of the month are reported at 1,500 piculs at \$16.25 to \$16.75, there being 800 piculs in stock. Cassia Buds are scarce and wanted. Cassia Oil, the only sale reported is 3 piculs, at \$315, leaving 15 piculs in stock. Star Anniseed is quoted \$16 at Macao, stock 200 piculs, and no sales. Anniseed Oil, 50 piculs taken at Macao, at \$175, leaving as much more upon the market. Galangal Root, sales at Macao 250 piculs at \$4.30, stock 400 piculs. Matting, white, four, five, and six quarter, 11, 12½, and 15 cents. per yard. Checked, 12½, 14½, and 17 cents. Fire Crackers, 85 cents. per box for the best.

CHINA—IMPORTS.

AT SHANGHAI.—Business continues in the same stagnant condition. Small sales of shirtings in barter have been made. Quotations are nominal—Tael 1.6 to 2.10 for grey and white shirtings, and 1.0 to 1.25 for T-cloths, American Drills, 2.5.

AT Foo-CHOW-Foo.—Sales of about 12,000 pieces of shirtings have been made at \$1.75 to \$2.70. About 2,000 piculs lead at \$8.25.

AT CANTON.—The following are the sales: Cotton yarn, 900 bales; grey shirtings, 26,000 pieces; white ditto, 1,600 pieces; T-cloths, 7,000 pieces; American jeans, 1,700 pieces; chintz, 1,000 pieces; English camlets, 400 pieces; long ells, 1,000 Spanish stripes, 120 pieces; lastings, 100 pieces; lead, 1,200 piculs; tin plates (in excessive stock), 100 boxes; quicksilver, 200 flasks; nail rod iron, 600 piculs.

AT HONG KONG.—Sales of cotton yarns, 132 bales; shirtings, 4,750 pieces grey; T-cloths, 21,500 pieces; long ells, 1,360 pieces; Spanish stripes, 70 pieces; tin plates, 100 boxes; lead, 600 piculs; coals are fetching \$17. In addition to this there have been large sales by auction of damaged cotton goods.

MANILA.—EXPORTS.—Sugar: Sales of current clayed at \$5.06½. Hemp: \$4.25. Indigo: \$60. M. O. P. Shells: \$26. Imports: Sales of cotton goods have been small; the dealers being occupied in clearing late purchases. The *Ari Tona* was the next vessel expected from Europe. The quotations are for White Shirtings: \$3.12½ to \$3.18½ per piece of 40 yards. Grey Shirtings: 8 to 8½ lbs. \$3.37½. Grey Longcloths: 7 to 8 lbs. \$2.87½, and for 9 lbs. goods, \$3.12½ to \$3.25 per 40 yards. Blue and White Checks: \$3.18½ per piece of 18 yards. T. R. Handkerchiefs: \$1 per dozen. Dark Blue Cotton Cambayas: \$41 per corg.

SINGAPORE.—EXPORTS.—The demand for produce generally has been rather less brisk, and the supplies of some of the principal articles having been somewhat larger, prices are on the whole a trifle easier. In Imports: Large supplies are at hand, and while dealers are not disposed to purchase, importers are still anxious to reduce their stocks; so that, taking into consideration the discouraging accounts from the Bengal and China markets, that the Siam demand is less active, and that cheaper goods are on the way, it is probable that lower prices will rule ere long.

The picul is 133½ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cent and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

	Bank. 6s. 7½d.	Private. 6s. 8d.
At Shanghai . . . 6 months sight.		
At Canton . . . 3 ditto	..	5 0
At Foo-Chow-Foo (per dol.) . 6 ditto	..	4 10
At Hong Kong . . . 6 ditto	4 9½	4 10
At Macao . . . 3 ditto	4 10	4 10½ to 4 10¾
At Singapore . . . 6 ditto	4 4	4 4
At Manila . . . 6 ditto	..	..
At Batavia . . . 6 ditto	..	..
(guilders.)		

The exchange on India at Shanghai was at 320 rupees per 100 taels and at Hong Kong 234 per \$100. Bar silver at Shanghai 17 to 17½ dwts. B. 11 per cent. premium, and at Hong Kong 8 per cent. The current quotation at Shanghai for Mexican dollars was 72 to 73 cents, and the rate of exchange on Hong Kong was 27 per cent. discount. The export of bullion by this mail to India was very trifling.

EXPORTS OF TEA AND SILK TO GREAT BRITAIN. SEASON 1859-60.

	From Shanghai.	From Foo-chow.	From Canton, Macao, and Hong Kong.	Total lbs.	SILK. Total Bales.

For Boston: Arab, Kate Howe. For Havana: Emigration, del Oceano. For Falmouth: Beatrice. For Havre: Coligny. For Sydney: Abruck, S. H. Talbot.

At SINGAPORE.—For London: General Wyndham, Hawthorn, Oryx.

Victor. For Liverpool: Conference. For Europe: Medora. For Boston: Borneo, Dolphin. For Hamburg: C. Brockelmann.

At PENANG.—For London: Rob Roy. For Boston: Hollander. For Nantes: L. Olivier.

CASUALTIES.

HONG KONG.—The Dithona, from Melbourne, was struck aback with a terrific squall from the S.W., and before sail could be taken off the vessel, the maintop-gallantmast went over the side, jibboom carried away close to the cap, lost jibs, topsails, courses, and topgallant sails, and sprung mainmast.

The Celestial, from Kanagawa, when in lat. 22°44' N., long. 127°57' E., was overtaken by a typhoon, and lost several sails; three feet of water was found in the hold after.

The Vater Gruner lost nearly a whole set of sails on the 6th July.

The Verbena, encountered a cyclone in lat. 40°30' S., and long. 37° E., on the 16th May, and two following days in which the chief officer and carpenter were severely hurt, boats and bulwarks washed away, and other deck furniture.

PASSED STRAITS OF SUNDA.

From England and Continent to China: July 8, Oldero; 10, Ocean Mail; 11, Catharina; 12, Art Union, Cambula, Triton, Wagoola; 13, Horizon, Pleiades, Mary Lee; 14, Nankin; 18, Keepsake. From Boston: 8, Behring; 11, Cossack. From New York: 11, Swordfish, Edith Rose; 17, Phantom. From Cardiff: 11, Sultan, Isaac Bell; 17, Deszwerwer. From Hamburg: 12, Miranda; 17, Carl Ritter. From China to England and Continent: 10, Falcon; 12, Ziba; 14, Mercedes. From England and Continent to Singapore: 11, Oscar Vidal; 12, Medora; 13, Three Bells; 14, Von Berg, Angolia; 15, Roebuck, Acolus; 17, Juliet, Betty, Otto; 18, Queen Nab; 20, De Zwaan. To New York: 7, Sarah. From Singapore to England and Continent: 6, Jane Gray, Napoleon III.; 15, Tigris; 18, Eliza Hands. From Manila to London: 17, Ethereal. To New York: 4, Free-Trade; 15, Indianman. From Liverpool to Manila: 13, Arizona. From London to Batavia: 14, William Simpson. From Batavia to Hamburg: 19, Adolph.

FREIGHTS AND CHARTERS.

At SHANGHAI.—A good business has been done during the fortnight The Berwick Walls, Glencoe, Morayshire, and Bacchante have been taken up by the French Government for three trips to Chefoo, for the conveyance of horses, cattle, and coal, at \$10,000 to \$11,000 Mex. There has also been a demand for small vessels to take pulse to the Southern ports, which has not left a single vessel in port disengaged, and many would still find employment.

At HONG KONG, MACAO, AND CANTON.—For London: £3 2s. 6d. to £5 5s. For New York, \$10. The settlements of the fortnight have been to most parts of the world, the export season being at its height. The amount of disengaged tonnage in port is 56,590 tons, against 43,835 tons last year, and many more vessels will go to China which would have gone elsewhere owing to the late favourable advices regarding tonnage. The British Government have taken up the Ardenraigh, Oishona, Pioneer, and Imperial (Am.) for three months certain at 17s. 6d. per ton, and the French, the steamer Francois I., to Saigon, for \$13,000. The other settlements reported are:—For London: Fairy from Whampoa, £5 5s.; Mary Ann, from Macao, £3 2s. 6d., and the Northfleet, £4 10s. to £5. The Christopher Hall, to load from Foochow for New York, at \$10; the Everdina Elizabeth to Batavia, 3,000 guilders; the Bertha, to load at Manila for Sydney, at £2 7s. 6d.

At MANILA.—For London, £2 15s.; for New York, \$7 to \$8. 50c. The following vessels have been laid on since last mail. The Carausius for London, with sugar, at £2 15s.; the Britannia for Cork and a port in the United Kingdom, with sugar, at £2 17s. 6d.; the Arab, for Boston, \$7 per ton sugar, and \$8 50c. 4 bales hemp; the Industry, for New York, \$8. 4 bales hemp; the Onabruck, to Sydney, with sugar, at £2 10s.

At SINGAPORE.—For London: £2 10s. to £3. Several charters have been offered to load from Calcutta to various places, and there is some enquiry for vessels to load from the rice ports to Europe, but the rates have been so low that they have been generally declined. The Medora has been chartered to London at £2 10s. all round, or £2 15s. to Hamburg. The Von Berg and Betty, from Rangoon, at £3 10s. to a port in the United Kingdom or Bremen, and £3 15s. to other continental ports.

At BATAVIA.—Freights show a downward tendency, and the rates are dull, owing to the scarcity of staple articles of produce. The William Simpson loads for London, on owner's account. The Chili to the Channel for orders to a port in the United Kingdom with sugar, at £3 5s.

EXPORTS FROM CHINA.

Per Jubilee, from Shanghai, July 16.—Cocoons, 357 piculs; silk waste, 52.

Per Mauritius, from Whampoa, July 17.—Rhubarb, 148 piculs; galls, 250; galangal, 200; cassia lignea, 250; sugar, 270; sweetmeats, 360 boxes; anniseed oil, 6; soy, 60 packages; sundries, 997; matting, 700 rolls; canes, 128 mils.

EXPORTS FROM MANILA.

Per R. P. Stringer, for New York.—Hemp, 15,350 piculs; sugar, 6,400; sapanwood, 700; hides and cuttings, 476; cigars, 511 mils.

A. Cezard, for Nantes.—Sugar, 5,340 piculs; hemp, 300; coffee, 852; sapanwood, 140; cigars, 10 mils.; indigo, 106 qts.

EXPORTS FROM PENANG.

Per Sir Robert Peel for London, 21st June.—Tin, 732 piculs; sugar, 3,334; catch, 1,954; black pepper, 1,760; india rubber, 576; buffalo and cow hides, 256; rattans, 364; gum Benjamin, 48; gutta percha, 21; isinglass, 49; nutmegs, 158; mace, 63; cloves, 1; elephants' teeth, 2; tortoise-shell, 4; patch leaf, 5. Essential oil, 24 dozen. Shells, 3 cases: tapioca, 1. Rum, 2,365 gals.

Per William Gilles, for London, 12th July.—Sugar, 7,115 piculs; tin, 507; india rubber, 705; rattans, 387; nutmegs, 227; mace, 67; tapioca, 698; isinglass, 10. 33 dozen nutmeg oil, 10 cases essential oil and mace paste, 2 cases patchouli leaf, 20,145 gallons rum.

Per Santiago, for Boston, 28th June.—Tin, 1,500 piculs; black pepper, 1,000; nutmegs, 102; mace, 11; india rubber, 200; gum Benjamin, 22.

COMMERCIAL POSTSCRIPT.

THURSDAY AFTERNOON.

The news received this morning from China by the mail has not had any perceptible influence on the tea and silk markets. They will probably remain in their present state of inactivity until the receipt of more decisive intelligence of the action of the allied forces, which may confidently be expected by the next advices.

ARRIVALS AT NEW YORK.—August 20, *Amazon*, *Dannbog*, from *Batavia*; 23, *Euseka*, from *Shanghai*; 27, *C. Dow*, *McGilvery*, from *Singapore*.

SAMSON.—On the 6th of June, at *Canton*, on board *H.M.'s gunboat Starling*, which vessel he had recovered from the enemy under a sharp fire at *Peiho*, in June, 1859, *Mr. Oscar Samson*, second master, in his 32nd year.

Continental Intelligence.

RUSSIA.

ST. PETERSBURG, September 1.

(FROM OUR OWN CORRESPONDENT.)

The Government has given official notice to the merchants at Kiachta that it is not intended to make any alteration for the present in the duties on tea imported by the land frontiers; that the permission for the importation of tea from Canton and other ports of China by sea, which project has long been under consideration, will certainly not take place on the 1st January next, as was generally expected; and that in the case of such permission being granted at any future time, it shall be publicly notified at least six months previously. Russia has of late years made so many important reductions in her tariff, and shown such unequivocal signs of conforming gradually to the enlightened principles of free trade, that it cannot but be sincerely regretted that the opening of the tea trade has been shelved for the present. The Minister of Finance was, and is still, completely in favour of throwing open the trade and reducing the import duty on teas of all descriptions—both by sea and land—to one uniform rate of sixty-five copecks per pound, and all the details of the plan had been worked out and arranged by this zealous and enlightened Minister of the Crown; but unfortunately at the last moment difficulties occurred where least expected, which, being considered insuperable under present circumstances, the whole plan has been postponed *sine die*, and hence the issue of the above-mentioned communications to the merchants of Kiachta, who consequently obtain a new lease of their exclusive privileges and protective duties. In connection with the proposed reform of the tariff, it may here be mentioned that an extensive reduction in the duties on iron and other minerals was intended to be made simultaneously. This has also been overruled in certain high quarters, and I fear there is no chance now of further progress in this direction for a long time to come.

By the latest courier from Peking with dates to end of June, we learn that the Russian Ambassador at that Court, General Ignatiev, had left the capital, and proceeded to Beitau, on the Gulf of Petcheli, where he had safely arrived, "having everywhere received from the Chinese," says the despatch, "such signal marks of honour as have never before been accorded to any foreign ambassador." At Peking the state of affairs is described as quiet, but may be compared to the lull that usually precedes a hurricane. It was feared that disturbances would shortly break out, and many of the principal inhabitants had asked the Russian ecclesiastical mission to grant them an asylum if their life and property were endangered by any unforeseen popular movement. —[The Times, in giving the substance of this intelligence, has erroneously given the date as March.]—Ed.

According to a report published by the naval department in their official organ, the *Marine Journal*, the Russian navy consisted, on the 1st of January last, of 186 steamers and 41 sailing ships, giving a total of 227 vessels of all descriptions. The distribution of these ships was as follows:—161 in Baltic ports, 6 in the White Sea, 17 in the Caspian, 33 in the Black Sea, and 10 in the Pacific Ocean. In addition to these there were also 301 gunboats, transports, and other small craft belonging to the navy. Owing to the reduction of the navy by the losses incurred at Sebastopol during the late war, a great number of naval officers and seamen had been discharged, and at the above-mentioned date there were no less than 209 naval officers of different grades, and 307 petty officers and seamen of the Imperial navy serving on board Russian merchant ships.

The usual annual fair of Nishny-Novgorod has commenced, and promises to produce very satisfactory results. For the first time the *Northern Bee* publishes this year telegraphic bulletins every day of the principal features and transactions of this fair, according to which we gather that the supplies of all kinds of goods were large, and the sales very extensive; but that owing to the great want of the circulating medium, the principal transactions had been limited to barter. The supply of tea comprised 80,000 chests, amongst which, however, there was a great deal of inferior quality; notwithstanding which the demand was good, and nearly one half of the stock had by the last advices already changed hands.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, September 6.

In conformity with the contents of the Royal Ordinance of 23rd August (No. 36), the session of the States General was closed this day. In the absence of the King the Royal Speech was read by the Minister of the Interior.

Orders have been sent down to the E. I. depôt at Harderwyk to embark 100 fresh recruits for Batavia, on board the chartered transport *Australia*, Capt. B. D. Jochems, to sail from Nieuwe Deep on the 9th inst. The detachment is under the command of Major J. F. van Stietz, of the infantry, who is returning to India on expiration of furlough, accompanied by Lieutenants J. A. Vetter and J. C. Baud, of the infantry, and F. Julius and D. D. Niepce, of the artillery.

The Netherlands Trading Company advertises for tenders to load coals at Newcastle-upon-Tyne for India, a part to be landed at the steam-factory at Onrust, near Batavia, and partly at Sourabaya. They also require tenders for the conveyance of 100,000 florins in specie from Holland to Java, at the usual freight of one-half per cent. *ad valorem*.

Mr. K. F. Jansen-Hooyma, hitherto at the head of the warehouse department at the factory of the Netherlands Trading Company at Batavia, having tendered his resignation, the King has been pleased to accept the same, and grant him a pension in acknowledgment of his long and valuable services.

Stephen Higginson, junior, Esq., has received his *Exequatur* as Consul at Padang for the United States of America.

BRITISH COLUMBIA.

Advices from British Columbia to the 1st ult. report that four small steamers were building at Victoria to run on Fraser River and other inland waters. Several brick buildings were going up in Victoria, with an increased disposition to invest in real estate. The mining news contains nothing noteworthy, only that the Chinese continued to flock to the diggings, already outnumbering the whites five to one. Her Majesty's ship *Satellite* had sailed from Victoria for England *via* the western coast of Mexico and Panama.

UNITED STATES.

(FROM OUR OWN CORRESPONDENT.)

NEW YORK, August 27.

The following announcement is made in one of our daily papers:—"Four ships had cleared out from Kanagawa for London within a month, laden with teas and raw silk; the captain of the *Onward*, which brought the news, states that the quantities of teas and silk being brought down for export were astonishing."

Letters from the U.S. frigate *Niagara*, (*en route* to Japan with the Ambassadors), give a very poor account of her performances. She is described as much slower than was generally believed, and strained hard when under sail. The Ambassadors had caused to be removed from the cabin assigned to them almost every article of furniture which had been provided expressly for them at great cost, preferring to sit on a carpet in the Oriental style. They managed to while away the time in eating seven or eight times a day, smoking, playing at chess, and caressing their great toes, which latter operation afforded them evident solace and satisfaction. Tommy was as lively and amusing as ever, and still addicted himself to the habit of writing love-letters to his sweethearts.

A mysterious vessel, with coolies on board for the Chincha Islands, had touched at San Francisco for supplies. The United States' Marshal was soon on her track, but the bird had flown. An exciting pursuit took place, but with a negative result.

Havana dates are to the 18th. There is no news of importance. The time limited for the introduction of coolies into the island of Cuba had been extended by the Government. The *Staghound* (American), with 340 coolies, had arrived at Havana from China.

MONETARY AND COMMERCIAL.

FREIGHTS TO CHINA.—Assorted goods are quoted at \$12 per ton for Hong Kong and Shanghai.

The money-market continues without change of importance. We quote call loans at 5 to 5½, while ninety days to six months (first-class paper) goes at 6 to 7 per cent., the latter being an extreme rate, and, in some cases, for single names.

A fair business has been done in sterling exchange. Bankers' rates for sixty-day bills on London were 109½ to 110; and short sight ditto, 110½. Bills on Paris were steady at 5f. 14½c. to 5f. 13½c.

HEMP.—There has been nothing further done in Manila. Last week at Boston 4,050 bales Manila sold, to arrive per *Malay*, at 6½c. 6 mos.

INDIGO is quiet but firm, and principally confined to jobbing lots, for which full prices are obtained. Some twenty or thirty cases of Manila sold at 55c. to 70c.; and four chests Madras, 80c. six months, with sales of last

week of twenty and twenty-five cases of fine Manila, at 85c. to 120c.; a few Madras, 85c.

RAW SILK.—We notice further sales of Canton and Taysams since the 1st—about 100 cases and bales, for use, within our quotation; also Tattees at \$6 50c. and a few bales taken Japan silk.

SPICES.—The operations in pepper alluded to in our last in general terms, consisted of the cargo of the *Monterey*, from Sumatra—say 7,000 bags; 1,120 ditto Singapore per *Asian*; and 700 ditto from Store, besides 4,000 to 5,000 bags at terms not made public. Also some 8,000 bags more—about half in Boston on the spot and to arrive, generally at 8 to 8½c. six months, duty paid, and 7½c. to 7¾c.; in bond for shipment 250 bags here were run off in lots at 8½c. six months. We notice besides fifty bags Pimento, at 6¼c.; cloves in lots, 8c. cash; 20 cases nutmegs, 42½c. to 43c.; 50 bags Race ginger, 7 and 6 months; and 27,000 mats Cassia, on private terms.

SALTPETRE.—At Boston, 350 bags Crude sold at 10½c. to 11c., 6 mos. Stock in Boston, Aug. 1st, 3,000 bags against 16,398 bags last year. The quantity on the way is 15,523, against 15,681 bags last year.

SEEDS are quiet. For Clover there were buyers could sellers be found. In Timothy the business is confined to small sales for the country. Linseed is without material change. We note sales, 1,382 bags, Bombay here, per *M. C. Day*, at \$1.77c.; 3,000 ditto, Calcutta (2 lots), in Boston, at \$1.70c.; and 10,000 to 11,000 bags, there from store, previous to our last, on terms we did not learn.

TEA.—The first public sale of the season took place yesterday, and though the offering was small and in nowise an attractive one, there was a good attendance and prices sustained, and with a fair degree of spirit in biddings; most of the catalogue of Green and Black was disposed of, at rates about equal to those previously current at private sale. Otherwise, there has been nothing of moment done.

TIN.—Straits Pig has again been in speculative request, and about 2,000 slabs here and to arrive have been taken on private terms, but understood at a full price; the business besides comprises some 600 slabs, Straits, most at 31c. cash, and 32½c., 6 mos.; and some small lots Banca, 33c., cash.

ARRIVALS.—Radiant, Chase, at Boston, August 5, from Calcutta; Raven, Crocker, at New York, August 13, from Padang; Golconda, Parington, at Boston, August 12, from Calcutta; Manila, Behrens, at Boston, August 13, from Batavia; Andes, at Boston, Aug. 14, from Penang; Tellus, at Boston, Aug. 4, from Batavia.

CLEARED.—New York, Sweeney, from New York, August 7, for Nagasaki, Japan; Curlew, Ballard, from Boston, August 8, for Hong Kong; Elizabeth, Schmidt, from New York, August 10, for Melbourne; Canvas Back, Clark, from New York, August 11, for Hong Kong; Eastern Queen, Hancock, from Boston, August 11, for Madras, via Calcutta.

THE SLAVE TRADE.

The official despatch from the United States' Secretary to the British Government is published in the New York papers, from which we extract the following:—

"This Government will, to the utmost extent of its power, put down this abominable traffic, and capture all American vessels and punish all American citizens engaged in it. The success which has already attended our efforts near the coast of Cuba prove that we have done our duty in this respect, and this at enormous expense, for the support of the captured Africans, for their transportation back to Africa, and for their liberal maintenance there during the period of a year after their return.

"Second: The laws of registration and inspection in the Island of Cuba, by which the employment of slaves imported contrary to law might be detected by the Spanish authorities. After what has been said, it is necessary that the Government of the United States could not ask Spain to pass such laws of registration. But if this were otherwise, it is quite certain that such laws would have no practical effect. For if 'her Majesty's Government are well aware that the price of sugar and the demand for labour afford the slave-trader profits which enable him to corrupt the authorities, whose duty it is to thwart and defeat this criminal enterprise,' and if joint-stock companies are established at Havana for the purpose of prosecuting the African slave trade under the eye of the highest officials of the island, and with perfect impunity, it would be vain to expect the registrars throughout the country would counteract the policy of their superiors by faithfully performing their duty.

"Third. A plan of emigration from China, regulated by the agents of European nations, in conjunction with the Chinese authorities. It is not probable that Lord John Russell expected this Government to unite in forming such a plan of emigration from China, for if he had entertained this idea he would scarcely have omitted 'the agents' of the United States from any participation in its regulation. Nor can the President share in the anticipation of her Britannic Majesty's Government that the coolie trade can be put on any such footing as will relieve it of those features of fraud and violence which render the details of its prosecution scarcely less horrible than those of the middle passage; and he is of opinion that it would exert a most deleterious influence upon every portion of this country to import into it Chinese coolies as labourers. In the States, where the institution of domestic slavery exists, these heathen coolies would demoralise the peaceful, contented, and orderly slaves, very many of whom are sincere Christians, and in the Free States they would be brought into competition with our own respectable and industrious labourers, whether of native or foreign birth, who constitute so large a portion of our best citizens.—WM. HENRY TRESCOTT, Acting Secretary."

Spirit of the Press.

THE THIRD CHINA WAR.

At the end of June, the English Expedition in the Chinese waters was ready for action, and only waiting for the arrival of the French supplies and reinforcements. Delays of this kind are almost inevitable in all joint military operations; and it is fortunate that, in this instance, the backwardness is not on the English side. It would be absurd to blame the French authorities for the unavoidable accidents which may affect arrangements necessarily concerted at Paris to be carried out on the other side of the globe.

The English bases of operation at Calcutta and Singapore are several thousand miles nearer to the scene of action, and probably it will be found that the early readiness of our fleet and army is represented by an enormous expenditure. If domestic journalists or foreign critics would, on future occasions, make similar allowances for English shortcomings, the lesson which may be conveyed by the delay in the Gulf of Pecheli will not have been altogether unprofitable. By this time the allied forces are probably in movement, bursting through or overawing all attempts at resistance. It seems to be taken for granted that the Peiho forts will be turned, that the river will be ascended, and that the armies will advance beyond Tientsin in the direction of Peking. The allied commanders are probably well aware that, if they can extort a tolerable peace, the achievement will far outweigh any possible amount of glory which can be won from Tartar troops and generals. A more unsatisfactory war has never been undertaken since the first commencement of European intercourse with Eastern Asia. Ordinary politicians are obliged to judge and to act on the statements of unknown authorities who possess or claim a special knowledge of the subject; and, unluckily, the residents at Hong Kong, and the merchants who trade to China, are by no means unanimous on any question which relates to any treaty, course of policy, or war, in the past, the present, or the future. A pamphlet lately printed at Hong Kong, under the title of "England's Policy in China," denounces the opium trade, the proceedings of Mr. Bruce, and the general conduct of the English in China, with a confidence of assertion which would be more convincing if dogmatism were not characteristic of colonial controversy. It is little to the purpose to remark that the treatment which has been applied to China would be utterly intolerable if it were adopted towards any European State. Those who assume most readily that the law of nations is equally applicable to the West and to the East are generally most sweeping in their contempt for the ignorance that would attribute to China the maxims or modes of thought which are universally prevalent in Christendom. The author of the pamphlet quotes the opinion of a certain leading foreign merchant in China, that treaties in the East are only binding as far as they are "beneficial to commerce, to industry, and to the great interests of the country." It is also necessary that they should "have received the free assent" of the nation which is called upon to carry out their stipulations. In other words, the Chinese repudiate all obligations which are inconvenient, especially when they, in the first instance, had intended to violate their undertakings. The "leading foreign merchant," by a bold innovation in ethics and jurisprudence, seems to assert the equity as well as the actual existence of the Chinese mode of interpretation. "I would suggest that in courts of justice among the civilised nations of the West, the fundamental fact required in contracts is that their provisions shall have received the voluntary assent of the mind of both parties, and if the evidence of that assent is wanting, the contract is null and void. . . . The rule which requires the voluntary assent of the mind is obviously a rule of justice, while that which requires fulfilment without such assent is the rule of injustice." The ethics of Hong Kong appear to be identical with the doctrine of mental reservation which brought so much odium on the Jesuits, and on the casuists in general. The contemporaries of Euripides were never weary of taunting him with a still earlier and broader exposition of the same questionable proposition. "The tongue has sworn, but the mind is still unsworn," was considered to include whatever sophistry could be enlisted in the service of practical dishonesty. If the Chinese and their advocates insist on construing their treaties by their own wishes and intentions, it certainly becomes necessary to consider how their defective moral sense may be supplied by the occasional exercise of force. It might be possible to believe in the knowledge and judgment of an Anglo-Chinese expert if he confined himself to allegations as to the practice of the nation which he has studied, but a writer who considers that the substance of treaties is not contained in their express provisions may be equally liable to error in his descriptions of Chinese character. As long as the intercourse of Europeans with China depended on custom and tacit acquiescence, it was unnecessary to inquire into the national mode of dealing with written obligations, but within twenty years various rights have been acquired by formal treaty, and in many instances the whole commerce of England is dependent on stipulations which have never yet been disputed. If the Court of Peking were allowed to interpret Lord Elgin's treaty according to its own secret policy, no security would remain for the concessions which were long before obtained by Sir Henry Pottinger. There are several suggestions in the Hong Kong pamphlet which seem reasonable and useful, but, in disputed questions, an authority which cannot be trusted possesses little practical value. The oddity of the present war is increased by the circumstance that, in some parts of the empire, it assumes the form of a triangular campaign. During the delay of the allied forces, the rebels captured the important town of Soochow, and the French General actually proposed to interfere by force for the restoration of the Imperial authority. Mr. Bruce and Sir Hope Grant judiciously declined to waste their strength in supporting the enemy whom they might soon afterwards be compelled to attack; yet the scheme may not be so absurd in China as if it had been devised in any other part of the world. It is possible that the Imperial Government might be conciliated by timely assistance, even though the proceeding were followed by open hostilities; and it may be advantageous to treat with a State which retains sufficient unity to carry out any compact to which its rulers have consented. The advocates of China would in general applaud European interference for the restoration of Imperial authority, but no English Government will commit the error of embarking in a gratuitous contest under absolute incapacity to foresee the probable issue. If moral scruples and considerations of political expediency were insufficient causes for disliking the war, the expense alone might well alarm any prudent statesman. It is asserted that the outlay of the Commissariat in a single month amounted to £400,000, and it is known that enormous sums have been asked and obtained for freight and transport. The amount which was voted by Parliament in the latter part of the Session must already have been exhausted, and there can be little doubt that the Government will be compelled before the end of the year to resort to the additional vote of credit. It is true that England can afford all things that are necessary, nor is it expedient that questions of peace or war should be decided principally with reference to expense. It is only in an ambiguous and unprofitable quarrel that all objections to war apply with cumulative force. The country and the Houses of Parliament will assuredly be satisfied with moderate con-

cessions, although it has been thought right, on the authority of the Government, to exact retribution for the affair of the Peiho, and to confirm by a fresh display the moribund treaty of Tientsin.—*Saturday Review*.

THE FRENCH VERSUS ENGLISH FORCES IN CHINA.

It has for some time been the fashion to speak of unreadiness as if it were an essential part of the English military character. Throughout the Crimean War we were politely taunted with our want of promptitude, and "*Les Anglais sont toujours trop tard*" was adopted, even among ourselves, as a formula of self-reproach. No matter what the nature of the service, our allies always managed to convince themselves, and more than half convinced Europe, that their energy alone saved us from the most serious scrapes. Their Zouaves were scrambling up the hill at the Alma before our troops had got across the water; it was they who rescued us from the jaws of the Russians at Inkerman; and, as to the Malakhoff and Redan, why, in consideration for our feelings, they forbore allusion to the respective shares of the two countries in that transaction. Even in the last China campaign, where the proportion of English and French troops was reversed, the handful of the latter proved themselves worthy sons of "*la grande nation*," and quietly appropriated to themselves the lion's share of the *éclat*, such as it was. If there are but half-a-dozen Frenchmen in an attacking force, no sooner is a point carried than they pull out the tricolours which seems always forthcoming at the right moment, and shout "*Vive l'Empereur!*" while their less mercurial comrades are making good their position, or following up the retreating enemy. But the fact remains that the French have a greater credit for alacrity, mobility, and rapid organization than ourselves. Every one knows the apologies and qualifications that may be made to account for our own tardiness, but we prefer to own frankly that in the sudden exigencies of warfare the "solidity" of our genius and institutions makes it hard for us to keep pace with the elasticity of our neighbours. We do not say it is satisfactory, but it is instructive, to observe that such results are not invariable. It is possible for an English contingent to be beforehand, and for a French contingent to be too late. Yesterday we published a telegram from Hong Kong confirming the letter of our correspondent at Shanghai, dated June 30:—"The British force were ready for attack, but the French had protested against commencing hostilities on account of having lost all their harness in the vessel which was wrecked at Amoy, and having also 2,000 men less than the British." We take it for granted that the second motive is imperfectly expressed in the telegram, and was grounded on an honourable anxiety on the part of the French Commissioner that his countrymen should bear their fair share in a joint expedition, rather than on any unworthy jealousy of the English. At all events, it is gratifying to know that "on the 26th of June Lord Elgin induced Baron Gros to withdraw the protest," and that "the attack was to commence immediately." We have every hope that, allowing for this deduction, the aggregate force will be strong enough to effect its purpose; and, if this be so, we doubt whether the Emperor of China will concern himself to calculate which of the two Western Powers contributed most to the momentum of the blow. Nor do we think it necessary to suppose any deficiency in the naval or military preparations of our allies, except, perhaps, in the number of transports employed. We must remember that their basis of operations is practically much more distant than our own, inasmuch as they have no important military and naval establishments in India or the Straits of Malacca. It is wiser as well as more charitable to attribute their disasters to ill-luck, and to speak of our own better fortune, as Cicero warns us, "sparingly and with diffidence." We have, indeed, alluded to this mishap in perfect good-humour, and in no spirit of national vanity. Accidents will happen, and the administrative virtues of our neighbours are too universally acknowledged to need any defence. The moral we would draw is for the edification of our own countrymen, and it is, that we ought not to throw the responsibility of every failure on the badness of our "system." By all means let us improve our machinery to the utmost, but let us place our chief trust on the personal merit of those whom we employ. There never was a more completely organised expedition launched from our shores than that which perished under Lord Chatham's auspices at Walcheren. There never was a worse appointed army than the Volunteer force which, under Garibaldi, overran Sicily and now threatens Naples. The same troops under different Generals develop different capacities. According as they are led, English soldiers may be impulsive, or French soldiers steady. The secret of the present efficiency of the British armament in the Gulf of Pecheli we take to be twofold—the personal qualities of the Admiral and Commander-in-Chief, and a very large expenditure of money. When we read of "the untiring solicitude and unwearying care of Admiral Hope and Sir Hope Grant," and think of the vote of credit in anticipation of the China expenses, we need not resort to any abstruse explanation of the fact that for once we have been more alert than our allies.—*Times*.

Literature.

British Relations in China. By Capt. SHERARD OSBORN: Blackwood & Sons, Edinburgh and London.

Captain Sherard Osborn thinks like a sailor, fights like a sailor, and writes like a sailor. His marked characteristic is best expressed by the word *dash*, and dash is a far greater virtue in fighting than in authorship. He has been in two China wars, and we doubt not performed his duty well as a naval officer. With the knowledge he thus acquired of China and the Chinese character he deems himself competent to advise us on what some consider rather an intricate question, "Our future relations with China." Captain Osborn's advice amounts to this:—"Teach them through the gentle medium of Armstrong guns how willing you are to take their tea and silk, and how anxious you are to supply them with Manchester goods." He says, treat the Chinese like children, do what you consider best

for them, tell them it must be so; use force if necessary; do not procrastinate or hesitate a moment, and, above all, do not appeal to their reason. At pages 92 and 93 he brings several charges against the merchants of China, who, he says, advance specious arguments in behalf of their vested interests—trade—and have induced our statesmen to steer a middle course. We consider this a great libel on the merchants of China. We do not think that a community of merchants exist who are disposed more freely to make sacrifices for the general good, and bear the attendant losses more patiently. The Canton factories (with large quantities of goods) burnt down in 1857, for which they have, up to this moment, not received any compensation, is a good illustration of our belief. Captain Osborn dwells bitterly on the delay of our Government in obtaining satisfaction for the Taku defeat. Although we dissent from many of the writer's views, we bear willing testimony to the interest of his book, and it contains a most valuable map.

The Man of Destiny: a Romance of Modern History. By L. A. CHAMEROVZOW. T. C. Newby, 30, Welbeck-street, Cavendish-square.

Before Louis Napoleon shall have been gathered to his forefathers ten years, he will probably be the hero of a hundred novels. We could have been content to wait until then, but M. Chamerovzow has decreed otherwise. Even now, while that august potentate is *making history* his sallow visage and inscrutable moustache are surrounded with the accessories of fiction. "*The Man of Destiny*" is no other than his Imperial Majesty the Emperor of the French. We are not bound to state what we think of the portrait, but we are perfectly willing to say that the author has produced a very clever book. As a work of fiction it is defective. The story lacks interest and continuity; the personages talk (some of them, indeed, in a strange manner), but they want the "breath of life," and the writer's style is altogether too diffuse. It is as a semi-political *résumé* of the events of 1848 that the work is valuable. As might be expected, therefore, what the author terms his "digressions" are the best parts of his book. We refer especially to the fourth chapter of the first volume, and the third chapter of the second volume, which contain admirably-written reviews of the state of political parties in France when Louis Napoleon began to achieve his "destiny." We cordially recommend the perusal of the work before us—not as a good novel, but as being more valuable than a good novel would be.

The Daughters of Merville. By S. J. WEST. T. C. Newby, 30, Welbeck-street, Cavendish-square.

This is a tale of fashionable life, very well pruned, very tastefully bound, and dedicated "by special permission" to a duchess. It is by no means unworthy of these advantages, for it is written in good taste, and with considerable talent. To the fairer portion of our readers we more particularly commend it.

MAGAZINES FOR SEPTEMBER.—The most important article in this number of *Blackwood* is on the recently published "*Life of Sir Robert Peel*," in which that statesman's career is very fairly reviewed.—*Collins's New Monthly* commences with a capital paper on "Italy; her Friends and Foes." "*East Lynne*" is continued, but not concluded. "*The Notes on Note Worthies*" for this month treat of Savonarola. "*The Belles of the Island*," an effective sketch, is happily concluded. There is a pleasant article, entitled "*To Paris and Back in Five Days*," an important paper on the "*Lake Regions of Africa*," and an agreeable summary of the most recent history of Dublin.—*Macmillan* begins with a powerful article from the pen of Mr. Cliffe Leslie, on "*The Future of Europe Fictitious History*." The next most noticeable paper in this number is by the Editor, on "*The Life and Poetry of Shelley*"—the latter portion of the article is written in Mr. Masson's best manner. The criticism of the "*Two Budgets of 1860*" is cleverly written, but we dissent from many of the writer's opinions.—In the *Cornhill Magazine* for this month we have Mr. Thackeray's "*Lecture on George the Third*," which was very popular when it was first delivered. "*Framley Parsonage*" is, however, we suspect, the paper first read on opening each succeeding number of the magazine, and, taken as a whole, it is as yet the best contribution to its pages. We do not forget, while recording this opinion, Mr. Sala's "*Hogarth Papers*," all of which we have read with pleasure. We warn him, however, to stop ere the subject becomes tedious. An article on "*Thieves and Thieving*" details the experience of a clergyman among the thieves of London, in plain and forcible language.

LITERARY AND ARTISTIC NOTES.

It is rumoured that the *Dial* and *The Morning Star* are about to amalgamate.—Mr. Charles Dickens is preparing to appear again in his old character of a monthly contributor to the amusement of the reading public.—The appearance of a little volume of poems by Miss Kate Macready, a daughter of the great tragedian, is to be noticed among literary novelties of the day.—The appointment of Sir C. Eastlake as Director of the National Gallery has been prolonged for another period of five years.

Naval and Military.

It was announced in our last that the P. & O. steamer *Alhambra* had been hired by the French Government for the conveyance of reinforcements en route to China. This vessel reached Malta on the 27th August, with 171 men of the 102nd Regt., and thirteen hospital nurses, in charge of Lieut. Lavergne, and proceeded on to Alexandria. The French steam frigates *Ulloa* and *Eldorado* left Toulon for Alexandria, also with reinforcements. These troops—we believe in all numbering 450—will, it is reported by *The Times*, be conveyed from Suez to China by a French transport expected there from Hong Kong with invalids.

The screw steam sloop *Hornet*, 17, has sailed for the Cape and Bombay. This vessel has been reported as leaving for China by some journals, and by others for the West Coast of Africa. On application to the Admiralty we find the Cape and Bombay to be correct.

The Government has given directions for the whole of the diving apparatus in use by the Royal Engineers at Chatham to be fitted with Mr. Heinke's improved eye-plates, under the personal direction of that gentleman.

A very extraordinary sensation has been occasioned in military and general circles by the appearance of a work under the title of "Army Misrule." Nor is the interest the less because it is rumoured on the best authority that this *expose* is from the pen of a member of a distinguished family who has served himself in the ranks, and now comes forward unreservedly to give up his experience of the life of a common soldier. The *Army and Navy Gazette* has pronounced it one of the most powerful brochures that has appeared of late years, and indeed it has been commended, on very excellent authority, not only to the attention of no less a person than the Commander-in-Chief, but to every one at all interested in the welfare of the British soldier.

Mr. W. H. Ward having brought his experiments with the ocean signal telegraph to a favourable issue at Woolwich, has received instructions from the Board of Admiralty to proceed to Milford Haven and embark on board H.M.'s screw steamship *Royal Albert*, flag of Rear-admiral Sir Charles Fremantle, K.C.B., for a course of experiments at sea.

Donald McKay, the celebrated American shipbuilder, writes to the Boston *Commercial Bulletin* some of the results of his observations in the British navy yards. The Government is now building fifty-three steam war vessels of various kinds, carrying 1,783 guns, or nearly as many as the whole United States navy. By the middle of next year, when the ships now on the stocks are completed, the British fleet will count 735 vessels, with 17,099 guns, and 132,786 horse power, or about eight times as many guns as our navy. Over 200,000 men will be required to man the vessels. The French navy is, in guns, only a little over half as strong as the English.

The Metropolitan Police (Dockyards) Bill, which has received the Royal Assent, and will immediately come into operation, provides for a uniform system of police supervision throughout the whole of the Government dockyards. A large number of the B division of metropolitan police, who have for many years been on duty at the dockyards of Woolwich and Deptford, and at Woolwich Arsenal, will therefore be transferred to other Government establishments, and it is stated that the entire force will be placed under the command of Mr. Mallalieu, the present superintendent of the B division, who was, previous to the introduction of the Act, specially employed to visit the Royal dockyards, and report as to the existing police regulations.

In consequence of the amalgamation of the Indian with the Royal army, nearly all the recruits have left Warley Barracks, near Brentwood, and a draught of the 6th will leave, only the staff remaining.

It has been announced in Woolwich Arsenal that Capt. A. Noble, Royal Artillery, Assistant Inspector of Ordnance, is about to resign his commission in the Royal Artillery, and that he has entered into engagements to join the manufacturing firm of Sir W. Armstrong and Co.

The sailing line-of-battle ship *Doscaren*, 70, Capt. Richard A. Powell, C.B., bearing the flag of the Rear Admiral the Hon. Sir Frederick Grey, K.C.B., has arrived in Plymouth Sound.

Detachments of the 5th Fusiliers, 37th, 71st, and 88th Connaught Rangers, arrived at the invalid depot at Chatham from Gravesend. They disembarked from the ship *Lady Clarendon*, from Calcutta. The ship brought home the head-quarters of the 53rd Regiment, under command of Colonel Frederick English, C.B., which landed at Plymouth, and three companies of the 8th (the King's) Regiment, which disembarked at Portsmouth. The 8th proceeded to Portsmouth barracks.

Her Majesty's screw steam-sloop *Pioneer*, 350 horse power, Mr. May, master in command, has had the engineer's trial of machinery after repairs. The *Pioneer* has been fitted with peculiar care to join Dr. Livingstone's expedition in the Zambesi, and has been freighted at Woolwich with a heavy cargo of victualling and other stores for the use of Dr. Livingstone and the exploring party who accompany him.

The Lords of the Admiralty visited Cork on the 3rd inst., and were engaged on the two following days in their inspection, and in giving audience to deputations, and listening to suggestions in reference to the expenditure of the public money.

1st Royals.—The *Army and Navy Gazette* says: We learn that the 2nd Battalion at Hong Kong has been very unexpectedly ordered home. It went on foreign service in 1853. As it has been found impossible to work a double staff of officers—one for what is still called the Indian Army, the other for her Majesty's European regiments—in the Chinese expeditionary force, those officers who held appointments on the former establishment, such as Colonel Hubert Bruce, &c., have returned to India.

The hired transport *Venilia*, Captain Page, with a heavy freight of hutting and building materials, was towed down the river on Saturday last from Woolwich Arsenal, on her voyage to the Cape of Good Hope.

Nothing has been said as to the intentions of the Government with reference to the Indian Navy.

Lieutenants Stokes, of the 38th, and Sutherland, of the 44th, having obtained first-class certificates at Hythe, have been appointed as instructors, to their respective regiments; the former to proceed to India, and the latter to China.

London Gazettes.

ANNOUNCEMENT.

Mr. A. L. Inglis, Harbour Master at Hong Kong will, we understand, shortly resume his duties. Mr. Weatherhead, of the Supreme Court, has resigned his appointment.

We understand that Bishop Smith, of Hong Kong, is expected in this country via San Francisco, &c., some time next month.

DEATH OF SIR JAMES WILSON.—*The Times* of September 12 says:—"It is with the most sincere regret that we announce the death of the Right Hon. James Wilson, Financial Member of the Indian Council in Calcutta. Mr. Wilson had from his first arrival in India suffered from the effects of the climate, and had been advised to retire for a time to the Hills. His anxiety, however, to bring into operation the important measures he had initiated for the reform of the Indian system of finance, induced him to remain in Calcutta, and he has fallen a sacrifice to his high sense of public duty. His loss will be severely felt in India, and it will be most difficult to find a man capable of filling the place left vacant by his sudden and lamentable death."

GOVERNMENT OF HONG KONG.

Sir Hercules G. R. Robinson	Governor	Salary £3000
Lieut. Brown, A.D.C.	Private Secretary	250
W. T. Mercer	Colonial Secretary	1200
F. H. A. Forth	Do. Treasurer	800
W. H. Rennie	Auditor General	600
W. C. F. Robinson	Do. Superintendent of Trade	300
C. St. George Cleverley	Surveyor General	1000
J. J. Murray	Colonial Surgeon	1000
A. L. Inglis	Harbour Master	600
D. B. Caldwell	Registrar-General	700
W. H. Adams	Chief Justice	—
H. Kingsmill	Acting Attorney General	1250
W. H. Alexander	Registrar of Supreme Courts	600
T. F. Callaghan	Chief Magistrate	1200
W. H. Mitchell	Assistant do.	600
Charles May	Superintendent of Police and Coroner	500
W. Chapman	Postmaster General	800
F. W. Mitchell	Assistant do.	500
Rev. J. J. Irwin	Colonial Chaplain	700
Rev. W. Lolescheid	Inspector of Chinese Schools	300

NOTE.—The Governor, Superintendent of Police, and Postmaster General, have a house provided for them; £300 of the Auditor General's salary, £200 of the Surveyor-General's, and £250 of the Acting Attorney-General, are not charged to the Colony, but voted by Parliament under Civil Service Estimates for Consular, &c., Services in China, Japan, &c.

GOVERNMENT OF PRINCE OF WALES ISLAND, SINGAPORE AND MALACCA.

Colonel Orfeur Cavenagh	Governor	—
W. Thomas Lewis	Resident Councillor of P. W. I.	—
Captain Henry Man	" " Singapore	—
Captain Macpherson	" " Malacca	—
Sir B. Bolton M'Causland	Recorder	—
W. Willans Willans	Magistrate of Police	—
W. Cuppage	Postmaster	—
J. Rose	Resident Surgeon	—
J. Clunies	Engineer and Surveyor	—
J. Michael Moniot	Surveyor-General of the Straits	—
J. D. Vaughan	Master Attendant	—
Captain G. C. Collyer	Chief Engineer of Public Works	—

LIST OF CONSULS IN HONG KONG.

For United States	James Keenan	Consul.
— France	M. A. E. Vaucher	Vice-Consul.
— Spain	D. José de Aguilar	Do.
— Portugal	Manoel Pereira	Do.

Envoy Extraordinary and Minister Plenipotentiary	1800	British Commissioner for the Adjudication of the Claims of the British Auxiliary Legion, from May, 1839, to March, 1849. British Commissioner in the Mixed British and Portuguese Commission of Claims, 26th March, 1840. Consul at Foo-chow-foo, Shanghai and Canton, 1844 to 1857.
	Abel Gower	Acting Sec. of Legation	..	
	E. Easden.....	Interpreter	500	
Kanagawa	F. H. Vyse	Vice-Consul	750	Served previously in the army as captain.
Nagasaki	G. S. Morrison	Consul	800	
Hakodadi.....	D. Myburgh	Interpreter	500	Student Interpreter in China, Jan., 1843. Acting Second Assistant at Amoy from Jan. to June, 1849.
	C. P. Hodgson	Consul	800	
	F. M. Cowan.....	Interpreter	500	
Philippines—	J. W. P. Farren.....	Consul General	1000	
	Manila	Vice-Consul	..	
	W. H. Webb	Vice-Consul	..	
Iloilo	N. Lorrey	Vice-Consul	..	
Snal	Jose de Bosch	Vice-Consul	..	
Siam—Bankok	Sir B. H. Schomburgh	Consul	1200	
	T. G. Knox	Interpreter	500	
	H. Alabaster	Assistant	405	
Java—Batavia ..	A. Fraser	Consular Agent	200	Unpaid Vice-Consul at Pau, 15th Oct., 1851, to 17th March, 1855. Vice-Consul at Caen, 12th March, 1857.
Sourabaya ..	T. Bonhote	Consular Agent	200	
Samarang	D. MacLaine	Consular Agent	200	

ON LEAVE OF ABSENCE.—F. Harvey, Consul at Ningpo; John Markham, Vice-Consul at Shanghai; F. H. Hale, Vice-Consul at Whampoa; W. H. Fittock, First Assistant at Shanghai.

NOTE.—When the new treaty with China comes into operation several changes will be made in the above arrangement, which will be notified.]

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

Suggestions for the insertion of information required by our subscribers will have due attention and acknowledgment.

In our present number will be found a Tabular Statement of the Exports from China, in addition to our Tea and Silk Table, but as the published statements in China contain a large proportion of packages entered as "Sundries," we intend giving another statement of the cargo, compiled from the vessels' report to the Custom House at the port of her arrival in Great Britain, as also the consignees.

Post-office orders should be made payable at the Lombard-street Office, to MORTIMER WRIGHT.

Our OFFICES in this city have been REMOVED from 337, Strand, to 7, George-yard, Lombard street, E.C. Newspapers and literary communications should be addressed to the Editor. Correspondence relative to Advertisements, Subscriptions, and the general business of the Paper should be addressed to the Manager, and not to the Editor.

Correspondents and Newspaper Publishers in INDIA, CHINA, JAPAN, and the EASTERN ARCHIPELAGO are requested to address all communications, newspapers, &c., to the Editor, Box No. 70, General Post-office, London, E.C., c/a Marseilles, which has been opened specially for the same.

The London & China Telegraph.

THURSDAY, SEPTEMBER 13, 1860.

INTERPRETERS FOR CHINA.

THERE is no subject more talked about and less understood than the Far East. We may suppose that "distance lends enchantment to the view." John Bull is so very gullible that he swallows every fine story about the Court of Peking, the unapproachable Emperor, and all his glittering mandarins. They are very proud, certainly, and they ought to be humbled; very cruel—witness Mr. Commissioner Yeh—and very obstinate, and they ought to be brought to reason. But how must we do this? Well, with soldiers and ships, of course; and without money we cannot carry on the war. We have paid for such things before, and surely we can do so again. It will cost only four millions, or a little more. We will send out 20,000 men and a large fleet, and charter all the merchant vessels in that quarter, and frighten the Chinese who are so brave and daring. The management is in the hands of a great statesman, at least he bore that character in another part of the world, and no doubt he will understand Chinese tactics very soon, and if he does not wind up the affair too hastily and come home, why we expect he will make a decided improvement. We shall have a resident minister in Peking who will live in his hotel and weather the dusty, blustering winds of the north, and finally retire on a decent pension. He will be able to understand all Chinese customs and manners, and have a little private confidential intercourse occasionally with the Celestial minister for the Interior or the Exterior, and if he does not speak their language, why he will get it interpreted for him somehow. The records of these debates will form interesting subjects for Blue-books, and show that something is being done in the capital of the North.

But, *extra jocum*, there should be some defined policy explained to the public before the public money is demanded. The tax-payers of England will never see a shilling of the four millions again, and, what is worse, they have no guarantee that it will be a benevolence to the Chinese Emperor. We have condemned the policy that calls for a resident Minister at Peking, but if this be not proved advisable, then let the interests of British trade be looked after by a man who understands practically the nature of the case, and by one who also understands the Chinese language, if such can be found. More trouble has arisen from this defect—the ignorance of the language—than perhaps anything else. What breeds greater contempt for a man than an inapt and unscholarlike use of words? Yet if we may judge from the versions of some of the Chinese documents, the translators cannot have had very clear notions of the original. What must the converse be when our English despatches are put into Chinese? We may well inquire what the process is which these papers go through before they are presentable to the native authorities. It must be supposed that, after all, they are the composition of natives in

the employ of the English, for no foreigner has ever yet been able to write Chinese in an approved style, and is it uncharitable to suppose that a few elegant, perhaps, but insufficient phrases, have crept in occasionally? Upon these the wary mandarin builds a mountain of difficulty, or does not, as we have before observed, properly estimate the consequence of a refusal to accede to our demands.

We cannot expect that this danger to public peace, and the heavy tax upon the nation for Chinese wars, will be diminished until the British Government provide some means for preparing their interpreters and making them efficient. Every writer on China notices the great want of interpreters, and surely, after voting the large sum which is to be expended on this new war, a provision might be made for qualifying persons to hold really faithful and true communications with the Chinese Government. All sorts of misunderstandings will arise, if the methods of communication be neglected; and a ten years' course of study upon the basis of a liberal education cannot be too long a period for such preparation as that difficult language requires. India, where folly had wrought much evil, now claims the talent and genius of our country for her Government; why should not a portion of the same be devoted to providing a worthy staff of interpreters and consuls for China where similar troubles may arise? No abiding relations of a peaceful nature can subsist between Oriental nations and foreigners, unless the latter are acquainted with the languages of the former.

What we should aim at in China is a policy which would increase their respect for Europeans, and especially for our own people. This will be produced by a course which is at the same time *suaviter in modo a fortitudo in re*. It is certain that the British people will expect something permanent from the vast expense of this war, and will anticipate a reduction in tea and silk, whether they get a resident minister in Peking or not.

RUSSIAN INFLUENCE IN CHINA.

A WRITER in the *Hong Kong Daily Press*, who dates his letter from Lappa Hill, referring to information given by our Russian correspondent in a recent number of *The London and China Express*, says:—"It would appear to be the wish of the Russians to induce a general belief amongst the English residents here that they are at present on bad terms with the Chinese." Of course this writer from Lappa Hill is at full liberty (as are all other readers) to draw such conclusions as he may think fit from statements in our paper, but we must be allowed to say that we do not profess to expound the views of the Russian or any other Government. Our Russian correspondent simply records such facts as come under his notice, and let us add that he is in a position to derive his information from the most authentic sources. We are glad that in this instance his communication has been confirmed by Continental papers. No one can deny that Russia has great facilities for gaining information about that part of China which is less accessible to us than to them, and it is known that the Russian Government pays more attention to the culture of Eastern languages and the acquisition of such general information as may be serviceable to them in their intercourse with Eastern nations than we ourselves do. We are far from being Russian sympathisers, but still we think it only right to say that it appears to us ridiculous to ascribe failures of our own to Russian influence. The cry of Russian encroachment has served its turn. We have had Russian wars and Persian wars, and we have striven, in conjunction with other nations, to preserve the sick man, but we have only hastened his approaching death. The falsified Afghan despatches afford a notable instance of what the pretext of counteracting Russia has led to, and we heartily hope that it is not to become the fashion for our diplomatists to justify their policy in China by their fears of Russian encroachment. The Russian wolves are not the only ones who cover themselves with sheep's clothing.

JULY 1860 IN CHINA.

OUR position in China, as recorded by late mails, is certainly most anomalous, and in no other place could it exist. At war with the Imperial Government, of that no doubt exists—although a public declaration, as is customary by the recognised law of nations, has not yet appeared—we maintain friendly intercourse with various of its representatives in the Provinces, were our commercial interests dictate such proceedings. In Canton, our forces and those of our ally assist in re-establishing order, and enable the Provincial Governments to collect the

necessary ways and means to provide for the indemnity and compensation, first for others, then for ourselves, leaving them enough on hand to meet extraordinary expenditure, such as putting down local rebellion or brigandage—to decide which is indeed not in our power—and may be to assist the Imperial Exchequer with some funds to be applied for purposes of defence against ourselves in some other part of that vast empire. What does it matter to a Chinese official what occurs in another Province, which to him is almost another empire?

Some of these provinces, to judge them by the population, are what in Europe is considered a first-rate Power, exceeding in population that of Imperial France. On the other hand, have the authorities of Canton shown their due appreciation of the assistance rendered them by leasing to us, in perpetuity, at a nominal ground rent of 500 taels, the peninsular (or part of it) of Cowloon, opposite the city of Victoria, Hong Kong! a position so important, in many respects, to Hong Kong, that it seems rather surprising it was not secured at an earlier period, as we might have been forestalled by some other Power. The Canton authorities must have been perfectly aware that the immediate purpose for which we now want this part of the mainland is for locating troops and stores, &c., to be employed at another part of the empire against their Imperial Master.

Proceeding northwards, we have just now, not by treaty right, but by a kind of sub-treaty with provincial officials, established a consul at Swatow, having previously given our assistance in organising a Custom-house with European officials for collecting the revenue, and which involved the seizure of the British barque *Chin Chin*. At Amoy business is proceeding satisfactorily. At Foo-chow-Foo a party quarrel between Canton and Chin-chew sailors is looked on with indifference by our consuls, who can give no assistance to the authorities, because, as yet, none of our people have suffered; but, if such had happened, they would of course have held the authorities responsible. What to us seems inexplicable is that, as at present circumstanced, not one British man-of-war is, or at any rate was, so far as our last advices go, at this important port, when events in other parts of the empire may, at any moment, imperil the safety and lives of all foreign residents.

Chusan is now in our occupation for the third time; will it remain so, and at last the anxious wish of Mr. Montgomery Martin be realised, who for fifteen years advocated its retention, and the giving up of Hong Kong? While we admire the patriotism which dictated Mr. Martin's advocacy of this idea, even to the extent of sacrificing an annual income of £1,200 to enable him to bring his views personally under notice of her Majesty's Government, we may hope that by this time he will have seen that it was a mere chimera of his own brain. On the one hand it was no easy matter to give up Hong Kong, after the vast outlay, both public and private, which had been made; and Chusan could not offer a harbour that could stand comparison with that of Hong Kong; and now that it has passed through its transition period, it has in a great measure justified the expectation which induced Sir Henry Pottinger to select it, which was its contiguity to Canton, and without it our trade could not have increased to the extent it has.

In a report as to the views stated by Mr. Martin, Sir John Davis stated:—

"To prove that climate must not be rashly assumed as the cause of mortality among the soldiery, I may cite Chusan in 1840. . . . I do not say that (for a great many reasons) I should not rather have kept Chusan than Hong Kong at the settlement of the Convention, but, if the Chinese fulfil their engagements, I do not see how this is now to be done."

We hold Sir John Davis was right. Since that time the opening of Japan has given more importance to the island, from its position to that empire, the Government of which once occupied it and made it the entrepot of a lucrative trade. Sooner or later it will no doubt fall into the protecting arm of one or other of the Western Powers. Not acting single-handed at present in China, it is not likely that we shall demand its cession, but most probably we will hold it as a kind of depot, whilst our Allies hold another part. A convention exists between the English and Chinese Governments, by which the latter bound itself not to surrender the island to any other Power, and we on our hand promised to defend it against aggressors. This is an important fact, and in due season will doubtless be acted on.

Proceeding from Chusan to Ningpo, we learn that "everything was quiet," and we have no doubt that its inhabitants

would prefer seeing the city again occupied by our troops, if only to keep out the rebels. Our position in Shanghai, the present residence of our Ambassador to the Court of China, the chief emporium of our trade with that empire, and the vicinity of the rebels or taepings, make it now the most interesting port. Our proceedings in the Gulf of Pecheli are plain enough, but at Shanghai we are aggressors and defenders at the same time.

SANITARY CONDITION OF HONG KONG.

THE *China Mail* of the 5th July, in an article on the sanitary state of Hong Kong, says that the inhabitants owe it to the present Governor that prompt and decided measures have been taken for a good supply of wholesome water, and that there is now a sure prospect that before long the necessary works will be commenced for carrying out the plan approved of last year. We are right glad that at last this essential element will be, in all likelihood, supplied to the increasing inhabitants of the colony. It seems to us that there has been some gross neglect on the part of the local authorities, but to whom the blame is particularly due we are unable to say. We believe, that in addition, the military buildings, Government House, and the Government offices have—thanks to the Royal Engineers—been supplied with water ever since their erection. It certainly seems strange that the department of the Surveyor-General should never till lately have thought about the supply of water. Even that extensive estimate of Mr. Gordon's (then Surveyor-General), dated 10th February, 1844, amounting to \$796,275 (see Mr. Martin's "China"), does not say a word about water, nor are we aware that for many years after anything was done on the subject. On searching a number of Parliamentary and other papers relating to Hong Kong, in 1846, an estimate (No. 3 of that year) seems to have been actually prepared to provide for "tanks in case of fire," but it lay dormant in some of the numerous pigeon-holes at the Government offices till, we believe, the great fire in the lower bazaar drew attention to the want of them, and some years after (1854 or 1855), several of these tanks were at last made. We must, however, not forget that several wells had been sunk in various parts of the city, but—as far as we can ascertain—in such a manner that they were perfectly useless for the purpose intended. In a despatch of Sir John Bowring's, dated 24th of May, 1856, No. 82 (Parliamentary Paper), the then Governor says:—

"The topic of the public health occupies the constant attention of the Government. Exaggerated statements as to the mortality of the colony having been industriously circulated, and false reports prevailing as to the prevalence of fatal epidemics, I caused an investigation to take place, the result of which shows that for the months of February, March, and April, the average mortality did not exceed 1 in 7,000."

From the enclosure to this despatch—the Colonial Secretary's letter—we find him to say, in referring to the colonial surgeon's annual report:—

"In that report I have not much to notice, save that the colonial surgeon seems to be unaware that much has been done during the past year to improve the sanitary condition of the city. Tanks to ensure a proper supply of water are nearly completed. Captain Cowper is engaged in a thorough revision of the sewerage and drainage, and an ordinance to regulate buildings and suppress nuisances has recently passed the Legislative Council."

The acting Colonial Secretary, in his report of May 29, 1857, with reference to the acting Surveyor-General's annual report, says that he has no particular remarks to make thereon, and concludes thus:—"but I may perhaps be permitted to remark, that the general state of the roads, streets, drains, in and about the town of Victoria reflect the highest credit on the Surveyor-General's department generally; and if kept up in their present condition, will enable the town of Victoria to bear the test of comparison with any colonial town." In a subsequent report, dated March 20, 1858, he draws attention to the "imperative necessity of commencing, at an early day, a thorough water supply to the town," remarking, that in England this might be left to private enterprise, but in Hong Kong it must be taken in hand by Government; fervently hoping that there will be no delay in the matter of supply, and earnestly pressing the danger of a want upon his Excellency, as a famine of water would destroy all the progress that had been made during the preceding five years; and Sir John Bowring, in his report on the colony of the 25th of March, 1858, says:—

"I attach great importance to the question of an adequate water supply. Though the Island owes its name to the reputation of its waters, the vast increase of population, the enormous demands for the shipping, and the insufficiency of present arrangements (though much has been done to provide a sufficiency of water), all serve to show that measures for providing for

the necessity of the case should have early attention, which I will not fail to give."

On the other hand we find, that in the estimates for the year 1858, which we suppose were prepared about the middle of 1857, £1,500 had been provided for on account of tanks and water supply. From the foregoing it seems to us that under the several governors, from Sir John Davis to the present one, this matter has, more or less, been kept in view; but, apparently, the estimates submitted to them were, if not altogether useless, certainly not comprehensive enough. It is but simple justice to remark, that up to the time Sir John Bowring obtained a surplus fund, the two governors (his predecessors) were rather restricted in their resources, on account of the pressure put upon them, both from colonists and Parliament, for bringing the expenditure within the revenue; so much so, that Sir George Bonham seems to have been compelled to limit the execution of public works, which he and his predecessors had contemplated. We may remark that Sir John Davis delayed building a Government House, and other buildings, so that the essential improvements, as roads, streets, and drains, might be proceeded with.

Many of our readers in China will recollect certain "Statements and Suggestions regarding Hong Kong," being a collection of letters from justices of the peace, and others, proposing to "rid Parliament of a pecuniary burden," viz., the annual grants. This remarkable production of collective wisdom will be rather surprising to a reader at the present period, that is ten years after its appearance. One writer, a justice of the peace and M. L. C., suggested the abolishment of the Surveyor-General's Office, and says, "No new buildings or roads are likely to be required." Another justice of the peace, and once a member of a leading mercantile firm, considered a revenue of £20,400 "more than adequate for the expenses of an efficient Government establishment, and for all other purposes of the colony." Another justice of the peace makes an estimate of £17,650, which, he thinks, "would be sufficient for the colonial establishment, supreme court, police and gaols, and all;" and as the revenue for 1849 amounted to £23,617, or £6,000 more, he thinks that the ground-rent, as he says, "the only item of revenue complained of," could be reduced, "or be done away with, and Property Tax substituted instead," after which he thinks the colony would progress. Next to him came another justice of the peace and merchant who, on the contrary, says that the sources of industry have, in fact, been dried up by the Government through the opium and other farms; and to illustrate the hopeless state of affairs in the South of China in 1850, as compared with 1837-38, he shows that the delivery, we almost had said smuggling of opium to Canton, could not so easily be effected now as then. He says, "I had for some months to take the night duty (to deliver opium at various points on the river) on myself, in addition to making sales during the day. My first delivery was above Canton, after which I made deliveries at every point of the river, sometimes to the value of \$18,000 to \$20,000 at a time," &c. We have no idea who this discontented smuggler was, and only quote his opinion to show to what great extent opinion varied as to the slow progress of the colony. In April 1851, further statements and suggestions regarding Hong Kong submitted to members of Parliament complained of the high rate of taxation as a great hindrance to the prosperity of the colony. We find that the revenue for 1850, from all sources, what otherwise would be called Imperial and Municipal, amounted to about 14s. per head.

We have rather gone beyond our limits in commenting on the sanitary state of the Colony of Hong Kong, respecting "supply of water," but being sincerely anxious to discover as to the how and when, could not fail to notice the diversity of opinions which existed regarding Hong Kong, even by gentlemen like the justices of the peace whose opinions are quoted, and who from their position must be supposed to have had the best means of obtaining information, and becoming able advisers. Our readers will have perceived, if they know anything of the Parliamentary debates regarding the grants of Parliament, which were chiefly founded on statements like the above, that we were right to say that the governors for the time being had to submit more or less to the pressure put on them by Parliament, influenced by the Colonists. We therefore excuse in some measure the former governors of Hong Kong, for not having legislated for a regular supply of water. We are glad that it seems at last a fact that Victoria will be supplied with water, although the cost of £30,000 appears to us to be rather high; but people on the spot must be the best

judges. The Governor evidently is a wise man, and our Chancellor of the Exchequer ought to take a lesson from him, whilst the original estimate submitted to him is £25,000, and the revised one £28,000; he prefers to make sure of it, whilst the iron is hot, asks and gets £30,000, and saves himself from after trouble; here the opposite rule is observed. The estimate is originally submitted as low as possible, and afterwards extended.

The Editor of *The China Mail*, in reference to the water supply, says:—"But this is only the beginning of improvements. The state of the public sewers and their outfalls, and of the house drains throughout the colony, is a subject demanding immediate and accurate inquiry." Now, it was only in our last number that we took occasion to congratulate the citizens of Hong Kong on good roads and drainage. To set ourselves right with our readers, we have examined more closely into this—and the result is, in our opinion, that it must be from culpable neglect if the drainage has become what it is described to be, viz., "very defective." Mr. Gordon, in 1844, in the estimate above alluded to, set down \$100,000 for drains. We know that the first thing done under Sir John Davis's administration was the construction of drains on a general plan for the town, now city of Victoria, which is particularly well situated for good drainage, and we recollect well that by many it was considered rather extravagant how these drains were constructed; it was no patchwork, but a regular plan for the complete drainage of the town as it then was and expected to be. A typhoon and extraordinary fall of rain in 1845 put those completed to a severe test, causing damage to some and bursting others, but still we always thought them exceedingly well constructed, particularly so as to the material. In short, until last Overland Mail, we considered that Hong Kong was particularly fortunate as regards its public drainage. What the actual cost for the same was we are unable to make out; but the subject has led us to investigate the expenditure of the colony from its commencement.

We find that public works, not including those of a military or naval nature, in fact only those executed by the Civil Government, have cost up to the end of 1859, in round numbers, *One Quarter of a Million Pounds Sterling*, as near as possible—if we include the departmental expenses, such as the salaries of the Surveyor-General, this amount will be exceeded. After what we ourselves recollect about the drains of Hong Kong, the vast outlay on them, and the testimony of the acting colonial secretary before quoted, we are almost inclined to think that the Editor of the *Mail* is not serious when he suggests that a reward should be offered (as was done with regard to the waterworks) for the best plan for effectually draining the town. We acknowledge that we always thought that as regards Taipingshan and its back streets, Lascar Row, &c., drainage, &c., had been neglected, or, to use a milder term, overlooked—leaving it, as it would seem, even to this present moment, what it was in former years, "a splendid feeding ground for fevers and cholera."

That the house drainage is a subject demanding inquiry—in fact, that the same has been neglected, we do not doubt, although in the leases, a form of which is before us, it is expressly provided for that proper sewers, drains, and all other usual or necessary appurtenances, shall be done by the holder, and to be kept "with all manner of needful and necessary repair—tion, cleansings, and amendments whatsoever, the whole to be done to the satisfaction of the Surveyor of her said Majesty." With such ample provision made for providing house drainage we cannot but express our surprise that the same should have fallen in the deplorable state depicted. The authorities seem to have the power to cause the remedy; why is it not enforced, for the welfare of the whole community? The "Public Health Act" no doubt might prove useful, if it could be carried into effect, and not remain a dead letter, as the condition of the leases alluded to; and the ordinance "to regulate and suppress nuisances," passed in 1855 or 1856, surely was intended for some purpose.

COMMERCE AND TELEGRAPH WITH WESTERN CHINA.

In our last number we gave the admirable memorial of the Leeds Chamber of Commerce to the Prime Minister, urging upon his consideration the great importance to our manufacturers, shipowners, and merchants, of opening to the latter and to the merchants of British India the commercially rich western inland half of the Chinese empire, from the port of Rangoon

across Eastern Pegu. We stated that the memorial had been presented to Lord Palmerston by Mr. Baines, M.P. for Leeds, and that his lordship had assured him it should receive from him "due consideration." We also stated that the Chambers of Commerce of Bradford, Halifax, Huddersfield, Liverpool and Manchester had severally addressed the Prime Minister with much earnestness in advocacy of that extension of the commerce of both England and India, all which led us to hope that the cabinet, a Whig ducal one though it be, would give its earnest consideration during the vacation to the best means of obtaining the proposed access to the vast population of Western China and its hundreds of thousands of square miles of productive territory.

In the *Globe* of the 4th we observed a short Liverpool paragraph, to the effect that at a meeting, on the previous day, of the Chamber of Commerce of that port, a reply to their memorial was read, stating that the proposal for opening Western China to our commerce was not considered to be "at present—feasible." We have since learnt that a reply has been also received by the Leeds Chamber, not from the Premier, but from the Foreign-office, stating, in curt routine style, to that representative body of the vast manufacturing and trading interests of the West Riding—"that Lord Palmerston having handed their memorial to Lord John Russell, he, *Lord John Russell*, did not deem the prayer of the memorialists feasible—at least for the present." As we assume that a copy of this Foreign-office dictum against opening this important channel for our foreign trade was despatched to the other Chambers of Commerce, we beg leave to remind our manufacturers and merchants, all of whom are concerned in this proposal, that we duly warned them against the official propensity to shelve questions of a purely commercial character; and that we urged them to prepare to support their memorials with such Parliamentary authority and influence as would, for once, have overcome the antipathy of a Whig Ducal Cabinet to take an interest in matters connected with mills, factories, warehouses, and cargo ships.

The Leeds memorial called the attention of the First Lord of the Treasury to three or four distinct matters necessary to the establishment of such a direct and new trade with the west of China: each of which, perfect in itself, must be now, better than at any time past or to come, within the easy grasp of the Government. The memorialists asked that the Queen should extend the hand of friendship to the King of Burmah, and that in settling present differences with China the true interests of our country should be studied by making a stipulation that the west of that country be opened to our merchants from Eastern Pegu. This will be far more desirable than our insisting on maintaining a resident ambassador at Peking: while it will be the best compensation for our losses at Taku, and for our naval and military outlay to avenge them. The Session is, however, scarcely concluded when the memorials of our manufacturing and commercial bodies, for objects affecting the welfare of millions of our industrial countrymen, are tossed by the Prime Minister across Downing-street, to be answered by that commercially darkest of our State departments—the Foreign-office. The chief of that office, fully occupied with the intrigues of European diplomacy, doubtless left a matter affecting mainly the manufacturing and industrial interests of his own country to be answered in his name by a mere routine official, who takes no notice whatever of either of the different points submitted by the memorialists for the consideration of the Government, and refrains from offering any reason why his lordship deemed it not, at present, feasible to secure to our country and to India the incalculable permanent advantages which, as the memorialists stated, must result to each of those principal divisions of our empire from commercial intercourse with the half of China which is as yet wholly unknown to us in commerce.

We are glad to learn that the manner in which these memorials have been dealt with has proved unsatisfactory to the commercial chambers, and that it is intended to press this important subject both upon the Premier's individual consideration and upon that of his cabinet in such a manner as may accelerate the time when the Foreign-office may deem the project a feasible one. This manner of treating the subject is an attempt of the governing "great Pooh Pooh" to set aside commercial aspirations, similar to that which, in 1829, caused Waghorn's noble efforts to establish the Egyptian route to India to be officially obstructed; and which banded his memorials from the Colonial-office to the Treasury, and from the Treasury to the Post-office, with red-tape objections to granting Government

assistance to a project of certain permanent benefit to our country and to India. Waghorn was met by the curt reply,—"that as the Government "had no despatches to send by him they would incur no expense in promoting his exertions." Need we give another instance of this official indifference in matters of commerce? Need we remind our readers how while Java was being abandoned to the Dutch, the occupants of Downing-street left *unopened* and buried in official dust the instructing and guiding despatches of Sir Stamford Raffles in regard to that very island?

We would have the Chambers of Commerce, therefore, estimate accordingly, the Foreign-office reply to their memorials to the First Lord of the Treasury for the peaceful opening of Western China to trade and the land telegraph,—firmly remonstrate against this off-hand deferring of their propositions,—and organise a parliamentary pressure in its favour, such as will not fail to insure its adoption; and such as, since commerce, like cotton, should know no politics, it cannot be difficult to the various industrial, commercial, and shipping interests of Yorkshire and Lancashire promptly to organise in support of a proposal so promising of permanent benefits to them, and through them to our country generally. And as the financial policy Her Majesty's Ministers have adopted for India is fast closing that country against our fabrics, it is indeed wise in Lancashire and Yorkshire, who have built up "the mightiest commercial fabric ever known to the world," not to sit down in tame submission to the unsound dictum of the Foreign Secretary, "that it is not "feasible, at present," to meet their prayer that Western China should be opened to theirs and the world's trade across British Eastern Pegu.

Thus impressed in regard to this very important proposition for the duplication of our commercial intercourse with the Chinese, we have great satisfaction in announcing that the Leeds Chamber of Commerce, fully alive to the undeniable advantages thereof, have forwarded to the Foreign Secretary of State a further memorial, still more earnestly pressing the project on Ministerial adoption. We trust that every other organised commercial body of the United Kingdom, as well as those of India and China will similarly urge it perseveringly on those of our rulers with whom it rests now to realise or to sacrifice such an illimitable and inestimable new trade.

THE CHINESE AS AMERICAN CITIZENS.

THE Right Rev. Dr. Smith, Bishop of Victoria, Hong Kong, has worthily closed a visit to San Francisco by addressing a letter to Judge McAllister on a subject calculated to enlist the sympathies not only of the philanthropist and the Christian pastor, but also of the merchant and the citizen. Of the feelings of the former it would be difficult to find a more fitting or eloquent exponent, but we are well assured that in giving expression to the opinions and sentiments of the latter the journalist is discharging a duty peculiarly within his province. In discussing this subject, therefore, we leave the higher ground of Christianity to the able advocacy of Dr. Smith, adverting only for a few moments to its mercantile aspect. In California a Chinese is under no circumstances admitted as a witness in a court of law. The consequences of this are, interminable confusion and a failure of justice in the civil causes, while in criminal jurisprudence the effect is opposite, even worse. Let us suppose a case in order to show the impolicy and monstrous injustice of this enactment. A murderous assault is committed in broad daylight in the streets of San Francisco. It may be (for we would bring the case home) that the victim is an Englishman. Among the passers by are a score of Chinese, but it so happens that not one European or one American is witness of the fray. What is the result? Why, that justice is defeated. The united testimony of the twenty Chinese is of no avail—there is no evidence, and conviction is impossible. So much for this question as it affects the ostensible aim of every code of laws—the due administration of justice.

There is, however, another, and, in a commercial point of view, equally important consideration involved—the rights of citizenship. We believe the Chinese residents in California do not number fewer than 50,000, all of whom are of course bound to conform to the established laws. When the operation of those laws is adverse to their wishes or their interests, the plea of their foreign extraction proves no bar to their citizenship—they are properly amenable to the laws. But why, we ask, is a reservation made when their rights and privileges are affected? If it be right in the eyes of American legislators

that a man should lose his life for murder, or his liberty for theft, though he be a Chinese, why are the same laws not to be applied for his protection because he is a Chinese? It needs no argument to prove that the operation of all laws must be unequal where whole classes are, from whatever cause, inadmissible as witnesses. It is manifest that under such circumstances "the weight of evidence must almost always be against them." We contend, therefore, that to incapacitate the Chinese by a legislative enactment from giving evidence in a court of law is impolitic, inasmuch as it tends to defeat the purpose for which all laws are made, and unjust, because it deprives those who are bound by certain obligations as citizens of the rights of citizenship.

The reason which the Americans urge against the repeal of this obnoxious Act has not by any means the charm of novelty. The Chinese, they allege, never tell the truth. Like the Archetype of lies they have been "liars from the beginning." This assertion seems indeed to have had some weight with the Bishop of Hong Kong, and has induced him to narrow the issue with a suggestion in which we cannot altogether concur. Dr. Smith writes:—"An intelligent American jury might doubtless be permitted to hear Chinese evidence, and be left to weigh for themselves the real value to be attached to the statements of individual Chinese witnesses." Thus far the Bishop's advocacy is admirable, but the plea he next advances is, to our thinking, of too sectarian a character. "At all events," he adds, "an exception might and ought to be made in favour of those Chinese who profess the Christian religion. It is better that the exclusion of Chinese from the witness-box in your courts of law should be based on objections to the defective character of Pagan morality, than on invidious distinctions calculated to depress the Chinese as a race." Now, it seems to us a very convenient doctrine for Western nations to hold that the farther you travel eastward the more abundant will be the crop of lies you will gather, and certainly, if we could accept this as a truism, the Americans would be entitled to "cast the first stone." But, are they? Is their veracity always unimpeachable? We can no more vouch for it than we can for that of the Chinese. We know something of the trickery and the falsehoods which are unfortunately as rife in the Western Hemisphere as they are in the Far East, and we say emphatically that in either case it is not for the legislature of the country to deny the rights of citizenship, but for the administrators of the law—the judge and the jury—to form their own estimate of the veracity of each individual witness.

This is particularly desirable, seeing that Chinese labour now forms an important element in the labour markets of the world. The Chinese are spread over California, Australia, British Columbia, Peru, and the West Indies. It will be seen by a list in another column that over 2,000 passed St. Helena during June and July, on their way from China to the West Indies. The following is the letter of Bishop Smith to Judge McAllister (dated San Francisco, July 30), which was supported in a leading article in the *San Francisco Daily Times*:—

MY DEAR SIR,—Until my arrival in this city I had never become cognizant of the fact that by the legislative action of this State every individual among the 45,000 Chinese immigrants in California is incapacitated from giving evidence in your courts of law; and that under no circumstances of cruel oppression, injustice or violence, is the possibility of redress open to a Chinese in this State, unless he be so fortunate as to have a European eye-witness to bear testimony to the facts of his wrong.

Chinese merchants in this city, of the highest respectability, who received their education under my roof at Hong Kong, have called my attention to this exceptional legislation, and have feelingly detailed to me cases of almost unparalleled hardship to which their fellow-countrymen are exposed, as long as this enactment retains its place in the statute-book of your local Legislature. They are pillaged, plundered, assaulted, and even murdered by European and American miscreants in your gold-fields; and in the absence of European witnesses, there remains to these poor Chinese no alternative but that of helplessly and hopelessly submitting to the oppression caused by this unequal law. A hundred Chinese may have witnessed the deed of violence, but their united testimony is deemed worthless and inadmissible against a European or American evil-doer within the limits of this State.

In the name of all that is just, equitable, and humane—in the name of the Christian Missionaries, who are endeavouring on the soil of China itself to impress the Chinese people and rulers favourably respecting the equal toleration and beneficent laws of Christian lands—in the name of your American Plenipotentiaries, who, in China and Japan, are demanding for American citizens equal privileges, immunities, and rights from the Governments of those pagan lands—in the name of our common Christianity, to whose merciful and tolerant spirit your institutions and laws are professedly conformed—I exhort and entreat the Christian citizens of your great and powerful country to arouse themselves to a consideration of this Chinese grievance, and to apply themselves vigorously to a repeal of this obnoxious Act.

An intelligent American jury might doubtless be permitted to hear Chinese evidence, and be left to weigh for themselves the real value to be attached to the statements of individual Chinese witnesses. At all events,

an exception might and ought to be made in favour of those Chinese who profess the Christian religion. It is better that the exclusion of Chinese from the witness-box in your courts of law should be based on objections to the defective character of Pagan morality than on invidious distinctions calculated to depress the Chinese as a race.

Sixteen years' experience of the Chinese as a people, and a personal observation of their character and pursuits in cities of the Chinese continent, and as settlers in Singapore, Java, Australia, and Japan, have led me to the belief that, as a body, they are an industrious, orderly, peaceable, and well-disposed race, and that no danger to your institutions or commercial prosperity need be feared, from the Chinese immigrants attracted to your shores.

Many an aged parent in China itself is enjoying ease and affluence in his native home, supported by the hard toil and earnings of their sons who have crossed the broad Pacific on the errand of filial piety, and are helping to shed a ray of joy and comfort around the native domestic hearth.

During my stay under your hospitable roof you have been yourself an eye-witness of scenes in which individual Chinese in this city have afforded substantial and munificent proof of their gratitude towards their former benefactors and instructors in China. On their behalf I raise my voice in earnest deprecation of that system of legislation by which they are now exposed to the suffering of injury without remedy or redress.

In the hasty preparations for my speedy departure from this city, I have taken the liberty, without previous consultation with you, of addressing to you this letter, and remain, my dear sir, with much respect, yours, very sincerely,

GEORGE SMITH, D.D.
Bishop of Victoria, Hong Kong.

MR. CARLOWITZ, OF CANTON, AND "THE TIMES."

THE following letter has appeared in reference to an article which appeared in *The Times* of 21st April, and which was partly transferred to the *London and China Express* of the 26th April, although it appears not seen by Mr. Carlowitz. No notice has been taken of the letter by the Editor of *The Times*:—

Sir,—Extracts of German papers have reached here by last mail, stating that *The Times* in an article, or articles, on Coolie Emigration, mentions a "German, a certain Von Carlowitz, a native of Oldenburg, as the one who has committed the grossest atrocities in this business." I have been told that this refers to a leading article of *The Times* of about the 21st of April, but unfortunately I have not been able to find a copy of this number, as many numbers are missing owing to the unfortunate loss of the mail steamer at Galle. I have therefore not seen the article; however, from what the German papers say, I cannot doubt but that hard things must have been said of me; not of me, properly speaking, because I am not a native of Oldenburg; but as there is no other Carlowitz in China beside myself your informant must doubtless have meant me. I have now to request that you will kindly send me a copy of said article and give me the name of your informant, as anything which can tend to represent any act of mine as at all diverging from the strictest principles of honourable dealing and propriety is based either on misinformation or on personal malice and slander, and every one who knows me is aware that I am utterly unable to commit atrocities. I have, therefore, a right to demand the name of your informant, and expect it from your fairness. Without knowing particulars of accusations hurled against me I am of course unable to repel them, but am ready to lay my acts before the scrutiny of the public. An extract in the *Augsburg Gazette* of the 26th of April of one of your articles refers to events that happened on board the Oldenburg bark *Fanny Kirchner*. They are entirely falsely represented. The vessel was chartered from the captain by the agent of an Havannah house, who had engaged a quantity of coolies. I was called on board, as Oldenburg Consul, to accompany a commission of mandarins for the examination of the coolies; and, after it was over, happened to be on the poop, when some coolies, in the face of some bystanding mandarins, rushed out of the main hatch and jumped overboard at the main gangway; but I had not the least to do in this affair. I was about fifteen yards distant, and the coolies trying to attack me and driving me overboard is a myth equal probably to other fables of your informant. This extract in the *Augsburg Gazette* quotes passages of your article the questionable taste in the diction of which I regret to see in your paper. You might, perhaps, also have hesitated to accept so grave charges against an individual who has no chance of replying to them for four or five months. I promise, as soon as I know what I have been accused of, a full statement of the case, and am sure I shall be able to refute all statements of a dishonourable interference of mine, or participation of mine, in these lamentable coolie troubles. Expecting from your fairness an equal disposition to grant reparation of character as it appears you have granted facilities for it being assailed, I am, sir, your obedient servant, R. VON CARLOWITZ.—Canton, July 4.

OPENING OF SAIGON, COCHIN CHINA.

THE *London Gazette* of the 31st ult. contains the notification issued by the French Admiral opening the port of Saigon to trade. It is stated to have been received from the British Consul at Manila, but the officials at the Foreign Office do not say "when." We presume it has been discovered, after the closing of Parliament, among the shelved papers marked mentally, if not literally, "Documents which will keep." We received a copy of this document four months since, and published the gist of its contents in the *London and China Telegraph* of the 27th April.

A CORRESPONDENT of *The Times*, signing himself M.D., complains that his son, after having undergone a course of study in Chinese and successfully passed his examination, had been unable to procure an appointment, owing to the stoppage of appointments for China.

ADMIRAL SIR MICHAEL SEYMOUR, G.C.B.

Our readers will probably have been surprised that we did not in our last issue notice the paragraph which appeared in the *United Service Gazette* of the 25th ult., to the effect that the distinction of Commander of the Legion of Honour had been conferred upon Admiral Seymour by his Majesty the Emperor of the French, in connection with his services in China. We had no particular reason for doubting its accuracy, but simply the one which governs us in general in reference to statements made in connection with matters in our field, which is to test the correctness of the same before giving them publicity. The result in this case, as in most others, is, that we find the announcement to be incorrect. Indeed, we happen to know that the late Derby Government, or rather Lord Malmesbury, the Foreign Minister, opposed any interchange of honours arising out of the Allied expedition to China; but we also happen to know that the French Government expressed the highest opinion of the manner in which Admiral Seymour conducted the Allied naval forces, in conjunction with Admiral Rigault de Genouilly, and we have no doubt were quite willing to bestow the honour.

WILL OF THE LATE MR. BRAND.—James Brand, Esq., East India and China merchant, of New Broad-street, London, and of Bedford Lodge, Balham, Surrey, died 12th of June, 1860, aged 64, possessed of estates, real and personal, the latter estimated for probate duty at £350,000. The will is dated 25th of January, 1855, to which are added four codicils; and he has distributed his immense property, real and personal, almost entirely amongst his family. He bequeaths to his relict an income of £3,000, besides miscellaneous effects. The property in Millnathort, Kinross-shire, devolves upon his eldest son James. His other freeholds he directs to be sold, and the proceeds to merge into his personal estate. He bequeaths amongst his daughters, in equal shares, the sum of £102,000, besides other legacies, and a further sum of £30,000 to be divided in like manner amongst them on the decease of his relict. The sons are appointed residuary legatees. The executors being Mrs. Brand, his sons James, Andrew, and Harvey, together with Mr. Peter George, of Fenchurch-street.

JAPANESE HORSES.—A Paris correspondent has the following notice on these animals:—The news from China brings assurance that all is going on well there, excepting the horses, who appear to be of a breed inimical to European bondage. A letter from an officer complains that the two hundred horses bought at Nagasaki require at least five hundred men to manage them. "They would devour each other were they not continually watched, all sorts of contrivances having been invented by our men to prevent their doing more damage than work for the allies."

There is no truth in the paragraph which has been going the round of the papers to the effect that Sir James Brooke is about to return to Sarawak. The Rajah has, we are enabled to say, no such intention.

Monetary and Commercial.

With the improved state of the weather business generally has improved. The produce markets have been steady, prices occasionally showing a slight advance with considerable transactions for consumption. The recent improvement in sugar has been fully supported. Ceylon coffee has been firmer, plantation selling rather above the valuations. The tea market has continued dull, and the trade have chiefly directed their attention to the public sales.

A circular has been issued by Mr. Thos. Basley, of Manchester, calling a meeting for the 14th inst. to consider proposals for forming a "Cotton Company" for direct supplies from India and Australia. Experience has fully proved that any forced effort to procure supplies, independent of private merchants, has failed, and no confidence can be placed on any such scheme. But Mr. Basley proposes to employ capital for increasing the growth of the raw material in India and Australia, and in this respect it should have hearty support.

The Cape Colony has lately taken up the question of a monthly steam communication to and from Seychelles to profit by the overland route. The Governor warmly supports the project, especially as the P. and O. Company will not allow their packets to touch at that island.

The *Money Market Review* says:—"Our great cotton interest at home is watching with natural anxiety the movement which is taking place in India with a view to the extension of cotton spinning and weaving in that country, under the forcing effect of the differential duty which has been imposed by Mr. Wilson. The last *Bombay Times* and *Standard* declares that 'the number of spinning and weaving companies now in course of formation threatens, if carried out, to create quite a revolution in the market for English manufactures.'"

There has been no new feature lately in the affairs of the Red Sea Telegraph Company. The cable is still out of order.

The specie by the last mail is as follows:—For Madras, gold, £3,341; Calcutta, silver, £16,000; Singapore, gold, £4,735; Hong Kong, silver, £101,515; Shanghai, silver, £70,784.

ARTICLES OF IMPORT.

TEA.—We have still to report inactivity in our market, with a further decline in prices for most kinds of Congou tea. Owing to the extreme anxiety of holders to quit their stocks, as evidenced by the very large quantity offered at public auction during the month (amounting to 80,000 packages, of which 33,000 packages have been for absolute sale), has been the principal cause of the great dulness which has prevailed. The broken leaf to good ordinary kinds of Congou have been less in demand, and the quotations are now from 1s. to 1s. 2½d. per lb. For good common prices have fluctuated, and, in the absence of orders for export, they have been difficult of sale, the quotation being now 1s. 3d. to 1s. 3½d. per lb. In fair to good flavory kinds recent sales by public auction have been at a decline of fully 1d. per lb. In common to good Ho-Hows and Ning-Chows, as also second-class Honams and Monings, there has also been a decline of fully 1d. per lb., owing to the quantity offered without reserve. For fine Monings the demand is very limited, and it is difficult to obtain 2s. for fine Chops. For fine Kaisows there has been a slightly better market for small parcels. Taysan Congous show a decline of fully 1d. per lb. Fair to good Ooolongs have sold 1d. per lb. lower. Common to fair Souchongs also show a reduction of 1d. per lb.; fine to finest, being comparatively scarce, are better maintained. Flowery Pekoes are required for from time to time, in small parcels, but buyers only make low offers. Common Scented Capers are saleable in limited quantities at the low prices lately ruling, the better kinds being much as before. In Scented Orange Pekoe there is no material alteration to notice. In Green Teas business has been limited, but prices show but little alteration. Common to fair Hysons have not been so readily saleable, and prices are about 1d. per lb. lower. In Young Hysons and Gunpowders, under 2s. per lb., there is not much offering, and prices remain about the same as before. Fine kinds, being in full supply, remain difficult of sale. Canton made Teas show no material change. There have been five public sales during the month, including that of to-day. 80,000 packages have been brought forward, of which 33,009 have been offered without reserve. 40,000 packages were sold in all, the decline quoted having been established from time to time at these sales. The stock of the 1st of September of all descriptions of black was in London 47,320,530 lbs.; green, 7,058,774 lbs. The total deliveries in London for the present year have been 53,182,630 lbs. of black, and 7,143,127 of green. The stock at Liverpool was of black, 3,035,808 lbs.; and of green, 111,172 lbs. The imports were in London, from the 1st of January to 1st of September, 54,924,057 lbs. of black, and 7,763,983 lbs. of green; and at Liverpool, 4,562,185 lbs. of black, and 295,937 lbs. of green.

SILK.—We have had a limited business in silk. The season of the year would in part account for this, but that is not all—the home trade is wretchedly bad, and foreigners show no disposition to purchase beyond daily requirements. The strike at Coventry is at an end, but now the employers are afraid to commence operations, and this feeling is shared, and to some extent acted upon, by their brethren in other districts. Prices are unfortunately very high, and so decided is the determination of consumers to keep out of the market, that notwithstanding the extremely small stock of old silk, the first arrival of about 1,000 bales new silk from China has been allowed to hang upon the market for two or three days, and is only being sold parcel by parcel without the least symptom of competition or eagerness to purchase—and this not from any question as to the quality of the silk, for on this point, thus far at any rate, there is no reason for complaint. Chinese thrown silk has commanded rather more attention, especially the better qualities and finer sizes, and the deliveries have been good, but the stock is so large that at present they make no impression. Canton silk has not found favour with consumers—the prices are thought to have been pitched a little too high. The sold stock on the 1st inst. amounted to 7,700 bales of China, and 725 Japan; the unsold stock, 8,000 bales of China, and 293 Japan. The current quotations are as follows:—

		Superior.

SUGAR.—The market has maintained its late buoyancy; 6,819 bags Manila were chiefly bought in, but since taken off at better prices, fair 37s. to 37s. 6d., good, 38s. The private transactions on the spot comprise about 25,000 bags Clayed Manila, ordinary to good, 36s. 9d. to 38s. Refined has been in steady request, and improved prices have been realised; but the supply continuing limited, business has been less extensive than last week. The stock of sugar in the chief ports of Europe, on the 1st inst., was about 157,000 tons, against 157,500 tons last year.

COFFEE continues in good general demand, and nearly the whole of the quantity offering has been taken freely at previous rates, and in some instances at a slight advance. Ceylon—The parcels of plantation in auction

have amounted to 1,510 casks, 1,180 barrels and bags, which nearly all found buyers, the qualities under 70s. selling rather dearer; fine ordinary to low middling, 68s. to 72s., middling to good middling, 72s. 6d. to 76s. 6d., bold, 80s. The inquiry for native is still active, but the small quantity placed on offer restricts business, which is principally confined to 1,150 bags, in public sale, at stiffer prices; good to fine ordinary, 62s. 6d. to 64s. 6d.; garbings, 31s. to 46s.

RICE.—Great apathy has distinguished the market during the week, and even at a reduction of 6d. per cwt. from the late highest point, which has in some cases been submitted to, no disposition to operate has been shown, and business is almost entirely suspended.

PEPPER.—Sales of 827 bags, black Sumatra, at 4½d. to 4½d. Penang, 3½d. to 4d. Sales of Singapore, white, at 6½d. to 6½d. for fair to good bright.

SAGO AND TAPIOCCA.—Market quiet, and no sales to announce.

SPICES.—Cinnamon, small sales; quotations nominal at 1s. 4d. to 2s., for best quality. Cassia Lignea sales, at auction, at 80s. to 84s.; 235 boxes sold. Cassia buds quiet, no sales. Cloves: no sales. Mace: quotations nominal; none offered at auction. Nutmegs: prices firm, no sales reported.

HEMP.—Market more active; sales of the greater part of 7,820 bales at auction, sold at £13. 10s. to £21. 17s. 6d. for common to very good jute, Of Manila, 1,966 bales, partly sold at auction at £21. 10s. to £22. 10s.

COTTON.—This staple maintains the firm position advised in our last; prices being in many instances ½d. per lb. higher.

JAPAN WAX.—150 casks, part sold, block at 60s.

TOBACCO.—Prices for Java have increased both here and in Holland. No transactions are reported in Manila.

TIN.—Banca is neglected; fair business doing in straits at 131s. to 132s.; antimony ore, £16. 2s. 6d.

MISCELLANEOUS.—India Rubber sales made to arrive at current rates, actual prices not given.—Camphor: market very dull, quotations nominal; Rattans, prices firm, no sales; Sapan wood, 150 tons, at auction, nearly all sold at £7 10s. to £9 5s.; 4 tons of Java at £5; Soy, no China offered; sales of Japan, at 1s. 6d. per gal. in tubs, and 19s. for boxes; Rhubarb, part of a lot of 179 cases sold at 2s. 3d. for good flat, and 1s. 11d. to 2s. for round; Mother o' Pearl Shells firm; no transactions: Tortoise Shell, market inactive, no sales; Star Anniseed, sales of 116 cases, at 82s. 6d. to 83s. for good; Stic-lac, 25 cases of Siam sold at 82s. to 83s. for good; Gum Benjamin, sales of 150 cases, Sumatra, at auction, at £3 15s. to £4.—Rum: nominal, at 1s. 5d. to 1s. 6d.

GOLD AND SILVER.

Bar Gold in Coin (per ounce)	£3 17 9
Spanish Doubloons	3 16 6
United States Gold Coin	3 16 2½ to 5 15 8
Silver in Bars	0 5 1½

Carolus Dollars	0 6 2

Messrs. Pixley, Abell and Langley's circular states that large quantities of silver and dollars are at Tampico and Vera Cruz, which will probably come forward in the present month.

EXPORTS OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from England during the present year by the P. and O. Company's mail steamers:—

	Gold.	Silver.
Shanghai	£1,177,278	21,809
Foo-Chow-Foo	£40,616	1,652,587
Hong Kong	5,795	187,630
Manila	15,960	
Singapore		
Penang		

EXCHANGES.

	Bank Bills, 60 days' sight.	House Bills, 60 days' sight.
On Singapore (dols.) Bank Bills	4s. 8d.	Buy at 4s. 3d.
On Hong Kong, ditto	4s. 8d.	Do. 4s. 3d.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh Bars, £6 2s. 6d. to £6 10s.; nail rods, £6 15s. to £8; hoops, £9 to £9 10s.; sheets, single, £9 10s. to £10; Staffordshire bars, £8 to £8 10s.; rails, £5 7s. 6d. to £7.

STEEL.—Swedish keg, £18 10s. to £19 10s.

COPPER.—Sheet and Sheathing, 11½d.; yellow metal, 9½d.

TIN, 136s. for block; 137s. for bar. Tin plates, best charcoal, I.C., 31s. to 32s. 6d. per box.

LEAD.—English Pig, £21 10s. to £21 15s.; shot, patent, £25; sheet, £22 7s. 6d. to £22 10s.; Spelter, £20 10s. to £20 12s. 6s.; Zinc, English Sheet, £26; Quicksilver, £7 per bottle.

MANCHESTER MARKET.

Shirtings of 6lb. and 7lb. for India and China could be sold largely at last rates, but makers are asking an advance of 1½d. per piece. More business also in 36-inch shirtings, and a good deal has been sold at last week's rates. In yarns also buyers have purchased more freely, both for home use and exportation.

ROSINA, Falmouth to Hong Kong, April 18, 27 N., 21 W.

GOLCONDA, from Penang, June 27, 3 S., 92 E.

STAR OF THE NORTH, Foo-chow-Poo to London, Aug. 7, 8 N., 26 W.

CASUALTIES.

The Eweretta, Montgomerie, from Manila, which arrived in the Downs on the 25th Aug., having received orders to proceed to Liverpool, missed stays while working back through the Gull stream, was compelled to let go an anchor to prevent going on to the Brake Sand, and slipped; others were supplied from Deal, and she anchored from off the North Foreland; sails damaged, and crew sick from scurvy.

The Godefroy, Lecomte, which arrived at Havre 25th Aug. from Hong Kong, had had heavy weather off the Cape of Good Hope from 22nd May to 19th June. On 30th May she shipped some seas, which carried away boat, and, it was feared, did some damage to cargo.

The Courier, Clinck, which arrived at Brouwershaven 29th Aug. from Rangoon, had lost part of bulwarks and had thrown part of her cargo over-board, having experienced bad weather.

The Alliance, from London to Singapore, was spoken 21 days out in lat. 43 N., long. 12 W., with the master in a dying state, by the Venilia, Nance, arrived at Liverpool 31st Aug.

The Scotia, Ward, from Sourabaya, which put into St. Helena 12th July, leaky, and with part of cargo thrown overboard, has been surveyed, and recommended to discharge the whole of her cargo, part of which is much damaged, for further examination.

The Admiral de Buyter, de Witt, from Banjoewangie to Amsterdam, which put into Simon's Bay 8th June, was condemned there 18th July. Part of her cargo, 2,400 bags coffee, had been sold; the remainder, 700 bags, still on board, was completely damaged, and would be destroyed.

The Argus, Smit, from Amsterdam to Batavia, which put into Simon's Bay 2nd July, had sustained damage during a gale on the 23rd and 24th June. She was expected to be ready to proceed in the beginning of August.

The Hester Adriana, van Hees, from Cardiff to Hong Kong, which put into Simon's Bay 8th July, very leaky, had thrown part of her cargo overboard, and had cut away her topgallant masts.

FREIGHTS AND CHARTERS.

The contract noticed in our last for 12,000 tons of coal on account of P. & O. Company for Point de Galle is to be shipped within three months, one-third from Birkenhead and two-thirds from the East Coast. The price obtained is 45s. 5d., and the freight offered 32s. 6d. from Birkenhead, £35 to £36 from the Tyne or Wear. The conviction seems to be gaining ground that the China war will be a protracted affair, much to the benefit of those who have ships in the China Sea. As there are many steamers amongst the transports, in addition to the vessels of war, it is expected that the consumption of fuel and stores by the expeditionary forces will give employment to a fair amount of tonnage outwards.

Homewards there are offers for small vessels, at 70s. from Akyab to U.K. or Continent, and large vessels at 65s. rice, 85s. teak, from Moulmein, &c., to U.K. Bombay to London or Liverpool, 50s.; Mauritius, 47s. 6d. (early ships), London to Ceylon and back, 100s.; Mauritius and back, 80s., &c., &c. PASSENGERS OUTWARDS.—Per Maria Adriana, Captain van der Held, from Helvoet-luys to Batavia: Messrs. C. Poensen, A. L. Kroef, and J. A. Schwarz. Per Adriana Petronella, Captain Anniko, from Amsterdam to Batavia: Mr. P. de Jongh and family, Mr. O. Minnig, Mr. P. J. Vogelsang, and Miss J. Mackenzie.

BOARD OF TRADE RETURNS.

The Board of Trade returns for the month of July have been issued. They show an increase in the Export trade, the total shipments for the month having reached £12,522,698, being £1,237,247, or 10 per cent., larger than in the corresponding month of last year; and £1,528,701, or 13 per cent., larger than in July, 1858. Nearly one-half of the increase is in cotton goods. We give the particulars for China and other parts of the Far East. Those for Singapore and Penang are still included by the Board of Trade with India. The total exports to China of all goods stand at £2,858,787, against £1,499,314 in 1858, and £1,978,412 in 1859, for the first six months of the year.

In the Imports, we find that for China the figures are £5,526,054 in 1860, £3,943,359 in 1858, and £5,070,691 in 1859, for the first six months in the year.

The exports of cotton goods to China for July have been £209,982 against £62,018 in 1858 and £229,862 in 1859, and for the seven months of 1860 £1,890,385 against £1,015,712 in 1858 and £1,419,569 in 1859. To Java, £96,901 against £52,944 in 1858 and £89,137 in 1859, and for the seven months of 1860 £833,560 against £314,044 in 1858 and £447,675 in 1859. To the Philippine Islands, in July no exports against £42,638 in 1858 and £30,047 in 1859, and for the seven months of 1860 £121,178 against £281,591 in 1858 and £183,430 in 1859. The exports of cotton yarn to China for July have been £19,518 against £4,175 in 1858 and £54,938 in 1859, and for the seven months of 1860 £231,049 against £134,699 in 1858 and £280,801 in 1859. No exports to other parts. The exports of woollen cloths to China in July have been £40,678 against £10,560 in 1858 and £48,709 in 1859, and for the seven months of 1860 £325,305 against £133,341 in 1858 and £209,749 in 1859. The exports of woollens and worsted stuffs to China in July £47,620 against £2,458 in 1858 and £19,488, in 1859, and for the seven months of 1860 £311,490 against £86,510 in 1858 and £157,711 in 1859. No exports to other parts.

THE STRANDED SHIP "WAGoola."—The following report has been made to the Admiralty, in reference to the charge brought against the Coastguard, "That the plunder spoken of by Captain Jonathan Russell, as having subsequently occurred, is referable to the hasty proceedings of the Sunday and Monday nights, although not discovered by him till a later period, and the evidence shows that after the hurried discharge of the cargo on the beach had ceased, the goods were vigilantly watched by the coastguard and others. I am, therefore, of opinion that Captain Russell's charges of want of vigilance on the part of the coastguard have not been substantiated.

P. & O. STEAMERS.—This company are building a fine iron screw of 2,500 tons at the Thames Iron Ship Building Company. She is intended for the Alexandria line, and will be shortly ready to launch. She is to be called the Moulton.

The Flying Spur, lately launched by Messrs. Hall & Co., of Aberdeen, is a very beautiful clipper, of 735 tons, and is, we hear, under the management and part ownership of Messrs. Jardine, Matheson, and Co., of China. She is now loading for Bombay, under the command of Capt. Rylie, late of the Cairngorm. She is poop-built and handsomely fitted with all new improvements, reefing gear, &c. Length, 184ft.; beam, 31½; depth, 19½, classed A1 for 14 years.

VESSELS WITH CHINESE COOLIES PASSED ST. HELENA FROM THE 1ST OF JUNE TO THE 31ST OF JULY, 1860.—June 6: Galilee (French) from Canton for Martinique, with 426 Chinese emigrants. CARSON'S**ORIGINAL ANTI-CORROSION PAINT,**

PATRONIZED BY

The British Government,
The French Government,
The Russian Government,

H. R. H. The Prince Consort.
Hon. East India Company,
Most of the Nobility and Gentry,

Railway and Canal Companies,
The Principal Collieries
Mill Owners, Iron Master &c., &c

The Anti-Corrosion Paint is now used extensively

FOR ALL KINDS OF OUT-DOOR WORK,

Such as WOOD, STONE, BRICK, COMPO, CEMENT, &c. Also IRON STEAM VESSELS, BRIDGES, PIERS, of any description of Iron, and from its being expressly manufactured for exterior purposes, is peculiarly adapted for tropical Climates, resisting the rays of the sun more effectually than any other Paint. It can be easily applied by any Labourer, being sent in various Colours, requiring simply to be mixed (no grinding is necessary).

Merchants and Shippers' attention is particularly drawn to it as a most serviceable article for exportation.

A List of Colours, Prices, &c., also Copy of Testimonials, will be sent.

NOTICE TO PASSENGERS BY THE OVERLAND ROUTE via EGYPT.

PHILIP ZECH, Proprietor of the two well-known Hotels in Alexandria, the Hotel d'Europe, and the Peninsula and Oriental Hotel, begs to inform his friends and Travellers in Egypt in general, that he has purchased **SHEPHEARD'S HOTEL** in CAIRO, which will still continue to bear the same name; and in returning thanks for the extensive patronage enjoyed by his two houses in Alexandria, hopes that the preference may likewise be extended to his house in Cairo, which will be managed in first-rate style, and in a manner intended to give every satisfaction to its frequenters, both as far as table, wines, internal and external service are concerned. Many alterations and ameliorations are being carried out at the present moment.

Curtis on Manhood.—New Edition.—A Medical Essay on Nervous Diseases.

Just published, the 120th thousand, with numerous plates in a sealed envelope, price half-a-dollar.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE, with plain directions for perfect restoration to health and vigour. By J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

CONTENTS:

INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatorrhoea and Impotence; Early Vicious Indulgences; Dangers of Neglect.

CHAPTER III.—A Review of the various Disqualifications of Marriage—whether resulting from the Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection.

CHAPTER IV.—The Author's plan of Treatment Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhoea and other Urinary discharges by microscopic examination.

CHAPTER V. and VI. on the modern Treatment of Gonorrhoea and Syphilis.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

"We feel no hesitation in saying, there is no member of society by whom the book will not be found useful—whether such person hold the relation of Parent, Preceptor, or Clergyman."—Sun.

Mr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by letter, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Mr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty Years; nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINNAM, QUEEN'S ROAD, HONG KONG.

FACILITIES in BOOK-KEEPING

THE MONEY MARKET REVIEW,
 A WEEKLY JOURNAL,
 Exclusively devoted to the Discussion of Commercial and
 Financial Topics.

PUBLISHED EVERY SATURDAY MORNING.

This Journal has access to the highest sources of infor-
 mation, and comprises only original and condensed matter.

THE "MONEY MARKET REVIEW"

FURNISHES—

Independent Comments upon the various Commercial and
 Financial Topics of the day.

Leading Articles upon the Bank Returns, the Money
 Market, and kindred matters.

Full details of the movements in the Stock Exchange, and
 in Public Securities of every kind.

Special Analyses of the Accounts and Position of our great
 Railway, Banking, and other Undertakings, Home
 and Foreign.

The Progress of the Traffic and Financial Condition and
 Prospects of BRITISH RAILWAY PROPERTY will meet
 with especial attention.

Each Number contains a full and correct City Article,
 forming a Resume of the Week.

Also, a careful description of the Course of Trade in the
 Manufacturing and other Districts.

Together with a Weekly Review of Mining Business.

The "MONEY MARKET REVIEW" appeals especially to
 the whole of the community interested in Trade and
 Finance.

Possessing a large subscription-circulation of the highest
 class, it forms a most valuable medium for Commercial,
 Financial, and general Trade Advertisements.

PRICE 6D. UNSTAMPED; OR 7D. FREE BY POST.

**THE AFFGHAN PAPERS—REPORT AND
 PETITION OF THE NEWCASTLE FOREIGN
 AFFAIRS ASSOCIATION.**

"Those collections of State Papers which are supposed
 to furnish the best materials for history are often in
 reality one-sided compilations of garbled documents,
 counterfeits which the ministerial stamp forces into cur-
 rency, defrauding a present generation, and handing
 down to posterity a chain of dangerous lies."—*Kaye's*
Affghanistan.

London: EFFINGHAM WILSON, Royal Exchange.

Agents will be found in every city
 where English is spoken.

KALOS GEUSIS SAUCE, as Improved by
 Mons. A. SOYER, and so highly valued in our East
 and West Indian Colonies as a stomachic, is prepared by
 I. M. ROBSON, 32, Lawrence-lane, Chesham, London.

AN OXFORD MAN, who holds an appoint-
 ment in King's College, is desirous of meeting with
 ONE or TWO GENTLEMEN who wish for assistance in
 their studies for the University or the Civil Service Exa-
 minations. He will not object to pupils whose education
 has been neglected. Terms moderate.
 Address, S. H. N., Post-office, Northaw, by Barnet (N).

All Descriptions of Paper for Newspapers, Printing, and
 Writing. Account Books and Envelopes, at the lowest
 current rates.

**HOLLOWAY'S PILLS—SPASMS, FLA-
 TULENCY, CONSTIPATION.**—So many persons
 suffer from these disorders that a description of them is
 unnecessary; but the recommendation to take Holloway's
 Pills for the cure of disordered digestion, will be repaid
 with gratitude by all who give them a single trial; no
 medicine will so safely and speedily restore a deranged
 stomach or torpid liver to order. No other preparation
 will so effectually and healthily conduct digestion so that
 spasms, flatulency, and other torments of dyspepsia can-
 not, by any possibility, arise; or if present will be soon
 cured. The power of these Pills in removing acidity of the
 stomach, sick-headache, biliousness, diarrhoea, dysentery,
 and debility is wonderful. They act as tonics, alteratives,
 and general regenerators of the frame.

TO MERCHANTS AND EXPORTERS.
**UMBRELLAS, PARASOLS, AND WALK-
 ING STICKS.**

BILLIARD TABLES.

THE ONLY BILLIARD TABLES appreciated in India, China, and the Colonies, are those made by THURSTON & Co., who have supplied Her Majesty's and Native Regiments for the last FORTY YEARS.

14, CATHERINE-STREET, STRAND, LONDON.

FOR FAMILY ARMS.—Send Name and

County to the Royal Heraldic Studio and Library; in a few days you will receive a Correct Copy of your Armorial Bearings. Plain Sketch, 3s.; in Heraldic Colours with written description, 6s.; Large Size, 12s. Family Pedigrees, with original grant of Arms, to whom and when granted, the origin of the name, all traced from authentic records, fee Two Guineas. An Index, containing the Names of nearly all persons entitled to use Arms, as extracted from the British Museum, Tower of London, Herald's College, &c. &c. The Manual of Heraldry, 400 Engravings, 3s. 6d., post free, by T. CULLETON, Genealogist, Lecturer on Heraldry at the Mechanics' Institute, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C. The Heraldic Colours for Servants' Liveries, 5s.

ARMS, CRESTS, &c., Engraved in the Best

Style. Crest on Scut or Rings, 7s. On Steel Die, 6s. Initials, 1s. 6d. per Letter. Book Plate, Engraved with Arms, 10s.; or Crest, 5s. Postage and Registered Letter, 1s. extra.—T. CULLETON, Heraldic Engraver by Appointment to the Queen, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

SOLID GOLD RING (18 Carat, Hall

Marked), Engraved with Crest, 42s.; Large Size, for Arms, 75s. On receipt of P. O. order the size will be sent to select from.—T. CULLETON, Seal Engraver, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

STAMP YOUR OWN PAPER.—with Arms,

Crest, Initials, or Name and Address, by means of CULLETON'S PATENT EMBOSSEING PRESS, 15s. Best Make, 21s. Any person can use them.—T. CULLETON, Die Sinker to the Board of Trade, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

WEDDING CARDS.—For Lady & Gentle-

man—5s. each. 50 Embossed Envelopes, with Maiden Name printed inside, 13s. Visiting Cards—A Copper Plate engraved in any style, with name and 50 Card, printed for 2s., post free. N.B.—All orders executed by return of post, for stamps or cash. T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

FAMILY ARMS, &c., Embellized for Paint-

ing on Carriages or Needlework, 6s.; Best Style, 12s., Gothic and Modern Monograms Designed, 5s. Arms Quartered, Impaled, and Painted on Vellum, according to the laws of Heraldry. By T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

THE PEN SUPERSEDED.—Mark your

Linen. The best and only method of Marking Linen, Silk, Stockings, Course Towels, or Books, so as to prevent the Ink washing out, is with CULLETON'S PATENT ELECTRO-SILVER PLATES. By means of this novel invention a thousand pieces of linen can be marked in a few hours. Initials, 1s. each; Name, 2s. 6d. Set of Movable Numbers, 2s. 6d.; Crest Plate, 5s., with the necessary directions for use. Post free. Certificate from the eminent Dr. Sheridan Muspratt, F.R.S., Professor of Chemistry, &c.

“Several trials with Mr. Culleton's Patent Electro-Silver Plates, for marking linen, induce me to pronounce them excellent; the letters so beautifully marked in a deep black colour, without blotting, and after a long boiling, with either potash or soda, they remain unaltered. Other plates which I tried decomposed the ink, and in many cases burned holes in the linen. I can testify Mr. Culleton's Plates are incorrodible, and will not hurt the finest fabric.—(Signed) “SHERIDAN MUSPRATT, “College of Chemistry, Liverpool.

“May, 15, 1854.”

All orders to be sent to the Patentee and Sole Maker, T. CULLETON, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

All Orders executed by Return of Post.

JOHN ROBERTS & SON, AUCTIONEERS AND COMMISSION AGENTS, HONG KONG.

Agents for the LONDON AND CHINA EXPRESS and LONDON AND CHINA TELEGRAPH.

Duty paid—Double, at 21s. Sparkling Hock, Moselle, Champagne, and Claret, in Bond and Duty Paid.

By Appointment, and Royal Letters Patent.

JOHN BRACHER (late WILLIAM MARR & SON), Inventors, Patentees, and Manufacturers of the strong WROUGHT-IRON FIRE and THIEF-PROOF SAFES, CHESTS, STRONG-ROOMS, IRON DOORS and FRAMES, 11, Cannon-street West, corner of Queen-street, facing outwards Bridge, and Vulcan Safe Works, Skin-yard, Bankside, Southwark, London. To the New Houses of Parliament, Her Majesty's Honourable Board of Ordnance, National Debt Office, Public Buildings, &c.

Full value given in exchange for old Safes. The attention of Corporations, Bankers, Architects, Solicitors, Commercial Houses, and all persons having the care of valuable property, is drawn to the superior quality of his Patent Fire-proof Safes and Chests.

TWINBROW'S DANDELION, CAMOMILE, and RHUBARB PILLS, an effectual cure of indigestion, all stomach complaints and liver affections. In cases of constipation these pills never fail in producing a healthy and permanent action of the bowels, so that in a short time aperients will not be required, and, being quite as innocent as castor oil, they may be given to children.

From Dr. Dick, Lansdown-terrace, Kensington. “Sir.—Send me another bottle of your Dandelion, Camomile, and Rhubarb Pills for my own use. I lose no occasion of recommending these Pills, as I can conscientiously do so.”

Prepared by TWINBROW, Operating and Dispensing Chemist, 2, Edwards-street, Portman-square, London; and may be had of all Patent Medicine Vendors.

THE LONDON AND CHINA TELEGRAPH.

THE FIRST VOLUME of this JOURNAL was completed on the 11th Nov. 1859, and can be obtained bound, with an Index, price 23s., subscriptions for Vol. II. commenced on the 25th Nov. 1859. Price 18s. per annum, or 5s. per quarter, not including postage. Terms for advertising, 2s. 6d. per five lines; and 6d. for each additional line.

Subscriptions and Advertisements received abroad by the following Agents:—

A paragraph was circulated by the daily papers on the 22nd that rumours were current of a defeat of the allied forces in China, and the source is supposed to be from Russia. *The Times* says that the rumour would not receive any credence whatever, but that the intelligence of the Peiho disaster came by Russia two weeks in advance of our usual Overland intelligence. Our readers will be aware that this is simply an error, it was the conclusion of peace at Tien-tsin in 1858 which was announced, not the Peiho disaster.

List of Passengers.

PASSENGERS INWARD.

By this Mail.—From Hong for Southampton: Mrs. Medhurst, two children, and European servant, Mrs. D. Pain, Surgeon Atkinson, 31st Regt., Lieut. J. Hudson, Lieut. Worsap, 31st Regt., Mr. Jas. G. Barren, Mr. O. Cleverly. For Marseilles: Mr. Deberque, Mr. E. T. Kettles. For Singapore: C. S. Sherwood, Mr. Paul Schill.

By last mail.—From Hong Kong for Southampton.—Messrs. D. T. Louttid (Master R.N.), R. Williams (ch. engineer), W. Penman (military stud), I. Mackay, E. B. D'Arcy, Noah Morgan, and Stephen Judd. For Marseilles: Messrs. E. Planchett, Harvey Brand, Capt. M. de Chenev, and Lieut. C. R. McDonnell. For Alexandria: Mr. T. B. Whitney.

PASSENGERS ARRIVED OUTWARD.

At Hong Kong.—Per Swordfish from New York: Rev. J. M. and Mrs. Conduit, Rev. J. G. and Mrs. Schilling, Messrs. C. Auld, Jr., and Wm. Beete. Per Mary Lee from Liverpool: Mr. Geo. Rodgers.

PASSENGERS OUTWARD.

Per P. and O. str., 20th Sept.—From Southampton to Singapore: Mrs. Bernard and infant. To Hong Kong: Mr. H. Dickinson, Mr. A. H. Roberts, Capt. Cahill, Mr. and Mrs. W. Cole and daughter, Mr. Maslin. To Penang: Mr. A. Cree. From Marseilles to Shanghai, via Bombay: Mr. Jannet, Mr. de Courcy, Mr. Vallin.

Per P. and O. str., 27th Sept., via Bombay.—From Southampton to Shanghai: Mrs. Marshall, Mr. Maclean. To Hong Kong: Mr. J. F. Callaghan, Capt. R. Silley, Dr. C. Chapman. To Singapore: Mr. G. Lipscombe. From Marseilles, 5th Oct.—To Hong Kong: Mr. and Mrs. T. Borraidaile, Mr. L. Josephs. To Shanghai: Mr. J. Schut. To Hong Kong: Mr. N. Boye. To Singapore: Mr. W. G. Forchiana. To Penang: Mr. H. Beme.

Per P. and O. str., 4th Oct.—From Southampton to Hong Kong: Mr. G. Smith, Miss Harmer, Mr. and Mrs. Dixon, Veterinary Surgeon Appleton, Mr. C. H. Platt, Mr. A. L. Inglis. To Singapore: Mr. Temple. From Marseilles, 12th Oct. For Hong Kong: Messrs. J. D. Gibb, E. F. Parker, and R. Westall. To Singapore: Mr. Matzen, M. and Madame Deschaux and infant. To Shanghai: Mr. and Mrs. J. P. Tate, Mr. Birt.

Per P. and O. str., 12th Oct., via Bombay.—From Southampton to Hong Kong: Mr. Hutchison, Mr. Spurria. To Penang: Mr. and Miss Mathiew. From Marseilles, 20th Oct., to Shanghai: Mr. J. C. Sillar.

Per P. and O. str., 20th Oct., from Southampton to Singapore: Mr. and Mrs. Gemmell, Mr. L. van Pabst, Miss Baumgarten. To Hong Kong: Mr. F. Pereira, Capt. Archer, Depy, Com. Gl. Innes. From Marseilles, 28th Oct., for Singapore: Mr. and Mrs. C. Hill and infant, 3 children, Miss Symons and governess. To Hong Kong: Mrs. Murray. From Alexandria to Hong Kong: Mr. J. Hogg. To Singapore: Mr. R. B. Reed.

Per P. and O. str., 27th Oct., from Southampton to Shanghai via Bombay: Mr. J. Bradwell, Mr. F. Bloor, Mr. J. Maitland. From Marseilles, 4th Nov., to Singapore: Mr. and Mrs. Engler.

Per P. and O. str., 4th Nov.—From Southampton to Hong Kong: Lieut. Trunners, 12th Nov.—From Marseilles to Singapore: Mr. and Mrs. Heneicken and infant, one, lady and two children, Mr. and Mrs. E. Cunningham.

Per P. and O. str., 20th Nov.—From Southampton to Hong Kong: Mr. Padder, Miss Alexander, Capt. Worthington. To Singapore: Messrs. J. Watson, and R. Henderson. From Alexandria to Penang: Mr. and Mrs. E. J. Leveson.

PROGRESS OF THE THIRD CHINA WAR.

DEPARTURE OF THE ALLIED FORCES FOR THE PEIHO—ATTACK TO TAKE PLACE ON THE 31ST JULY—RUMOURED ABANDONMENT OF THE TAKU FORTS AND CONCENTRATION OF THE CHINESE FORCES ON TIENTSIN—INEFFICIENCY OF THE FRENCH FORCES AND CRUELITIES AT CHUSAN—PROMPT ACTION OF LORD ELGIN—WANT OF CONFIDENCE IN ADMIRAL HOPE.

(FROM A SPECIAL CORRESPONDENT.)

TA-LIEN-WHAN BAY, July 24.

The mail leaves here to-morrow morning, I understand. Lord Elgin has expressed very energetic resolutions; and the delays which have been hitherto occasioned by the uncertain moods of our commander-in-chief—"to one thing constant never"—will now cease. It is indeed time that something was done, for the expenses which are daily accruing will sum up to a total which will astonish John Bull when lumped under the head of the "Chinese Expedition."

In two days—the French being at last ready—we all leave here for the Peiho, and the gun-boats which have been stationed near there report that the forts at the entrance, which have been described as very formidable, are now apparently abandoned. The enemy preferring to concentrate his strength at Tientsin. The land is level, and we are told offers no great obstacles to marching a force, which we are given to understand will be done; one division landing somewhere in the neighbourhood of the Taku forts, destroying them *en passant*, and combining with a second, which will leave Shanghai and take the Grand Canal as their route. Such are the reports, and I believe trustworthy; but it must always be borne in mind that

the Chinese seem to have some peculiar faculty of arriving at information as early, and in many cases earlier, than the *guidances* of the fleet. Operations are to commence on the 31st of July, and it is said that General Michell leads the first landing-party, viz., the 1st, 2nd, 31st, and 60th regiments.

Admiral Hope may be a very bold man, but we require something more than personal intrepidity in the commander of such a force as is at present assembled here. Amongst other points of importance in the character of either Admiral or General, the leader of a body of men should be able to inspire confidence, and a certainty of success amongst his followers. Admiral Hope is remarkable for deficiency in this. This delicate subject is handled pretty freely by officers and men, the former in confidential discussions amongst themselves, the other by open and pretty generally expressed contempt for their Admiral's mental powers. With no hereditary title to honour beyond some few generations of Amsterdam burghers, he imitates the "grand seigneur," and rides roughshod over the opinions of as good, if not better officers. This would be called strength of mind, were it not patent to everybody that vacillation is the mainspring of all the movements of our orders given to the fleet. It is well known now that, had he listened to the opinions of officers whose position and experience entitled them to a voice in the consideration of a campaign, we should not have to regret the dishonour of the British flag retreating before the Tartars. It will need a more than ordinary combination of well-planned strategy and success to restore amongst the army or navy any feeling of confidence in that Admiral who commanded in person the attack upon and repulse from the Peiho forts. I trust, however, to advise you, in my next, of the capture of those detested forts, and of our march on Peking. Our troops are in first-rate condition, with every necessary; not so, however, with our Allies, who, for once, as might be expected in the Far East, are all at sea. Indeed, I hardly like naming the rumours current about their want of artillery, cavalry, &c.

(FROM ANOTHER CORRESPONDENT.)

TA-LIEN-WHAN BAY, July 23.

To-morrow morning the fleet sails from this for the Peiho, and will proceed in three divisions, consisting of the ships, conveying the first, second, and cavalry divisions of the expeditionary force, numbering in all about two hundred vessels; men-of-war included.

When I last wrote, the intention was that the French force should land to the south of the Taku forts, while the British force landed at Petang, and after marching across the country, attack the northern forts in the rear. This plan, however, has been altered at a Council of War, held at Cheefoo on the 19th inst., at which Sir Hope Grant and Admiral Hope was present, and it has been determined, that the two fleets leave their respective anchorages on the morning of the 26th July, and meet in the neighbourhood of the Peiho—about Petang it is believed—and make a combined attack in place of the plan originally proposed, the details of which were given in my last communication.

The chief events since the departure of last mail, have been the death by drowning of Captain Gordon, (not Major Lumsden, as reported), of the Madras Engineers, caused by the upsetting of a boat in crossing from one side of the harbour to the other—the death from dysentery of Dr. Macauley, the surgeon of Probyn's Horse, and the hanging at the yard-arm of H.M.'s gun-boat *Leven*, of a marine, for the attempted murder of Lieutenant Hudson, R.N., and the second-master of the *Leven*. The ruffian took deliberate aim at both with a revolver, dangerously wounding Mr. Hudson in the neck, and shooting the second-master through the ear; both officers are in course of recovery. The marine was a man of very bad character, and the immediate cause of the attempted murder was his being sentenced to some slight punishment for stealing spirits.

The 1st division, under the command of Major-General Sir John Michel, K.C.B., embarked yesterday in the following vessels. 1st Royals in the *Macduff*, the 2nd Queen's in the *Bosphorus* and the *Burlington*, the 31st in the *Australian*, the *Hougomont*, and the *Mars*, and the 60th Rifles in the *Alfred* and the *Indomitable*. General Michel and staff embarked in the *Alfred*.

The 2nd division, commanded by Major-General Sir Robert Napier, K.C.B., also embarked yesterday. The 3rd Buffs in the *Earl of Clare* and the *Miles Burton*, the 44th in the *York* and the *Athletas*, the 67th in the *Tasmania* and the *Crescy*, and the

8th Punjaabee Infantry in the *Dalhousie* and the *Minden*. A company of Madras Sappers and Miners also embarked in the *Statenman*.

Though the climate is apparently very healthy, a considerable amount of sickness has prevailed amongst the troops encamped on shore; and about five-and-twenty deaths have occurred during the past month, chiefly from fever and dysentery. The Chinese coolie corps also have suffered a good deal from sickness, and it is stated that nearly 200 of them will have to be left behind at the invalid depot in Odin Bay; which will make the actual amount of sick left at Talien-whan about 400.

Sir Robert Napier and staff embarked yesterday in the *Imperatrice*, steam-transport; 300 men of the 44th Regiment embarked also in the *Imperatrice* yesterday, under the command of Major Hackett, with Major Preston, Captain Gregory, Lieutenants Rogers, Hodson, Rennie, and Assist.-Surgeon McDowel.

Each division of the army proceeds to the Peiho, accompanied by its hospital ship. The *Mauritius* with the 1st division, the *Sir William Peel* with the 2nd division, and the *Lancashire Witch* with the cavalry division. The *America* has been taken up, and is now in course of fitting as a stationary hospital ship in Odin Bay; and Surgeon Smith, of the 21st Madras Native Infantry, accompanies the forces to take medical charge of an hospital ship for the sick and wounded of the native troops.

The whole of the artillery were embarked on the 23rd inst., and the cavalry, consisting of 300 men of the King's Dragoon Guards (with about 400 followers), and two regiments of Sikh Horse, embarked yesterday. The cavalry transports alone number between 20 and 30 (requires eight vessels to convey it to the Peiho), and a very large number of ships are occupied by the artillery.

A sick depot is to be formed in Odin Bay (a creek in Talien-whan Harbour), and the 99th Regiment, the 19th Punjaabees, and one battery of artillery, are to be left there, partly as a protective force, and partly as a reserve. Staff-surgeon Galbraith and three Staff Assistant-surgeons will remain in medical charge of the European sick, numbering over 200, that will be left behind the expeditionary force.

(FROM ANOTHER CORRESPONDENT.)

CHUSAN, July 20.

I am sorry to inform you that our gallant Allies are acting in a manner calculated to injure our prestige most seriously. Of course when the war is over we shall be the sole sufferers, for the French have no vested interests in China as we have, and in peaceable times they are not known or felt. They have committed several acts of cruelty, and altogether conducted themselves more like a half-civilised race. One officer rode so furiously through the town that he was thrown and killed.

The natives, however, continue their supplies, and treat us very well. The steamer *Powerful* has left for the Peiho with supplies, and the *Zouave* will follow in a day or two.

PROGRESS OF THE THIRD CHINA WAR.

(FROM A SPECIAL CORRESPONDENT.)

The following letter should have reached us by the last mail, but as it contains many items not already noticed by other correspondents, we print it:—

"TA-LIEN-WHAN BAY, 13th July, 1860.

"My last communication to you was from Hong Kong, dated 23rd June, in which I mentioned the arrival there on the 21st June of Lord Elgin and Baron Gros. The plenipotentiaries remained but a short time at Hong Kong, Lord Elgin embarking in the *Feroze*, for Shanghai, two hours after the mail left for England on the 23rd ultimo. Baron Gros left for Shanghai twelve hours after Lord Elgin, in the French steamer *Suigon*.

"On the 24th June H.I.M. steam transport *Weser* arrived at Hong Kong from Toulon, bringing out in compartments three steam gun-boats, with their crews, guns, and machinery complete, and under the able management of her commander, Captain Clerat-Langavant (Capitaine de Fregate), she made the passage to Hong Kong from Toulon in sixty-three days' actual steaming, including detentions, coaling, &c., amounting to thirty-three days at St. Vincent, Ascension, Cape of Good Hope, Mauritius, Point de Galle, and Singapore; the whole time occupied was ninety-six days. After waiting at Hong Kong, she sailed for Woosung on the 27th June, where, after communicating with Vice-Admiral Charner, she was sent to Chefoo, at which place it has been determined to construct the gun-boats. Admiral Page, the senior Rear-Admiral of the French Navy in China, left Hong Kong in his flag ship the *Nemesis* also on the 27th

June, for the North of China. The *Weser* arrived at Cheefoo on the 5th July, and arrangements were forthwith made for having the gun-boats put up on the beach close by where the troops are encamped. It is doubtful that they will be ready in time to take part in the approaching operations.

"Cheefoo is a bay with a number of villages skirting its shores, in latitude 37 deg. 30 min. N., and longitude 121 deg. 20 min. E. It is beautifully situated, and its coast consists of a fine light coloured clay, on which large quantities of maize, millet and wheat are grown. Some of the villages are situated close to the beach, others are a short distance inland, and are very prettily placed amongst some small-sized trees richly foliaged, the farthest one not exceeding a mile from the beach. The mainland round Cheefoo harbour rises by a gentle slope, until it terminates in an amphitheatre of lofty and exceedingly picturesque looking hills, of a sombre green colour, contrasting strongly and not unpleasantly with the bright green of the maize fields that creep for a considerable distance up their base.

"The climate at the present time appears to be one of no ordinary salubrity, as there is an almost total absence of sickness in the French army—on the occasion of my visit there a few days ago there being only eight men out of a force of some 7,000 under treatment in hospital, though the troops have been gradually assembling there since about the 1st of last month. Four deaths only have occurred since their occupation of the place, and one was from a wound received in a duel. The general health of the troops is reported by the medical officers as superior to its average in France, and which no doubt is attributable to the purity and remarkable dryness of the atmosphere, notwithstanding that the direct force of the sun is very considerable during the greater portion of the day. Abundant supplies of fresh meat (pork), poultry, eggs, vegetables, apricots, plums, &c., are brought into market by the neighbouring population, whose first fears, caused by the landing of the "Western Barbarians," are now completely removed, and business re-established in the different villages near the camp. Every morning several hundred Chinamen may be seen disposing of their supplies in the portion of the camp allotted to them as a market place, and where the whole day business continues to be carried on from sunrise to sunset. Already there is a whole line of money-changers with their portable *bureaus* and piles of cash (native coin), and as visitors pass them they hold up a dollar, calling out *nint cent et cinque*, indicating their readiness to give 850 cash in exchange for one dollar. Cash is the current coin of the realm—the only coin, in fact, that the Chinese have, and consists of a very base metal, having a hole in the centre, through which quantities of them are strung together—in Hong Kong their value is 20 for a penny, or 1,000 for a dollar; consequently the rate of exchange at Cheefoo is considerably lower than in South China.

"Cheefoo hitherto has been a place of considerable trade in maize, millet, and bearded wheat, carried on chiefly with the Corea, it is stated with Japan. The inhabitants, generally speaking, are a taller and finer race than we have been accustomed to see in the south. Their attire and general customs seem to be the same, though I observed one marked difference between them, namely, that in the south the moustache is not worn until the individual becomes a grandfather; but in the north it is by no means an uncommon decoration of the faces of the young. The Chinese are beginning already to talk a sort of pigeon (business) French, and may be heard *bonjouring* their invaders with great familiarity. Some of them engaged in business in the town have acquired a tolerable good knowledge of the common numbers in French, though their intercourse with that nation has not much exceeded twenty days.

"General Montauban arrived at Cheefoo on the morning of the 5th July, and assumed in person the command of the army, which hitherto has been under the charge of General Jamin, commanding the 1st Brigade of the expeditionary army. Rear-Admiral Protet has been in command of the Naval Department at Cheefoo until the afternoon of the 5th July, when Vice-Admiral Charner arrived from Shanghai, flying his flag in the *Saigon* steamer. Admiral Protet's flag is in the *Dryade*, a magnificent two-decked steam frigate—the upper deck for guns, the lower one specially constructed for the transport of horses—a form of vessel that is now becoming much adopted in the French navy. Sixteen war transports were in harbour on the 7th inst., of which twelve were steamers, namely, *Dryade*, *Rhin*, *Rhone*, *Garrone*, *Jura*, *Loire*, *Forbing*, *Calvados*, *Garrone*, *Nievre*, *Avalanche*, and *Saigon*. The *Calvados* had just arrived

from Shanghai, bringing up 250 horses, also a battery of artillery that had been saved from the *Queen of the Clippers*, the loss of which vessel by fire has been a serious occurrence for our allies; all their winter clothing, including 20,000 pairs of boots, having been destroyed.

"The French force now at Cheefoo is detailed in two brigades—the 1st under General Jamin, consisting of two battalions of the 101st Regt., each battalion being about 1,200 strong, and the 2nd Regt. of Chasseurs de Vincennes, about 1,000 strong; also two batteries of field artillery, in all twelve guns, and one company of Engineers. General Jamin commanded the regiment of the Zouaves of the Guard during the Crimean campaign.

"The second brigade is commanded by General Colinot, who commanded the regiment of the Zouaves of MacMahon's division at the storming of the Malakoff, and consists of two battalions of the 102nd Regt., each averaging about 1200, with three battalions of Infanterie de la Marine, consisting of 18 companies, each company averaging 120 men, making in all about 2,000 marines. This brigade also has twelve field guns in two batteries, and one Company of Engineers.

"With the exception of thirty Sphais (Algerine Cavalry), as an escort for General Montauban, there is no cavalry attached to the French army. In addition to the force detailed above, they have a mountain battery of six guns, for the horsing of which some very fine mules have been imported from Japan. There is also a siege train on board the *Jura*, and a corps of Pontoniers, who are now engaged constructing a military bridge for service in the Peiho. A Coolie corps also has been formed, and six hundred of these warriors are now at Cheefoo, and four hundred more are expected from Shanghai. They have proved very useful in the carrying of stores about the camp. With reference to horses, including 250 in course of landing from the *Calvados*, there are now eight hundred horses and ponies at Cheefoo, and they have chiefly been procured from Japan and Manila, and their unbroken condition at the present time is the chief cause of the delay in making a movement on the Peiho.

"The French have taken possession of upwards of forty junks for store purposes, intimating, through interpreters, that they require the loan of them, and will return them with an indemnity when they have no further use for them. How much of this the Chinese believe of course I do not pretend to say.

"The French camp seems well laid out, and extends over a small promontory, terminating in an elevation of some height, on the slopes of which the 101st and 102nd, and Chasseurs de Vincennes are encamped. The land in the rear of the hill is a fine alluvial plain, that has been under maize cultivation; here the artillery and horses are placed, and in the extreme rear the battalions of marine infantry. The French 'Corps Chinois' are disposed of in round tents, and located between the infantry and the horses. They have been gambling so extensively that General de Montauban has been obliged to issue an order prohibiting it.

"In respect to the English portion of the expedition, the whole of the transports are now lying in Talien-wan Bay, on the eastern side of a promontory in the province of Lian-tung, in Manchuria, exactly opposite, and ninety miles distant from Cheefoo. They will remain here until such time as our allies intimate that they are ready to take the field, when a combined movement will be made on the Peiho, the French landing on the south side of the forts, and the English to the north of them, most probably at Petang, distant about eight miles.

"Talien-wan Bay is a fine harbour, containing several smaller ones, in four of which the transports, &c., about 200 in number, are now lying, while the troops are all under canvas on shore. Talien-wan Bay averages eleven miles wide, and is entered from the east. On its northern side a portion of the fleet, amounting to 65 vessels, are lying in a small harbour, to which the name of the Victoria Bay has been given, and on the maize fields bordering its coast the Infantry of the 1st Division of the army is now encamped, consisting of the 1st, 2nd, 31st, 60th, and 15th Punjaubees, Sir John Michel, K.C.B., commanding on shore, his head-quarters being at a small village about a mile inland. On the opposite side of the harbour are three small bays, at present known as Hand Bay, Bustard Creek, and Odin Bay. In the first of these, on shore, are encamped, the 3rd, a portion of the 44th, the 67th, 99th Royal Marines, Madras Sappers, and 8th and 19th Punjaubees. On the ridge of a hill between the lines of the 44th and 99th Regiments stands the tent of Major-General Sir Robert Napier, K.C.B., commanding on this side of

the harbour. In Bustard Creek are encamped the Military Train and head-quarters of the 44th, and in Odin Bay the whole of the Artillery and Cavalry are on shore. The ships of each corps are at anchor in the harbours where they are respectively encamped. The country occupied by the camp is in soil similar to that I have described at Cheefoo; but while the French are encamped on a small promontory in the harbour, having a flat alluvial base, terminating in a somewhat rocky headland, our troops are scattered for miles over country consisting of nothing but hills and dales, which renders communication between the different sub-divisions of the army a matter of some difficulty. Each division of the army will proceed to the Peiho accompanied by its steam hospital ship, the *Mauritius* being that of the 1st Division, and the *Sir William Peel* that of the 2nd Division; the general health of the troops is good. The climate being very fine, exactly similar to that of Cheefoo, the reason for having the force so scattered has been the difficulty of procuring water in quantity sufficient for the whole army in a body.

"Lord Elgin arrived in the *Feroze* from Shanghai on the forenoon of the 9th, and the following morning at 3 Sir Hope Grant left in the *Granada* for Cheefoo, to consult with General Montauban as to the probable period of the French being ready to leave Cheefoo, so as to enable arrangements being made for having the troops embarked in the transports ready to sail from Talien-wan on a specific day. It is not expected that any movement will be made from here much sooner than the 1st of August. This, however, will depend on our allies, as we are now quite ready, and the whole expedition could be embarked in the course of three or four days. Seventeen junks have been seized on terms resembling those adopted by the French; but the first seizure is stated to have been effected in such a manner as precluded negotiation from the crews jumping overboard. That distinguished corps, the Bamboo Brigade, are proving themselves of great service, and it is to be regretted—at least so report goes—that, owing to the rough usage which a party of them lent to the navy received, several desertions have taken place from that particular lot, and report further alleges that several of them have been caught and murdered by the inhabitants, but no particulars are yet known."

Summary of News from the Far East.

JAPAN.

According to the advices received by this mail business was proceeding satisfactorily at all ports.

Dates from Nagasaki reach to the 25th July. Messrs. Frazer and Co., in their circular under that date, state that:—

Business is improving; whilst the export of teas, flour, &c., is again brisk. Several American and English ships have arrived and sailed again for the north of China, taking full cargoes of coals, flour, grain, horses, bullocks, fresh provisions, &c., &c., for the use of the Allied forces. Provisions of all descriptions are arriving freely from the country.

The Japanese are quite anxious to see what is to be the result of the Peiho affair, and the satisfactory adjustment of that question will have a very favourable influence here.

The extension of the Bund before the Foreign settlement is going rapidly onward, and Europeans are preparing to build.

The exchange of itzeboos for Mexican dollars was discontinued by the custom House on the 15th inst., but the consuls, who are merchants as well, are still allowed privileges by the Government.

IMPORTS.

American drills and sheetings, English chintzes, camlets, and T-cloths have been imported by each arrival from Shanghai, and have been favourably disposed of to the Japanese for Itzeboos and produce. American drills have brought Mexican \$3.35 to \$3.45 per piece of forty yards. Red blanket cloths sell readily at \$4 to \$4.50 per piece. Chin se medicines: Very light stock. Rhubarb: \$50 to \$60 per picul. Sugar and sugar candy: Mexican \$6 to \$7 per picul of 133 lbs. Sapanwood is in moderate demand, with but a light stock. Quicksilver in good demand, but no stock. Coals: Less inquiry. Considerable quantities of treasure (Mexicans) have been received from Shanghai, by late arrivals, for investment.

EXPORTS.

TEA.—During the first part of the month, owing to the unfavourable news from Shanghai, but little was done, until latterly. Green teas have been eagerly sought for, and prices have advanced. The new crop is just coming to market, and the quality is good. The *Templeman* for Shanghai has a full cargo, about 7,000 piculs. We quote No. 1, Greens, mex. \$24 to \$26; No. 2, \$14 to \$16; No. 3, \$5 per piculs.

RAW SILK.—Light stock, mex. \$5 to 6, per catty; copper \$24 to 25, per picul; coals \$5, per ton; iron, \$3½ to 4; vegetable wax, \$9 to 12, per picul; beeswax, \$40 to 42; seaweed, No. 1, \$6, No. 2 \$50c.; Mushrooms, \$24 to 25; tobacco, No. 1, \$5 to 6, No. 2, \$3 80c. to \$4; Isinglass, \$24 to 27; Vermicelli, \$3; sharks' fins, \$13 to 14; cuttle fish, \$6 to 8; fish-maws, \$13 to 14; fish-rows, \$50 to 56; Broom stuff, \$3 to 3 20c.; dried ysters, \$13 to 19; saltpetre, none in the market; sulphur, \$2 80c. to \$3;

camphor, \$7 to 8; oil, \$4 50c. to \$5; fungus, \$4 to 5; shrimps, \$13 to 15; peas, \$2 50c. to \$3, per picul; silk piece goods, \$4 to 4 50c., per catty, and scarce; flowered cloth, 80c. each.

EXCHANGE.—Itzeboos, 235 per 100 mex. dollars; cop. cash, 1,800 per \$1.

FREIGHTS.—To Shanghai, \$5 per ton; meas, 60c. per bale for teas; 40c. for seaweed, and 50c. for oil; 30 c. for iron. To Hong Kong, \$7, per ton; meas (nominal), 70c. per picul.

CHINA.

SHANGHAI.

The London mail of the 11th June arrived on the 28th July, 47 days *en route*.

There is very little political news of importance. The rebels remain in possession of Soochow and the adjacent country. A number of freebooters, consisting of 300 Manilamen, under the command of a certain Ward, who had been instrumental in the recapture of Sung-keang from the insurgents, have sustained a complete defeat before Tsingpoo, which place they had attacked. The leader himself was seriously wounded by a foreigner in the rebel employ.

Some further correspondence has been published on the quarrel between the Consul and the Foreign Chinese Customs. When we can see the end of the correspondence we shall have something to say on the matter.

A great panic took place on the 17th July at the sound of the rebels, in which several Chinese destroyed themselves.

COMMERCIAL REPORT.

CHINA—EXPORTS.

TEA.—The exports for the present season have been on a large scale, principally from Foo-chow, the holders and purchasers being alike eager to ship off. The former have, however, as usual, attained their own terms. The large export to Australia has assisted to maintain high rates. At Foo-chow, settlements are reported of 16,000 chests and 16,000 half chests of Congou, at 25 to 30 for good, and 19 to 24 for ordinary. Oolongs 21,000 half-chests, at 24 to 28 taels. Souchongs, 2,500 chests, at 22 to 40 taels. Scented teas, 3,000 boxes, and flowery Pekoe, 500 chests, at 28 to 40 taels. At Shanghai, the transactions of the fortnight are reported at 600 chests Hoochow Congou, at 27½ taels, and 1,000 half chests Japan leaf. The stock on the market is computed at 5,000 pkgs., of which 1,000 were Hoochow, the remainder being trash. It was rumoured that a few chops of New Congous had arrived within a few miles from Shanghai under convoy of foreigners, and had been stopped by the mandarins for transit fees.—Greens: About 7,000 pkgs. New Pingsueys had arrived *via* Ningpo. The settlements reported for the fortnight are confined to 1,000 pkgs. Japan. The stock on the market is stated at 1,000 pkgs. Hoochow, 1,200 ditto common Shanghai packet, and 5,000 ditto Japan leaf. At Amoy the supply has been large and several vessels were loading for England and the United States. Ningyongs are quoted at \$21 to 28; Congou, \$14 to \$26; Anko, \$14 to \$16. At Canton sales have been: Congou, new, 31 chops (making 70 in all), at 25 to 30 taels for Oonams, and 30 to 33½ for Oopacks; ditto Canton packed (Tayshan), 3,000 half-chests, at 18 to 26½ taels; Scented Orange Pekoe, 18,000 boxes, at 22 to 33 taels; Scented Caper, 18,000 boxes, at 18 to 27 taels; Powchong, 12,000 half-chests, at 18 to 24 taels; Gunpowder and Imperial, 3,500 boxes, at 21 to 25½ taels Young Hyson, Scented, 1,000 half-chests, at 20 to 24½ taels.

SILK.—At Shanghai large arrivals have taken place, to avoid the increased transit duty, and holders have accepted 10 to 15 taels less. 3,000 bales have been settled, making a total of 8,000 since the 30th June. The *Ballarat*, *Lucknow*, and *Challenger* will load large parcels. The settlements have been at 425 taels for No. 1 Tsatlee, and 353 for No. 1 Tysam. These rates, however, will probably advance, owing to a report that a large mart in the Tsatlee country had been taken by rebels.

DRUGS.—Cassia Lignea: \$17½ to \$18 at Canton, with a stock of 1,000 piculs. At Macao it is reported in full supply, at \$16½ to \$17. Cassia Buds quoted \$23 to \$24, no stock. Cassia Oil: 20 piculs are on the Macao market, \$310 to \$315 being the asking rate. Star Anniseed: 200 to 300 piculs are being offered at Macao, at \$16. Anniseed Oil: 50 piculs are in stock at Macao; no buyers at \$175. Rhubarb: No stock either at Canton or Macao. Matting: at Canton, four, five, and six quarter; white, 11 cents, 13 cents, and 15 cents. Red Checked, 13 cents, 15 cents, and 18 cents per yard; large contracts have been made. Vermilion, at Canton, \$37½ per box. Camphor, \$23 to \$24.

CHINA.—IMPORTS.

At SHANGHAI.—Grey Shirtings, (sales) 55,500 pieces; white do., 2,500 pieces, at 172 to 190 taels; T-cloths, 20,000 pieces; 110 to 125 spotted shirtings, 2,000 pieces; white brocades, 300 pieces. American goods: 20,000 pieces drills, 9,000 pieces sheetings, and 3,500 pieces Jeans; 225 to 260 long ells, 330 pieces; camlets, 50 pieces.

At Foo-CHOW-Foo.—The stock is very full, the following being the sales of the fortnight:—T-cloths, 5,000 pieces, at \$1 60c. to \$1 95c.; grey shirtings, 4,000 pieces, at \$2 50c. to \$2 80c.; drills, 2,500 pieces, at \$3 15c. to \$3 40c.; lead, 1,000 piculs, at \$8 40c.

At AMOY.—There has been a better business done than usual. The following are the sales:—Cotton yarn, 988 bales, \$29 to \$33; stock, 527 bales; grey shirtings, 9,200 pieces, no stock; white shirtings, 1,800 pieces, stock, 3,000 pieces; \$2.40 to \$3.10; T-cloths, 600 pieces, \$1.50 to \$1.90; stock, 3,500 pieces.

At CANTON.—The business of the fortnight exhibits an improvement in so far as quantity goes, owing to the large export trade in tea: Grey shirtings, 11,700 pieces; white shirtings, 2,600 pieces; cotton yarn, 330 bales; T-cloths, 9,000 pieces; American goods: 6,000 pieces drills, 500 pieces sheetings, and 1,500 pieces Jeans; long ells, 240 pieces; Spanish stripes, 264 pieces; camlets, 200 pieces; lastings, 200 pieces. Iron: 1,000 piculs nail rod, 500 piculs bolt and bar, and 750 piculs hoop. [The stock of iron is 40,000 piculs.] Iron wire, 600 piculs; lead, 200 piculs; tin plates, 100 boxes; quicksilver, 300 flasks.

At HONG KONG.—Except in sales of T-cloths the business done has been very small. The demand continues to be supplied from auction sales. The following are the sales reported for the fortnight: Cotton yarn, 75 bales, high numbers; grey shirtings, 3,250 pieces; T-cloths, 42,500 pieces, 24 inch, and 1,500 pieces, 36 inch; long ells, 280 pieces; Spanish stripes, 450 pieces; lead, 420 piculs; iron, 4,000 bundles; nail rod.

MANILA.

EXPORTS.—There is very little alteration to note in prices of produce, the decline in freights and Exchange preventing in some measure the lower prices that the dull advices from Europe would otherwise have caused. Current clayed Sugar \$5 62½c.; Hemp, \$4. 1½c. to \$4 25c.; Cigars, No. 1, 2, and 3 \$14, \$8, and \$6 75c. Indigo, no quotations.

IMPORTS.—The *Arizona* has arrived from Liverpool. The next ship thence will be the *Primera de Espana*. Stocks of most articles will be considerably reduced before her cargo comes on the market. The American ship *Golden City*, from Boston, brings some grey goods which will not come to a very good market.

BATAVIA.

EXPORTS.—Sugar sales have been made at—guilders, 16; pepper, black, at 20 to 21; India-rubber, at 100 to 111; coffee, 35½.

IMPORTS.—Cotton goods are in large stock, and quotations almost nominal. Iron sales of hoop at 10½, square and round, at 8; nails at 18; spelter at 24; lead at 23; tin plates, 20 to 22. Stocks mostly large.

SINGAPORE.

EXPORTS.—Supplies are scarce, and the comparative prices are higher, while the shipments are much smaller than in previous years.

IMPORTS.—The active demand for European cotton goods has subsided, and prices are falling.

The picul is 133½ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cen and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

	Bank.	Private.
At Shanghai 6 months sight.	6s. 7½d.	[6 7½ to 6 8
At Canton 3 ditto	..	5 0
At Foo-CHOW-Foo (per dol.) . 6 ditto	..	4 10
At Hong Kong 6 ditto	4 9½	4 10

Per Epsom, from Hong Kong, August 5, for London: Sugar, 500 piculs; soy, 50 packages; sundries, 58 packages.

Per Kremlin, from Hong Kong, for Boston: Fire crackers, 10,000 boxes; crape shawls and scarfs, 2,500 pieces.

Per Oracle, from Hong Kong, July 7, for San Francisco.—Tea, 310 packages; rice, 9,500 piculs; sugar, 3,000; opium, 23,200 taels; matting, 500 rolls; china goods, 560 packages; hemp, 500 bales; silk, 11 boxes.

Per Meta, from Hong Kong, for San Francisco: Tea, 1,606 packages; sugar, 1,674 piculs; rice, 1,500; oil, 600; opium, 23,500 taels; fire crackers, 100 boxes; sweetmeats, 100 boxes; clothes, 27 boxes; China goods, 1,050 packages.

Per Creole, from Hong Kong, July 26, for San Francisco: Tea, 742 packages; rice, 2,500 piculs; sugar, 1,450; oil, 220; opium, 15,300 taels; pepper, 383 bags; cloves, 37 boxes; tapioca, 303; nutmegs, 13 cases; pearl sago, 100; China goods, 1,050 packages.

EXPORTS FROM MANILA.

Per Carausius, for London, July 29: Hemp, 1,050 piculs; sugar, 10,550; sapanwood, 500; cigars, 52 mils.

Per Idas, for Liverpool, July 27: e mp, 5,560 piculs; sugar, 9,675 sapanwood 530; M.O.P. shells, 160.

Per Parisian, for Cork, July 23: Hemp, 2,120 piculs; sugar, 7,850; sapanwood, 525.

Per Beatrice, for Cork, July 23: Hemp, 800 piculs; sugar, 4,950; sapanwood, 342.

Per Pa de Santander, for Cork, July 27: Hemp, 1,600 picult; sugar, 12,230; sapanwood, 252.

Per Sappho, for Cork, July 28: Sugar, 6,400 piculs; sapanwood, 230.

Per Arab, for Boston, July 23; Hemp, 6,250 piculs; sugar, 4,000; sapanwood, 400; cigars, 900 mils.

Per Kate How, for Boston, Aug. 1: Hemp, 8,500 piculs; sugar, 4,400 sapanwood, 600; cigars, 7 mils.

Per Industry, for New York, June —; Hemp, 12,250 piculs; sugar, 4,800; sapanwood, 600; hides and cuttings, 200; cigars, 730 mils; indigo, 260 qqls.

Per S. H. Talbot, for Sydney, Aug. 3: Sugar, 11,275 piculs; corlage, 1,075; cigars, 1,100 mils.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From London, July 20: Anglo Saxon, Assyrian; 31 Thor. From Liverpool: 21, Charlotte Ann; 24, Mirage. From Cardiff, 17, Giovanni; 24, Gauntlet. From Toulon: 18, Elizabeth.

At HONG KONG, MACAO, AND CANTON.—From London: July 30, Balnagith, Prince of Wales; Aug. 1, Nankin, Art Union; 8, Roebuck. From Liverpool: 1, Mary Lee, Teazer. From Newcastle: July 30, Psyche, Cathrina; Aug. 7, Keepsake. From Cardiff: 3, Inverner; 5, Oibero; 7, Faders Minde. From Toulon: 2, Jouteur; 3, Rich Schmets, Maria. From Hamburg: July 31, Miranda; Aug. 3, Carl Ritter. From Plymouth: July 31, Triton. From Sunderland: Aug. 2, Kelso. From New York: 1, Swordfish, Edith Rose. From Boston: July 30, Cossack.

At SINGAPORE.—From Sunderland: Aug. 9, Johanna. From Clyde: 8, Toronto.

At PENANG.—From New York: Aug. 6, Revely.]

At MANILA.—From Liverpool: Aug. 1, Arizona.]

SAILED.

From SHANGHAI.—For London, July 16, Jubilee.

From Foo-chow-Foo.—For London, July 20, Hero, Gleam; 24, Pol-maise. For Cowes: 29, Thos. Sparks. For New York: 20, Benefactor; 29, Don Quixote; 31, Magenta.

From HONG KONG, MACAO, AND CANTON.—For London: Aug. 5, Epsom; 4, Wellington; 7, Mary Ann; July 25, North Fleet; 27, Wellington; 28, Langdale, Fairy, Aug. 1, Caroline Chisholm; 2, Veronica. For Liverpool: July 25, Romeo. For New York: 27, Penguin.

From SINGAPORE.—For London: Aug. 12, Hawthorn. For Boston, via Penang; 12th, Burneo.

From PENANG.—For London: July 20, Rob Roy. For Boston: 19, Hollander.

From MANILA.—For London: July 29, Caucasius. For Liverpool: 27, Idas. For Cork: 23, Parisian, Beatrice; 27, P. de Santander; 28, Sappho. For New York: Aug. 3, Industry. For Boston: July 23, Kate Howe, Arab.

LOADING.

At SHANGHAI.—For London: Assyrian, Ballarat, H. Luduina, Lucknow. At Foo Chow.—For London: Broadwater, Crest of the Wave, Earl of Windsor, Flying Cloud, Maida, Peterborough. For New York: Argonaut, Christopher Hall, Magnet, Winged Racer. For Sydney: Dragon, Windhover. For Melbourne: J. Shepherd, Miranda, Planter.

At AMOY.—For New York: Howqua, North Wind, Arab.

At HONG KONG, MACAO, and CANTON.—For London: Falcon, Maggie, Eliza, Fort George, Norseman, Spirit of the Deep, Westminster. For Falmouth: Roska. For New York: Annie Bucknam, Hotspur, Ocean Steed. For Europe: Thetis. For Havana: J. Wakefield, Live Yankee. For Sydney: Dannebrog. For Melbourne: Helvetia. For San Francisco: Lotus.

At MANILA.—For London: Amoor. For Liverpool: Matilde, Monsoon. For Cork: Britannia, Clifton, J. de Unzueta, Veturia. For Havre de Grace: Coligna. For New York: Cygnet, John Haven, Starlight. For Boston: Annie Bowen, Eloise. For Havana: Emigrante, R. del Oceano. For Sydney: Onabrock. For San Francisco: Tusco.

At SINGAPORE.—For London: Anglia, General Wyndham, Guilding Star, Oryx—via Cape, Victor. For Cape and Liverpool: Conference. For Liverpool: Rose.

At PENANG.—For London: Germania. For Europe: Jalawar. For Boston: Borneo.

FREIGHTS AND CHARTERS.

At SHANGHAI.—For London, £4 to £4 10s.; tea, £6; silk, a steady business has been done; more disposition having been shown in the coasting trade by the Chinese merchants, and vessels still being wanted for the transport service by the French Government. The following charters have been made for French transports—the Livingston, one trip to Chefoo, 10 lay days, \$3. 100 Mex.; the Exporer and Canton, with 30 lay days, \$3,500, Mex. each; the Avalanche, with 35 lay days, \$5,000; the Sportsman, two trips and 40 lay days, \$3,000 Mex.; the Nabob, to Swatow, 30 lay days, \$5,000 Mex.; the William Mitchell, to Swatow, 25 lay days, \$5,500 Mex.

At AMOY.—Rates are rather low, owing to the superabundant supply of vessels; but a fair business has been done. Amongst the charters reported are the Asia to Tamsui and back, thirty days, \$1,800; the Pres Furroo to Foochow and Swatow, twenty-five days, \$2,000; the Melbourne to Ningbo Chinchow and back, thirty-two days, \$2,900.

At HONG KONG, MACAO, and CANTON.—For London, £2 15s. to £4 10s.; for New York, \$10. Nothing but the most fortuitous events can prevent tonnage becoming more prostrate than ever, as the amount of shipping on the coast of China is enormous. The British and French Government requirements and the unusual briskness in the export trade are the causes which have combined to create the extensive demand for ships, which sources certainly have been well supplied. The following charters are reported. The Eliza, at £2 15s.; Veronica, at £4 10s.; Westminster, and J. Vennicombe, at £3; from Whampoa to London; the Anne Lee, from Macao to London, at £3; the Celestial, from Foo Chow to London, at £3 10s.; the Lammermuir, with invalids to the Cape, at £20; the North Wind, Alfred Hill, and Ocean Steed, to New York, at \$10; the Lorenza Sabine and C. Leekmann, from Foochow to Melbourne, at £3 10s.

At MANILA.—For England: £2 10s. sugar; £3 5s. hemp. For New York: \$7 sugar, \$8 hemp. The Monsoon is reported at the above rates for Liverpool, and the John Haven and Cygnet for New York, and the Eliass for Boston. The Isabella gets 6,500 florins for cigars to Batavia.

At BATAVIA.—Produce becoming extremely scarce, freights are duller. Some Dutch ships are loading sugar for Holland, at £3. 7s. 6d. per ton.

At SINGAPORE.—For London, £2. 5s. to £2. 10s. The rates for tonnage being now so low, the charters offered have in general declined, although there are still vessels in port unemployed. The charters reported are—the Anglia, from Sarawak and Singapore to London, at £2. 15s. per ton all round. The Guiding Star, from Bankok to London, at £3. 2s. 6d. per ton, with 10s. per ton extra if ordered for the Continent, and 5s. extra on all laden inside the bar. The Juliet to load planks at Manila to Mauritius, at £1 per ton, and to load sugar thence to a port in Great Britain at £2 per ton.

At PENANG.—For London £2. 15s. to £3. 10s. The Germania is loading at from £3 to £3. 15s.

Continental Intelligence.

HOLLAND.

AMSTERDAM, Sept 24.

(FROM OUR OWN CORRESPONDENT.)

Scarcely were the States General closed, as mentioned in my last letter, when they are again convoked for the new session of 1860-1861. The ceremony took place on the 17th inst. by the King in person, accompanied by the Prince of Orange and Prince Frederick. In the speech from the throne the King congratulates the country on the flourishing condition of the finances, commerce, and march of moderate reform, and informs them that his relations with foreign Powers continue to be of the most satisfactory nature; but that in the present complications of Europe it is absolutely needful to be prepared for any unexpected contingency, and that his ministers are labouring to increase the defensiveness of the kingdom by re-organising the army and navy, and that, to promote this still further, a Bill will be presented them in the course of the session for the organisation of the militia. He further

announces a Bill for the reduction of the tariff and transit dues, and other measures for the facilitation of trade. On the subject of the colonies in the East Indies, the King says: "The affairs of our oversea possessions are in the most satisfactory condition. By the courage and perseverance of our land troops and naval forces, the subjection of Boni is completely effected, and the kingdom of Banjermassing placed under our own direct authority. The increase of population and the flourishing state of Netherlands India have produced again great advantages to the mother country, a part of which have been so judiciously invested and turned to account that there is every reason to anticipate a still further improvement, and a greater development of the resources of those fertile and valuable possessions. It is to be hoped that this satisfactory state of affairs will conduce to a further improvement and acceleration of the sea communication between the islands of the Indian Archipelago, which will be accompanied by the erection of several additional lighthouses, for the greater security of our daily increasing navigation in those waters." The King then declared the session opened, and nominated Mynheer Philipsa to be President of the First Chamber, while M. Anemaet was confirmed as President of the Second Chamber.

The merchants, shipowners, and brokers of this city have recently submitted a numerously-signed petition to the Colonial Minister on the subject of the cultivation of tobacco in Java by free labour. After dwelling with satisfaction on the fact that the importation of that article in Holland amounted in 1859 to 52,000 bales, with every probability of a much larger quantity being received this year, which had the advantage of raising Amsterdam to the rank of one of the largest markets for tobacco on the European continent, and giving additional employment and remunerating freights to the languishing shipping interest, they complain of an order lately promulgated by the Governor-General of Netherlands India, forbidding the European authorities and native chieftans from interfering in the question of free labour, but that the Resident of Rembang, the principal district for the cultivation of tobacco, had wilfully or unintentionally misinterpreted the order, and had prohibited the native chiefs of his residency from having any commercial dealings with free labourers, and on no account to purchase their produce. They, therefore, respectfully pray the Minister for the Colonies to take immediate steps for placing the free cultivation of tobacco in Java on a more satisfactory footing.

The Minister for War, Colonel de Casembroot, has been promoted by the King to the rank of Major-General in the army.

The Netherlands Trading Company have chartered the following vessels for Netherlands India: the *Fulck*, Captain Duyvenboden, *Zeenymph*, Captain Schipper, *Alida Maria*, Captain de Vries, and *Paul Johan*, Captain de Kooy; the first three to sail from Amsterdam, and the fourth from Schiedam.

Orders have been transmitted to the East India Depot at Harderwyk to get ready, for embarkation to Batavia, a detachment of 100 supplementary troops on board the chartered transport *Prinz Mauritz*, Capt. J. Bart, which vessel is under orders to sail from Nieuwe Deep on the 7th October. The command of this reinforcement will devolve on Captain P. Peereboom, of the East India Infantry, returning to Java on expiration of furlough, accompanied by Lieutenants Miltenberg, and A. Beckhuis, and Surgeon W. K. F. Hartsteen.

Another detachment, consisting of foreign mercenaries recruited abroad for twelve years' service in India, has been sent from Harderwyk to the depot of the 7th regiment, stationed at the Helder, there to be drilled and instructed in their military duties; after which they will be forwarded to Java for service.

No. 51 of the official *Staatsblad* contains the text of the treaty between France and Holland for the extradition of criminals in their respective colonies.

The great half-yearly autumnal coffee sale of the Netherlands Trading Company was held in this city the day before yesterday (20th inst.), and consisted of 546,945 bags of Java, and 10,077 bags of Padang. The biddings were spirited, and the whole quantity found purchasers at very full prices, whilst many descriptions were quite one cent per lb. above the hitherto market figure.

The following table shows the quantity of E. I. coffee brought forward and sold at the autumnal sales since 1850 together with the prices paid for good ordinary Java:—

	Bags.	Cents.
1850	507,728	26 to 27
1851	469,228	25½ — 26
1852	634,921	25½
1853	603,401	30 — 30½
1854	514,109	28½ — 29
1855	643,107	32 — 32½
1856	655,807	32½ — 33
1857	572,163*	41 — 41½
1858	702,957	32 — 32½
1859	564,010	37½ — 38
1860	557,082	39 — 41

UNITED STATES.

NEW YORK, Sept. 12.

(FROM OUR OWN CORRESPONDENT.)

Advices from Japan are to the 22nd of July. A Portuguese commissioner had arrived in a war-vessel to negotiate a treaty. An American vessel had sailed for Shanghai with a cargo of tea and silks to the value of half a million. Mr. Gallaher, of New York, has published the market report of their correspondents in Japan, Messrs. John Allmand and Co., in the *Herald*.

The *New York Commercial Advertiser* gives an anticipation of the results of the decennial census now in progress in the United States. Since 1850 the creation has been witnessed of three new States—California, Minnesota, and Oregon, while Kansas, Utah, New Mexico, Washington, Nebraska, and Dakota have been organised as territories, the whole of which long before the next census, in 1870, will probably have also become independent members of the Federation. The population is estimated to have increased from 23,144,126 to over 31,000,000, of which 4,000,000 are slaves. It is, as usual, in the Western States that the great advance has been made, and in Wisconsin and Iowa especially the population is believed to have doubled. Among the Slave States Texas has effected the most rapid strides, and it is thought that in another ten years her number of inhabitants will constitute her the empire State of the South. In 1850 the centre of the population of the United States was at a point in Virginia near the Ohio river. It is now expected to be found nearly as far west as the city of Cincinnati. The railway mileage in the period has increased from 5,500 miles to 30,000, and the telegraph has been extended over about 50,000 miles.

MONETARY AND COMMERCIAL.

Since our last the banks have shown a slight increase of specie, and a heavy decrease in deposits. The returns for the past week exhibit the following changes:—

Week ending	Loans. Dols.	Specie. Dols.	Circulation. Dols.	Deposits. Dols.
September 1	129,027,890	19,033,880	9,233,849	79,068,500
September 8	127,999,839	19,187,713	9,338,824	77,112,611
Decrease	1,028,051			1,955,819
Increase		151,833	285,975	

Money plentiful, and rates of interest without change of importance. At call and at 90 days and 6 months it ranges from 6c. 7c. and 7½c. to 8c. Sterling is dull at 109½ to 109¾, and at sight at 110½ to 110¾. Paris Bills more steady, at 5.12½, at 60 days, and sight bills at 5.10.

The stock market, with some fluctuations, continues to move with an advancing tendency. The Secretary of the United States Treasury has advertised for a loan of \$10,000,000, to redeem that amount in Treasury notes, the loan to bear 5 per cent. in interest, and to be redeemable about 1875; the tenders to be opened about the middle of October next. An American Bank-note Engraving Company have contracted with Russia to the amount of \$70,000, to set up a branch of their business in St. Petersburg, and engrave issues of paper roubles for the Government.

There has been more activity in East India goods, with an improvement in some descriptions. There has been a demand for gunny bags and cloth as well as for linseed, while spices have ruled with much steadiness. Yesterday 11,900 bags Manila sugar were sold, ranging from 6½c. to 7½c., chiefly at 6½c. to 7½c., the latter figure for prime goods. Low grades of green teas are scarce and wanted, while blacks are dull. Tin has been more active.

There are more goods offering for Australia, and the *Sweepstakes* sailed last week for Melbourne with a full cargo, chiefly consisting of lumber and flour, and the *Brarier* is nearly full for Sidney with a similar cargo, but more of flour, with assorted goods. There are two or three other vessels loading for Australia. Freights for Hong Kong have not changed, and still range at \$9 for coal and at \$12 per ton for other goods.

GUNNY BAGS.—The market, though not active, continues very firm. The stock in Boston on the 1st of September was 6,800 bales, against 7,026 last year. Sales of 125 bales in Boston, medium weights, at 11½c., 6 months; 430 lbs. bags are now held at 13c.

GUNNY CLOTH is heavy, with a declining tendency. Sales of 390 bales of standard were made in Boston, at 13 to 13½c., less 4 for cash. Stock in Boston, September 1st, 10,900 bales, against 7,179 last year.

FIRE CRACKERS.—A sale has been made of 3,000 boxes No. 1, at \$1 45c., 6 months.

HEMP.—The market continues quiet; 100 bales Manila for export sold on private terms, and 350 jute, in Boston, to come here, at 95 dols., 6 months. Import from January 1 to August 31, 1860:—

From Foreign Ports	168 tons.	80,490 bales.
Coastwise	—	6,445
Total	168	86,935
Same time, 1859	1,891	63,071

TEA.—There were two public sales held last week—one on last Wednesday, the other last Saturday. At the first the offering was not large, and

* The quantity offered was 572,163 bags, as stated above, but only 356,027 bags were sold.

previous prices were sustained. At the second sale the offering was large and composed of the better grades; but as the supply of this is larger than the proportion of other qualities, a portion was withdrawn. Prices at neither sale showed particular change.

SPICES.—Though not active, the market remains steady. The sales have embraced 600 bags of pepper during the past week, chiefly at 8½c.; 320 lbs Penang nutmegs on private terms; 25 cases in lots at 43c. to 44c., for six months.

Import from Jan. 1 to Aug. 31, 1860:—

	PEPPER.	PIMENTO.
From Foreign and Coastwise Ports	28,543 bags	7,203 bags
Same time 1859	42,552	12,113

TIN.—With the exception of pig, the market has been comparatively quiet. Pig has been in rather better demand, while prices have not materially varied. Holders generally are firm. The sales have embraced 1,300 to 1,400 slabs Straits, mostly to the trade, at 31c. cash, and 32½c., six months; 1,000 ditto Banca, to arrive, at 32c. cash, and 200 ditto in lots on the spot at 32½c. cash. Plates were in fair activity, at rather easier rates.

Import from Jan. 1 to Aug. 31:

	1860.	1859.
Pigs, &c.,	No. 31,093	38,164
Plates	bxs. 418,165	367,524

INDIA RUBBER we have no sales East India to report. Free sales of South American are making at full prices.

INDIGO.—The market is quite firm, and East India in good demand; 20 cases Manila sold at 60c. to 70c. Bengal was in good demand, and sales within the past week have embraced 47 chests, at 35c., 6 months. Import from Jan. to Aug. 31, 1860—

	Cases.	Ceroons.
From Foreign Ports	1,213	1,120
Coastwise	196	100

Total	1,409	1,220
Same time 1859	1,594	1,979

SALTPETRE.—The market is quiet, and sales light; 50 bags crude sold at 11½c., 6 months, and 100 kegs Re sold at unchanged prices, and at Boston 400 bags crude sold at 11c., 6 months. Stock in Boston, Sept. 1, was 3,400 bags, against 14,474 last year. The quantity on the way from Calcutta was 14,655 bags, against 7,410 last year.

LINSEED has become very firm. Among the sales have been 3,000 bags Bombay, per Salim, at 180c.

RAW SILK.—The deliveries since our last have been light, with sales of Canton at the lately advanced prices. The stock unsold is quite small of both Canton and Taysama.

ARRIVALS.—At New York: Nestorian, Goodhue, Aug. 31, from Manila; Urania, Turner, Sept. 7, from Shanghai. At Boston: Malay, Willcomb, Sept. 7, from Manila.

DEPARTURES.—From New York: Sweepstakes, Magill, Sept. 7, for Melbourne; Levanter, Brown, Sept. 10, for Hong Kong.

Spirit of the Press.

THE REBELLION IN CHINA.

China has long been regarded by Europeans as a country in which everything is turned topsy-turvy. There is an odd family likeness in all the stories that reach us of the Flowery Land, which is in itself no mean proof of the originality of its inhabitants and the vitality of the national idiosyncrasy. But we question whether the thirty centuries of Chinese civilisation ever witnessed a stranger complication of destiny than that which now menaces the empire. The "Taiping" insurrection, which broke out in 1851, after spreading sluggishly over several provinces, has assumed a more definite and alarming form in that of Kiangsu. "This great province," writes our correspondent from Shanghai, "with an area larger than France, and a population of 37,000,000, is lost to the Imperial Government." But the grand paradox is that the city of Shanghai itself is virtually retained for the Emperor by a garrison of "Western devils," at the very time when the same race of barbarians is preparing to coerce the "Brother of the Sun and Moon" by armed force in his own capital, as a condemned criminal is rescued from disease to be reserved for the purposes of justice. Well may the Chinese writer lament that he has fallen on evil times. It is probable that the Lord of "the Ten Thousand Kingdoms and of the Four Seas which are under Heaven" would find it very difficult to define the present limits of his own sovereignty. Recent travellers tell us that a foreboding of the fall of the Manchou dynasty has for some years been prevalent, and, though the Ottoman Empire in Europe, as well as our own in India, has survived similar predictions, the event has been due to that intelligent energy which can alone defy these counterfeit decrees of Providence. At all events, this observant Chinaman, though he has the philosophy to laugh at the "sacrifices, with prayers to Heaven, offered in all directions, which," he adds, "is just like those slaves the Buddhist priests," is touched with the presentiment, and records with sad earnestness the same portent of "red rain" that used to frighten the augurs in the emergencies of Republican Rome. It is impossible not to sympathise with the dark and hopeless melancholy of his language. "Of the cities that were besieged there is not one that has not been taken." . . . "The generation of evil-doers have surely obtained a world of their own." Words such as these were wrung from those who watched the last throes of civilisation in the dissolution of the Roman Empire, and found utterance in the "fearful litanies" that thrilled through the darkness of the tenth century. The Chinese are not loyal in our sense of the term; they know as little of the "temperate passion" of subjects under a limited monarchy as of the "dignified obedience" of chivalry. They are not even patriotic in any sense that would prevent their readily naturalising themselves for a sufficient consideration in any clime under heaven. But their imaginations are powerfully affected by the immensity of the organisation within which they live, and of which the Emperor is the centre. When he is removed by death, they say, with a characteristic periphrasis, that he has "fallen, or given way," as if a catastrophe so stupendous had disturbed half their horizon. When they see the change come over the still and vast features of that giant frame of empire which they identify with earthly power and wisdom, no wonder that their hearts "fail them for fear,

and for looking after those things which are coming on the earth." But the English reader must not presume too far on this despondency. Considering the ease with which the rebels have become masters of Hangchow and Soochow, cities which dwarf all but the very greatest of European capitals; and remembering, too, our own earlier encounters with the Celestial troops, one is tempted to think too meekly of the force which may possibly be brought to bear against us. It is true there are good reasons for believing that the reverses of last year were inflicted by a picked body of the Imperial Guard, the flower of the Manchou reserve. But the Manchou race, though a mere handful among the countless multitudes of Chinese, is numerous enough to furnish an immense army. Nor does an impartial survey of facts justify the popular contempt for native Chinese valour. Their annals are full of deeds akin to the "courage of antiquity," and the sanguinary revolutions which have so often spread havoc through the country are illuminated by acts of self-devotion such as modern Europeans associate with Saragossa and Moscow. Of their capacity for organisation, notwithstanding their inability to organise themselves, travellers have expressed but one opinion. They are patient, docile, and independent of circumstances in a very high degree, and their power of bearing privations is wonderful. Under European officers, and even under the few able native generals of whom their history makes mention, they have evinced an indifference to danger which can surprise no one who knows how lightly they regard death. A people who have no belief in the terrors of eternity, who not unfrequently commit suicide from economical or vindictive motives, and who sometimes allow the love of a handsome coffin to overcome that of life, can scarcely be called constitutionally timid. The fact is, that the "Braves," or local militia, are the only Chinese soldiers, properly so called; the rest are a miscellaneous rabble of agricultural labourers and artisans, subject from time to time to an imperfect drill. Such troops have no *esprit de corps*, and feel no interest in the quarrels of their rulers. They look at fighting from the common-sense point of view presented by *Hudibras*. There is more of discretion than of cowardice in their composition. Opposed to arms against which they are powerless, or under the command of leaders in whom they have no confidence, they give way as a matter of policy, and from sheer want of military ardour. But where a Chinaman feels it is his interest to resist and believes that he can do so with success, he will not flinch from mere nervousness. So thoroughly has this been recognised by some officers of experience, that it has even been thought that British India might be advantageously garrisoned by Chinese mercenaries. Whether civil war will forestall the results of European intervention, and whether, in the contrary event, the honours are reserved for diplomacy or strategy, it would be idle to speculate. We trust, however, that Lord Elgin's mission is elastic enough for any contingency. The panics and the treasons, the impatience of the present and the despair of the future, which appal the poor Chinaman to whose letter we have referred, are just the elements out of which may issue new destinies for China. In spite of the mock Christianity which mingled so quaintly with its early enormities, we have very little more faith in the religious or commercial tendencies of the insurrection now in progress than in the sincerity of Imperial concessions. Yet we cannot forget that Chinese exclusiveness dates from the ascendancy of the Tartars, and is no essential part of the national character. From the ninth century before the Christian era till Marco Polo visited the Court of Kublai Khan, China was as open to commerce as the difficulties of land traffic would permit. Since that period our information has been chiefly derived from Jesuit missionaries and tea merchants, two classes equally interested, though for different reasons in exaggerating the inaccessibility of the inland provinces. Till these provinces be reached, as our correspondent reminds us, "we are merely scratching at the outer crust of China." Ignorance alone can have reconciled us to entertain no other than absurd ideas of a nation whose arts and literature were old before Europe had a history, and which even now enjoys an astonishing degree of material prosperity. Further acquaintance may, perhaps, teach us that the monotonous unity and traditional immobility of the Chinese Empire are partly imaginary and partly the result of temporary causes. It is not on the strength, but on the weakness of the Peking Government—not on the enlightenment of the official hierarchy, but on the versatility and practical instincts of the people, that we rest our hopes of ultimate success.—*Times*.

THE CHINA EXPEDITION.

The letter from our special correspondent who accompanies the British expedition to China has given precise information as to the position of the allied forces, and as to the state of affairs in that country, up to the 12th of July last. At that date the two expeditionary forces were in perfect order, safety, health, and immobility. The Chinese retained their old attitude of dogged expectation, and every one was waiting to see what would next occur. Even Lord Elgin himself did not seem to hope much from mere negotiation; for those wise celestial, who are the perfection of old-fashioned common-sense, never go forward to meet troubles, and those patriotic Mandarins who issue their commands from Peking are far too sound Confucians to be moved by any misfortunes that may chance to happen to distant populations. A Governor made a suggestion that by cultivating friendly relations with the Europeans the Imperial Government might, perhaps, stop the career of that armed rabble which sweeps over their rich cities; but the stoical Mandarins of Peking superseded him, and have called him up in chains to answer before them or his traitorous advice. The Emperor, it seems, lives in a drunken delirium, and his counsellors, with the shallow gravity of Chinamen, publish in the *Peking Gazette* protests against his too potent potatoes. With such a ruling Power as this accommodation without blows is evidently hopeless. The only course that can have any effect is to show these drunkards and dotards that we can reach them even in Peking itself. For this all preparation, so far as the English are concerned, has long since been made. The two allied nations have wisely held rendezvous in separate localities, sufficiently near to each other and to the scene of operations to be able to act in unison, and sufficiently apart to be able to enjoy national tastes and habits undisturbed. The anniversary of the disaster of 1859 passed by. Instead of upon that day directing his new force against his old enemy, Admiral Hope was compelled to remain where he was. The General, Sir Hope Grant, instead of landing his troops at the point of action on the opposite side of the bay, found it necessary to disembark his men and horses on the healthy shore off which he lay, and to place his men under canvas. When our correspondent first saw this force it had been lying listless and inactive for nearly three weeks. It was not,

however, the fault either of Admiral Hope or of General Grant that valuable time, the heart of the working year, had been lost, or that our Armstrong guns had not long ago undergone their first trial in actual warfare. That army of 12,000 men could march through China from end to end, and find no obstacle to delay its march. But there was an obstacle to the commencement of its operations. Our good friends who lay at Che-fow had not made their arrangements in a business-like manner. If it be lawful to blurt out the plain truth of such matters, it must, we fear, be told as the result of all our experience in combined operations with the French that they are rather liable to fail in their preparations, and to trust to chance, or to their allies, to make up their shortcomings. Upon the last occasion in China they borrowed from us with the freedom of the frankest friendship. They borrowed our gunboats and our stores, and our ammunition, and even our spars and rigging; and when we trained that effective Coolie corps, which was so essential to our transport service, the French came and divided them with us in a most brotherly manner. On this occasion the distance between our positions has not altogether deprived us of the pleasure of rendering them frequent friendly offices, but it may possibly have rendered them less immediately efficacious. However this may be, the English fleet and army had been, when our correspondent arrived, waiting three weeks in the Bay of Ta-lien-whan for the French. Our ships, drying their sails, and our men, spending their ammunition upon the too nimble hare, which refuses to succumb to ball-cartridge, were all idling until it should please the French to come up and encumber us with their assistance, and assert their customary claim to all the glory. But the French were not ready; they had no artillery horses, and they had to break in the ponies which were coming from Japan and Manila. Their gunboats had been sent out in pieces on board the transports, and it was necessary to put them together, in the few cases in which the pieces were complete; and we suppose it was also necessary to spend a decent time in lamentations over those more frequent sets of pieces which were, unfortunately, incomplete. Moreover, they had had misfortunes. Some of their transports had gone down, and much of their ammunition had been spoilt; and, although we could help them to some extent in these minor matters, we could not find fitting pieces for their portable gunboats or spare them our artillery horses. Things were not going comfortably with our friends, and, what was much worse, it was by no means clear whether their deficiencies would be remedied in any reasonable time. The information afforded by them, in answer to an inquiry on this subject, was not very satisfactory. We all recollect the story of that thirsty Irish guest who, when asked by his host whether he would take any more wine, replied, "Sir, I shall reserve my unavailing protest until after the next bottle." The French answer suggests a still less definite postponement, for they would undertake no more than that within a week they would name some future time by which their preparations would be completed.—*Times*.

TRADE WITH WESTERN CHINA.

From an able article in the *Leeds Mercury* we extract the following:—

The *Tim's* correspondent in the Chinese Waters has well observed the fact, which the Treaty of Tien-tsin also recognised, that we are at present only scratching at the outer crust of the Chinese trade. The treaty of Tien-tsin recognised this fact in the clause stipulating for the opening up of the interior trade, by the free navigation of the river Yang-tse. This grand, navigable stream rolls its flood through the very heart of the Chinese Empire, and perhaps has conveyed more merchandise upon its waters than any other river in the world. For ages it has carried the mineral wealth of the Upper Provinces to the silk growing districts near its mouth, and has changed the silks of the Eastern for the produce of the central and western parts of the empire. But the opening of the river Yang-tse is attended with two or three serious difficulties. In the first place, the river carrying-trade is in the hands of the Chinese, and the exclusion from this lucrative employment by the introduction of British river steamers would be regarded with a jealousy sure to beget every species of opposition. In the next place, at the present time the banks of this stream are in the occupation of the rebels who have so long wasted the strength of the Chinese empire, and have lately devastated the most important and wealthiest cities on its banks. Further than this, from the western provinces of the Yang-tse to its mouth, and from the mouth of the Yang-tse to Calcutta or Rangoon, are two immense journeys, while from those same western provinces by way of Esmok over Burmah to Rangoon is a comparatively short distance. Unless we so dabble in Chinese politics as to clear the country of rebels—a task which, in all probability, we could not accomplish, even if we were foolish enough to attempt it—the free navigation of the Yang-tse seems likely to be a mere name. It is a concession the Chinese may very cheaply make, and we very cheaply accept, but a concession which can be of no practical use to either of us. Even if it could, a glance at the map will show that there are immense districts in the south-west of China which are hardly nearer to the Yang-tse than they are to our own port of Rangoon. The vast saving of cost and time which would be effected by opening a direct trade between the English province of Pegu and these parts will be obvious to everybody; and to everybody but to those whose intellects are tied up in red tape it will be obvious that an effort to open such a trade communication would be among the best directed movements of our age. But this scheme, to which no geographical difficulty is opposed, to which no political difficulty is opposed, to which no commercial difficulty is opposed, has met with an opposition of an equally formidable character, the opposition of the cold shoulder. Isaac of York was not more effectually repelled by the swine's flesh brandished in his face by the jester, than are our Chambers of Commerce by the barrier reared in the shape of this formidable joint to the progress of their favourite scheme. . . . We are glad to see that the Leeds Chamber of Commerce has returned to the charge, and has again memorialised the Government at least to ensure the most pressing part of the scheme—the part which must be secured now or must be indefinitely postponed. The making of a new treaty with China is the time, and the only time, for securing the right of trading to Esmok. Let this be obtained, and the exercise of the right and transit through Burmah may be secured afterwards. We trust the Chambers of Commerce throughout England, and especially in Yorkshire and Lancashire, will not let the chance slip, but will press the subject on the attention of the Foreign Secretary in such a manner as will compel him to take a more satisfactory course.

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

Suggestions for the insertion of information required by our subscribers will have due attention and acknowledgment.

In our present number will be found a Tabular Statement of the Exports from China, in addition to our Tea and Silk Table, but as the published statements in China contain a large proportion of packages entered as "Sundries," we intend giving another statement of the cargo, compiled from the vessels' report to the Custom House at the port of her arrival in Great Britain, as also the consignees.

A REGISTER is kept of the addresses of all persons connected with the FAR EAST, and reference can be made to the same by personal application at the office or by letter. Passengers arriving by either Overland route or sailing vessels, in England or on the Continent, are requested to forward their address, in order that inquiring friends may be informed.

Post-office orders should be made payable at the Lombard-street Office, to MORTIMER WRIGHT.

Our OFFICES in this city have been REMOVED from 337, Strand, to 7, George-yard, Lombard street, E.C. Newspapers and literary communications should be addressed to the Editor. Correspondence relative to Advertisements, Subscriptions, and the general business of the Paper should be addressed to the Manager, and not to the Editor.

Correspondents and Newspaper Publishers in INDIA, CHINA, JAPAN, and the EASTERN ARCHIPELAGO are requested to address all communications, newspapers, &c., via Marseilles, to the Editor, Box No. 70, General Post-office, London, E.C., which has been opened specially for the same.

The London & China Telegraph.

LONDON, SATURDAY, SEPTEMBER 29, 1860.

INTERPRETERS FOR CHINA.

Apropos of our recent article alluding to the want of interpreters for China is a letter in *The Times*, from a certain M.D., who complains that his son has spent a considerable portion of his time (sufficient to have enabled him to secure an Indian appointment) in acquiring the rudiments of Chinese at King's College, with a view to a student interpretership, concerning which appointments there was a sort of tacit agreement between the College authorities and her Majesty's Government; and that, although for several years four or five youths have been nominated annually by the Principal of the College, the demand has suddenly ceased, to the disappointment of his son, who finds himself, in common with several other youths, in possession of a kind of knowledge useless to him everywhere but in China. It was officially stated in a debate in the House of Commons, in July, 1857, that "Lord Clarendon considered it most important that Englishmen, who held important offices in the principal ports of China, should be thoroughly acquainted with the Chinese language; and the consequence was that a number of young Englishmen were sent out at the low salary of £200 a-year to learn the language." This was certainly a step in the right direction, but it seems, from the letter above referred to, that these calls on King's College have been discontinued, at a time when more assistance than ever is required in this department.

It may be thought that the gentlemen nominated from King's College have not fulfilled the expectations of the Government, or that the principle of selection has been a wrong one; but we find that these nominations have been made from a very small number of students; that there really was no competition; that no standard of acquirement was exacted, except in Chinese, and that this was so low, owing to the uncertainty of the student ever being called for, that few nominations could be made with satisfaction. The Government cannot expect youths to give up every other prospect in life to study Chinese upon the bare probability of getting a post worth £200 a-year, while they are offering £500 a-year to competent individuals for the Indian Civil Service. During the whole period of our intercourse with China, down to the last great war with that country in 1840, the constant cry has been the paucity of interpreters. Lord Jocelyn, the military secretary to the mission in 1841, writes: "A great misfortune to this expedition was the scarcity of interpreters; Mr. Morrison having only two assistants—Mr. Thom and Dr. Gutzlaff." And further on in his narrative he adds:—"One of the greatest difficulties and drawbacks to the expedition has

"been the want of interpreters, and it is a requisite of such vital importance for all future negotiations that some steps ought to be taken to remedy the evil," and he proposed a plan similar to that pursued by the Company in India to encourage the study of the language.

The same story is told nearly twenty years after—in 1858—by the special correspondent of *The Times*:—"One great want is interpreters; it would appear that there are only three English interpreters available for our use in all China. Mr. Wade and Mr. Parkes are worked beyond all reason; and what is more to the purpose, they toil in vain to overtake the exigencies of the public service. Mr. Alabaster, a young man of some acquirements in Chinese (a King's College nominee), is in attendance upon Yeh. There is a Chinaman named Wang, and a Portuguese named Rozario. These are the only mouths through which we can communicate with this people. If we are to have an extensive intercourse with China, we must have a large staff of interpreters, who should be confined to their duties as interpreters."

Such are the testimonies of eye-witnesses, [during two important periods of our intercourse with China. Misunderstanding has done its evil work in India, and this difficulty of communicating freely with the Chinese is likely to produce a crop of troubles ever increasing. What China needs is enlightenment on the affairs of Europe. We may frighten her into acquiescence with anything, but we shall never gain her respect until we can make her feel that it is her true interest to have friendly relations with the West, and especially with Great Britain. To effect this, we must have a staff of officials of high principle and talent, able to cope with the astuteness and duplicity of the mandarins, and to overcome the difficulties of their language. Every consul should understand the language, and every certificated interpreter should be able to speak it and write it for himself, without the necessity of passing the document through the native scholars' hands for revision. Who can say that the native assistant is not a paid agent of the nearest mandarin? The laborious preparation for the interpretership ought to be the stepping-stone to consulships. We are aware that several well-deserving men have been raised to these higher posts, but this was done only by slow degrees. Should the rule be established, it will be the more necessary to select the young student-interpreters from among those who have stood high in other languages besides the Chinese, and who have classical attainments, which may be judged of in this country. Why should not the system which is now in operation for the selection of servants for India be followed in choosing young men for service in China? A good salary should be given, and the prospect of advancement be held out, to induce men of ability to enter for examination. Every government in Europe, except Great Britain, takes the means for a supply of linguists. Russia is foremost in this, for she knows that, without proper interpreters, her interests in the East must suffer. The want of an Oriental college, where interpreters might be fully prepared for their duties, has long been felt; and we trust that some plan may ere long be formed, and obtain the support of her Majesty's Government.

THE TRANSMUNDANE TELEGRAPH.

UNDER the above novel title a comprehensive scheme has been projected and forcibly described by Herr F. J. Schneeberger, director of the Austrian Imperial Telegraphs at Vienna, of which the following is a summary:—

"The Transmundane Telegraph is an undertaking intended to be formed for the purpose of uniting the isolated networks of telegraphs either already existing or about to be formed in the different countries, groups of States, or quarters of the globe, in such a manner that direct telegraphic communication may be carried on from any one particular telegraph station in any country to any other station in any part of the world. It would thus stand in about the same relation to the present isolated systems of telegraphs as the main arteries in the human body do to the lesser arteries and veins. An accompanying diagram renders the projector's scheme perfectly plain, and shows how easily it might be accomplished."

The proposed connecting point between the European and Asiatic lines of telegraph is Saratov in Russia. From this station one branch would extend to Tiflis, and another be carried by way of Orenburg and Irkutsk to Kiachta, on the Russian frontier of China. From thence a fork would be formed, the southern wires traversing China to Peking, whilst the other would cross the new Russian territory of the Amoor, where it would again form a fork, one branch crossing the Island of Sagalien and extending to Japan, whilst the other would go more to the north, and touching at Kamtschatka, cross the

Pacific by an easy chain of short submarine cables, landing them at the different islands of the Aleutic group, and reach the Russian possessions on the west coast of North America, which might then be easily united to the existing lines in that continent through British Columbia and the Oregon territory and California. From Japan a branch is proposed to be carried down to China, connecting that country with the British East Indies and the islands in the Pacific, and another from Formosa to the Philippines and Moluccas, with a continuation to Australia. Other projected lines are from Australia along the Islands of Sunda to Singapore, and thence to Rangoon, to communicate with the great lines in Hindostan (already partly executed); from the banks of the Indus on the coast of Beloochistan to Muscat; from Tripolis to the Cape of Good Hope, from Gibraltar to Ceuta, and from Sicily to Tunis. With regard to the telegraphic communication between Europe and America, Herr Schneeberger ignores the North Atlantic route by way of Iceland and Greenland, as proposed by Colonel Schaffner, and to explore which the *Fox*, of Arctic celebrity, has lately actually sailed from our shores, but proposes a deep sea line across the Atlantic from the Islands of Bissago, on the west coast of Africa, to the Brazil coast near Pernambuco, as soon as the proper mode of manufacturing deep sea telegraphs has been discovered, till which time the line through Siberia must suffice for the traffic. South America would be placed in communication with the northern part of the continent, partly by a land wire through Central America to Mexico, and partly by a submarine line across the Gulf of Mexico from Caraccas to Cuba and Florida, with branches to the Bahamas and Leeward Islands.

In approaching the financial part of the question, we find this learned German going deeply into figures, in order to prove that the expense of the submarine lines would not cost more than 10,000 florins per German mile (about £200 per English mile), nor the land lines, with five wires each, exceed 3,000 florins per German mile (about £60 per British mile). His exact calculations of the land distances give, as a general result, an aggregate length of 9,336 German, or 43,568 English miles, which at the above figure would cost 28,008,000 florins, whilst his submarine lines would amount to 4,993 German, or 23,300 English miles, which at his estimated cost would require an outlay of 49,930,000 florins, or about £5,000,000; so that the total expense of forming the whole of the proposed line would demand a sum of 77,938,000 florins, or about seven millions sterling. In addition to this, he puts down the cost of erecting and fitting up 2,400 telegraph stations, building 1,556 houses for the inspectors, and purchasing six large steamers for employment in laying down the submarine lines, at 18,712,000 florins, making the total capital required for the execution of the project amount to 96,650,000 florins, or a little more than eight millions and a-half sterling. The annual expenses of the Transmundane Telegraph are calculated as follows:—

“Interest on the above capital at 5 per cent., 4,832,500 florins; salaries (including those of 800 directors in different parts of the world, 9,600 telegraphists, 2,400 inspectors of lines), depreciation of property, repairs of wires, posts, buildings, and steamers, 20,004,560 florins, requiring therefore a total annual outlay of 24,837,060 florins, or about two millions sterling.”

With respect to the returns that may be expected to be derived from the execution of the projected enterprise, it requires some patience to follow Herr Schneeberger through his calculations and figures; but “not to put too fine a point on it,” the following may be taken as the result. Assuming that all the lines are worked according to Morse’s system, and that all the wires are in operation for twenty hours every day, and allowing the maximum number of words to be 300 for each hour, on four out of the five wires, reserving the fifth wire for Government telegrams and service messages, it follows that 24,000 words can be telegraphed daily. We have shown already that the total length of the projected telegraph lines is 14,329 German miles, and by dividing that number into the 25 millions of florins (in round numbers), required to cover the annual expenses, the quotient gives us the sum of 1,800 florins for each German mile per annum, or 4 florins 93 kreutzers per day. We further find that in dividing the above 493 kreutzers by 24,000 (the maximum number of words per German mile daily), we obtain a quotient of $0\frac{2}{3} \frac{2}{3} \frac{2}{3}$ kreutzer for each word per German mile of $4\frac{2}{3}$ English miles, so that a telegram of 20 words from Saratov to New York, a distance of 3,000 German miles, would only cost 12 florins 50 kreutzers, or little more than a pound sterling. But, on the other hand, it would be needful to raise the tariff above

the foregoing figure, as it is scarcely to be expected that the lines, especially in the commencement, would obtain so much traffic as to be kept in constant operation for 20 hours a day. In reducing this estimate then to 10 hours daily, and raising the tariff price to $\frac{2}{3}$ kreutzer per German mile, the receipts would amount to more than 25 millions of florins, without at all producing a monopoly for a few rich people who could afford to use the Transmundane Telegraph; for at these rates a telegram of 20 words, from Saratov to New York, would cost 30 florins, a similar one between Constantinople and Canton 24 florins; one from Gibraltar to the Cape of Good Hope, 17 florins, which rates are decidedly cheaper than the tariff of any telegraphs now in operation in Europe.

After going into various details of a scientific and technical nature, with a view to abolish the relative misproportion in the expense of a telegram a short distance to that of forwarding the same to a more distant station, Herr Schneeberger proposes as follows:—

“To convoke a congress of all nations, for the purpose of drawing up and signing an international treaty, of which he gives a sketch, and the means to be taken to secure the independence and neutrality in case of war between any of the Powers through whose dominions the transmundane telegraph shall pass, and to prevent its being used, or rather abused for any interested purposes. He then goes into the question of the time required to transmit a telegram to its destination, and states that as a general rule it is not required to have relays at nearer distances than 600 German, or 2,800 English miles from each other. It is usual to send off ten telegrams in a lump, before checking them off by the receiving station and obtaining an acquittance for the same. This requires on the average three quarters of an hour for ten despatches, so that a delay of forty-five minutes is inevitable for every 2,800 English miles, and a loss of four hours and a-half incurred in transmitting a telegram from Saratov to Rio Janeiro. It would, therefore, be unquestionably possible to exchange telegrams and answers between London and the Brazilian metropolis twice during the twenty-four hours. The Transmundane Telegraph would, therefore, satisfactorily fulfil its object as regards celerity of communication, and in frequent cases put to the blush a good many of the present existing European lines, which, from mistaken economy, are not fitted up with the most recent improvements, and, therefore, drag their work heavily, without being equal to the requirements of the present day.

“At all events,” says the projector, “there can be no doubt that the Transmundane Telegraph, if organised according to the above plan, would not fail to draw within its influence sooner or later all the principal cities and the most important and extended lines of existing telegraphs, rendering the present system of administration and management wholly untenable for the future, and necessitating an alteration and improvement favourable to the different Governments and equally advantageous to the telegraphing public.”

From the foregoing particulars the reader will easily comprehend that the quantity of materials required for the execution of this magnificent project, and keeping the lines in working order, is something enormous, and will, therefore, not be surprised to hear our author put down the amount of iron wire at 25,000 tons for the land lines. Then we find amongst the further requirements for the same no less than 10,000,000 of insulators, 2,000,000 of posts, 10,000,000 of supporters for the insulators, &c. For the submarine lines there would be required 30,000 cwt. of copper wire, 100,000 cwt. of gutta percha, an equal quantity of tar, 100,000 cwt. of hemp, and 300,000 cwt. of iron wire as an outer covering for the submarine cables; and, finally, it would be needful to have 29,000 complete sets of Morse’s telegraph apparatus, 24,000 galvanic batteries, 36,000 relays, 30,000 keys, 36,000 compasses, and 100,000 lightning conductors.

The projector states that he should not be surprised to have it imputed to him that he intends to raise an agitation *à la* Lesseps, and we cannot but fully agree with him when he repudiates any comparison between his project and that of the Suez Canal. The latter is, in a technical point of view, nearly an impossibility, in a commercial sense a work of supererogation, as a financial speculation a gigantic swindle, and as a political question a welcome means of agitation in the hands of the French to sow discord among nations for their own territorial aggrandisement. On the other hand, the Transmundane Telegraph is not open to these objections, but could not fail to prove a step in the right direction, promoting the cause of humanity and civilisation, increasing the commerce of the whole world, facilitating communication between man and man, and bringing nations geographically separated from each other by continents and oceans into close and more intimate proximity, thus enabling their inhabitants to cement the bonds of amity, commerce, and science, hitherto happily subsisting among the great family of nations, and increase these relations to an extent not dreamed of hitherto, even by the most speculative enthusiasts. In these days of the most wonderful discoveries and improvements, it is not going too far to predict

the execution of a work of this sort at no very distant period, and it is but fair to give Herr Schneeberger due credit for having originated the scheme and gone into the details with all the scientific knowledge and intimate acquaintance with practical telegraphy of which he is master, perfectly aware that his projected enterprise will bear the test of most close and rigid examination, and perhaps with some small modifications and improvements he may live to see the execution of a project upon which he has evidently bestowed much valuable time, patient investigation, and may be unrewarded labour.

WESTERN CHINA—THE CHAMBERS OF COMMERCE AND THE FOREIGN OFFICE.

THE *Leeds Mercury* appears to have secured to itself the honour of leading the press of Yorkshire and Lancashire in advocating the opening of the inland western half of China to commercial intercourse with us, from the port of Rangoon, across the eastern division of our province of Pegu. In its issue of the 18th instant that journal gives another instructive leader on this great Imperial question. We say *Imperial*, because, although the so opening of Western China from Rangoon must prove greatly beneficial to British India, and more especially to its ports of Calcutta, Bombay, Kurrachee, and Madras, to the several lines of Indian railway which have their sea termini at those places, and to our provinces of Pegu, Martaban, and Tenasserim, the realisation of the project will be *mainly* beneficial to the manufacturers, merchants, and shipowners of the United-Kingdom, to whom it will open an almost boundless new field wherefrom to draw raw materials needful to our manufacturers, and, at the same time, give to them and to our merchants fully two hundred millions of new customers for our goods. The further leading article in the *Leeds Mercury* above referred to ably comments, with deserved severity, on the indolent attempt of the Foreign-office to procrastinate action in the matter until the time shall have passed when it will be possible to accomplish it through the fresh negotiations with the Government of China, made necessary by the repulse of our Minister from the mouth of the Peiho. In the course of its strictures on the Foreign-office the *Leeds Mercury* most justly observes:—

"A glance at the map will show that there are immense districts in the south-west of China which are hardly nearer to the Yant-zee than they are to our own port of Rangoon. The vast saving of cost and time which would be effected by opening a direct trade between the English province of Pegu and these parts will be obvious to everybody; and to everybody but to those whose intellects are tied up in red tape it will be as obvious that an effort to open such a trade communication would be among the best directed movements of our age. But this scheme, to which no geographical difficulty is opposed, to which no commercial difficulty is opposed, and to which no political difficulty is opposed, has met with an opposition of an equally formidable character—the opposition of the official cold shoulder. Isaac of York was not more effectually repelled by the swine's flesh brandished in his face by the jester, than are our Chambers of Commerce by the barrier reared in the shape of this formidable joint to the progress of their favourite scheme. The energy and ability of two non-official individuals" have made clear to most of our commercial men how small are the difficulties and how great the advantages of this mode of communication. But that energy and ability have not been sufficient to move the dogged resistance to all great schemes ever offered by the apathy of the Foreign-office. The arguments which convince the judgment of practical mercantile men are not sufficient to break the red tape fetters which bind down to dull uniformity the conceptions of the inmates of that venerable establishment in Downing-street.

"The memorials presented by all the Chambers of Commerce in the North of England—bodies not generally carried away on the wings of any very fantastic ideas—memorials stating fully the advantages contemplated, and modestly praying a slight activity on the part of the Foreign-office, are met, not with reasons showing why the scheme to which all practical men have given their adherence is found to be impracticable, but with the statement that 'the project does not appear to Lord John Russell to be feasible, at least for the present.' Why not feasible? Is it feasible to be expending nobody knows how many millions for the right of scratching with unimpaired nails the outer crust of Chinese commerce? Is it too expensive to send an embassy which may negotiate a treaty with the King of Burmah for the passage of goods across a strip of his territory, or too troublesome to write a despatch to Lord Elgin directing him to include the opening of Esmok, as a trading town, in the new treaty he is to settle with the Emperor of China? This is all that the Foreign-office is asked to do, and which part of the business does it find 'not feasible?' It is not asked to take a hundredth or a thousandth part of the trouble for extending our trade to two hundred millions of trading people that it has often done to gain a commercial advantage among some barbarous people or to vindicate the honour of the country from some imaginary insult. We are glad to see that the Leeds Chamber of Commerce has returned to the charge, and has again memorialised the Government at least to ensure the most pressing part of the scheme—the part which must be secured now or must be indefinitely postponed. The making of a new treaty with China is the time, and the only time for securing the right of trading to Esmok. Let this be obtained, and the privilege of the right of transit across Burmah may be negotiated for afterwards. We trust the Chambers of Commerce throughout England, and especially in Yorkshire and Lancashire, will not let the chance slip, but will press the

subject on the attention of the Foreign Secretary in such a manner as will compel him to take a more satisfactory course."

Of the further memorial which the Leeds Chamber sent up to our rulers we are able to give the substance; and we do so in the earnest hope that its thus extended circulation will cause our manufacturers and merchants forthwith to give their hearty adhesion, and active assistance, to this movement for the opening to them of Western China by that route alone by which its rich and populous provinces can be reached, and through that port which this age of railways has made their nearest and natural ocean inlet and outlet:—

"To the Right Hon. Lord John Russell, M.P., her Majesty's Secretary of State, Foreign Department.

"The Memorial of the Council of the Leeds Chamber of Commerce, through their President,

"SHOWETH:—

"That your Memorialists respectfully acknowledge the receipt of your Lordship's reply to their Memorial to Viscount Palmerston, on the subject of opening the Western Provinces of China to British trade, by an Overland route from H.M.'s port of Rangoon to Esmok; which they learn is not deemed, by your Lordship, feasible—at least for the present.

"That your Memorialists, nevertheless, desire to express to your Lordship the great importance they attach to any arrangements that may be hereafter entered into by H.M.'s Government, whereby the commercial city of Esmok, on the extreme south western frontier of China, in the Province of Yunnan, and adjoining the Kingdom of Burmah, may be included in the number of free towns and ports of the Chinese Empire.

"That your Memorialists are credibly informed that the Province of Yunnan is extensive, fertile, and thickly peopled; that it abounds with cities and towns which are connected together in all directions, and with the cities of the adjoining provinces of the Empire, by high roads, navigable rivers, lakes, and canals; and that the Province of Szechuen, north of Yunnan, is the largest, most populous, and most productive of the eighteen provinces of the Empire; yielding, with Yunnan, large quantities of various rich commercial products, suited to and needed in our home markets; including teas, silk, the precious metals, &c.

"That your Memorialists desire respectfully to impress upon your Lordship, and upon her Majesty's Ministers generally, that manifold and great advantages must eventually result to British industry and enterprise, if such a field is opened to them in the manner indicated.

"And your Memorialists, therefore, pray of your Lordship, and of her Majesty's Ministers collectively, that, in whatever negotiations may be entered upon with the Government of China on the termination of the present rupture with it, the said frontier city of Esmok, in south-western China, may be thereby constituted open and free to British trade.

"And your Memorialists will always pray.

"Signed, on behalf of the Council

"Of the Chamber of Commerce of Leeds.

"DARNTON LUFKIN, President"

Let us trust, though we confess we have little hope of it, that the routine fixtures, under every ministry, of the executive departments in Downing-street to whom it is too commonly left by their chiefs to "dispose of" such matters, may thus be shamed into taking steps to realise what the Memorialists so clearly show to be for the national good. It is, indeed, a noble opportunity to our Ministers to atone, in some degree, for their too-much and too-long wrong doing along the sea-coast of Eastern China, from Canton to the Peiho; and will prove a better check on the designs of Russia in that quarter of the world than can even our temporary occupation of Peking as conquerors, or than did our ill-advised and costly wars with Afghanistan and with Persia, to appease the jealous feelings of our Foreign-office towards Russian progress in the Far East.

Since the foregoing has been in type, we have learnt that our fears have been realised, Mr. Hammond, of the Foreign-office, having answered the above memorial, stating that:—

"It appears, however, to his lordship that much inconvenience might arise from introducing into any fresh negotiation with China, at the present time, so novel a question, as far as this country is concerned, as that of access to a city on the western frontier of the Chinese empire; and that even in the improbable case of the Chinese Government acquiescing in a proposal to that effect, the opening of Esmok to British trade would be more likely to have a prejudicial effect than otherwise on the relations between the two countries. For it would be impossible to afford adequate protection to British trade at so inland a city, or to exercise due control over British subjects; while redress for any wrong done in that remote quarter could, in all probability, only be obtained by applying pressure at places more accessible, and so placing in jeopardy the more important interests of British trade on the sea board of China."

To this string of idle objections on the part of the Foreign Secretary—for a tenable reason is not among them, at a time when he is an active party to a profuse expenditure of the national treasure and of the lives of our gallant sailors and soldiers to force a resident Minister on the Chinese Court, to force the opening of the lower Yeang-tze river, and to force the opening of ports which are close to Peking, we shall fully reply in our next number. Here we will only add that it

* Captain Richard Sprye and his son, Mr. R. H. F. Sprye.

more and more shows the necessity there is for all our commercial matters, including our Consulates, throughout the world, being withdrawn from that diplomatic department of State, and placed entirely under the President of the Board of Trade, as Minister of Commerce, and we trust the manufacturing districts will now give more attention to this, for them, most needful change.

Naval and Military.

THE P. & O. steamer *Athambra* returned to Marseilles and embarked a second detachment of French troops for Alexandria, en route to China.

The detachments, per French transports, *Ulloa* and *Eldorado*, announced in our last, arrived at Alexandria, and by last dates from that place they were waiting the arrival of a transport at Suez from China. The number of troops thus conveyed are now announced to be nearly 1,000.

From a correspondent's letter it appears that the booty money for Canton is not yet ready for distribution, notwithstanding the promises made in the House in answer to Admiral Seymour's inquiry.

The *Runnymede*, hired transport, arrived at Spithead on the 16th inst. from Hong Kong and St. Helena. The *Runnymede* has 141 naval invalids on board (no military), who were landed from the ship and transferred to the *Victory*, flagship; the cases which may require treatment will be sent to the Royal Naval Hospital at Haslar. The following officers have arrived in the ship:—Mr. Bowen, Master, R.N., Admiralty Agent, Dr. Carr, R.N., and Assist.-Surg. Bartlett, R.N., in charge of invalids; Lieut. Smith, Gilbert, and Kellett, R.N., and two warrant officers.

The *Anson*, 91 guns, was successfully launched from Woolwich dockyard, the ceremony of christening being performed by the Viscountess Sydney.

The appointment of Commanding Royal Engineer at Chatham, vacant by the promotion of Col. M. Williams to be Major-General, has been conferred on Col. J. Twiss, Royal Engineers.

Experiments have been going forward at Shoeburyness with the Armstrong and Whitworth guns, under the inspection of a special committee, against steel-plated fortifications. The results have not yet been published.

The *Army and Navy Gazette* announces that Major-General Sir George Buller will succeed General Horatio Brooke.

The report on gun-boats shows that between the years 1854 and 1857, during the pressure of the Russian war, 286 gun boats and mortar vessels were built by contract in private yards for the service of the Royal Navy, no fewer than 223 of the whole number having been ordered in the single year 1855. 134 gun-boats, in good condition, are distributed between the steam reserves, 14 are under repair, and 14 waiting inspection. A strong force of these vessels in the China Seas are doing excellent service.

The Lords of the Admiralty have made a tour of inspection of the naval arsenals and dockyards.

CHANGES AND PROMOTIONS IN HER MAJESTY'S ARMY AND NAVY.

WAR OFFICE, PALL-MALL.

12th Regiment of Light Dragoons—Cornet Thomas Edmund Houghton, from the 17th Light Dragoons, to be cornet, vice Jackson, who exchanges.

John Lindredge Elgee, Royal Artillery, to be major.

MEMORANDA.—Major William Forbes has been permitted to retire from the service by the sale of an Unattached Majority, he being about to become a settler in Nova Scotia.

Literature.

Bradshaw's Guide to India, Egypt, China, and Australia, 1860. Adams. Bradshaw's Guide Office, 59, Fleet Street.

We are always desirous of treating works of this description with indulgence. We are well aware that great care and patience, and a very considerable amount of talent, are almost invariably expended upon the compilation; that it is no easy matter to obtain strictly correct information upon points of detail, and that be the profit on a work of reference what it may, the harvest in literary reputation is always a scanty one. We are sorry to be compelled to set aside these considerations altogether in noticing the book before us. Two words characterise it—it is a "blind guide." As far as we are able to judge, the errors seem to be distributed with tolerable fairness over the whole of the work; but leaving to other critics the information referring to Egypt to India, and to Australia, we confine ourselves to that which relates to China. We take a few blunders almost at hazard, neither our space nor our patience admits of our giving a complete list. The tables of the exchanges are inaccurate; the list of consuls is incomplete and incorrect. Of the newspapers the oldest, the *Hong Kong Register*, is not mentioned. The population list, which might have been compiled from our newspaper file, is inaccurate. Of the actual banking establishments in Hong Kong, no mention is made; those gentlemen on whom Mr. Albert Smith had letters of credit "reign in their stead." Many of our readers will be amused to learn that "on landing in all parts of China, except Her Majesty's dominions, half a Spanish dollar (2s.) must be paid by each person to the Mandarin;" that the only place of amusement in Hong Kong is the bowling-green; and that A. Dixon, Esq., is "the recorder." By-the-bye, this gentleman, as agent for Bradshaw's Guides, should at least have supplied correct information concerning himself. We have mentioned only a few of the errors with which a cursory glance at the pages has made us acquainted, but our readers will doubtless deem them sufficient, and, in truth, we are weary of our task. If the publishers are unable to make this book in reality what it professes to be—a guide—we recommend them, for the sake of their own repute, to discontinue its annual publication.

LITERARY ANNOUNCEMENTS, &c.

Messrs. Longman and Co. have just ready a new work, entitled "The Dead Shot, or Sportsman's Complete Guide."—Messrs. Macmillan and Co.'s new list includes "A Life of Edward Forbes, the Naturalist," by George Wilson; and a new work "On the Origin and Succession of Life on the Earth," by John Phillips, Reader in Geology in the University of Cambridge.—Messrs. Sampson Low and Co. announce "The Prairie and Overland Traveller," by Capt. R. B. Marcey, and "A Handy Book of Patent and Copyright Law, English and Foreign," by James Fraser.—Messrs. Hogg and Co.'s list of books in the press includes "The Wits and Beaux of Society," by Grace and Philip Wharton; "Men who were Earnest, a series of Biographical Studies;" "Friendly Hands and Kindly Words;" "The Star of Hope and the Staff of Duty;" "Tales of Womanly Trials and Victories;" "The Busy Hives around us: a variety of Trips and Visits to the Mine, the Workshop, and the Factory;" and a new juvenile work, edited by Mary Howitt, entitled "A Treasury of Tales for Young People."—Mr. James Blackwood announces "Cossack Tales," by Nicholas Gogol, from the original Russian; "The Male Flirt," a novel, by Mrs. Gordon Smythies; and "New Readings of Homer," by W. W. Orr.—Messrs. Hurst and Blackett will publish immediately "Traits of Character; being Twenty-five Years' Literary and Personal Recollections," by a Contemporary; also a new novel entitled, "Money."—The proprietors of *Cassell's Family Paper* announce four short stories by Mr. Anthony Trollope, to appear in that periodical.—M. Eugene Hatin has just published, in Paris, a fifth volume of his elaborate "History of the Press in France;" embracing the exciting period of the great French Revolution.—Mr. Blanchard Jerrold is engaged on "A History of Industrial Exhibitions," under the patronage of the Prince Consort, which will be published by Messrs. Allen, of Leadenhall-street, in November.—Messrs. Routledge's "Christmas Book" for 1861 will be published in October. The subject is the "Collected Poems of Eliza Cook," printed on tinted paper, and illustrated by Gilbert.—Mr. Sidney Smith Dickens, who figures in the list of young gentlemen who have lately passed as naval cadets at Portsmouth, is the son of the eminent author, Mr. Charles Dickens.

London Gazette.

A Treasury warrant in the *Gazette* of the 14th inst. directs that on every letter not exceeding half an ounce in weight, transmitted by the post direct by British packet-boat between Gibraltar and Hong Kong or Singapore, without passing through the United Kingdom, there shall be charged and taken in lieu of any rates of postage heretofore chargeable on such letters, a uniform British rate of 1s. (in which the Red or S-a Persian Gulf packet-rate is included). The various rates for letters exceeding half-an-ounce are also given. The term "by the post" used in the warrant shall include the conveyance through Egypt. The warrant is to come into operation on the 1st day of December, 1860.

Correspondence.

(To the Editor of *The London and China Telegraph*.)

SIR,—As a late resident in China my impressions on our present relations with that country are these:—

If China will really be opened—and this is to be the *last* war, instead of only the *third*—we may be satisfied. But I doubt it, so long as half measures prevail. Asiatics are intensely suspicious, and nothing but a steady, unflinching posture will lead them to deal honestly. As long as we make war in the north or in the south, and act as if at peace everywhere else, we shall not succeed. The acts of war should be universal and simultaneous, if possible. And when the Chinese are brought to terms substantial guarantees must be required for their behaviour. International law is beyond the orbit of their intelligence, and European diplomacy a myth to them as it is, alas! too often to ourselves. We want to establish or extend commercial relations with them upon just and reasonable principles to our mutual advantage. It has been said that the Empire is tottering to its fall; we should therefore abstain from weakening its influence over its people. But is this the policy of European States? Does Naples meet with this kind of sympathy? And such dungeons as were disclosed during the civil wars in the Kingdom of the Two Sicilies may be found in effect the same in the Far East; only their distance from the civilisation of the West, hides much of the abomination which is practised by Chinese officials. But the danger of breaking up the Empire is not so imminent; the people of China, with the exception of the fanatics who have almost depopulated whole provinces, are but slow in revolutionary movements, and the presence of a European army as an ally to the Chinese Emperor would be an effectual sedative to such feelings, even if they were entertained. Let all alarm on this score be dismissed, and a vigorous policy be adopted. While rashness, such as that of Admiral Hope, in the Peiho, last year, is to be avoided, delay is to the Chinese a mark of weakness, and will be well improved by them. Above all, no evasive replies or mock apologies should be received.

Your obedient servant,

SENATOR.

Jerusalem Coffee House, City, 16th Sept., 1860.

Monetary and Commercial.

It is gratifying to perceive that Government are willing to acknowledge the services of the mercantile marine. The British Consul at Bangkok lately informed our Government of the services rendered by Captain MacMillan, of the British steamer *Sir James Brooke*, belonging to "The Borneo Company, Limited," in rescuing the captain and crew of the Hamburg barque *Helene* from the hands of the Cochinchinese. It appears the vessel was bound from Saigon to Hong Kong, and on the 28th of June struck on a rock a few miles to the eastward of the Britto Shoal, on the coast of Cochinchina, and became a wreck in a few minutes. Part of the crew found shelter in a junk anchored off the coast, from which the captain of the *Sir James Brooke* rescued them just in time to save them from becoming victims to the Cochinchinese, who offer head-money for all Frenchmen, and are not very correct in making out the difference between one European and another. The following is an extract from the letter of the Secretary of the Committee of Privy Council for Trade, addressed to Captain MacMillan:—

"My Lords desire me to express to you their sense of the humane services you have rendered to the unfortunate persons in question, and to state that they have forwarded a report to the Secretary of State for Foreign Affairs, who will, in all probability, bring the same to the notice of the Hanseatic Minister."

The *Queen Victoria*, one of the screw steamers intended to convey the Rangoon and Singapore cable, has been lengthened, and will be shortly ready to take on board her portion of the cable, which will be 1,300 miles in all. The remaining portion will be conveyed in two screw steamers, building specially for

the purpose, by Messrs. Palmer, of Newcastle, which will, it is expected, be ready in November. The rumours in reference to a stoppage in the laying of this line, in consequence of the inoperative condition of the Red Sea Cable, are incorrect; the vessels will all be despatched in November by the contractors, Messrs. Glass, Elliot, and Co., under the supervision of the Government engineers, Messrs. Lionel Gisborne and Ford.

In consequence of the legal proceedings instituted by Messrs. R. S. Newall and Co., the contractors, against the Red Sea Telegraph Company, the under running of the cable has ceased, and the steamer *Imperator* is now on her way home. We have reason to believe that these differences will shortly terminate, and that the operations for repairing the cable will soon be resumed. The earliest period, however, which the cable could be put in working order must be six months from the present time.

The *Comptoir d'Escompte* (the National Discount Company of Paris) is about to establish a branch at Shanghai. This company is the largest discount establishment in France (the Bank of France only excepted), but an Englishman acquainted with its resources is surprised to hear of its undertaking operations at such a distance. On the 31st August last its capital was £3,314,960. We may test this by comparing it with the funds of Lombard-street. The Governor of the Bank stated before the committee of 1858—"We knew that one broker had five millions of deposits, and we were led to believe that another had between eight and ten millions. There was one with four, another with three and a-half, and a third above eight." It would certainly appear that the *Comptoir d'Escompte* ought to have full scope for all its available means nearer than Shanghai. It is true that it is to add £800,000 to its capital; but how insignificant.

Two lines of land telegraph from the Atlantic to California are now in rapid progress. The most northerly, which passes through Kansas and Nebraska, is expected to be so far completed in November that the remaining gap will be only about 1,000 miles. The other, which proceeds southward through Missouri and Arkansas, is also considerably advanced, and previous to its entire completion the breaks will be filled by a pony express. It is thought that before the end of next year one, if not both, of the lines will be in perfect operation. If at that time we are without a submarine connection with the East, we may then look for our speediest China news to arrive occasionally *via* New York.

The amount of bullion by the last mail is as follows:—For Mauritius, gold, £30,000; Madras, silver, £7,201; Calcutta, silver, £6,200; Penang, silver, £1,820; Singapore, silver, £4,650; Hong Kong, silver, £60,195; Shanghai, silver, £10,402.

ARTICLES OF IMPORT.

TEA.—The system of "unreserved public sales," which has so long been an incubus on the market, has, during the past fortnight, reached its climax; no less than 19,400 packages out of 30,300 declared for the 19th inst. having been offered in this manner. The result has been another serious fall in prices, without stimulating the demand; and unless this system is nearly, if not altogether, abandoned, we see no prospect of a revival of business by private contract, the large wholesale dealers being unable to purchase freely under such repeated and serious falls in prices, consequent on this mode of realising teas. The transactions in good common Congou have been very small, and prices remain nominally 1s. 3d. to 1s. 3½d. per lb. Low and broken leaf Congous have been heavy of sale at a decline of ¼d. to 1d. per lb. At the sales of the 19th inst. Flavoury kinds of Congou went 1d. per lb. lower. Fair to good Ho-Hows, Ning-Chows, and second class Honan, Monings and Wopaks, ¼d. to 1d. per lb. lower. Good and fine Kaisows and Monings 1d. per lb. lower, and Tayshan Congous, 1d. per lb. lower. Oolongs sold at a decline of 2d. per lb., also Foo-chow-Foo scented orange Pekoes. Scented Capers and orange Pekoes of Canton make about 1d. per lb. lower. Souchongs and flowery Pekoes showed no material alteration. Green Teas remain much as before. The very limited amount of business precludes us entering into detail.

SILK.—Little or no alteration in the market, which has been quiet, and the prices without change. The current quotations are as follows:—

	s. d.	s. J.	s. d.	s. d.
Tsatlee, No. 1 and 2	24 6	24 0		
" No. 3 and 4	23 0	24 0

Japan	18 0	20 0	22 0 to 30 0	
Yuenfa	14 0	24 6		

SUGAR.—Foreign sorts have participated in the general languor that has prevailed since our last; several parcels have been brought to auction, but only a small proportion disposed of, namely, 7,834 bags Clayed Manila, which, meeting low offers, were withdrawn at 38s. to 39s.; 3,270 bags China, mostly taken in, low and middling yellow at 39s. to 41s. 6d., but greater part afterwards placed 6d. per cwt. below these rates; 2,196 bags Siam above half sold, gray and middling white, 43s. to 46s.; good middling and good white bought in at 46s. 6d. to 47s. The business reported by private contract embraces 1,470 baskets Java, at 44s.; 800 bags Manila, at 38s.

COFFEE.—The demand has continued good. Plantation Ceylon, low middling, 70s. 6d. to 72s.; privately, however, about 260 casks have changed hands at extreme rates. Native is still in request, but in the absence of public sales the transactions are restricted to small quantities by private contract, at an improvement of 1s. per cwt., namely, good and fine ordinary, 64s. to 65s.

RICE.—Owing to the change in the weather rates have again advanced. Large sales of Rangoon and Necranzie at 10s. to 11s. 3d. Ten cargoes afloat have been placed at 11s. to 11s. 6d.

PEPPER.—At public sale 2,038 bags Singapore were about two-thirds realized at steady prices, fair black, 4½d. to 4½d.; also 107 bags Cochin at 4½d.; but, in expectation of more liberal supplies, little business has been done privately. 548 bags Singapore white, at auction, were nearly all disposed of at prices slightly in the buyers' favour, the bulk, middling quality, at 6d. to 6½d., a few good bold fetching 6½d. to 6½d.; 30 bags fair Penang also, brought 6½d.

SAGO.—Small sales at 16s. for fair medium.

TAPIOCA.—Sales of fine white Penang at 6d. to 6½d.

SPICES.—Cinnamon, market dull, at last quotations; Cassia lignea, in fair demand, and sales at 90s. for first quality; Cassia buds, firm at 170s. to 180s.; Cloves, sales of Penang at 12½d. to 16½d.; Mace, sales of Penang at 1s. 5d. to 2s. 1d.; Nutmegs, sales of over 300 cases at 4s. to 4s. 1d. for fine bold, and 1s. 3d. to 2s. 7d. for ordinary.

HEMP.—Market firm, at £21 to £25; 257 bales were withdrawn at auction.

COTTON.—Large sales, and rates firm at 2½d. to 5½d. for Surat.

JAPAN WAX.—No sales.

TOBACCO.—No change since our last.

TIN.—Market firm, demand limited, at 136s. to 137s. for Banca, and 131s. to 132s. for Straits. Antimony ore, £16. 2s. 6d.

MISCELLANEOUS.—India-rubber: Large sales have been effected, at 1s. 11d. to 2s. 1d.; demand fully supplied. Camphor: 230 cases at auction were retired at 140s. to 150s. Sapan-wood: No sales reported. Soy: Nominal, at 3s. 6d. to 4s. 3d. Rhubarb in more demand, at an advance of 2d. Mother o'pearl shells: No sales, market firm. Tortoiseshell: Market inactive; small sales of Singapore, at 15s. to 20s. 6d. Star annised dull, at quotations 78s. to 83s. Stielac: Sales of Siam at 75s. to 77s. Gum Benjamin: Market very flat, at last quotations. Rum: more demand, and sales at 1s. 7d.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh Bars, £6 2s. 6d. to £6 12s. 6d.; nail rods, £6 15s. to £8; hoops, £9 to £9 10s.; sheets, single, £9 10s. to £10; Staffordshire bars, £8 to £8 10s.; rails, £5 7s. 6d. to £7.

STEEL.—Swedish keg, £18 10s. to £19 10s.

COPPER.—Sheet and Sheathing, 11½d.; yellow metal, 9½d.

TIN, 136s. for block; 137s. for bar. Tin plates, best charcoal, I.C., 31s. to 32s. per box.

LEAD.—English Pig, £21 5s. to £21 10s.; shot, patent, £25; sheet, £22 5s. to £22 7s. 6d.; Spelter, £20 5s.; Zinc, English Sheet, £26; Quicksilver, £7 per bottle.

On Hong Kong, ditto	4s. 9d.	Do. 4s. 3d.

MANCHESTER MARKETS.

The purchases for China are more restricted, but the sales made in both shirtings, T-cloths, and in 16's to 32's water twist for that quarter have been sufficiently extensive to give considerable steadiness to prices. The demand for other markets is of a pretty general character, and in longcloths, T-cloths, and the narrower makes of printing cloths, the amount of business during the week has not been inconsiderable. For yarns, in addition to a considerable business for China, there have been some good orders given out for home consumption, especially in warps, and prices are well sustained.

COMMERCIAL POSTSCRIPT.

CITY, SATURDAY AFTERNOON.

The market for the new season's tea has opened at 1s. 11d. to 2s. 3d. Business not active.

From FOOCHOW-FOO to LONDON, per "FALCON," entered Sept. 28.—10,538 chests, 3,184 half chests, 3,726 boxes, 373 packages tea, order; 3 boxes merchandise, M. Blow; 6 packages merchandise, 10 cases ginger, Master; 2 boxes ginger, M. Hedley.

ARRIVALS NOT INCLUDED IN TABLE.—Sept. 26, Falcon, from Foo-chow-foo, supposed to have arrived off Plymouth; Aug. 4, at St. Helena, from Manila, Oshawa; from Akyab, Shelburne; 5, Oriental; 8, from Rangoon, Ocean Child; from London for China, Lyemmoon (s.); 17, Orion, from Siam; 25, Borneo, from Penang; 26, Napoleon III, from Singapore; 27, Gokunda and Pilgrim, from Penang; 22, Rata Kearney, from Akyab. 4, at Havana from Macao, Alexandre Delphine; Aug. 4, at Valparaiso, from Hong Kong, Carn Tual; 17, Mandarina.

The crews of the Typhoon and Borderer, from Akyab, abandoned at sea, arrived at the Cape.

DEPARTURES.—Sept. 24, from Deal for Shanghai, Coleroon and Dirk Arnold.

A special meeting of the Chartered Bank of India, Australia, and China was held yesterday, Mr. Mitchell, M.P., in the chair, when a dividend was declared for the half-year ending in June, at the rate of 7 per cent. per annum, free of Income-tax. After providing for this distribution, a balance of profit will remain from the operations of the past six months to be added to the £4,500 brought forward from the previous account. With regard to the general position of the bank, it is said to be highly satisfactory, considering the severe competition to which it has been exposed. No new branches have been opened, because it has not been thought desirable, but a gentleman has been appointed to visit each of the existing institutions, and to inspect the accounts.

IMPORTS FROM CUSTOM HOUSE MANIFESTS.

From MANILA to LIVERPOOL, per Britannia, entered September 11,;—41 chests indigo—Borneo and Co.; 20 tons sapan wood, 9,150 bags sugar, 3 cases tortoiseshell, 755 bales hemp—order.

From MANILA to LIVERPOOL, per Everetta, entered September 13:—18,756 bags sugar, 454 piculs sapanwood, 1,033 bales hemp, 2 bales fish maws—order; 6 bales isinglass—Parr and Co.; 7 boxes, tea, 2 cases preserved ginger—Master.

From WHAMPOA, at LONDON, per Sir Ralph Abercrombie, entered September 15:—2,695 chests tea, 3,562 half-chests and 9,340 packages tea, 75,000 canes, 150 packages, 410 rolls of matting, 95 packages canes, 2 boxes Japan ware, 2 tubs China ware, 88 packages sundries, 9 packages China ink, 4 boxes silks—order; 564 chests tea—Hath and Co.; 525 rolls matting—Forbes and Co.; 19 packages sundries—Smith, Elder and Co.

From BATAVIA to LONDON, per Fleda, entered September 18:—2,113 bags rice—Hambro and Son; 348 bags India-rubber—Sieveking and Co.; 2,711 bags rice, 323 bundles cassia vera, 100 cases gum dammar, 7 boxes sundries 1,290 hides, a quantity of sapan wood, 1,265 bundles rattans—order.

From SARAWAK and SINGAPORE to LONDON, per Wildflower, entered Sept. 17:—329 tons antimony ore, 1,021 boxes and 674 bags sago-flour, 102 packages gutta percha, 18 baskets gum dammar—R. and J. Henderson; from Singapore, 1,994 bags pepper—Thornton and Co.; 303 bags pepper—M. Berkeley and Co.; 24 cases spices, 400 bundles canes, 67 baskets India-rubber, 83 bundles cow-hides, 1 case picture—order; 8,321 pieces satinwood, 87 baskets gutta percha, 567 bags pepper, 1,003 buffalo hides—R. and J. Henderson; 1 bundle cow-hides—Chalmers and Co.

From HONG KONG to LONDON, per Alchymist, entered Sept. 17:—435 half-chests tea—Reiss and Co.; 757 chests tea—order; from Macao, 650 half-chests tea—order; from Canton, 809 chests, 2,625 half-chests, 11,103 boxes tea, 14 boxes silks—order; 670 chests tea—Forbes and Co.; 35 half-chests tea—A. Capel and Co.; 2 half-chests tea—A. Casella; 43 chests, 1,322 half-chests tea—Reiss and Co.; 5 cases preserved ginger, 1 quarter-chest tea, 3 cases sundries—Master.

From SINGAPORE to LONDON, per Hiawatha, entered September 19:—3,329 bags sugar, 290 boxes gum dammar, 16 baskets, 17 bags India rubber, 126 cases, 8 packages merchandise, 1,277 bags white, and 1,561 bags black pepper, 9,969 blocks, 91 baskets gutta percha, 186 slabs tin, 300 bundles Malacca canes, 296 cases jamboge, 86 cases nutmegs, 8 packages, 2 boxes sundries, 377 bags coffee, 24 cases shells, 180 Japan brooms, 5,075 pieces sapanwood, 1,030 buffalo hides, 1 case a piano, 425 boxes gum, 185 cases camphor—order; 636 bales gambier, 98 bags black pepper—W. Berkeley and Co.; 12 cases merchandise—G. H. and J. F. Wulff; 6 cases merchandise—Clavel and Co.; 48 baskets India rubber—Drake and Co.; 21 cases gum benjamin—Smith, Sundina and Co.; 8 cases gum benjamin, 1 case shells, 5 cases nutmegs, 2 bundles rattans, 1 case preserves—De Clermont and Co.; 98 bags sugar—Fraser and Co.; 1 case sundries—W. Napier; 3 cases sundries—Grindlay and Co.; 1 package Penang canes—W. Douglas.

From SINGAPORE to LIVERPOOL, per Glengariff, entered September 15:—465 bags black, 203 bags white pepper—R. and J. Henderson; 939 bags black, 365 bags white pepper, 66 boxes, 20 bags shellac, 4,765 pieces sapan-

wood, 1,452 bales gambier, 2 boxes segars, 2,570 boxes sago-flour 86 bags coffee, 100 cases, 100 boxes pearl sago, 898 bags sugar, 44 boxes tapisca—order.

From MANILA to BRISTOL, per Joaquina Victoria entered Sept. 17:—15,229 bags sugar, a quantity of sapanwood—Beloe and Co.

From SINGAPORE to LIVERPOOL, per Endymion, entered Sept. 17:—208 bales gambier, 98 bags pepper—R. and J. Henderson; 647 bales gambier—Leech and Co.; 3,224 bags sago flour, 1,684 bales, 5,695 bales gambier, 360 bags coffee, 176 slabs tin, 1,016 buffalo hides, 593 bags pepper, 3,578 pieces sapanwood, 58 boxes nutmegs, 15 boxes mace—order.

FREIGHTS AND CHARTERS.

A good demand has existed for tonnage for coals to India and China, advanced rates having been paid in some cases. For Galie business has been done at £38, 10s., and for Hong Kong 6s. from Cardiff is freely offered. For the berth there is a fair request for tonnage at about 70s. per ton N.N.M. for China, 60s. Bombay or Calcutta.

Rates of freight current for vessels on berth to Shanghai, 60s. per ton dead weight; 45s. per ton of 40-feet measurement. To Hong Kong, 45s. to 50s. weight, 45s. measurement. To Singapore, 35s. to 40s. weight or measurement. To Manila, 35s. and 40s. To Japan, £5 weight, 90s. measurement. To Batavia, 50s. weight, 40s. measurement. At the United States: to Shanghai, coal and measurement goods, \$10 to \$12.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Nominal quotation for Jedda, 70s. to 80s.

At Hamburg, for Batavia and Singapore, 40s. to 50s. China and Manila 50s. to 60s.

CASUALTIES.

The Oshawa, from Manila to Liverpool, with rudder head gone, decks swept, &c., was seen off the Cape of Good Hope, by the Gauntlet, Inglis, which had arrived at D. merara; the Oshawa would try for St. Helena.

The Lavinia, Cannel, from London for Siam, put into Rio Janeiro, 10 Aug., leaky, she has been surveyed and recommended to discharge part of her cargo, and to be caulked from the copper upwards.

The Hero, Young, from Cardiff to Manila, which put into Cadiz, 10 Aug., very leaky, arrived at Gibraltar 7 Sept. leaky, and would have to discharge.

The Sir Charles Napier, of Gelfe, from Sourabaya, left St. Helena June 19, for Amsterdam, and has not since been heard of.

PASSENGERS INWARDS.—Per *Nederland*, Capt. Hookstra, at Nieuwe. Deep, from Batavia: the Count and Countess Bentheim-Tecklenburg-Rheda, Major and Mrs. van Bloemen-Waanders and family, Major D. Oosterhout, Captain van Zuylen, Lieut. P. Ten Borch, R.N., Mr. S. Musschenbroek, Mr. Greaves, Mrs. van Hoek, and J. Heyning, Jun. Per *Graaf Dirk III*, Captain Rotgans, at Brouwershaven, from Java: Miss Albert Etienne, and Mrs. Merdassa. Per *Paul Johan*, Captain de Kooy, at Amsterdam, from Batavia: Mr. and Mrs. Simons and family, Joubert and daughter, Block and three children, Mr. and Mrs. Hurrelbrink and child, Mrs. Diebitz, child, and servant. TESTIMONIAL RECEIVED BY

TUCKER AND SON,

MANUFACTURERS OF IMPROVED INDIAN LAMPS.

"Messrs. TUCKER & SON.

"Edinburgh, Sept. 11, 1856.

"Sir,—I have much pleasure in bearing my testimony to the excellence of the Lamps supplied by you to me when in India last year. They give a brilliant light, are not affected by the punkah, and are in every way suited to the Indian climate. In short, they are the best lamps I have seen in the country.

(Signed)

"A. Ross, Bengal Civil Service."

NOTICE TO PASSENGERS BY THE OVERLAND ROUTE via EGYPT.

PHILIP ZECH, Proprietor of the two well-known Hotels in Alexandria, the Hotel d'Europe, and the Peninsular and Oriental Hotel, begs to inform his friends, and Travellers in Egypt in general, that he has purchased SHEPHEARD'S HOTEL in CAIRO, which will still continue to bear the same name; and in returning thanks for the extensive patronage enjoyed by his two houses in Alexandria, hopes that the preference may likewise be extended to his house in Cairo, which will be managed in first-rate style, and in a manner intended to give every satisfaction to its frequenters, both as far as table, wines, internal and external service are concerned. Many alterations and ameliorations are being carried out at the present moment.

Curtis on Manhood.—New Edition.—A Medical Essay on Nervous Diseases.

Just published, the 120th thousand, with numerous plates in a sealed envelope, price half-a-dollar.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE, with plain directions for perfect restoration to health and vigour. By J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

CONTENTS:

INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatorrhoea and Impotence; Early Vicious Indulgences; Dangers of Neglect.

CHAPTER III.—A Review of the various Disqualifications of Marriage—whether resulting from the Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection.

CHAPTER IV.—The Author's plan of Treatment Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhoea and other Urinary discharges by microscopic examination.

CHAPTER V. and VI. on the modern Treatment of Gonorrhoea and Syphilis.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

"We feel no hesitation in saying, there is no member of society by whom the book will not be found useful—whether such person hold the relation of Parent, Preceptor, or Clergyman."—Sun.

Mr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by letter, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Mr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty Years; nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINNAM, QUEEN'S ROAD, HONG KONG.

FACILITIES IN BOOK-KEEPING

DRAPER'S PATENT SEMI-DETACHED DOUBLE REFERENCE INDEX effects great saving of time, and expedites posting. All descriptions of Account Books fitted with Patent Index. Account Books, Copying Machines, and Stationery supplied, of the best quality, Wholesale and for Exportation, 5, Tower-street, London. Sample of Patent Index can be seen at Mr. GEORGE HOLMES', Hong Kong. Sample Book of Papers, with prices, forwarded on application.

LEA AND PERRINS' CELEBRATED WORCESTERSHIRE SAUCE.

PRONOUNCED BY CONNOISSEURS TO BE THE ONLY GOOD SAUCE, AND APPLICABLE TO EVERY VARIETY OF DISH.

EXTRACT OF A LETTER from a MEDICAL GENTLEMAN, at Madras, to his Brother, at WORCESTER, May, 1851

"Tell LEA and PERRINS that their Sauce is highly esteemed in India, and is, in my opinion, the most palatable as well as the most wholesome Sauce that is made."

EXTENSIVE FRAUDS.—Lea and Perrins having discovered that several of the Foreign Markets have been supplied with spurious imitations of their "Worcestershire Sauce," the labels of which closely resemble those of the genuine Sauce, and in one or more instances with the name of L. and P. forged, they have deemed it their duty to caution the public, and request purchasers to see that the names of Lea and Perrins are upon the Wrapper, Label, Stopper, and Bottle.

L. and P. further give notice that they will proceed against any one who may infringe upon their right, either by manufacturing or vending such imitations, and have instructed their correspondents in the various parts of the world to advise them of such infringements.

Wholesale and for Exportation by the Proprietors, Lea and Perrins, Worcester; Crosse and Blackwell, and other Oilmen and Merchants, London.

JEAN MARIA FARINA Cologne, London, 2, Salters'-hall-court, and 16, St. Swithin's-lane, E.C., begs to commend his Stock of **EAU DE COLOGNE** and **LAVENDER WATER** in Bond—Double, at 9s.; Single, at 5s. 6d. per dozen. Duty paid—Double, at 21s.; Smalting Rock, Moselle, Champagne, and Claret, in Bond and Duty Paid.

FOR FAMILY ARMS.—Send Name and County to the Royal Heraldic Studio and Library; in a few days you will receive a Correct Copy of your Armorial Bearings. Plain Sketch, 3s.; in Heraldic Colours with written description, 6s.; Large Size, 12s. Family Pedigrees, with original grant of Arms, to whom and when granted, the origin of the name, all traced from authentic records, fee Two Guineas. An Index, containing the Names of nearly all persons entitled to use Arms, as extracted from the British Museum, Tower of London, Herald's College, &c. &c. The Manual of Heraldry, 400 Engravings, 3s. 6d., post free, by T. CULLETON, Genealogist, Lecturer on Heraldry at the Mechanics' Institute, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C. The Heraldic Colours for Servants' Liveries, 5s.

STAMP YOUR OWN PAPER.—with Arms, Crest, Initials, or Name and Address, by means of CULLETON'S PATENT EMBOSSED PRESS, 15s. Best Make 21s. Any person can use them.—T. CULLETON, Die Sinker to the Board of Trade, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

WEDDING CARDS.—For Lady & Gentleman—5s. each. 50 Embossed Envelopes, with Maiden Name printed inside, 13s. Visiting Cards—A Copper Plate engraved in any style, with name and 50 Card, printed for 2s. post free. N.B.—All orders executed by return of post, for stamps or cash. T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

FAMILY ARMS, &c., Emblazoned for Painting on Carriages or Needlework, 6s.; Best Style, 12s., Gothic and Modern Monograms Designed, 8s. Arms Quartered, Impaled, and Painted on Vellum, according to the laws of Heraldry. By T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

ARMS, CRESTS, &c., Engraved in the Best Style. Crest on Seals or Rings, 7s. On Steel Die, 6s. Initials, 1s. 6d. per Letter. Book Plate, Engraved with Arms, 10s.; or Crest, 5s. Postage and Registered Letter, 1s. extra.—T. CULLETON, Heraldic Engraver by Appointment to the Queen, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

SOLID GOLD RING (18 Carat, Hall Marked), Engraved with Crest, 42s.; Large Size, for Arms, 75s. On receipt of P. O. order the size will be sent to select from.—T. CULLETON, Seal Engraver, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

THE PEN SUPERSEDED.—Mark your Linen. The best and only method of Marking Linen, Silk, Stockings, Coarse Towels, or Books, so as to prevent the Ink washing out, is with CULLETON'S PATENT ELECTRO-SILVER PLATES. By means of this novel invention a thousand pieces of linen can be marked in a few hours. Initials, 1s. each; Name, 2s. 6d. Set of Moveable Numbers, 2s. 6d.; Crest Plate, 5s., with the necessary directions for use. Post free. Certificate from the eminent Dr. Sheridan Muspratt, F.R.S., Professor of Chemistry, &c. "Several trials with Mr. Culleton's Patent Electro-Silver Plates, for marking linen, induce me to pronounce them excellent; the letters are beautifully marked in a deep black colour, without blotting, and after a long boiling with either potash or soda, they remain unaltered. Other plates which I tried decomposed the ink, and in many cases burned holes in the linen. I can testify Mr. Culleton's Plates are incorrodible, and will not hurt the finest fabric.—(Signed) "SHERIDAN MUSPRATT, College of Chemistry, Liverpool.

"May, 15, 1854."
All orders to be sent to the Patentee and Sole Maker.
T. CULLETON, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.
All Orders executed by Return of Post.

CAUTION.—FRENCH, of Royal Exchange, London, Chronometer, Watch, and Clock Maker, established 1810, has NO CONNECTION whatever, and never had any, with the CITY OBSERVATORY, carried on by Mr. Jacob French, since 1854, as jeweller and watchmaker. Mr. Jacob French sold his premises in July last to Mr. Bennett, of 64 and 66, Cheapside. The words "Late French" in his advertisements being calculated to mislead the public, renders this caution necessary.

PIESSE & LUBIN'S
INVIGORATING, COOLING,
REFRESHING
HUNGARY WATER.
"I am not surprised to learn (says Huxley) that Grators, Clergymen, Lecturers, Authors, and Poets, give it the preference, for it improves the memory."
ESPECIALLY THE SCENT FOR WARM WEATHER.
A case of six bottles, 10s.; single samples, 2s.
2, New Bond St., London.
Copyright.—Entered at Stationers' Hall.

To prevent disappointment, be sure to ask for Piesse and Lubin's Perfumery.

HOLLOWAY'S PILLS AND OINTMENT.
—CONFIDENCE.—To expect, for merely asking, the confidence of another would be unreasonable, but for the other to disbelieve his own senses would be madness. To discredit the celebrity obtained by Holloway's medicines in all parts of the world is to doubt the united testimony of thousands. Their virtues have been tested for twenty years, during which period no single charge has been made against them. No invalid, after a fair trial, has found them fail to relieve his pain or completely cure his disease. The combined action of the Ointment and Pills in all disorders is too irresistible to be withstood. All who try them once award them their entire confidence, and are never deceived.

ASTOR HOUSE. SHANGHAI.

THIS PRIVATE HOTEL is admirably suited for Commercial Purposes. It is between the English and French Legations, and commands an entire view of the river.

JOHN GOSNELL AND CO.'S PERFUMERY, PATRONISED BY

HER MAJESTY and the ROYAL FAMILY.

Among the celebrated articles for the Toilet prepared by J. G. and Co., the following are of the choicest kind, and universally admired:—

JOHN GOSNELL and Co.'s COURT PERFUMES.—Queen Victoria's Bouquet, The Bride's Bouquet, Jockey Club, Guard's Own, Ess Bouquet, Military, Royal Yacht Club, New Perfume—Extract of Flowers, Eugenie, Napoleon III., Frangipanni, Wood Violet, Opera Bouquet, &c.

JOHN GOSNELL and Co.'s FOUNTAIN PERFUMES for the BALL-ROOM.—A most elegant and useful invention, which cannot fail to be appreciated by the Ladies.

JOHN GOSNELL and Co.'s TREBLE DISTILLED LAVENDER WATER possesses in the highest degree the full fragrance of the flowers.

JOHN GOSNELL and Co.'s REAL OLD BROWN WINDSOR SOAP.—A Toilet Soap of the finest quality and very superior fragrance. It differs so widely in composition from the ordinary Alkaline Soaps, that its frequent use is highly beneficial in removing all harshness and redness of the skin.

JOHN GOSNELL and Co.'s MOELLINE, GOLDEN OIL, for the Hair.

JOHN GOSNELL and Co.'s INSTANTANEOUS HAIR DYE.—The only Hair Dye which produces a good natural colour with perfect certainty, and with the least possible trouble.

JOHN GOSNELL and Co.'s PATENT TRICHOSARON.—The obvious utility and improved construction of the Trichosaron Hair Brush adapt it for general use, and render it the most suitable Hair Brush for the Toilet. Sold by all Perfumers, Chemists, &c.

JOHN GOSNELL and Co.'s STEREOESMIE TOOTHBRUSHES, highly recommended by the most eminent Dentists.

JOHN GOSNELL and Co.'s ESSENCE OF GINGER.

Merchants and Shippers supplied on liberal terms.

12, THREE KINGS COURT, LOMBARD-STREET LONDON.

OVERLAND ROUTE.

COMMUNICATION by STEAM TO INDIA, AUSTRALIA, &c., via EGYPT.—THE PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY book Passengers and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers, leaving Southampton on the 4th and 20th of every month. NOTICE TO ADVERTISERS ADDRESSING AUSTRALIAN INTERESTS.

IN consequence of the Alterations in the Mail Service from Australia, THE LATEST DAY for receiving General Advertisements for the

"AUSTRALIAN MAIL."

(THE LEADING ORGAN FOR SUCH ANNOUNCEMENTS.)

Will in future be the 9th of the month. Advertisements can be received through the regular Advertisement Agents till the Evening of the 10th.

Ship Advertisements will be inserted if received on the Morning of the 11th.

OFFICE—5, GROCERS' HALL COURT, POULTRY.

By Appointment, and Royal Letters Patent.

JOHN BRACHER (late WILLIAM MARR & SON), Inventors, Patentees, and Manufacturers of the strong WROUGHT-IRON FIRE and THIEF-PROOF SAFES, CHESTS, STRONG-ROOMS, IRON DOORS and FRAMES, 11, Cannon-street West, corner of Queen-street, facing Southwark Bridge, and Vulcan Safe Works, Skin-yard, Bankside, Southwark, London. To the New Houses of Parliament, Her Majesty's Honourable Board of Ordnance, National Debt Office, Public Buildings, &c.

Full value given in exchange for old Safes. The attention of Corporations, Bankers, Architects, Solicitors, Commercial Houses, and all persons having the care of valuable property, is drawn to the superior quality of his Patent Fire-proof Safes and Chests.

TWINBROW'S DANDELION, CAMO-

MILE, and RHUBARB PILLS, an effectual cure of indigestion, all stomach complaints and liver affections. In cases of constipation these pills never fail in producing a healthy and permanent action of the bowels, so that in a short time aperients will not be required, and, being quite as innocent as castor oil, they may be given to children.

From Dr. Dick, Lansdown-terrace, Kensington. "Sir,—Send me another bottle of your Dandelion, Camomile, and Rhubarb Pills for my own use. I lose no occasion of recommending these Pills, as I can conscientiously do so."

Prepared by TWINBROW, Operating and Dispensing Chemist, 2, Edwards-street, Portman-square, London; and may be had of all Patent Medicine Vendors.

BOTTLED ALES AND WINES, &c.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—"Melbourne Journal of Commerce," Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases, by using SEYMERS' BOTTLE PACKINGS AND COOLERS.

Price 7½d. per doz. Bottlers contracting for large quantities, effect a great saving in labour, &c., that they can supply them at one-third less price to Shippers, who will find it most profitable to order their goods to be so packed in future.

SEYMERS & CO., 37, Eastcheap, E.C.

CONNECTED WITH THE
SUGAR COLONIES.

G. BUCHANAN & CO.,

Engineers and Manufacturers of

Sugar Machinery and Apparatus,

COFFEE, COCOA NUT, AND RICE-MACHINERY,

(OF YORK PLACE IRON WORKS,

ABERDEEN),

25, BUCKLESBURY, MANSION HOUSE,

LONDON, E.C.,

SUPPLY with the same satisfaction as

hitherto their improved SUGAR CANE MILLS, worked by Steam, Water, Wind, or Cattle Power; Vacuum Apparatus, Clarifying, Boiling, Concentrating, and all kinds of Apparatus and Implements used on a Sugar Estate.

Improved Coffee Pulpers, Peelers, Sizing Machines, and Drying Stoves, &c.

Grinding Machinery and Hydraulic Presses, especially designed for reducing the Cocoa Nut to a Pulp, and extracting the greatest percentage of Oil.

Rice Machinery, consisting of Machines for thrashing the Paddy, and complete Rice Mills for Husking, Pearling, Polishing, and otherwise preparing the Rice fit for the London Market.

All the above-mentioned descriptions of Machinery arranged to be driven by Steam, Water, Wind, or Cattle Power.

Having personally visited various Sugar Colonies, their Steam Engines, Steam Boilers, Pumps, Water Wheels, &c., are expressly adapted for Colonial use.

G. B. and Co.'s practical experience of eighteen years, as Sugar and Colonial Engineers, will be some guarantee as to the quality of their Machinery, to the good working of which they can produce numerous References and Testimonials.

N.B. Descriptive Catalogue of G. B. and Co.'s Machinery forwarded on application.

Designs supplied for Sugar Houses for Estates of all sizes.

In addition to the above G. B. and Co. continue to manufacture and supply, as usual, all kinds of Machinery and Iron Work required for Colonial use, Iron Ships, Barges, and Steamers, Wrought and Cast Iron Bridges, Railway, Dock, and Harbour Plant, &c., &c.

Order through any respectable Colonial Merchant, or through G. B. and Co.'s Agents, where established.

Paper Hangings for Exportation.

ROBERT HORNE,

PAPER-STAINER, &c.,

41, Gracechurch Street, London, E.C.;

Shipping Orders promptly executed.

St. Paul's Export Scented Soap Works.

M. ROBSON, EXPORT PER-

FUMER AND FANCY SOAP MAKER. Merchants

can be supplied with sample cases from ten pounds and upwards on the shortest notice.

N.B.—Brushes, Combs, Sponges, and every article for the Toilet, 32, Lawrence-lane, Cheapside, E.C., Sole Proprietor of the "Rose of England."

PREPARATORY EDUCATION, BRIGHTON.

A LADY residing in a healthy locality of

Brighton, receives a limited number of BOYS for

EDUCATION, and offers superior advantages on moderate

terms. Parents who reside abroad would find this a desirable

home for their children from 3 to 11 years of age. Satisfactory

references given. Address to "Alpha," at the office of this Paper, 7, George-yard, Lombard-street, E.C.

JOSEPH ROBERTS,

ENGINEER, CONTRACTOR, AND

MACHINERY AGENT,

7, OLD JEWRY, LONDON, E.C.

Soap Maker, Boot and Shoe Maker, Planing, Slotting,

Drilling, Sawing, Grinding, and every description of Engi-

neers' Tools and Machinery for working in Wood, Stone, &c

PORTABLE AND STATIONARY ENGINES,

PUMPS, &c.,

FOR SALE OR EXPORTATION.

Calculations, Estimates, Specifications, Working and

Finished Drawings made for every description of the above

Also for bridges, buildings, canals, railroads, wharfs, &c

Their construction superintended or contracted for.

JOHN TANN'S PATENT RELIANCE

LOCKS AND FIREPROOF SAFES are the best and

cheapest safeguard against Fire and Robbery.

WAREHOUSE, 30, WALBROOK, CITY, LONDON.

TO CHEMISTS, STATIONERS, AND CONFECTIONERS.—AGENTS WANTED.

PLUMBE'S GENUINE ARROW-ROOT

should be used in preference to any other. It is

greatly preferred by the most eminent Physicians in

London for invalids, and as the best food for infants.

REPORT ON PLUMBE'S ARROW-ROOT, BY DR. HASSALL.

"I have subjected Plumbe's Arrow-root to careful ex-

amination, microscopical and chemical. I find it to be

perfectly genuine, and of superior quality; equal in all

respects to the best Bermuda, for which so high a price is

usually charged. (Signed) ARTHUR HILL HASSALL, M.D."

Directions and testimonials with each packet, which

bears the signature of A. S. PLUMBE, 3, Allie-place.

Retailed in London by Snow, Paternoster-row; Ford,

Islington; Morgan, Sloane-street; Williams and Lloyd,

Moorgate-st.; Starling, Islington; Weatherley, Peckham.

THE LONDON AND CHINA TELEGRAPH.

THE FIRST VOLUME of this JOURNAL

was completed on the 11th Nov. 1859, and can be

obtained bound, with an Index, price 23s.; subscriptions

for Vol. II. commenced on the 25th Nov. 1859. Price

18s. per annum, or 5s. per quarter, not including postage.

Terms for advertising, 2s. 6d. per five lines; and 6d. for

each additional line.

THE ABOVE MAILS, RECEIVED THIS MORNING, WERE DUE ON THE 13th.

We beg to call attention to the tabular statements of Exports from China, Singapore, and all parts of the Far East, and the exports also by each vessel in continuation of the same. Statements of exports from England to China, Singapore, and all parts of the Far East will also be found.

List of Passengers.

PASSENGERS INWARD.

By this mail from Hong Kong.—For Marseilles: Mr. H. Vangan, Don Juan de Viarnos and servant, and Jose R. Dampierre and native servant. For Southampton: Mr. Robert Inglis, Adameser Manackjee (2nd class), Messrs. Jas. Smith, Frank, Ponsford, and Blisset. For Singapore: Mr. J. Sanderson. For Melbourne: Mr. J. F. Cox. For Alexandria: Mr. M. Fidal. For Cadiz: Mr. Francisco Molinira.

PASSENGERS ARRIVED OUTWARD.

At Hong Kong.—Per Ganges mail steamer, from England: Mrs. Howard, Mr. and Mrs. Lechfield, Messrs. Junsein, Brumfield, Green, Brocklehurst, Humphry, Chevalier, Galtun, Reinhardt, White, Denton, and Frankiss. For Shanghai: Messrs. Dulken and Fwombley.

Per Beatrice, from Melbourne: Mrs. Bonney, Mr. T. Platt, Mr. Washee. Per Surprise, from New York: Mrs. Gasset, servant, and three children, Miss Simons, Miss Cook, Messrs. King, Freed, and Hoght, two Chinese. Per Alphonse N. Ceazar, from Bordeaux: Mr. Rimet, Mr. Letitzean. Per steamer Emeu, from England, &c.: Messrs. Henderson, Lowder, D. B. Robertson, R. Tomlin, Lieut. Leacock, S. P. Olivers, Mr. and Mrs. White, C. Mason, A. F. Lindley, Deputy Commissariat-General Cooksley. From Marseilles: Mr. Kirby. From Gibraltar: Madam Dolers Ramas and daughter, and Mr. Mora. From Bombay: Mr. and Mrs. Marshall, Messrs. Haywood, Chinderebloy and two servants and five Chinese. For Shanghai: Messrs. Robertson, J. F. Lowder, Noyes, and Simon. Per Invincible, at London, from Shanghai: Dr. Duggan.

PASSENGERS OUTWARD.

Per P. and O. str. Indus, 27th September, via Bombay.—From Southampton to Singapore: Mr. Brine. From Marseilles, per Euxine, 5th Oct.—To Hong Kong: Mr. J. Jackson, Mr. J. F. Callaghan, Capt. B. Tilley, Dr. C. Chapman, Mr. N. Boyes, Mr. and Mrs. T. Borradaile, Mr. L. Josephs. To Shanghai: Mrs. Marshall, Mr. Maclean, Mr. J. Schut. To Singapore: Mr. G. Lipscombe, Mr. W. G. Forchiana. To Penang: Mr. H. Reme. Per P. and O. str. Pera, 4th Oct.—From Southampton to Hong Kong: Mr. G. Smith, Miss Harmer, Mr. and Mrs. Dixon, Veterinary Surgeon Appletton, Mr. C. H. Platt, Mr. A. L. Inglis, Mr. W. Long, Captain White's native female servant. To Singapore: Mr. Temple, Mr. A. D. Campbell, Mr. J. H. Chandler, and European man servant. From Marseilles, 12th Oct. For Hong Kong: Messrs. J. D. Gibb, E. F. Parker, and R. Westall. To Singapore: Mr. Matzen, M. and Madame Deschaux and infant. To Shanghai: Mr. and Mrs. J. P. Tate, Mr. Birt. Per P. and O. str., 12th Oct., via Bombay.—From Southampton to Hong Kong: Mr. Hutchison, Mr. Spurria. To Penang: Mr. and Miss Mathiew. From Marseilles, 20th Oct., to Shanghai: Mr. J. C. Sillar.

Per P. and O. str., 20th Oct., from Southampton to Singapore: Mr. and Mrs. Gemmell, Mr. L. van Pabst, Miss Baumgarten. To Hong Kong: Mr. F. Pereira, Capt. Archer, Depy. Com. G. Innes. From Marseilles, 28th Oct., for Singapore: Mr. and Mrs. C. Hill and infant, 3 children, Miss Symons and governess. To Hong Kong: Mrs. Murray. From Alexandria to Hong Kong: Mr. J. Hogg. To Singapore: Mr. R. B. Reed.

Per P. and O. str., 27th Oct., from Southampton to Shanghai via Bombay: Mr. J. Bradwell, Mr. F. Bloor, Mr. J. Maitland, Mr. W. Lamfoa, Mr. W. Pearson. To Hong Kong: Dr. Childs. From Marseilles, 4th Nov., to Singapore: Mr. and Mrs. Engler, Mr. H. Brouse.

Per P. and O. str., 4th Nov.—From Southampton to Hong Kong: Lieut. Trimmer. 12th Nov.—From Marseilles to Singapore: Mr. and Mrs. Henneick and infant, one, lady and two children, Mr. and Mrs. E. Cunningham.

Per P. and O. str., 12th Nov., via Bombay. From Southampton to Shanghai: Mr. J. Malcolm. To Singapore: Mr. Mooyer. From Marseilles, 20th Nov., to Singapore: Mr. L. Bowman.

Per P. and O. str., 20th Nov.—From Southampton to Hong Kong: Mr. Padder, Miss Alexander, Capt. Worthington. To Singapore: Messrs. J. Watson, and R. Henderson. From Alexandria to Penang: Mr. and Mrs. E. J. Leverson.

Per P. and O. str., 4th Dec.—From Southampton to Singapore: Mr. and Miss Allen, Mr. H. J. Silverlock. To Shanghai: Mrs. A. Evans, and infant. To Hong Kong: Mr. Gray, Capt. Archer, Rev. T. Mollesworth, Paymaster Pope. From Marseilles, 12th Dec.—To Singapore: Mr. and Mrs. R. Carnac. From Gibraltar to Hong Kong: Governor of Mindanao and lady.

Per Rajah of Sarawak.—For Hong Kong: Mrs. Huffam and family, Mrs. Keppel, Mr. Hugh Austin.

PROGRESS OF THE THIRD CHINA WAR.

FIRST BLOOD DRAWN.

(FROM A SPECIAL CORRESPONDENT.)

OFF THE PEIHO, August 12, 1860.

My last was dated from Tah-lien-Whan, and we were then in expectation. Our hopes had indeed been cheered by the advent of Lord Elgin, and we looked forward to some definite movement, which has at last been taken. It is now too late to speak about the time wasted during this summer season, as we have at last a chance given us, and like honest Sancho Panza we must not look too closely at our gift horse. If neglect has been the prelude, energy must now compensate for it, unless all concerned with the direction of this undertaking are willing to accept the odium which must attach to those who lose great opportunities and trifle with their nation's interests. They seem now willing enough to work, and therefore let us give some little commendation when it is deserved. On the 26th of last month we started from Tah-lien-Whan, the day when the steam fleet moved to Odin Bay, to be ready to render assistance to the numerous sailing vessels which were employed by the Government. We left en masse for the Peiho; and if the Chinese were on the

watch, it was a sight sufficient to awaken their gravest apprehensions. Not less than 250 sail of English vessels left, in such admirable order that nothing was to be desired; and we had a fair opportunity, at last, for giving credit to our admiral for something done. Could he always be sure of conducting other matters as well as he conducted that, then would we say that we had at last the right man in the right place, and some confidence would be exhibited by those under him. As far as I can gather, he now is followed with that heroic devotion which is part of our countrymen's pride—when they will sooner support mental incompetence, and perish for want of a better leader, than raise a cry against one whose personal courage cannot for a moment be disputed.

The command of the military is in Sir Hope Grant's hands, and if report speaks truly, we need no better soldier. The landing of the troops necessarily occupied some time; this has been effected most satisfactorily. I should here mention that the main body of the fleet is at anchor about five miles from the shore. The land is so low that it is hardly perceptible, and although every top was filled with men and officers, it was two days before any reliable information could be obtained. The following, however, may be quoted as authentic.

THE RECONNOITRE.

On reaching the shore to the north of the Pehtang forts, a large body of Tartar cavalry was discovered, which had been despatched from an entrenched camp some few miles inland. It was at first thought that they would render the undertaking one of some difficulty; but upon firing some three or four rounds of shell and shot, they very quietly rode back again, leaving the coast undefended. The French, whose force on this occasion was larger than the English, rapidly effected their purpose, and the English were not long in following their example; some slight skirmishing took place with a portion of the enemy, in which we had some fourteen wounded; these all amongst the military, one, Capt. Greathead, being, I regret, seriously so. On the next day, or the one following, they proceeded to advance against the forts, the gun-boats, from their light draught of water, being able to go up the shallow river which forms the false mouth of the Peiho here. These forts were, to all appearance, well supplied with guns, and a considerable resistance was expected. You may judge, then, of the surprise of the forces to find them utterly undefended. The English then proceeded to occupy them, but did so cautiously, thinking it not unlikely, from the known character of the Chinese, that some trap was laid, and it was fortunate that it was so, for before entering the first fort, the man who was reconnoitring found the bridge across the dry ditch which surrounds it trembling with his weight, and, upon a careful examination being made, it was shown to be so constructed with levers, &c., as to form a large hammer, which, on the rush of any body of men, would have exploded some detonating powder in communication with a large quantity of gunpowder, effectually destroying fort and all within it. Of the guns found some were only wooden dummies, but a large supply of Chinese rockets was there, and the soldiers amused themselves by expending these harmlessly in the air.

With the exception of the occupation of three such forts, we have hitherto done nothing but make preparations for the march inland, and the first attack of real consequence will be begun to-morrow. The first will, I am informed, be a feint on the part of the military, and an attack upon the entrenched camp I spoke of before; if this draws off their attention from the forts the gunboats will begin a bombardment, and from their number and the weight of the guns they carry, will, I fancy, rather astonish John Chinaman. An easy victory is not expected, for it seems pretty well known that many of the engineers are *Russians* and not Chinese.

The safe landing of the troops, their occupation of the Pehtang forts, and a skirmish with some Tartar cavalry is the sum total of the news. Speculation is rife as to the probable issue of the next steps, as upon the rapidity with which the Taku forts are overcome depends virtually the length of the campaign. If we occupy them after an attack lasting but a day or two, we may hope to date from Peking this year; if siege operations of any magnitude are necessary, we shall have to wait another season. Nearly every one is heartily sick of the inactive life they have been leading since the commencement of the expedition.

The following intelligence was received yesterday at the Foreign-office:—

"The Allied troops reached the Peiho on the 1st of August. They are established at Pehtang, having found the Northern and Southern forts there evacuated. On the 12th they attacked the Tartar camp. The Chinese fled in disorder.

"At the departure of the mail the troops were in front of the Taku forts, where the Chinese were prepared to resist. The grand attack would take place on the 15th."

Summary of News from the Far East.

JAPAN.

Dates from Nagasaki reach to the 5th August, at which date business was proceeding quietly.

CHINA.

SHANGHAI.

ADVANCE OF THE REBELS.

On the 13th August the rebels posted proclamations in the foreign settlement. The foreign residents formed themselves into a Volunteer Corp. It is certain that they are very near, large bodies having been seen at Minghong, about four hours' sail from this port. The Filibusters have had a severe handling before Sunkeang, which place has been retaken by the insurgents. All arms, of whatever kind, in the foreign settlement, have been bought up by the Chinese at enormous prices. The trade in *umbrellas*, i.e., firearms, has assumed no little importance, some foreigners having been detected in it. Barricades are erected in all the streets, the settlement is being isolated by a ditch, the volunteers have been called out, and the whole place is in a most excited condition. Both the Consul and Mr. Bruce have issued proclamations to tranquillise the people, but with very little effect.

It seems that on the 18th they had approached to within a few miles from Shanghai, burning and destroying all the villages near their path. A missionary station a little distance off was not spared, the priest, a Frenchman, with a number of his scholars, being killed. On the afternoon of that day the rebels entered the suburbs, and a body of about five hundred menaced the South East Gate, which was guarded by a detachment of French. These latter appear to have reserved their fire until the rebels approached quite close, when a well directed volley left thirty or forty on the ground, the rest taking flight.

The French sallied out with some artillery, and found that the portion of the suburb was being sacked, and as it would have been madness to have resorted to street fighting, the dire necessity of firing it had to be resorted to, as the French communications were endangered. One account states that the disturbance was caused by rebels, and eleven foreigners, who were assisting them, were made prisoners. It is also stated that the West Gate, which is guarded by English troops, was menaced, and the rebels driven away.

The force the allies had to rely on numbered as follows: 1,600 troops of the line, four despatch and gunboats; 400 sailors from the merchant fleet, and 150 residents enrolled as volunteers. The masters of the Woosung opium fleet had solicited permission to move their ships up to assist.

A party of five hundred approached one of the gates of the city, which was guarded by the French. The French fired on them, killed a number, and the rest fled. Meantime the mandarins, although they were so potently and devotedly backed, do not seem to have attempted to render the smallest assistance; and whilst the allied troops held the gates and the outposts, the city and suburbs were being sacked by the rabble. On the night of the 19th, the date of last advices, the following was the state of affairs:—The Eastern suburbs had been fired by the French as a measure of protection, and were burning fiercely; all the villages in the vicinity had been fired by the rebels, the greatest terror and consternation prevailed in the city and foreign quarter, and the rebel army was in great force five miles off.

We give a translation of the proclamation from the *North-China Herald*:—

"Le, of the verily Heaven-ordained Celestial Kingdom of Great Peace, commander of the Imperial body-guard, Imperial Commander-in-Chief, Loyal and Righteous, the Faithful King (Chung Wang), once more most impressively and distinctly proclaims and ordains, that all may understand and not be confused, thereby calling down sorrow on themselves.

"I, carrying out the Heavenly commands, have for no small number of years led as one man my mighty soldiers to the slaying and extermination of the destructive imps. It having occurred to me that within a hundred li of Nanking itself were many myriads of demons, my heavenly soldiers swept them away as by a flood. Every body has either seen or heard of these things, so there is no use in my repeating them. After leaving Nanking we came through Chu-jung, Tan-yang, Chang-chow, and Wuhsi, to So-

chow; through a journey of many hundred li we never received a check. We have recovered every place (from the Manchoes), and all the imps have now hidden their carcasses by the sea shore. Now I ask you people what is the use of shaking and trembling: why don't you choose the right side? Everybody is aware of my forbearance.

It is my determination now to lead the whole of my mighty troops to the capture of Shanghai, and the extermination of the imps, nor shall this my intention ever be absent from me, early or late. During my march the people everywhere fled first to Soochow, and afterwards to Shanghai: like birds fearing the bow, there is no resting place for them. Is it not so? It was on this account that I, looking up and acting according to the life-loving benevolence of God (Shang-ti) and the world-rescuing heart of the True Holy King, did not wish to lead troops against Shanghai too quickly; but having pity on you, I issued a proclamation for your guidance. All good people should have deeply reflected (*lit.* wash head and wipe face), and with all speed have submitted themselves, thus walking on the right path. Shanghai is but a hundred li or so from Soochow, in which place I have now been for two months: you should have made a book for presentation to me, containing a list of your houses and families; or standing on the roads, you should have respectfully offered a cup of wine as a token of your submission. Instead of so doing, you have seized and killed the messengers sent by me to execute my commands; your wickedness has really no limit, and is unpardonable.

"The ancients, previous to a fight, exchanged courteous civilities, nor were the heralds ever killed. How is it that you Shanghai people alone withstand all reason, and still listen to impish mandarins who do you nothing but injury? Your offences have now reached the climax that compels me to set troops in motion for your extermination, and I have consequently ordered a Tai-yuen-shih (Generalissimo) to precede me on the way to Shanghai.

"Although I should properly spare you on no account whatever, yet apart from punishment, I have still a merciful intention towards you, and therefore once more emphatically advise and direct you at once on seeing this to reform. I have hitherto taken cities without number, and it would behove you to amend your faults, and so be in the way of having your lives spared. From the first outbreak of righteousness in Kwangsi, until the present time, ten years have passed, during which time no enemy could withstand, and no attack could repress us. Should your little place, only a span in size, brave us and refuse to listen to us? Shanghai is an intelligent city enough, let the people take the good and the evil, and make their choice (of sides). I issue this Proclamation strongly to command and advise you; you know that an egg can't oppose a stone; make up your minds then speedily, and submit yourselves; and when the soldiers shall have come, not one fraction of anything shall be exacted from you. If you won't put confidence in me, but run away, every one of you, with the idea that you can withstand me, why do exactly as you please. I will establish my will firm as a mountain, and my commands shall be as flowing water. Immediately after I have informed you by this, my soldiers will arrive; they are not going to wait for you; don't say that I gave you no warning. Tremblingly obey, and don't slight this.

"Heavenly Kingdom of Universal Peace, 10th year, 6th month."

FOO-CHOW-FOO.

Dates from this place to the 20th August report the city quiet, and no movements of consequence among the Chinese officials. Business proceeding satisfactorily.

AMOY AND SWATOW.

The same advices as above have been received from these places. Mr. Caine, the British Consul, had not made his promised visit to the Taoutai.

HONG KONG.

The *China Mail*, in sounding the praises of this city, says:—"We think that if the gay gentleman who has linked his name with a place that shall be unmentionable as a fitting abode for a false lover, were to pay it a visit, he would change his opinion.

There are various buildings going on at present, which in a short time will be completed, and will tend to improve the colony greatly. We allude more particularly to the building of private residences, now going on in the western part. There are also several public works going on, or shortly about to be commenced. The Praya in several parts is being filled up rapidly. The clock tower and water works will soon be begun, and when finished will be great boons to the public. The gaol drags along slowly, but as this is only a boon to a certain portion of the public it matters little."

In reference to the Post-office we find also the following:—"We hear many complaints—and we have to make the same complaint ourselves—of the long delay in the delivery of the letters after the mail's arrival. The *Ganges* arrived with the last mail about eleven in the morning, and the letters were not delivered until half-past five in the afternoon. An answer to this was made that it took nearly three hours to land them."

There is another growl at the P. and O. Company, at which, of course, the Leadenhall-street directors will be much shocked.

The Hong Kong office of the P. and O. Company is the head office in China, and the number of steamers which arrive every month, and leave again, is very great. We have the steamer from Bombay with the English mail; the outgoing mail; the Shanghai steamers, inwards and outwards; the steamers from the coast, inwards and outwards—all twice a month; making six arrivals, and the same number of departures, besides an occasional extra steamer to and from the coast. This necessarily entails a great deal of work, and the staff of clerks in the P. and O. office has lately been largely increased on this account? But will it be believed that the duties

in one of the most important departments, notwithstanding the work having increased greatly, is left to be done by one man. We allude to the parcels and passengers' department. Many and grievous are the complaints we have heard of the long delay in the delivery of parcels—sometimes four or five days elapsing before their delivery takes place. But the delay is not to be wondered at when we consider that the duties are performed by one man, who has also to attend to the issue of passengers' tickets and see that the money is collected.

A severe thunder storm visited the colony on the morning of the 18th August, accompanied with a heavy fall of rain, which tore up the roads dreadfully. A Chinese house fell in, killing five individuals.

The *Weaver*, French despatch steamer, has arrived from off the Peiho, with dates to the 13th August. She is to be docked and proceed to Saigo, and thence to Suez.

The inquiry into colonial abuses had commenced, but adjourned until the 28th August. It is necessary to await the conclusion before commenting on the same.

CANTON.

The Imperial forces in the Canton province have made no demonstration. The Lieutenant Governor is still at the passes on the borders, but whether he or the rebels are the cause of the teas being stopped is a question hard to determine.

MACAO.

Another coolie tragedy took place on board the Spanish ship *Encarnacion*. She left Macao roads on the 2nd August, and a few days after leaving, whilst the crew were washing the decks, the coolies rose and rushed into the cabin. They wounded the captain severely, but in the meanwhile the crew came aft, and a fight ensued. The interpreter and one of the crew, as well as 75 of the coolies, were killed in the fray. The captain and eleven of the crew were also severely wounded, and are at present in hospital at Macao, to which port the vessel put back.

PHILIPPINES.

MANILA.

A steamer will shortly leave for Singapore, to bring on the new Governor-General, McCrohon, and the new Commandant-General, or Admiral of the station, Senor Salcedo.

COCHIN CHINA.

The *Lar* (Hamburg), which arrived at Hong Kong from Saigon, with dates to 15th July, confirms the statement of the exigencies of the French, and reports that unless reinforced they must vacate. In our last it was announced that 200 troops had been despatched from Hong Kong.

MALACCA STRAITS.

SINGAPORE.

Our usual files from this place have miscarried. It has been reported in a telegram, via Trieste, that a mutiny of Swiss troops broke out at Samarang; nine mutineers were killed, and 35 were sentenced to be hanged. A similar rising intended by the Swiss troops throughout Java had been discovered. The war in Borneo against the natives was being continued advantageously to the Dutch.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

- BARTON—At Swatow, on the 6th of July, the wife of Captain Z. Barton, of a son.
 CARGILL—On the 4th inst., at Donnochie, near Birnam, N.B., the wife of W. W. Cargill, Esq., of a son.
 CRANKHORP—On the 27th ult., at the Vicarage, Cast'le Bytham, Lincolnshire, the wife of the Rev. Charles Churchill Crankhorp, of a son.
 DOBBE—At Swatow, the wife of Captain Dobbe, of a daughter, still-born.
 EATON—On the 30th ult., at Tixover Hall, Rutland, the wife of Charles, Ormston Eaton, Esq., of a son.
 ELLISSEN—On the 3rd inst., at No. 9, Warrington terrace, Maida-hill West the wife of A. Ellissen, Esq., of a daughter.
 FIRTH—On the 24th ult., at Spring House, Heckmondwike, the wife of James Firth, Esq., of a son.
 HANCOCK—At Shanghai, on the 29th of July, Mrs. Herbert Hancock, of a daughter.
 JOHNSON—At Shanghai, on the 10th of August, Mrs. Beckwith D. Johnson, of a daughter.
 STEWART—On the 4th inst., at 46, Old Bond-street, Piccadilly, the wife of Mr. Francis Frederick Stewart, of a son.
 TARRANT—On the 9th inst., at 52, Elgin-crescent, Kensington Park, W., the wife of H. J. Tarrant, Esq., of a daughter.
 WISE—On the 2nd inst., at Trulshaw House, near Wilmslow, Cheshire, the wife of John Wise, Esq., of a daughter.

MARRIAGES.

LAY—LEGGE—On the 21st of August, at Union Chapel, by the father of the bride, assisted by the Rev. J. Chalmers, M.A., Horatio Nelson Lay, to Eliza Elspeth, eldest daughter of the Rev. James Legge, D.D., of the London Missionary Society.

LEWIS—TELFORD—On the 3rd inst., at St. Peter's Church, Dublin, by the Rev. J. McSorley, Dr. Robert Lewis, Royal Horse Artillery, to Mary Elizabeth, only daughter of the late Captain Joseph Telford, 96th Regiment.

NELSON—MORICE—On the 4th inst., at St. James's Church, Holloway, by the Rev. J. K. Harrison, Thomas Neeson, Esq., M.D., R.N., to Jane, second daughter of Commander G. F. Morice, R.N., of Arundel-square, Barnsbury-park, Islington.

RENNIE—RENNIE—On the 3rd inst., at St. John's Paddington, by the Rev. Henry Stevens, vicar of Watlington, William Rennie, Esq., to Wyndham Georgiana, eldest daughter of the late Captain George Lucas Rennie, R.N.

YOUNG—ANNESLEY—On the 27th ult., at Farnham, Surrey, by the Rev. W. Jones, the Rev. William Young, to Anne Maria Fanny Annesley, youngest daughter of the late Rev. William Annesley, of Ardilea, county Down.

DEATHS.

BELLAMY—At Amoy, on the 4th of August, of consumption, aged 32 years, the wife of Mr. John Bellamy, ship-chandler.

CORRIE—At Fuhchau, on the 13th of August, Captain Corrie, of the barque *Dragon*.

CODY—At Kanagawa, Japan, on the 12th of July, of consumption, Mr. John Cody, of New York City, U.S.A., aged 30.

DENNES—At Shanghai, on the 10th of August, Captain J. L. Dennes, of the steamer *Thunder*.

HUDSON—On the 5th inst., aged 39, Margaret Anne, wife of Henry Hudson, Esq., of Gipton Lodge, near Leeds, and eldest daughter of William Harland, Esq., M.D., Scarborough.

JOHNSON—At Shanghai, on the 25th August, Beckwith D. Johnson, master of the British ship *McLeot*, of Liverpool, aged 36 years.

LAWRENCE—Drowned off Dover, on the 2nd inst., from the upsetting of a boat, Emma Gough, second daughter of the late Mr. George Lawrence, of Clarence Lawn, Dover, aged 24.

PARKES—At Pehatang, died suddenly, on the 4th of August, of liver consumption, Mr. William Parkes, chief engineer of the P. and O. Co.'s steamer *Granada*, aged 27 years.

COMMERCIAL REPORT.

CHINA—EXPORTS.

TEA.—Our business at Shanghai is at an end, owing to the approach of the rebels. At Foo-chow-Foo supplies are abundant. But few vessels have, it will be seen by the export list, been despatched since last mail. At Canton supplies of Congou have been restricted to seven chops New Ningchow, which are favourably reported on as to quality. These came by a circuitous route, musters of nine chops more having come to hand. The settlements of the fortnight are—Congou: The remaining chop of Oopack at 33½ taels. One of the above-named chops of Ningchow at 28½ taels, and 3,000 half-chests Tayshan at 18 to 25 taels; 800 half-chests New Oolong; 1,200 half-chests New Orange Pekoe, and 500 chests new flowery Pekoe, besides the Canton made and packed teas. At Foochow, after the departure of last mail, the tea men submitted to a decline of 1 to 2 taels on the middling kinds. Purchasers for the United States market having become more wary, Oolongs have declined a little, but the quality of those now coming forward is very poor. The settlements since the departure of last mail are—Congou: 30,000 chests, and 13,000 half-chests at 11 to 17½ taels for dusty to good common; 18 to 21 taels, for but middling to flavoury, and 32 to 29 taels for medium to fine Kysows. Sou-chong: 3,000 chests at 21½ taels for inferior, up to 32 taels for fine Oolongs: 13,000 half chests, at 18 to 21 taels for Foochow packed and inferior, and 22½ to 25 taels for ordinary to good cargo. Scented Teas.—2,000 boxes at 27 taels for ordinary up to 40 taels for very fine. The unsold stock upon the market is estimated at 41,000 chests Congou, 4,000 chests Souchong, 1,000 chests flowery Pekoe, 13,000 half-chests Oolong, and 5,000 boxes scented teas. Regarding supplies, the third crop Kysows were beginning to arrive, and are said to be in ample supply. The Hohow Congous, which would be sent to Shanghai if the communication were open, are expected shortly at Foochow.

At Amoy.—The *Houqua* and *Arab* have sailed for New York, the *N. B. Palmer* and *North Wind* are loading.

RAW SILK.—Shanghai: On the eve of the departure of the last mail, intelligence was received of Nantsing, an important mart of the silk district, involving the destruction of a large quantity of silk. Supplies from the country have since poured in freely, evidently from the apprehensions of the rebels, foreigners continuing their operations in the silk districts. On the 18th Aug. business was suspended, Shanghai itself being menaced. No doubt holders will be anxious to sell, which will check for a time only the advance in rates. At Canton,

the only transactions reported are the settlement of 30 piculs' No. 1, re-reeled Cumchook for the United States, at \$470, and 100 piculs, No. 1, Kowkong for England, at \$420. Loonkong is quoted \$415 for No. 3, up to \$455 for No. 1.

DRUGS, &c.—Cassia Lignea: Canton, quotation \$17½ to \$17½, no sales—stock 1,500 piculs; Macao, sales of 1,200 reported at \$16—stock, 700 piculs. Cassia buds: scarce and wanted, at \$32 to \$33. Cassia oil: dull and full stock, 40 piculs are offered at Macao at \$310. Star aniseed: 300 piculs are on the Macao market, \$15½ being asked. Aniseed oil: 20 piculs sold, at Macao, at \$160 to \$165—stock on the market nearly 100 piculs. Galangal root: 700 are in stock at Macao, 54 asked. Matting: 1,250 rolls taken, at Canton, at 10½c, 12½c, and 15c. for four, five, and six quarter for white, 2½c. additional for checked. Fire crackers: at Canton, settlements are reported to the extent of 12,000 boxes at 80c. to 85c. Vermillion: at Canton, \$37 per box.

CHINA—IMPORTS.

The import market generally is in a very unsatisfactory state. Stocks are large, and the demand dull.

SHANGHAI.—Since the following settlements were effected, the advance of the rebels has entirely destroyed trade and confidence. Sales—Shirtings: grey, 26,000 pieces; white, 1,000 pieces; T-cloths, 10,500 pieces. American goods: drills, 10,000 pieces; sheetings, 60 pieces; woollens, 100 pieces long ells, and 40 pieces camlets; iron, 300 piculs; lead, 100 piculs.

HONG KONG.—Shirtings, 8,000 pieces grey; T-cloths, 8,500 pieces; lastings, 200 pieces; long ells, 1,400 pieces.

AMOY.—Yarn, 240 bales; shirtings, 8,800 pieces grey, and 500 pieces white; T-cloths, 3,500 pieces; American drills, 360 pieces.

CANTON.—Yarn, 273 bales; shirtings, 8,200 pieces grey, and 1,500 pieces white; T-cloths, 14,000 pieces; woollens, 240 pieces Spanish stripes; 240 pieces habit cloths, and 200 pieces camlets; lead, 600 piculs; quicksilver, 400 flasks; iron, 1,400 piculs nail rod; 1,200 piculs hoop; 700 piculs bar, and 80 piculs wire.

MANILA.

EXPORTS.—There has been very little doing in produce during the last fortnight, receipts of most articles having been extremely small. Current-clayed sugar is still generally held for \$5 62½c, per picul, though some small sales are reported at rather lower rates. Hemp is quoted as before, \$4 18½c. to \$4 25c. per picul for current quality.

IMPORTS.—The transactions in piece goods, limited as they are, have been quite as large as could be expected considering the sales reported for several mails back, and that dealers are now receiving many of their former purchases. White Shirtings: sales reported at \$2 68½c. to \$2 81½c., and 3,400 pieces, good 64s. to 66s., at \$3 87½c. to \$4 per piece of forty yards. Grey Shirtings: sales, 800 pieces 8½ lbs., at \$3 37½c. per forty yards.

SINGAPORE.

EXPORTS.—The market for produce has undergone little variation since the last mail. Shiproom is scarce, and by reason of this and other causes, the demand for most articles is not active. Supplies also continue short, and hence prices are upheld; the business done has, therefore, been on a small scale. Black Pepper: Few buyers, but the price holds at \$6 65c. per picul. White Pepper is scarce, and common Rhio is worth \$10½ to \$11. Gutta percha is in fair request at \$32 33½c. per picul. India-rubber: The last sale was at \$43½. Pearl Sago: Small demand at \$2 80c. to \$2 90c. Sago Flour in fair request at \$2 2c. Tin: Very scarce. The price has advanced to \$29½ per picul (126 9 per cwt. f.o.b.) Coffee: 2,200 piculs Bonthyne, received from Macassar, have been taken for America on secret terms. It is supposed the price is \$12½. Cassia Lignea: Sales at \$18½. Rattans, \$4 for best. Sapanwood, \$1 65c.

IMPORTS.—Since the last mail the demand for cotton goods has been very limited, and the sales effected have been on a small scale, and generally at reduced prices. There should be a more active business in the course of a few weeks, but stocks are heavy, and importers too eager to meet the market, to allow of any speedy improvement in prices. Woollens are in no request. The demand for metals is still dull.

The picul is 133½ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

(For dates, see first page.)

	Bank.	Private.
At Shanghai . . . 6 months sight.	6s. 7d.	6 7½ to 6 7½
At Canton (per Tael.)	..	5 0
At Foo-Chow-Foo (per dol.)	..	..

£ The exchange on India at Shanghai was at 318 rupees per 100 taels, and at Hong Kong 230 per \$100. Bar silver at Shanghai — per cent. premium, and at Hong Kong 7 per cent. The current quotation at Shanghai for Mexican dollars was 76 cents., and the rate of exchange on Hong Kong was 26½ per cent. discount.

EXPORTS FROM CHINA.

There is no alteration in our last Tea and Silk Table.
 Per Flying Cloud, from Foo-chow-Foo, Aug. 7, to London, 1,140,000 lbs. tea.
 Per Christopher Hall, from Foo-chow-Foo, Aug. 8, to New York, 641,500 lbs. tea.
 Per J. Shepherd, from Foo-chow-Foo, Aug. 8, to Sydney, 302,000 lbs. tea.
 Per Laertes, from Foo-chow-Foo, Aug. 12, to Sydney, 252,000 lbs. tea.
 Per Dragon, from Foo-chow-Foo, Aug. 14, to Sydney, 288,000 lbs. tea.
 Per Miranda, from Foo-chow-Foo, Aug. 15, to Sydney, 162,500 lbs. tea.
 Per Planter, from Foo-chow-Foo, Aug. 6, to Melbourne, 270,500 lbs. tea.
 Per Lorenzo Sabine, from Foo-chow-Foo, Aug. 10, to Melbourne, 204,800 lbs. tea.
 Per Howqua, from Amoy, Aug. 5, to New York, 439,314 lbs. tea.
 Per Arab, from Amoy, Aug. —, to New York, 366,145 lbs. tea.
 Per Roska, from Macao, Aug. 12, to Hamburg, 1,180 piculs cassia.
 Per Maggie, from Canton, Aug. 10, to London, 275,000 lbs. tea.
 Per Westminster, from Canton, Aug. 22, to London, 961,100 lbs. tea.
 Per Alfred Hill, from Hong Kong, Aug. 13, to New York, 10,000 boxes crackers.
 Per Helvetia, from Hong Kong, Aug. 22, to Melbourne: Tea, 70,640 lbs.; sugar, 300 piculs; oil, 850; matting, 1,150 rolls; prepared opium, 12,000 taels; China goods, 3,653 packages.
 Per Danneberg, from Hong Kong, Aug. 25, to Melbourne: tea 90,000 lbs.; oil, 1,400 piculs; tiles, 12,000; prepared opium, 33,000 taels, China goods, 6,274 packages.

EXPORTS FROM MANILA.

Per Amoor for London.—Hemp, 9,796 piculs; sugar, 14,150; coffee, 402; mother-o'-pearl shells, 339; cigars, 1,621 mila; tortoiseshell, 340 catties.
 Per Britannia for Cork.—Sugar, 12,888 piculs; sapanwood, 372.
 Per Annie Bowen for Hampton Roads.—Hemp, 570 piculs; sugar, 10,605; sapanwood, 302.

EXPORTS FROM SINGAPORE.

Per Conference to Liverpool, via the Cape.—1,694 bales gambier, 3,755 piculs; 2,546 bags sago flour, 2,849; 2,970 bundles rattans, 100; 7 cases merchandise; 2 cases sundries. To Cape Town.—840 cases and 150 bags pearl sago, 1,091 piculs; 230 bags black pepper, 180; 39 bags white pepper, 36; 5 cases nutmegs, 5; 11 cases mace, 7; 13,670 bundles rattans, 466; 12 cases cigars; 6 cases crackers; 75 bags sugar, 47.
 Per Victor to London, 1,117 slabs tin, 761 piculs; 2,218 bales 1,791 bags gambier, 5,612 piculs; 3,970 blocks 25 baskets gutta percha, 450 piculs; 72 baskets 19 bags India-rubber, 191 piculs; 170 boxes sago flour, 181 piculs; 117 bags sugar, 109 piculs; 9 cases tortoiseshell, 9 piculs; 824 hides, 95 piculs; 15,704 bundles rattans, 944 pla.; 52 cases nutmegs, ditto mace, 36 pla.; 4 cases benjamin; 312 bundles Malacca canes (16,850); 25 cases 32 baskets shells; 22 packages merchandise.
 Per General Wyndham to London, from Sarawak.—Antimony ore, 450 tons; 452 boxes pearl sago, 463 piculs; 640 bags sago flour, 621. From Singapore.—3,679 bags black pepper, 2,787 piculs; 416 white pepper, 395; 791 sago flour, 917; 537 pearl sago, 601; 540 boxes ditto, 601; 277 bags coffee, 284; 191 buffalo hides, 42; 12,639 buffalo horns, 251; 31,338 bundles rattans, 1,324; 5,091 pieces sapanwood, 414; 124 cases gum Ben-jamin, 182; 248 cases gum dammar, 239; 27 cases sticlac, 21; 202 cases mother-o'-pearl shells, 272; 10 cases tortoise-shell, 8; 134 baskets India-rubber, 260; 594 bags sugar, 581; 5 baskets 3,128 blocks gutta percha, 130.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From London: Aug. 3, Ocean Mail; 6, Wagoola. From Liverpool: 5, Cambula; 8, Horizon; 12, Pleiades. From Cardiff: 5, Sultan; 6, Isaac Bell (wrecked); 8, Revere. From Hull: 7, Lady F. Hastings. From New York: 5, Phantom. From Marseilles: 5, Admiral Baudin.

At HONG KONG, MACAO, and CANTON.—From Liverpool: Aug. 10, Jessie Beazeley. From Falmouth: 14, Rosina. From Shields: 20, Meliora. From Sunderland: 21, Sarah Scott. From New York: 14, Surprise.

SAILED.

From SHANGHAI.—For London: Aug. 1, H. Luduina. From Foo-Chow-Foo.—For London: Aug. 6, Flying Cloud. For New York: 3, Christopher Hall. From Amoy.—For New York: Aug. 5, Houqua; 15, Arab.

From HONG KONG, MACAO, and CANTON.—For London: Aug. 23, Westminster. For Liverpool: 9, Caroline Chisholm. For Falmouth: 12, Roska. For New York: 13, Alfred Hill. From MANILA.—For London: Aug. 11, Amoor. For Cork: 9, Britannia. For Havana: 7, Emigrante. From LONDON.—Aug. 25, Victor. For Liverpool: Conference.

LOADING.

At SHANGHAI.—For London, Assyrian, Ballarat, Challenger, Lucknow. At Foo Chow Foo.—For London, Broadwater, Ceylon, Crest of the Wave, Earl of Windsor, Maida, Peterborough, Ukko. For New York, Argonaut, Magnet, Winged Racer. For Sydney, Windhover. For Melbourne, Gazebound. For Australia, D. Godfrey. At AMOY.—For New York, North Wind. For Cork: Clifton, Veturia. For Boston, Eloise, Kremlin. For New York: Cyguet, Don Quixote, John Haven, Starlight. For Havana: Eidel Oceano. For Sydney: Bertha, Melaine. At SINGAPORE.—For London: Oryx, Queen Mab. For Liverpool: Rose. For Cork: Juliet.

CASUALTIES.

SHANGHAI.

The American ship Isaac Bell, from Cardiff, was wrecked on the North Bank, 6th August, and is a total loss; crew saved.
 The Kohinoor, from Foochow to Liverpool, has put in here, having been dismasted in a severe typhoon.
 The Burgermeister Duckwitz experienced a severe typhoon on the 25th July, and had to put back on the 31st, having cut away fore and main-topmasts and mainmast sprung.
 The barque Sophia Ray, from Nagasaki, sprung a serious leak, and became waterlogged, the captain and crew being compelled to abandon her about 400 miles east of Formosa. The captain and five men, after eleven days sojourn at sea, made for Makong, where they remained twenty days, when they were all taken on board the Syrian. Nothing has been heard of the chief officer and the other twelve men.

HONG KONG.

The Caroline Chisholm, for Liverpool, with teas, put back with 5 feet water in her hold.
 The Roseneath, from Shanghai, encountered a severe typhoon, and was obliged to put into Foo-chow-Foo, having lost her topmasts and leaking badly.

SINGAPORE.

The British ship Constantia Elizabeth, from China, bound to London, was spoken in lat. 5 deg. 26 min. N., long. 107 deg. 55 min. E., with loss of rudder.

PASSED STRAITS OF SUNDA.

From England and Continent to China: Aug. 10, Screamer, Ville de Montpelier; 11, Palma; 16, Weymouth; 18, Eva, Johanna; 19, Main Queen of the Seas; 20, Magnolia. From New York: Aug. 21, Horatio. From China to New York: Aug. 12, Judge Shaw. From England and Continent to Singapore: Aug. 10, Kortowaer, Rheine; 17, James Paton; 18, Wolverine, Congo; 19, Raphael; 21, Leopold, Cateaux, Antonia Petronella. From Melbourne: Aug. 15, Hound. From Singapore to England and Continent: Aug. 10, Carmen; 13, Versailles, William Stewart; 14, Prince Alfred; 21, Gala. To New York: Aug. 10, Keystone; 16, St. Louis. From England to Batavia: Aug. 15, Rhijnio Feith. From Melbourne to Manila: Aug. 17, Peru. From Bankok to New York: Aug. 16, Magniperb.

FREIGHTS AND CHARTERS.

At SHANGHAI.—For London, Tea £4 to £4 10s.; [Silk £6 to £6 10s. For New York none on berth. The demand for tonnage had considerably declined as also the ruling rates, until within the last few days when a reaction was caused by the near approach of the rebels, and vessels of all classes are eagerly sought for at extravagant rates. The Seaman's Bride has been engaged by the British Government as transport at 17s 6d per ton monthly. The principal charters reported are, the Charmer, to Hong Kong, and or Whampoa, 35 lay days, 35 c. per picul. The Swallow, to Amoy, 30 lay days, 28 c. per picul. The Anglo Saxon, to Amoy, 35 lay days, Mex \$ 5,000.

At HONG KONG, MACAO, AND CANTON.—For London, £3. For New York, no quotation. The amount of disengaged tonnage is at last on the decrease, the arrivals lately having been small. There has been very little inquiry for tonnage, except to the rice ports, since our last. The John Stephenson, Baglet, Lady Amherst, Kate, and James Marshall, have been chartered by the Government to take up cargoes to the north at 17s. 6d. per ton per month. The other settlements reported are—Anne Lee from Whampoa to London, at £3; Mary Ann Wilson, £3 to £3. 10s.—The John Bull, for three months, at \$1,200 per month; the H. V. der Lihu to San Francisco, for \$1,250. The Lammermuir, which vessel was reported as settled for invalids to the Cape at £20, was withdrawn, and fresh tenders invited, resulting in her being again taken at £3,800 for the voyage, with permission to take cargo in her lower hold.

At MANILA.—To London, £2 10s for sugar; £3 to £3 5s for hemp. To New York, \$7 for sugar, \$2 per ball for hemp.

At Foo Chow Foo.—To London, £3 to £3 10s; to New York \$12.

At SINGAPORE.—The want of light freight is the great cause of preventing vessels being put on the berth for London, though there are but few disengaged ships in harbour, and the rates offered being very low. The charters reported are, Trambaze, to Glasgow, at £2 2s 6d per ton all round. Spanker, from Akyab to Liverpool, at £3 5s per ton, with 40 running lay days. Punch, to Saigon, for the French Government, with stores, for \$900 in full port charges paid.

Continental Intelligence.

RUSSIA.

St. Petersburg, Oct. 5.

(FROM OUR OWN CORRESPONDENT.)

The *Northern Bee* publishes a letter of a late date from the Amoor, according to which the development of that province is going on in the most satisfactory manner, and the means of communication were increasing every day. The four small iron screw steamers built at Hamburg had safely arrived out in the ship *San Francisco* and were being put together. When ready for use they are to be employed in the regular navigation of the Amoor, and will be able to ascend that river as far as Tschita. The arrival of the *Steinwarder*, also from Hamburg, with a large and valuable cargo, is also reported, after a voyage of five months, and touching first at Hakodadi to obtain provisions and water.

Accounts from the Chinese frontier state that the introduction of steam communication between Djumen and Semipalatinsk is happily accomplished, and that steamers are now plying regularly on the Irtysh between those two places. It is intended to extend the communication up to Lake Tsai-Sana, near which are extensive and valuable coalfields, which can then be profitably worked, and thence to Chugo-chak, well known as a great tea market, and which is only 1,200 wersts (800 English miles) distant.

With reference to the melancholy loss of the Imperial steam-clipper *Platoon*, by the explosion of her powder magazine, mentioned in my last, I am enabled to send you the following copy of a private letter from one of the survivors, Dr. Johanson, the surgeon of the ship, to a relative of his in this city:—

"On the 18th of August, about 5 P.M., the squadron, consisting of the steamers *Rynda*, *Norik*, and *Platoon*, on their return from the Pacific after an absence of nearly three years, arrived off the entrance to the Gulf of Finland, and were bowling along with a fresh breeze and rather high sea. We were just abreast of the Island of Hoogland (not Heligoland, as incorrectly printed in our last number), and I was sitting in my cabin engaged in putting in order my papers and collections of plants and shells, which had cost me so much time, expense, and labour, when I heard a sharp explosion, which, however, did not sound louder to me than the usual report of one of the ship's guns, and I at first took but little notice of the circumstance, under the impression that it was the commencement of a salute to some ship of war or battery we might be passing. As, however, the report was not repeated, and recollecting that something was being done in the powder magazine, I scrambled upon deck, where I found everything in the greatest confusion, the decks strewn with dead bodies, and the ship in a sinking state. I jumped with several of the seamen into the barge between the masts, the fastenings being hastily cut away, and scarcely had we taken our places when the vessel went down with a heavy plunge. The foremast, as I learnt afterwards, was seen to shoot up like a rocket, but in the sinking of the ship our boat was capsized by coming in contact with the shrouds and rigging of the mainmast, and we were all thrown into the water. When I again reached the surface the vessel was no longer visible, and the sea was covered with pieces of floating wreck, among which I noticed several human heads bobbing up and down with the waves. I managed to seize a large block belonging to one of the gun-tackles, and then a bale of sail cloth that was floating near me, but the latter I was soon obliged to abandon, as it began to sink as soon as saturated with the sea water; but luckily just then I caught hold of an oar, with which I managed to support myself for some time. Hearing human cries near me, I looked round and perceived a boat upside down, to which were clinging ten poor fellows. The next time the wave raised me high enough to obtain a sight of the boat there were only four left, all the others having perished. Just as my strength was beginning to fail me, I saw a boat approaching, on my hailing which a rope was thrown to me, with which I was hauled on board and saved, though in a very exhausted state; but I have to lament the loss of nine brother-officers and eighty six of the seamen and marines."

The Russian ship *Kamtschatka*, Captain Juselius, belonging to the Russian-American Company, and bound for Sitka, arrived at Copenhagen on the 1st inst., from Helsingfors, in Finland, and after being supplied with fresh provisions, sailed the next day for her distant destination.

The following, dated from St. Petersburg, 7th October, was published on the 8th inst. in the London papers:—

Advices have been received here from Peking to the commencement of July. The insurrection in China was gaining ground, especially in the eastern maritime provinces. The militia had been called out in Peking and its environs. Discontent prevailed everywhere. Provisions of all descriptions were exceedingly dear, and commerce was stagnant.

The inhabitants of Peking were favourably disposed towards the English, and desired their presence at Peking. This was caused by reports that the English who disembarked at Pecheli had not ill-treated the natives. A corps of 6,000 men had been despatched from Peking against the English; 10,000 soldiers had been sent in another direction.

A report was current at Peking that the Emperor would spend the winter at Moukden. The Emperor's thirtieth birthday would be celebrated by festivals at Peking.

HOLLAND.

AMSTERDAM, Oct. 6.

(FROM OUR OWN CORRESPONDENT.)

When the *Malabar* was lost in the harbour of Point de Galle several boxes of the Dutch mail were saved and forwarded on to Batavia. At first it was understood that the part saved contained the letters, but a notice received from Java, and just published by the Dutch General Post Office, announces that the portion saved contained nothing but newspapers, and that the whole of the letters by that mail outwards may consequently be considered as irretrievably lost.

Mynheer P. van Rees, formerly Resident of the district of Batavia, has been created Officer of the Legion of Honour by his Majesty the Emperor of the French.

According to the report of the Dutch Consul at Hong Kong the number of vessels that entered that port under the Netherlands flag in 1859 was 33, of the aggregate burthen of 16,215 tons, and bringing 13,753 tons of cargo. Ten of these vessels brought 80,000 piculs of rice from Java, six arrived with coals from England, four from Japan, with assorted cargoes, three from Shanghai, chartered by Chinese houses, one from Bombay with cotton, three from Singapore with rice, one from Saigon with rice, and five from Macao for charter, and which were immediately taken up by the British Government.

In the proceedings of the States-General the most important topic introduced since my last was the Minister van Hall's financial statement in the Second Chamber and the debate on the budget for the financial year 1860-61. He describes the state of the national finances as highly satisfactory and encouraging. There is at present a disposable surplus from the year 1858 of 69,000 florins, after paying away the 20,500,000fl. as sanctioned by the Legislature in the last session, 3,786,417fl. surplus of 1859, whilst that of 1860 can be safely estimated at 14,145,000fl., making 18 million florins surplus. The ordinary receipts for this year are put down at 61,680,000fl., and the surplus from the colonies at 32,500,000fl., making the total receipts more than 94 million florins, exclusive of the five millions voted on the 7th July last for the purchase of state bonds at the market price towards the reduction of the national debt. The expenditure is estimated at 85,035,000fl., being 12 millions higher than the budget of last year, so that there will be a clear surplus of over 9 million florins to be applied as the States-General may consider most advantageous to the interests of the country. With regard to the National Debt, it appears from the Ministerial statement that no less than 170 millions of florins had been paid off between 1844 and 1850, and 135 millions between 1850 and the present time, making together 305 millions paid off during the last sixteen years.

UNITED STATES.

NEW YORK, Sept. 26.

(FROM OUR OWN CORRESPONDENT.)

The beautiful steamship *Fire Dart*, built for the China waters, was launched from the yard of Thomas Collyer, foot of Forty-third-street, East River. This is the fifth steamer which Mr. Collyer has constructed for that trade, and in about three weeks he will launch the sixth, and is now preparing to lay the keel for the seventh. Her dimensions are as follows:—Length over all, 200 feet; breadth of beam, 30 feet 6 inches; depth of hold, 11 feet 6 inches.

The Commercial agent of the United States at Hakodadi has transmitted to the State Department a report on the present condition of the Japanese foreign trade. Under the treaty stipulation, ground has been selected for dwellings and places of business. The harbour has been surveyed, and buoys placed where needed, and a Government pilot has been provided, whose fees amount to about £2 for each ship. Several vessels have already paid the pilotage. By this report it seems the Japanese are unwilling to give up their profitable foreign trade, and distrust the effects of the anticipated change in trade on the prosperity of the working classes.

MONETARY AND COMMERCIAL.

Since our last East India goods have undergone but little change in the market. Most descriptions of goods have been quiet, while prices in the market have been sustained.

The tea market has been steady, with a good demand from the trade. The higher qualities of both greens and blacks have sold, in some cases at rather easier rates, while the medium grades have commanded full prices, and in some cases an advance. Linseed has been active, and in good demand. Gunny cloth, Indigo and hemp, have been without important change.

Our money market continues easy, with loans plenty on call, and for good sixty and ninety days paper at 7 per cent. sterling. Exchange is steady, but

not active. We quote sixty day bills on London at 109½, and on Paris at 5.13½c. The 56 Banks of this city make the following weekly statement, closing the 22nd inst., compared with the previous week—

	Loans.	Specie.	Circulation.	Deposits.
Sept. 15	\$127,002,728	18,960,749	9,494,332	76,859,755
Sept. 22	125,802,644	18,988,603	9,480,871	75,754,931

Decrease	\$1,200,084	—	13,461	1,104,824
Increase	—	27,854	—	—

The following table gives the imports of dry goods at this city for the week and for the year.

	1858.	1859.	1860.
For the week	\$1,039,726	907,559	2,179,802
Previously reported	45,436,486	47,525,988	64,781,733

Since January 1	\$46,476,212	48,433,557	66,961,535
-----------------------	--------------	------------	------------

The following table gives the exports from the port of New York for the week ending the 24th September inst. :—

Mf. tob., lbs. 305,558 ..	\$65,622	Lumber, ft. 424,742 ..	\$14,452
Do. wood, pkg. 1,536 ...	3,660	Pkd. fish, cs. .. 15 ..	180
Hardware, cs. .. 120 ...	9,092	Agimp's., pkg. 81 ..	2,610
Oars	610 ...	Boots, cs. 66 ..	1,470
Domestics, bal. 28 ..	1,328	Candles, bxs. .. 50 ..	400
Dd. apples, bls. 91 ..	1,149	Soap	120 ..
Woodw. pkgs. 567 ..	4,296	Tobacco, tc. .. 1 ..	160
Sew mach., cs. .. 21 ..	1,176	Furniture, cs. .. 77 ..	1,000
Clocks, &c. 197 ...	2,593	Carriages 10 ..	1,830
Shoe pegs, bls. 50 ..	150	Harness, sets. 10 ..	600
Edge tools, cs. 127 ..	871	Drugs, pkgs. 21 ..	175
Blocks	8 ..	Miscellaneous. — ..	95
Flour, bbls. .. 1,500 ..	12,025		
		Total	\$126,027

There were exported to China from this port during the week ending the 21st inst., 1,500 bales American cotton goods, of the value of \$68,508, chiefly to Shanghai, via Hong Kong.

We annex particulars of the movements in Indian goods: Gunny bags, sales have been made in Boston of 600 to 800 bales, 425 to 440 lbs., at 13½c. 6 months.

TEA.—A spirited public sale was held on the 19th inst. The catalogue comprised a list of some 7,000 or 8,000 packages greens and blacks. The higher grades sold at a slight decline, this description being in excess of the wants of the trade, while the medium qualities commanded full prices, and in some cases sold at a slight improvement. At private sale transactions are moderate; 2,000 chests were sold to the trade in private.

GUNNY CLOTH.—There is but little doing, and prices are somewhat dull. The transactions have embraced a few hundred bales of standard at 13c. 6 mons., and 300 to 600 bales in Boston, mixed, on private terms.

HEMP.—The market is without activity. 250 bales inferior jute sold here from store at \$82 50c., 6 mons., and 250 in Boston for New York at \$90, 8 mons., and 100 do. Manila for export hence on private terms. At Boston, 500 bales jute sold at \$90 and \$92 50c., 6 mons.

FIRE CRACKERS.—Sales have been made of 2,500 No. 40 packages at \$50, 4 and 6 mons.

SPICES.—There has been animation and activity in this trade, though without change of importance in prices. Among the sales were 3,000 bags of cloves, part at \$7½, cash; 200 bags pepper, at \$½, and 1,500 mats cassia, at 23c.; 65 cases mace, at 37c.; 10 do. nutmegs, at 43c., 6 mons.

SEEDS.—Calcutta linseed rules with much steadiness and firmness in prices, with sales of 3,000 bags in Boston from store at about 80c. cash. The sales also embraced 5,750 bags and 2,300 pockets Calcutta to arrive here, believed to be at 1.77½c., cash.

SALTPETER seems in fair demand, with sales of about 1,500 bags, to arrive, at 10½ to 11c., and the stock of saltpetre in Boston on the 19th inst. comprised 1,500 bags. A sale of 420 bags was made at Boston on private terms.

INDIGO.—The market was quiet, but firm. The sales more light. We note sales of 11 chests Madras at 75 to 85 cents 6 months. Bengal was held at full prices.

ARRIVALS.—Martha, Lane, at Boston, Sept. 28, from Calcutta; Nautilus, Elwell, from Manila, telegraphed below Boston, Sept. 28, A.M.

SAILED.—Sherwood, Hauser, from Boston, Sept. 26, for Hong Kong; Firefly, Martin, sailed from Warren, R.I., Sept. 26, for Mauritius and a market.

Correspondence.

(To the Editor of *The London and China Telegraph*.)

SIR,—Allow me to call your attention to the following:—The Post-office at Hong Kong being no longer imperial, but colonial property, a similar thing may be said about the territory opposite the City of Victoria, called "Kowloong," it being leased in perpetuity to the Hong Kong Government, by the Imperial Government of China. Canton is held by the great partnership, giving our authorities just enough latitude to enforce any view or point they may desire to obtain, so that no difficulty at present exists for establishing a telegraphic communication between Hong Kong and Canton, under the Post-office authorities. I estimate the cost thereof at £3,000; the interest the colony at present gets for that amount at six per cent. is £180 per annum. Now, as you are well aware, in China people are always ready with subscriptions and money, if only it does not entail time and trouble. Suppose that only fifty firms in Hong Kong and Canton sub-

scribed five dollars per month each, that would bring in three thousand dollars, at 4s. 6d., a low rate of exchange, £675 per annum, leaving, besides covering the interest on the outlay, nearly £500 for working expenses, wear and tear. The revenue could and no doubt would be increased, and the estimated cost even reduced by the proper authorities. All I on my part wish to do by these few hurried lines is to draw attention to the subject, believing it not only feasible of execution, but also desirable for our mercantile community.

I inclose my card, and remain sir, yours respectfully,
London, October 4th, 1860. HONG KONG.

(To the Editor of *The London and China Telegraph*.)

SIR,—I was glad to see your late articles on "Interpreters for China." It has always been my opinion that if the Chinese (i.e. the Government) understood us better they would be less suspicious of our dealings. We know them pretty well, but they only know one side of the English character, that which is displayed in the exercise of force. If we want to really influence them, we must begin at the beginning, and give them a proper view of Europe and European affairs. It is not the mere translation of a despatch even that will enlighten them, or that will generally contain only a demand and a threat. But if men can be found who will take an interest in explaining that the arrangements we desire will be for their ultimate good, and who will do this not in the heat of controversy but in daily intercourse with the officials, much benefit would arise, and these expensive wars would be avoided. With a view to this I am in favour of a resident minister at Peking, where only the great rulers of the empire reside, and whose example would be followed everywhere, should any of the Cabinet Ministers be enlightened. It is evident, though, that such intercourse and such enlightenment can only go on by the means of able and intelligent interpreters, who have the honesty, and courage as well, to make faithful statements on both sides. I know some who have an over-weening love for Chinese antiquities and obsolete ceremonials, and think that an attention to these things will induce their respect. It is a fact, however, that the Chinese themselves have an utter contempt for many of these ancient forms and formalities, and therefore too great attention to them would argue weakness or suspicions in their minds, while upright and straightforward dealing will undoubtedly claim their respect. We should give due weight the wisdom of their ancestors, and set plainly before them the advantages and prospects arising from European institutions. The Chinese can draw inferences quickly enough, and right ones, too, if only the whole truth be set before them.—Yours truly,
Brighton, 6th October. LINGUIST.

Spirit of the Press.

THE REBELLION AND MR. EDKINS.

We have at length an authentic sketch of the Tai-ping insurgents in China from an eye-witness, Mr. Edkins, the missionary. There can be no better proof of the want of sympathy between the Asiatic and European mind than the wild theories which formerly found currency in England respecting this movement. Because the Empire is an irreligious despotism according to our notions, we recognised in the rebel chiefs the champions of civil liberty, and hailed their grotesque and profane dogmas as the Chinese equivalent of Christianity. Subsequent events have shown that there is very little to choose between the two parties in respect of civilisation, and that the only Scriptural analogy which can be found for the Tai-ping doctrines, as illustrated by their practices, is the policy of the Jews towards the Canaanitish nations. The interest, however, which had been felt in their proceedings was very much on the decline till their success in the present year, crowned by the capture of Hangchow and Soochow, made it necessary to contemplate, and, if possible, to avert, the contingency of a triangular war. While Mr. Edkins's narrative adds little to our knowledge of the origin or political bearings of the insurrection, it professes to throw some light on its religious aspect. "When the intelligence reached Shanghai that the semi-Christian rebels were become our neighbours, great curiosity was felt to learn from personal intercourse what are their present opinions and feelings in regard to foreigners and Christianity." This was the chief object of Mr. Edkins's expedition, and we cannot say that its results at all satisfy us that the Chinese have any leanings towards orthodoxy. It is true that a book called "The Visions of Hung-sin-tshuen, containing, according to Mr. Edkins, our best lights on the early history of the rebellion," "vindicates satisfactorily its religious origin, and shows that while the founder has erred in regarding himself as the subject of immediate Divines inspirations, he is a sincere believer in Christianity." We have not had the advantage of reading this work, but the facts of Mr. Edkins's interview with the rebel leaders are quite inadequate to support such a conclusion. One chief, Ho-sin-i, when questioned "respecting the religion of the party to which he belongs, excused himself from entering into particulars by stating, that being a late adherent, and not having devoted his time to anything but military operations, he could not do more than repeat the elementary formula of the Tai-ping creed." Another chief, who was an "original adherent" of the movement, confined himself to remarking that "the Chinese

and foreigners should be in harmony, seeing that they worship the same Heavenly Father and Heavenly Brother (Jesus), and profess the same religion." Very similar language was held by the Chung-Wang, or "Faithful King," himself, after the conversation had been opened with the following "leading" question:—"Faithful King, may you live a thousand years. We come from Shanghai, and belong to the great English nation. We have heard that your religion is Christian, like our own. We worship, like you, the Heavenly Father. We have therefore come to make inquiry respecting this." Thus primed, the Faithful King spoke of Jesus as the "Saviour of the World," adding that "the younger brother of Jesus is our chief." Prudently evading the discussion of this heresy, the missionaries elicited that the first day of the week was kept as the "worship-day," and obtained leave to send the Chung Wang some religious books. This is really all that the conversation amounts to, and, even though they are said to perform baptism by "rubbing water on the chest," and to distribute the New Testament, it would be a great stretch of credulity to mistake their spirit for that of Christianity. The Mahomedan Koran and the history and institutions of Buddhism present far more striking analogies to our own faith than this studied or fortuitous identity of certain theological terms and practices. Travellers agree in representing the prevailing creed of China as practical Atheism, and, as the materials of a religious system had to be procured somewhere, it is not wonderful that ours was laid under contribution. In spite of their sanctimonious proclamations, the rebels maltreat the peaceful inhabitants unmercifully. But it is their attitude towards the "outer barbarians" with which we are concerned, and, as inhospitality is no part of their creed, we shall be wise in cultivating non-official relations with them through missionaries and traders. Perhaps in the end we shall gain as much by conciliating the insurgents as by coercing the Imperial Government.—*Times*.

THE THIRD CHINA WAR.

At length the policy of the Western Powers has resumed its course in China. The British expedition left Tah-lien-whan Bay late in July for Peh-tang, somewhat to the north of the Peiho, and at no considerable distance from the point where the Great Wall hangs its last turret over the sea. The blow has by this time, probably, been struck; and we shall learn within a fortnight what retribution has been dealt for the slaughter of our soldiers and sailors in the Peking river. It is with satisfaction we observe that the French plan for disembarking at Chi-kau had been abandoned, since every traveller who has visited that locality describes the coast as a swamp, and the climate as fatally deleterious. We might have expected a repetition of the Taku disaster had this scheme been persisted in, since cavalry and guns would be totally unmanageable in shallow water and deep mud, a circumstance which proved so calamitous to the allied troops last year. The fourth Chinese war, however, has fairly begun, and it must be the desire of every politic mind that it should be continued until permanent results have been obtained. We are not fighting at present for glory, but for civilisation, commerce, and international law. Our Indian soldiers are pitted against the Tartars of the desert, the Sikh against the Mantchu, and some picked English battalions will employ their sabres to avenge the massacres of the Peiho. Local newspapers dilate on the splendid appearance of the British forces when drawn up on the beach of Odin Bay; but just now, when we are examining the quarterly accounts of the empire, we cannot help remembering that these blue, crimson, and golden squadrons, upon which ready writers expatiate, cost enormous sums of money; that their transport involves a heavy additional expenditure; and that, since the campaign was forced upon us, we ought to be indemnified in every shilling thus disbursed. Lord Elgin will be bound also, whenever negotiations recommence, to rectify certain errors in the treaty of Tientsin, to throw open without let or hindrance the channel of the Peiho, and to secure for European trade in the north, not the inferior harbour of Tangchau, but that of Chefoo, which is at all seasons adapted for the anchorage of large ships and the landing of heavy merchandise. Nor are we convinced by the objections entertained by Lord John Russell against the project for opening up regular relations with the Chinese of the West. Why should England fail in that which Russia has accomplished? The former, it may be argued, penetrates the interior from the ocean, while the latter has an inland frontier; but there is no valid reason why British agents should be more secure at Peking than at Esmok. With a tight hand kept upon the Central Government, the subjects of this realm might be safe anywhere, excepting, of course in those provinces which the rebellion has overwhelmed; and, with respect to them, the English have never experienced any want of confidence. The events of the rebellion are mainly in favour of the allies. The Emperor at Peking has now to encounter a double enemy, one ineradicably established throughout a vast range of his own dominions; the other bringing to bear upon him all the concentrated scientific and deadly strength of civilisation. The revolted Chinese, professing a modification of Christian tenets, wavering between Carpienianism and a sort of mongrel Catholicism, entertain peculiar sympathies with the people of the West, and at any rate would naturally be disposed to co-operate with the foreign assailants of the Mantchu throne. We aid their work, and they assist ours. Nor would it be matter of the slightest regret did the insurgents, acting simultaneously with the Western Powers, descend irresistibly upon the Imperial metropolis, and sweep from the face of the earth that Mantchu dynasty which has been the chief obstacle to enlightenment and progress amongst three hundred millions of the human family. Happily the fantastic theories of China which prevailed in the last century, and have since imposed upon so many minds eager for Utopianism, have been dispelled. The Citizen of the World has actually been among us, and we have recognised in the polished gentleman of Peking no more than a listless savage, gaudy and obese, whose pretence to philosophy consisted in an attempt at atheism, and whose manners formed a mixture of cowardice with insolence. Such are the mandarins of the Middle Empire, and we anticipate from them nothing whatever, except so much as may be extorted by the sabres of the Dragon Guards and the lances of the Punjaub Irregulars. These men, under able commanders, have undertaken to remove the reproach which fell upon our arms when a British Ambassador was fired upon from an ambuscaded Chinese river, in violation of a solemn treaty, and by orders of the Emperor's representatives. We trust it will be remembered that they have not only outrage and perfidy to avenge, but rights to establish for the commerce and the national flag of Great Britain. Great interests are at stake; and prodigious trade is waiting for the cessation of hostilities, especially in the north of the empire; and there is no calculating what, on the one

hand, might be sacrificed by an incompetent conclusion of the war, or what, on the other, might be gained if, once for all, we now define, on a permanent basis, and with unmistakable distinctness, the future relations of Great Britain with China.—*Daily Telegraph*.

TAH-LIEN-WHAN BAY.

Although we talk much more in England about Rome and Naples than we do about the bay of Tah-lien-whan, our intimate home sympathies jump most eagerly towards the last news from that far away locality. Its uncouth name has hitherto found its way into no map, and its position is an impenetrable secret to the majority of those English families who know it only as the temporary abiding place of some one who is very dear to them; but a little boat accident at Tah-lien-whan has much more English interest about it than if the whole Austrian navy went down in a storm in the Grand Canal at Venice, or after a collision with the unlighted Rialto, and the news of half-a-dozen cases of fever upon the shores of that bay with an unmemorable name would cause more real alarm in England than the news that malignant malaria had held its own at Rome against the approaching winter, and had seated itself triumphant upon all the seven hills. The fact is, that our own kith and kin were, at the last accounts, away in that distant and unsung land, where there are neither priests, nor ruins, nor deadly miasma; and upon this last point we are glad to be well assured. However, the dogs are now slipped, and our next letters will give us results. If we are not successful this time, no fault will lie at the door of those who prepared the expedition. It is at any rate pleasant to know that we have made some advance in the art of sending out a fleet and army. We have placed a powerful expedition on shore 16,000 miles from Woolwich without a disaster, and in as perfect a state of efficiency as if they were all congregated at Mount Edgecumbe. After the first blow is struck promptitude and rapidity will be everything, and there will be no more delay for anybody, not even, we will hope, for diplomatists, until enough has been done to render their work easy. The plan, we believe, was to land the first division at Peh-tang, where it may be reasonably supposed that the Chinese will not expect us. Peh-tang is the mouth of the unnavigable river into which the Chinese attempted to lure Mr. Bruce. It is about ten miles north of the mouth of the Peiho. It is defended by two small forts, and if the river should have been found not to be staked the landing party would make a dash at these forts, and, having taken them, the whole land force would march across the neck of land which separates the Peh-tang from the Peiho river, and thus obtain the rear of the Taku forts. When this march of twelve miles had been effected, the gunboats would cross the bar, and the forts be attacked at once from land and river. This plan may of course have been modified by circumstances, and it may have happened that the Peh-tang river might be found to be too formidable in its fortifications to be thus summarily dealt with; but circumstances point out this as obviously the plan of the first intention, and, as two months have now elapsed since the attack must have been made, not even Russian telegraphs can render it an indiscretion to mention it. Such is the crisis of our affairs in China as it stood on the 25th of July last, and as it has been more elaborately depicted by our correspondent who attends the expedition. For tidings of the issue we must still wait, and it is vexatious to feel that the want of telegraphic communication alone conceals from us events of vast national concern which are very possibly known to another European Power.—*Times*.

Naval and Military.

No movements have been announced in this country or in France in connection with the expedition to China since our last. The *Tartar*, 20, screw, which has arrived at Portsmouth from Sheerness, is reported to be fitting for service in China.

The *Albatross*, which sailed from Hong Kong on the 17th July, and the *Epsom*, on the 5th August, with naval and military invalids for the Cape and England, have, in consequence of the great mortality on board of some transports from China, been fitted and supplied with every necessary and comfort.

The following is an extract of a letter from Commodore H. B. Edgell, C.B., dated on board Her Majesty's ship *Retribution*, Trincomalee, August 26th, 1860:—"We are at last off for home, after a short trip to Madras, and leave for England about the 15th of September, hoping to arrive at Spithead before Christmas, as we only touch at the Cape. We have landed some of our heavy guns, as the ship is not too strong. I have no doubt we shall make a good passage home, the season being favourable for rounding the Cape. The *Cyclops* is surveying Galle harbour, and expects soon to be ordered home. The first stone of a new lighthouse has just been laid here, and I should not be surprised to see the Peninsular and Oriental Company make this their head-quarters at some future time."

The Sappers and Miners of the Royal Engineers, selected to proceed to the Cape of Good Hope, to erect the sanatorium at Cape Town, for the sick and wounded troops from China and India, embarked at Southampton on the 4th instant, by the mail steamer.—The sanatorium is intended to be formed of huts, and will be erected near the locality of Wineberg, about eight miles from Cape Town. Dr. J. B. Taylor, C.B., who has been appointed chief medical officer, has been for some time at the Cape superintending the erection of the various buildings and organizing the medical staff of officers for the new establishment.

The Rev. T. Molesworth, one of the chaplains at Chatham Garrison, has received orders to proceed to China.

With the desire of promoting a more intelligible intercourse between our own troops and those of our foreign allies, when called into the same sphere of action, a French class has been established at the Artillery Barracks at Woolwich.

The Select Committee of Woolwich Arsenal have for some time past been engaged in proving a 12-pound Armstrong gun, under a course of the severest conceivable tests, with a determination of overloading and firing until some portion of the gun should give way. The experiments, which have extended over some weeks, and are now terminated, have taken place at the Royal Arsenal butt, the committee having arrived at the conclusion that no amount of charge can have the slightest effect in shaking the metal.

The trial commenced with loading and firing seven rounds with an ordinary proof charge of powder and a single cylinder shot, after which the charge of powder was increased, and the length of the cylinder shot was doubled. Seven rounds were again fired, and the gun, having been searched and examined, was found intact. A course of trials was subsequently followed up with a gradual increase of the charge and a progressive lengthening of the cylinder, which ultimately consisted of 11 elongated shot, the last of which projected beyond the muzzle of the gun. In order to augment the severity of the test, the cylinder was rammed firmly home and cemented to the muzzle with molten lead and resin, and every one expected that the gun must inevitably give way. Seven rounds were fired with each increased charge, the result of the last seven rounds carrying the cylinder, weighing 132lbs., completely through the huge mound of earth against which it was fired; and the gun, having been carefully examined, exhibited no symptoms of injury.

A grand divisional field day of the whole of the troops stationed at the North and South Camps, and at the permanent barracks, took place at Aldershot. The Royal Artillery consisted of the Horse Brigade, commanded by Col. Phillpotts, and the batteries of Armstrong guns commanded by Capt. Elgee and Pigou. The Cavalry Brigade, commanded by Brigadier-Gen. Lord Paget, C.B., comprised the 5th Lancers, Col. Sullivan; 9th Lancers, Col. Little; 18th Hussars, Lieut.-Col. Knox; and the Military Train Corps. The three Infantry Brigades, under the command respectively of Major-Gen. Lawrence, C.B., Brigadier-Gen. Brook Taylor, and Brigadier-Gen. Russell, comprised the 10th, 32nd, 41st, 49th, and 55th Regiments, the Rifle Brigade and the Royal Sussex Militia. The whole force was under the command of Lieut. Gen. Sir John L. Pennefather, K.C.B., and about four hours were occupied in a series of evolutions of attack and defence on an extensive scale. The cavalry having taken up a strong position were supposed to be attacked by infantry, who advanced in quarter-distance columns, protected by the Rifles. The artillery opened fire, which was soon answered on the other side. The cavalry advanced and retired, and ultimately the enemy's centre was broken by a sharp attack, and a most exciting pursuit took place. The troops returned to quarters at 3 o'clock.

The first of a class of steel-plated iron steam vessels, of somewhat gigantic proportions, which the Government has decided upon having constructed for the British navy, is to be laid down at Chatham Dockyard as soon as the necessary preparations have been made at that establishment, and completed with all possible despatch. The vessel which it is intended to be constructed will be rendered as nearly as possible shotproof, and this will be accomplished by covering her above her water line with massive steel armour plates. She will be of a size never yet witnessed in the English navy, the intention being to construct her 400 feet in length, or about double the length of many line-of-battle ships, and about two thirds of the length of the *Great Eastern*. She is to be furnished with engines of corresponding power, which will drive her through the water at a high rate of speed, and her armament is to consist exclusively of Armstrong guns of the heaviest metal and longest range. She will be one of the most formidable vessels of war yet built for the Government. The Assistant-Surveyor of the Navy, Mr. Large, has paid a visit to Chatham Dockyard, in order to ascertain if either of the docks at that establishment are sufficiently large to admit of the proposed vessel being built. The largest of the docks is that known as No. 2, which has been only recently finished, the Admiralty having had that dock built in order to receive the largest vessels belonging to the navy. Its length is only a very little less than 400 feet, but an addition of several feet will be made by the removal of the caisson at the entrance and erecting in its place a dam, by which means the required length will be obtained for the construction of the vessel. The dock is at present occupied by the steam floating battery *Trusty*, 14, which is under repair, and as soon as she has been completed it is intended to commence building the new iron vessel.

CHANGES AND PROMOTIONS IN HER MAJESTY'S ARMY AND NAVY.

NAVY.

PROMOTIONS.

COMMANDERS TO BE RETIRED CAPTAINS.—John Neilson Gladstone, who entered the Navy in 1820, and Alexander John Græme, who entered the service in 1813.

CHIEF ENGINEER.—Frederick W. Brown, with seniority from the 24th of September, 1860. Charles Tucker, promoted to the *Indus*, for service in Naicissus.

ASSISTANT ENGINEERS.—First Class: John Grey, to the *Hogue*; Robert Anderson (a), to the *Snap*.

ACTING ASSISTANT ENGINEERS.—First Class: Wm. Farquharson, to the *Valorous*; George M. Dooley, to the *Niger*; Archibald Gillies, to the *Furious*; John Langlands, in the *Alert*.

ACTING ASSISTANT ENGINEERS.—Second Class: H. P. Saunders, promoted to the *Cordelia*; C. Bonwick, promoted to the *Satellite*.

ASSISTANT PAYMASTER.—C. A. Shapcote, promoted to the rank of paymaster.

APPOINTMENTS.

CAPTAINS.—The Hon. C. G. J. B. Elliot, C.B., to the *St. Jean D'Acre*, vice Captain T. P. Thomson, invalided; and Thomas Harvey, to the *Cressy*, vice Elliot.

COMMANDERS.—J. M. Reeve, to the *Cæsar*; Commander W. Swinburn, to be Inspecting Commander of Coastguard, vice W. H. Jones, superseded at his own request; H. C. Glyn, to the *Miranda*.

LIEUTENANTS.—C. W. S. Blount, to the *Ariel*; John Burgess, to the *Eagle*; G. Y. E. Rattray, to the *Marlborough*, for disposal; William B. Pauli, to the *Impregnable*; Richard S. Bateman, to the *Cumberland*; David Boyle to the *Centurion*; W. H. Elton, to the *Miranda*; Thomas W. Oliver, to the *Cornwallis*; Osmond de B. Brock, to the *Royal Adelaide*; Logie A. Whimper, to the *Impregnable*.

MASTERS.—James H. W. Bowlett, to the *Brisk*; Arthur Thomas, to the *Miranda*; E. J. Kemp, to the *Brisk*.

CHAPLAIN AND NAVAL INSTRUCTOR.—The Rev. W. C. P. Baylee, M.A., to the *Victory*.

SURGEONS.—Dr. Alexander Watson (Superintendent), to the *Palmerston*, convict ship; Henry Slade, to the *Miranda*.

PAYMASTERS.—S. H. L. Giles, to the *Hogue*; A. Robinson, to the *Wellington*; G. P. Ricarda, to the *Victory*; T. C. J. Dryden and W. H. Reeves, to the *Donegal*; Thomas Leccombe (additional), to the *Impregnable*; James C. Mesgher (additional), to the *Formidable*; George Barnes, to the *Miranda*; John Burke (additional), to the *Wellesley*.

ASSISTANT-SURGEON.—John J. Dodbyn (acting), to the *Landrail*.

SECOND MASTERS.—John Riches, to the *Landrail*; W. R. Cronin, to the *Rhadamanthus*.

MASTERS ASSISTANTS.—John B. Palmer, George S. Brodie, Thomas H. Smith, R. H. M. Maxwell, and George Alexander Broad (additional), to the *Marlborough*; Miles S. S. Bree, to the *Aboukir*; Herbert George T. Packer, to the *Diadem*; Nathaniel Child, to the *Centurion*; Edgar C. Baker (additional), to the *Victory*, for the *Rolla*; George G. M'Ewen, to the *Tartar*; John A. Jones (additional), to the *Britannia*, for the *Sealark*; T. J. Morris, to the *Miranda*; T. G. Freeman, to the *Dasher*; C. Brent, to the *Sanspareil*.

ASSISTANT-PAYMASTER.—J. S. Daniell (in charge), to the *Firefly*.

CHIEF ENGINEERS.—Patrick J. Lambert, to the *Cornwallis*; John H. Bishop, to the *Miranda*.

SECOND CLASS ENGINEERS.—R. H. Jenkyn, to the *Indus*, for charge of the *Charm*. Third Class: Thomas Lewis, to the *Cumberland*, for charge of the *Cochin*; Wm. Watson, to the *Indus*, as supernumerary.

ASSISTANT-ENGINEERS.—First Class: S. Swan, to the *Landrail*; W. Donneson, to the *Cumberland*, as supernumerary; J. Langrish, to the *Foxhound*; H. Payne, to the *Mersey*. Second Class: G. Thompson, to the *Cornwallis*, for service in the *Ruby*; J. Hansford, to the *Colossus*, for service in the *Biter*; John Singer, to the *St. Jean d'Acre*; T. Edgar, to the *Miranda*; Richard Henry Jenkyn, promoted to the rank of second class assistant-engineer in the *Indus*, as supernumerary. Third Class: Thomas Barker, to the *Foxhound*; William A. Naughton, to the *Dee*; F. Grundy, to the *Megara*, as part complement; William Allan, to the *Cumberland*, for service in the *Fisgard*; R. Oliver, to the *Miranda*.

ACTING ASSISTANT-ENGINEERS.—Third Class: Edward Highman, to the *Indus*, as supernumerary; Adolphus Andrews, to the *Blenheim*, for service in the *Violet*; A. Wilkins, to the *Megara*, as supernumerary.

GOVERNMENT OF HONG KONG.

In 1860.

Sir Hercules G. R. Robinson	Governor	Salary £3000
Lieut. Brown, A.D.C.	Private Secretary	250
W. T. Mercer	Colonial Secretary	1200
F. H. A. Forth	Do. Treasurer	800
W. H. Rennie	Auditor General	600
W. C. F. Robinson	Sec. to Superintendent of Trade	800
C. St. George Cleverley	Surveyor General	1000
J. I. Murray	Colonial Surgeon & Lock Hospital	1000
A. L. Inglis	Harbour Master	600
D. B. Caldwell	Registrar-General	700
W. H. Adams	Chief Justice	3000
H. Kingsmill	Acting Attorney General	1250
W. H. Alexander	Registrar of Supreme Court	600
T. F. Callaghan	Chief Magistrate	1200
W. H. Mitchell	Assistant do.	600
Charles May	Superintendent of Police and Coroner	500
W. Chapman	Postmaster General	800
F. W. Mitchell	Assistant do.	500
Rev. J. J. Irwin	Colonial Chaplain	700
Rev. W. Lobescheid	Inspector of Chinese Schools	300

NOTE.—The Governor, Superintendent of Police, and Postmaster General, have a house provided for them; £300 of the Auditor General's salary, £200 of the Surveyor-General's, and £250 of the Acting Attorney-General, are not charged to the Colony, but voted by Parliament under Civil Service Estimates for Consular, &c., Services in China, &c. An increase of salary has been granted to the Governor and several other officers.

GOVERNMENT OF PRINCE OF WALES ISLAND, SINGAPORE AND MALACCA.

Colonel Orfeur Cavenagh	Governor
W. Thomas Lewis	Resident Councillor of P. W. I.
Captain Henry Man	" " Singapore
Captain Macpherson	" " Malacca
Sir B. Bolton McCausland	Recorder
W. Willans Willans	Magistrate of Police
W. Cuppage	Postmaster
J. Rose	Resident Surgeon
J. Clunis	Engineer and Surveyor
J. Michael Moniot	Surveyor-General of the Straits
J. D. Vaughan	Master Attendant
Captain G. C. Collyer	Chief Engineer of Public Works

LIST OF CONSULS IN HONG KONG.

For United States	James Keenan	Consul
— France	M. A. E. Vaucher	Vice-Consul
— Spain	D. José de Aguilar	Consul
— Portugal	Manoel Pereira	Do.
— Netherlands	A. W. P. Kup	Do.
— Denmark	Fred. H. Block	Do.
— Free Hanseatic Towns	Ludwig Wiese	Do.
— Prussia	G. Overbeck	Vice-Consul
— Sweden and Norway	N. Duus	Consul
— Belgium	E. C. Antrobus	Do.
— Austria	G. A. Wiener	Do.]
— Sardinia	Johann Demt	Do.
— Oldenburg and Hanover	C. Brodersen	Do.

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

Suggestions for the insertion of information required by our subscribers will have due attention and acknowledgment.

In our present number will be found a Tabular Statement of the Exports from China, in addition to our Tea and Silk Table, but as the published statements in China contain a large proportion of packages entered as "Sundries," we publish another statement of cargoes, compiled from each vessels' report to the Custom House at the port of her arrival in Great Britain, as also the consignees.

A REGISTER is kept of the addresses of all persons connected with the FAR EAST, and reference can be made to the same by personal application at the office or by letter. Passengers arriving by either Overland route or sailing vessels, in England or on the Continent, will oblige by forwarding their address for the information of inquiring friends.

Post-office orders should be made payable at the Lombard-street Office, to MORTIMER WRIGHT.

Our OFFICES in this city have been REMOVED from 337, Strand, to 7, George-yard, Lombard street, E.C. Newspapers and literary communications should be addressed to the Editor. Correspondence relative to Advertisements, Subscriptions, and the general business of the Paper should be addressed to the Manager, and not to the Editor.

Correspondents and Newspaper Publishers in INDIA, CHINA, JAPAN and the EASTERN ARCHIPELAGO are requested to address all communications, newspapers, &c., via Marseilles, to the Editor, Box No. 70, General Post-office, London, E.C., which has been opened specially for the same.

The London & China Telegraph.

LONDON, TUESDAY, OCTOBER 16, 1860.

"THE TIMES" ON DIRECT TRADE WITH WESTERN CHINA.

We are so fully satisfied of the great advantages which must accrue to British commerce from the adoption of the

project which Captain Sprye and his son have through so many years advocated for opening up intercourse with Western China, by means of a direct trade between Rangoon and Esmok, that we hail with no ordinary feelings of gratification the accession (somewhat tardy though it be) of our influential contemporary *The Times* to the support we have so continuously endeavoured to give them. In our last issue we printed the reply of the Foreign-office to the second memorial of the Leeds Chamber of Commerce. As our readers are already acquainted with its purport we will only say that Lord John Russell evidently formed a very erroneous estimate of the opinions of those mercantile men who have given consideration to this mercantile subject. We observe with real pleasure, therefore, that these opinions have secured earnest, and, we need scarcely add, able advocacy in *The Times*. In its City article of the 6th instant the Foreign-office letter was dissected in a masterly manner. This appears to have had the effect of bringing into the field an able coadjutor, in the person of Captain Sherard Osborn: for in *The Times* of the 11th instant appeared a long letter from that gallant officer, warmly advocating the project. It is indeed true that he might have taken less credit to himself, and have made at least some reference to the originators of the project: but we are content to waive this consideration and to welcome Captain Sherard Osborn as a useful ally in the prosecution of the great work. Of still higher value, however, was the leading article accompanying his letter, and enforcing with considerable power the views we have so earnestly advocated. We trust that Captain Sprye and his son (as too long ministerially slighted as unsupported by others in their labours), will continue to persevere in the work till the commercially ignorant officials of the Foreign-office shall be shamed into action, and be compelled to show a proper disposition to make available the services of those who have devoted so much of their talent, time, resources, and energy, in furtherance of a scheme which must yield such manifold permanent advantages to the empire at large, in many points of view.

We have before stated that what we desire is the discussion of the question. We have reason, also, to think this to be the wish of the projectors. Therefore, we say, give the subject discussion. Its inherent merits will secure its ultimate adoption we are well assured. With pleasure did we read the the seve-

ral later letters which appeared in *The Times*. In one of them, indeed, the writer's views are adverse to the projectors. We refer to the letter signed "J. C." in *The Times* of the 12th inst.: and as that letter may have been written by a gentleman whose opinions are considered by *The Times* as commercially of some value, we will devote our remaining space on this occasion to the examination of some of its statements.

The reasoning of "J. C." in the letter to which we refer rests on the writer's wrong belief that the Eastern half only of China is populous and fertile. We will briefly examine some of his statements in support of this assumption. First, "J. C." speaks of the South-Western province of Yun-nan as "the poorest and the least populous of the Chinese Empire." He gives the population at five and a-half millions. Now, to shew the inaccuracy of this statement, what is the fact by the last computation in 1847? It was upwards of eight millions, and is now probably over ten millions. Next we are told that the adjoining province, "Quang-si, though somewhat better, is the poorest of all the southern provinces of the Empire." Still, this province of Quang-si, comprising upwards of seventy thousand square miles, had in 1847 a population of about ten and a-half millions, which now probably numbers more than twelve millions. Then, again, "J. C." strangely omits all notice of the province of Sze-chuen, immediately to the north of Yun-nan; which contained in 1847 a population exceeding thirty millions, and is said to be the richest of the eighteen provinces of China. In proof of this we refer "J. C." to that late traveller, the Abbe Huc's account of this province, in his journey through it from Thibet to Canton. Further, we may remark that "J. C." overlooks as part of Western China the two provinces of Chen-si and Kan-su, contiguous to Sze-chuen; and containing in 1847 a population of upwards of thirty-six millions. With the vast populations to which we have referred we have no trade from the seaports of China. Yet—and let our manufacturers mark this well—they are not only in themselves prolific of mercantile advantages, but are, besides, well trodden commercial highways to Eastern Thibet and Tartary.

Further, "J. C." speaks of Captain Sprye's proposed route from Rangoon to Esmok as though it were to be by the Irrawaddy. Now, British Pegu, as this writer should be aware, is divided by the Yomah range of mountains, called the backbone of Pegu, into Western and Eastern-Pegu, and the Irrawaddy flows through the Western half. Commerce with Western China has been long attempted by this very circuitous and difficult route from the sea to Bhamo: but the attempts, although made by many men of enterprise, have been absolute failures. We venture to recommend "J. C." to read the pamphlets issued by the projectors of the land route, which we have felt it our duty to advocate. He might, too, we think, with great advantage search after the reports of Richardson, McLeod, O'Riley, and others, on the geography of this part of Eastern Asia. Had he been acquainted with the results of their travels he would have known that the country from our north-east frontier of Pegu to Esmok is not destitute of roads, and that it is not "inhabited by predatory and barbarous tribes who lend a nominal obedience to either the Burman or the Chinese Government:" but on the contrary.

The territory to which "J. C." refers, belongs to the two Burman Shan Princes of Kiang-Tung and Kiang-Hung (than whom, the pamphlets of the projectors state, there are throughout Eastern Asia none more civilised or more desirous of commercial intercourse with our nation), and is not unknown. So long ago as 1835, 1836, and 1837, British officers traversed it, and found the roads covered with caravans carrying to and fro from the Chinese western frontier vast quantities of cotton, teas, cotton, &c., and saw numerous and extensive tea and poppy plantations west of that Chinese frontier. "Fine teas" are a matter of taste, and the taste of Capt. Osborn may be as good as that of "J. C." The former states that the best teas come from the West; the latter that you must seek them in the Eastern Provinces. We will not argue the point. We will only add, on positive authority, that the teas from the extreme west have a good demand even in the Imperial City of Peking. Did we feel justified in giving publicity to the whole of the information in the private pamphlets of the projectors which are before us, we could add much on this point: and could, moreover, give details of much interest, in political and military points of view, with reference to the intervening states of the two tributary Burman Shan princes above referred to.

There is yet one great error in the letter of "J. C." requiring present notice. He is, it would seem, more or less interested in the existing trade with China and Singapore, and assumes that

he sees in this proposal an encroachment on that trade. Now, one of the grounds of the projectors of this project is that it will open up a *wholly new* trade. They believe that it will in no way interfere with the existing trade with Eastern China. Nay, more, that it will not retard its *extension*. The extremities of that vast empire are so very far apart, that there can be no doubt extensive *distinct* trades will be established. Be this, however, as it may, and without adverting to the military and nautical aspects of the question—which we have reason to think Captain Sprye, years since, submitted to our Ministers—we are well assured that on the success of this project depends vast commercial interests for long ages to come: and possibly, also, the yet more important considerations of a higher morality, and a purer faith throughout the celestial empire. We conclude by quoting the following on the subject from *The Times* City Article of Saturday, the 6th inst.:—

“We published a statement a few months back (*Times*, March 10, 1860) to the effect that a large trade might be opened up by a short land route from our Indian possessions to the western frontier of China, and the project excited very favourable attention among the commercial classes in London and the provinces. Any one glancing at a map of Asia will be struck with the proximity we have already attained to China by means of our acquisitions in Pegu. From the port of Rangoon our territory extends north-eastward towards China a distance of 250 miles. We then come to the south-east portion of the territory of the King of Burmah; and across this, which is also about 250 miles in width, we come to the Chinese south-western frontier town of Esmok. We are thus brought into direct communication with that trading people almost at our own door, the whole of the navigation *via* Singapore and the Chinese Sea would be saved, and we should moreover reach a moiety of the population with whom we can never otherwise come in commercial contact, even if our political relations with the Chinese Government become of the most unrestricted and cordial character. What, then, is the difficulty? The first idea likely to occur is that the King of Burmah would throw obstacles in our way. Such, however, is not the case. The King of Burmah seems to understand commercial interests better than some English statesmen, for he is represented to be friendly to anything that will promote commerce with and through his dominions. Apparently there is no difficulty, except the old one. Our Foreign Office are not fond of new questions, and least of all of commercial questions. The Leeds Chamber of Commerce has recently twice memorialized the Government on the subject. They represented its important bearing on the interests not only of our home manufacturers, merchants, and shipowners, but of our traders in all parts of India. The Chambers of Commerce of Bradford, Halifax, Huddersfield, Manchester, and Liverpool, had previously made similar representations. The reply has been such as to damp, as far as possible, all effort in the matter. Yet nothing was required but a civil negotiation with the King of Burmah, which the Government alone can make; and that in any future diplomatic arrangements with the Chinese authorities the frontier town of Esmok should be recognised as a legal place of trade.

“Lord John Russell, however, thinks that ‘much inconvenience’ might arise from such a ‘novel’ proposition. Moreover, that it would be ‘impossible to protect British trade also inland a city,’ or ‘to exercise due control over British subjects.’ Next to the possibility of anything that might cause ‘inconvenience’ to the Foreign Office, the idea of allowing ‘British subjects’ to run without leading strings has always been the most distasteful to that department. The Chambers of Commerce have likewise been furnished with a hint that they know nothing about the true interests of trade, since the very measures for which they are now praying, under the idea of extending it, would only bring it into jeopardy. ‘Redress for any wrong done in such a remote corner as Esmok,’ observes his lordship, ‘could in all probability only be obtained by applying pressure at places more accessible, and so placing in jeopardy the more important interests of British trade on the seaboard of China.’ The Foreign Office doctrine therefore is, that we must shut ourselves from the trade of the largest continents and provinces, provided any diplomatic correspondence that might arise out of it would have to be carried on with authorities resident at some other locality. His Lordship’s words, in fact, may be paraphrased as follows:—It is bad to trade in the Sea of Azoff or at Odessa, because any disputes would have to be settled at St. Petersburg, and might compromise our trade in the Baltic. Avoid likewise all intercourse with San Francisco, because the necessity of an appeal to Washington would not only create much inconvenience to the Foreign Office, but might interrupt our transactions with New York or New Orleans. In like manner let the Canadians hold no traffic with Chicago, the difficulty of controlling British subjects at ‘so inland a town’ being especially formidable. It is to be hoped that no one will be disappointed with this official view. It may be a question whether the new route will be found so practicable or advantageous as it would seem to be from all the evidence at present possessed; but there can be no question, supposing past experience to be worth anything, that, if it is to be opened up, the task will be performed by private enterprise, not only unassisted, but obstructed, so far as official power extends; and that it will be only when everything has been fully accomplished by private energy that the Government will step in to encumber it with help.”

After reading this truthful description of our Foreign-office opinions and action on commercial subjects, can any one doubt that the time has fully arrived when all matters relating to our trade with other countries, together with our Consuls in them, should be transferred from the department of “Diplomatic Duplicity” to that of a Secretary of State for Commerce? Again, then, we urge our manufacturers, merchants, and shipowners generally, to give their serious attention to effecting such a beneficial reform in Government. The President of the Board of Trade is, wrongly, as destitute of controlling power

and official patronage in matters of commerce, as the Foreign Secretary is unwisely encumbered with them in reference to his other and more legitimate duties.

THE REBELLION IN CHINA.

THE chronic rebellion in China has been revived. Mr. Edkins—whom *The Times* designates as the most intelligent of our missionaries in China—has given us the benefit of his experiences, derived from his late visit to Soochow.

It is seven years since Shanghai was threatened by the approach of the Taepings, and our then representative in China, Sir George Bonham, determined in March, 1853, to proceed himself up the Yang-tse-kiang, to ascertain how matters actually stood, resolved not to interfere in any shape. Then, as now, the advance of the rebels caused a panic amongst the Chinese merchants at Shanghai, which acted injuriously upon our trade. The Governor of Keang-Soo, through the Taoutai of Shanghai, informed our Consul that the rebels were ravaging the country of Kew-Keang and Ganhwuy, seizing all merchant vessels, &c., and that the Imperial army and the volunteer vessels sent against them could not prevent the rebels from reaching Nanking, where the state of affairs had become most dangerous and pressing. He therefore requested a consultation with the foreign consuls, with a view of obtaining the assistance of foreign vessels of war to attack the rebels, “and assist in the extermination of ‘this hateful set,’ assuring us that his Imperial Majesty would cherish the recollection of the goodness shown. It was then nearly a year since the rebels had proceeded from Kwangsee into Hoonan, and from thence to Hoopoh, destroying the marts of general commerce, such as Hankow, &c., on the Yang-tse-kiang. The Taoutai very coolly asked as follows:—“I have ‘to request that you will, in the first place, despatch the ‘vessels of war which may be in Shanghai to Nanking, to ‘make, with the vessels under Imperial command, a combined ‘attack, and extirpate the rebels,’ &c. The consul, in reply, makes a communication to the Taoutai, informing him that if the Governor-general of the Two Keang desires assistance, or anything else, he must address her Majesty’s Plenipotentiary, without the intervention of any subordinate officer, assuring him that such communication shall receive the best consideration and early reply. Here was a point which might have turned the fortune of the Chinese Government, and of the people. Confidence and sincerity were wanting. The Chinese Government acts upon the principle of assuming, so long as assumption will be tolerated, and concedes justice only in the presence of force, able and willing to extort it. The American minister in China, in his report to the Secretary of State, on the 7th of February, 1853, said:—“On our side it seems ‘pretty certain that no inclination existed to assist the Chinese ‘authorities.’ As to the contrary we are not so certain—so Sir Charles Bonham qualified his despatch; and Lord Clarendon, in reply, approved of the same, and pending instructions from him, desired him not to interfere in any shape in favour of the Chinese Government.

It is not without interest to notice the information and opinions which authorities obtained at that time. Mr. T. T. Meadows, the author of a celebrated book on the Chinese Rebellion, in a report to the consul of Shanghai, dated the 26th of March, 1853, said:—

“All I have learned tends to strengthen my previously expressed conviction that the insurrectionary movement is a national one of the Chinese against the continued rule, or rather misrule, of the Manchoes; and that the power of the latter is already irrevocably subverted in the southern half of the Empire. The interference of foreigners in their behalf would now only have the effect of prolonging hostilities and anarchy for an indefinite period; while if they abstain from interference, it is highly probable that the valley of the Yangtse, with the Southern Provinces, will speedily come under the rule of a purely Chinese dynasty as one internally strong State, governed according to the old national principles of administration.”

In the same report Mr. Meadows—after giving these general conclusions, upon which he entertains no doubt—subjoins a few details, for the accuracy of which he does not vouch, but which to him appear credible; such as that Choo, who, under the title of Teentih, claimed to be a descendant of the Mings, the last Chinese dynasty, and as such claimed what his son Taeping now aims at, the Imperial throne; that he is assisted by a number of able councillors, chiefly literary gentry, who found their legitimate path to distinction barred by the mal-administration of the Manchoes, degraded and banished ex-mandarins, who, of course, conceived themselves unfairly deprived of their rank; that the pay of the rebel army is high, and paid with a punctuality unknown in the Manchoo armies;

that discipline is strictly maintained; that in two or three cities where the inhabitants resisted (defended their own, we should say), they put every living being to the sword,—man, woman, and child,—but in other cases where submission was tendered, it was said the troops were not allowed to enter; and also that large numbers of the landed proprietors had made their submission, &c., &c.

It is remarkable that at that time the then American Consul at Shanghai, whilst he held similar opinions, should have been under the rose assisting, by the charter of vessels, &c., the Chinese authorities. In his report to the United States' Minister, January 28, 1853, he expresses it as the opinion of well-informed Chinese merchants, that the rebel change was good, as, on obtaining Nanking, they would crown an Emperor of Chinese race. He, like Mr. Meadows, believed in the presence of men of capacity and education; that the soldiers observe the rights of others; and, says he, "pillage and rapine of all kinds are so effectually restrained that the peasantry take sides with them, and the country through which they move is not disturbed." This may be compared to the South of Russia, where the locusts have passed over, and it is not disturbed after they have gone, simply because nothing is left to disturb. The American Consul, in his letter, says, "that if they capture Nanking they will take possession of the cities to the eastward, including Shanghai, all places of large trade which will afford much revenue, and that they would not interfere with trade, either foreign or native;" and when we add that rumour (we cannot say how circulated) promised free-trade, we have the key as to how sympathy was enlisted in their behalf. Another American Consul, belonging to the same firm as the one in Shanghai, writes to his Minister in March, 1853, "I hope Teenth will be successful and upset the present dynasty. We cannot be worse off; and he is said to be a liberal man." So much for official information. About this time a race took place between the Ambassadors of Great Britain and America, as to who should first greet the new star, and secure him in their interest. Mr. Marshall, the United States' Minister, obtained the *Susquehanna*, to convey him to the haven of his desire, Nanking. In his first despatch from Shanghai, written the same day as Sir George Bonham's first despatch from that place he says:—"The trade is completely paralysed. Money is hoarded. It is with immense difficulty that a dollar can be obtained in circulation."

In the month of April, 1853, first the British community, but finally all foreign residents, formed into volunteer corps, and appointed a defence committee. The chairman of a meeting convened for that purpose was our Consul, and to show what was actually known of the rebels or their movement we quote his words: "Whether the rebels, if rebels they were to be called, would come in any force to Shanghai, whether if they came, it would be with hostile or with friendly intention, were questions which he firmly believed no one in the place had any knowledge to enable him to decide." Such, we believe, is the case even to this day. On the 5th of April the Chinese authorities informed the Consular body at Shanghai of the fall of Nanking. Not long after Ching-Keang-Foo fell also into the hands of the insurgents. But still reliable information was wanted, and Mr. Meadows proceeded to Soochow and up the Grand Canal. The information obtained by him was as to the state of the different armies, and, says Sir George Bonham, "There is a somewhat strange peculiarity distinguishing these insurgents. The accounts received by Mr. Meadows describe them as puritanical and even fanatic. The whole army pray regularly before meals. They punish rape, adultery, and opium smoking with death, and tobacco smoking with the bamboo. The women captured in battle are lodged in separate buildings, as well as the children, who are at the same time clothed and educated." Here we have another cause for the sympathisers with the Taipings. As rumours were flying about that assistance would be afforded by our naval forces to the Imperialists, it was deemed desirable to explain to all parties that we were for the present neutral, thereby undeceiving the insurgents in regard to the false statements made by the Shanghai Taoutai, and thus endeavour to elicit from the insurgent chiefs their intention towards foreigners—rather a strange way of proving neutrality, and begging the question however.

Sir George Bonham, accompanied by Mr. Meadows and his intelligent and observant secretary, proceeded in the steamer *Hermes*, commanded, the by Capt. Fishbourne, up Yang-tse-

kiang, when forts and junks at Ching-Kiang in the possession of the rebels fired at the steamer. Of course, the fire was not returned from the steamer, but Captain Fishbourne informed the rebel chiefs in a friendly note that his presence was caused by a desire to obtain information. At Nanking the same happened, and after mutual explanations Mr. Meadows was taken into the presence of two chiefs—princes—who promised a meeting of the rebel chiefs with her Majesty's Minister Plenipotentiary, &c., to the Imperial Court of China. This desired interview, however, did not take place, since, true to Chinese traditional arrogance, a mandate was delivered to Sir George Bonham, conveying the commands to the brethren from afar, so that they may understand the rules of ceremony, &c., &c.—"Whereas, God, the Heavenly Father, has sent our sovereign down on earth as the true sovereign of all nations in the world, all people in the world who wish to appear at this Court must yield obedience to the rules of ceremony." They ought to prepare a statement, representing who and what they are, &c., before an audience can be accorded them. The conclusion of this precious document is, "obey these commands." Sir George after that, on account of the weather and other circumstances, no longer desired the audience, and conveyed his sentiments and intentions in a letter on the 28th of April, in which he explains our relations with the Imperial Government, expressing a desire to remain perfectly neutral, and asks by what spirit they will be actuated in their measures having relation to the British in the event of their proceeding to Shanghai. The reply to this was a decree to the distant English, enjoining them to set their minds at rest and to harbour no unworthy suspicions. After alluding to their religious tenets, how God sent a messenger down to convey the Chief up into heaven, where he was, according to his account, endowed with power to sweep away from the thirty-three heavens demoniacal influences of every kind and to expel them to the lower world; telling that God came himself down in this our world in the third month of the year Mowshin (1848), and Jesus Christ during the ninth month of the same year, to aid the chief "Celestial Sovereign" in assuming the control of the whole empire. They also expressed their extreme gratification that the English had not deemed myriads of miles too far to come to acknowledge their sovereignty, assuring them that this manifestation of fidelity and truth will cause the admiration of God and Jesus Christ.

In giving by this decree permission to go about unmolested, be it in aid of exterminating their foes or to trade, the hope is expressed that the English will "earn the merit of diligently serving the royal master" (Taeping). Of course this dose was a little too strong, for even Sir George, in his answer, tells the chiefs that he is unable to understand their communication, and especially that portion which implies that the English are subordinate to their Sovereign; plainly telling them that if they injure any British interest the same will be resented as similar injuries were resented ten years previous. The next letter from the chiefs, after a long preamble, alludes more pointedly to what they desire, viz., our aid. They assert that Mr. Meadows, teacher, let them into the belief that we were anxious of entering into friendly relations with them, and that they had consequently sent a letter to Sir George Bonham. The teacher's letter seems not to have been made public. In conclusion, they ask for an explicit answer, if we will hold with them or with the fiendish Tartars.

In his last letter to the chiefs, Sir George gets out of the difficulty, and tells them that notwithstanding having again been fired at on passing Kwa-chow, on his return to Shanghai, that he is still disposed to preserve neutrality, but warns them against repetition. The insurgent chiefs, in acknowledging this letter, excuse themselves, and give assurance that instructions have been given to the officers to prevent the re-occurrence of firing; and so ends Sir George's exploring expedition of 1853. Sir George seems to have, on the whole, formed a tolerably correct opinion of the rebels; and that at a time when, amongst the religious world, the most sanguine hopes were entertained, and the enthusiasm for the new sect was as high as it was universal. In his despatch to Lord Clarendon he says:—"Few will be prepared for so extraordinary a sect, and for tenets so absurd—intermingled as they are with Christian principles." He thinks that the source of the doctrines expounded in their religious books may be traced to political motives on the part of the chiefs. Colonel Humphrey Marshall, the United States Minister, was all this time anxiously watching the proceedings of our representative, and on the return of

the *Hermes* to Shanghai (6th May) he reports to his Government, besides a certain flagstaff transaction in Canton, that the opinions regarding the rebels are as various as the persons who pronounced them. Sir George entertained one idea, the captain of the *Hermes* exactly the opposite view of it, and Sir George's secretary believes in yet another, which he expresses freely. Mr. Marshall says Sir George told him that "the rebel chief is a religious fanatic, or a charlatan."

The result of the expedition was, that we gained some exact information as regards the religious tenets, and no doubt prevented the destruction of Soochow at that time. During the ten years of their existence, the rebels have traversed a great part of the empire, but nowhere, except at Nanking, held any portion, nor have they established anything like a fixed government, which would have given confidence to the respectable portion of the community. They have no idea of the true functions of Government; have shown no administrative capacity, and, if successful in the struggle for power, will arrogantly assume such forms of ceremony as the self-styled younger brother of Jesus Christ shall deem consistent with his assumed celestial dignity.

The American Minister, McLane, in 1854 tendered, according to Chinese official accounts, positive aid against the rebels, which was thus reported to Peking by the authorities at Shanghai:—

"It is the opinion of your slave that inasmuch as the American barbarians, hitherto accounted so submissive, have taken advantage of the present juncture to press their demands, reliance is not to be placed in their co-operation, though they promise it in the restoration of order. Their example will probably be followed, and to a much more serious extent, by the English and French barbarians."

The Emperor replied:—

"His (Mr. McLane's) own communication contained requests that did not appear in the letter of his Government, and his conduct was otherwise presumptuous. Let him set out at once for Canton; it will be Yeh's duty to forestall his malice, holding fast by the treaty, and addressing him authoritatively in peremptory language."

(To be Continued.)

THE PRATA SHOALS.

In the first number of the *London and China Telegraph* we recorded the wreck of the *North Star* on the Prata Shoals, and drew attention to the supineness of underwriters in not devising means by which a lighthouse could be erected on those far-famed shoals in the highway of our navigation in the China Seas. It was something out of the way of regular business, we suppose, which caused the otherwise inexplicable indifference of the foreign commercial community in China for stirring in the matter. Had unfortunate wrecked individuals required pecuniary assistance, such would have been bestowed with a liberality known at few places; but to stir in the matter of preventing these frequent disasters would most likely have taken a little more time than an order on the Comptroller. A resident of the Isle of Fragrant Streams, belonging to a kindred nation, on being appealed to, to use his influence to get up a little agitation on the subject of the lighthouse, in his usual cold, collected, nasal manner, said, "Oh, don't trouble about that, the more wrecks on the shoal the better for Hong Kong."

On the authority of the *Hong Kong Register*, "ere long a completion of this long-delayed, long-needed blessing may be anticipated." We would have preferred hearing first of a commencement, instead of an anticipated completion; but then the *Hong Kong Register* just now is rejoicing at its resurrection, and further informs us that it is glad "that the Surveyor-General has taken the matter in hand." Not doubting that whatever that gentleman takes in hand is cleverly conceived, still we think that, under the circumstances, it is a matter for regret that the Surveyor-General of Hong Kong should be burdened with its execution. Ample reasons for this will be found in our late remarks on the sanitary condition of Hong Kong. The matter has not escaped the attention of her Majesty's Government. A survey was ordered, and a report obtained in 1858, which, as the *Register* correctly observes, "suggested difficulties rather imaginary than real." It is not long since a gentleman left for Hong Kong who has had sad experience of the inhospitable shoal, and given much attention to the subject of the erection of a lighthouse on it. We think he was longer on the shoal than any other European, and would willingly give his assistance.

The next question is, who is to pay for it? Great Britain, or the Great National Partnership called "Alliance," or all nations frequenting the China seas. The colony of Hong Kong cannot be saddled with the outlay. In our opinion the plan

suggested—we believe in 1857—that the Chinese Government pay for both the erection and maintenance of a lighthouse should be adopted, and the Custom-house Inspectors at Canton be entrusted with the directorship. Had not the foreign inspectorship been established at Canton we would have said, let it be maintained by the Hong Kong Government, and the annual charge be re-imbursed through the consul at Canton by the Chinese Customs.

CALDWELL VERSUS MURROW.

THE conclusion of the legal proceedings against the editor of the *Hong Kong Daily Press*, for an alleged libel on the notorious Daniel Richard Caldwell, Registrar-General and Protector (!) of the Chinese, and the manner in which it has been burked, is another illustration of the shameful way in which libels affecting the character of officials are "done" in that colony.

The history of the affair had reference to the conviction of a Chinese, in January last, of kidnapping coolies for the Havana barracoons, and his consequent sentence to four years' penal servitude. The trial being reported, the Procurator (Police Magistrate) of Macao wrote a letter to the *Daily Press*, in which he said, as plainly as the murder of the Queen's English would allow, that Caldwell, to procure the conviction of the kidnapper, had produced evidence in court which *he knew was perjured*! Only two witnesses had been produced by Caldwell, both of whom declared that they were victims of the kidnapper's arts and cupidity. But the Procurator asserted that Assoong, the superior of these witnesses, instead of being a green, was a very yellow hand, for he, the Procurator, had known him long as a coolie broker; and, mark! *this was told to Caldwell*. Clearly, when this letter appeared in the *Daily Press*, the duty of the Government was a searching inquiry. Nothing but libels-actions against unfortunate editors, however, claim sufficient interest for the initiation of judicial action; and so it followed, that when the editor of the *Daily Press* commented, in fitting language, on the appalling purport of the Procurator's revelation, the acting Attorney-General, after a sarcastic appearance at the Police Court, at once found a true bill on the criminal side. To ensure success, Caldwell, it appears—although he professes great poverty—paid heavy retaining fees to the only available barrister not to assist him, because the Attorney-General prosecuted, but to keep the editor from obtaining legal assistance in drawing his pleas; the same game which the late acting Governor Caine started with such success as to procure Tarrant's cruel punishment. Confident in the merits, however, the editor, drew his pleas himself, and on the 18th of June was prepared to defend them. The facts were astounding. When the Chinaman was convicted of kidnapping there was a strong feeling in the public mind against the atrocities of the coolie traffic, and Caldwell was held up as a model of official activity in bringing the hoary sinner to justice. There was more under it, however, than the public knew, or could by any reasonable possibility divine; and these are the facts the editor of the *Daily Press* was prepared to prove:—

1. That Caldwell, in prosecuting the Chinese kidnapper, had a private purpose—not public justice—in view.
2. That the Chinaman convicted was not in reality a kidnapper, but the recipient only of some of the money which had been given as advance wages (coolie bonding being legal at Macao), simply as payment for previous board and lodging in Hong Kong.
3. That the Chinaman so convicted—a quiet trader of over twelve years standing, never before implicated in coolie traffic—had had many transactions if he had not been a partner in the suspended firm of Mah-chow-Wang Caldwell & Co.!!! and
4. That the object—the "material inducement," as the lawyers have it—in the subornation of perjury by Assoong was the getting the Chinaman in question out of the way, because, first, he knew too much for Caldwell's peace, and secondly, because it was necessary that connections of the Mah-chow-Wang tribe should obtain possession of the premises built with partnership funds. Supporting the subornation of perjury, the editor had in court two Portuguese sent from Macao by the Procurator, who would have proved that "it was deposed on oath by one Jose Fernandez, before the Procurator, and in presence of D. R. Caldwell, that Assoong (the witness for the prosecution in the Queen versus Shun-ah-Hing) and several other persons, that he knew the said Assoong perfectly well as a broker in the said Barracoon, where he was very intimate with him, and had cut his nails several times there, and that Assoong had never been detained in the said Barracoon as a coolie, but had been there as a broker, and on one occasion Assoong had told him he had in his pocket upwards of seventy dollars commission money for three coolies—and he, Jose Fernandez, had actually touched the money, &c." . . . "and the said D. R. Caldwell asked the Procurator if he, the said Jose Fernandez, could speak Chinese, . . . and he repeated (in Chinese) all he had said in the Chinese language. But on the trial of the said Shun-ah-Hing, the court and jury were never informed by the said D. R. Caldwell, in his evi-

dence, of these facts—and they were never proved in evidence—and Assoong declared that he had been kidnapped and sold, and was detained in the said Barracoön."

These are strong, but we believe it could have been proved that Caldwell's wife, 'the immaculate Ayow, had been doing business with the convicted kidnapper, and taking money from him, in the Mah-chow-Wang connection up to within a week of Caldwell preferring against him this trumped-up charge of kidnapping. Returning to the appearance, however, the pleas were objected to as being informal, to which the editor replied, "I can't without legal assistance draw them better, and legal assistance I can't get, for Caldwell has retained all the bar." Therefore, Judge Adams requested Mr. Pollard, a barrister, to draw up a plea. A plea was drawn by Mr. Pollard, he, the confidential adviser of Mr. Caldwell, inserting in it of course just so much as pleased him, not as would please the defendant, and then came the trial, at which the following appears to be about the mode of procedure:—

Judge.—Well, Mr. Pollard, you admit that that seventh plea in the justification is faulty. It follows, then, such is the law of libel that the whole of the pleas but that of "not guilty" must be thrown out. In a word, I must direct the jury to find a verdict for the Crown. You say your client in writing—"this (Caldwell's) power of offence has been attributed to his adroitness in trumping up cases against such as may fly in his face, and accusing them of some crime, real or imaginary," simply meant that it had been so attributed by the chief magistrate and the superintendent of police in official despatches to Government; but that he, personally does not make an accusation which in effect is tantamount to subornation of perjury. Well, if you say that is what he really means, why cannot he publish so much in his paper in the shape of a retraction? The matter can end at that, and all that I shall require will be bonds to come up for judgment at any time within a year.

To this the editor consented; the bonds were given, the retraction made, and Daniel Richard Caldwell, Protector of Chinese, Justice of the Peace, &c., goes forth to the world with an unblushing front. Mean time, notwithstanding the circumstance that the executive Government have had every opportunity of eliciting the facts, Shun-ah-Hing, the victim of Caldwell terrorism—the man, by the way, who was brutally flogged in gaol remains in fetters.

The tale, we are informed, told by his family, is this:—

The police seeing a boat in the harbour of Hong Kong, with coolies en route to Macao, saw fit to order the men to land and tell them they were at liberty to go where they pleased. This the 120 knew before; but then they thought they would stay a little, and, at the request of the head man, Shun-ah-Hing was ordered to quarter and feed them in his hong. Afterwards they went voluntarily to Macao, to follow out their original intention of proceeding to the Straits. Shun-ah-Hing went with them, to obtain payment for their board, out of the advances customary, as well in the Straits as in the Cuban emigration-trade—received \$120, part of the proceeds obtained on ten who agreed to go to Havana, and, for so receiving—a fact which on the trial he never attempted to deny—he became, according to the law of Hong Kong, which strains at a gnat and swallows a camel, a wholesale slave-dealer!"

With regard to the original pleas, they contained a good deal of new matter touching Caldwell's past piratical connections; and had the whole been brought forward on trial the editor must have been acquitted with glorious honours. Could such a thing be? Certainly not! What could not be got over must be stopped like the Caine-Tarrant trial in 1846—and the magnates of Downing-street, will no doubt congratulate the Hong Kong Government on the very able manner in which the ugly affair was "done." Will the commission—at last announced to be held by order of the Duke of Newcastle—put an end to such mock trials? We fear not, but, on the contrary, will itself be a monument of mockery.

MR. TARRANT'S RELEASE.

We noticed in our last summary of news the release of this gentleman from the Debtors' Prison at Hong Kong, in which he has for nearly five months been confined on account of the costs of the suit of Colonel Caine, the late Lieutenant-Governor there; having in the first place undergone an imprisonment of six months in the criminal gaol, for an alleged libel on that functionary, who is now living at home in retirement on the spoils of his residence in the Far East, a monument to the official apathy and ignorance of Downing-street, to be followed shortly, no doubt, by that brother squeeze, Dr. Bridges.

The Hong Kong public having reason to believe that Mr. Tarrant could not or would not make payment to the legal crows of their little bills, to which \$225 for interest had been added, resolved to subscribe the sum of \$2,000 for that purpose, and through the active co-operation of a brother editor (*Daily Press*), the idea was completed. The following letter from Mr. Tarrant, which was published in the *Daily Press* of

the 6th of August, saves us from making any analysis of the "gigantic legal swindle," and alludes to the petition which has been forwarded to her Majesty in Council:—

Mr. Editor,—Having received the sum of two thousand dollars raised by public subscription to be presented to me for the purpose of aiding in satisfying the writ under which I am held in this prison for the costs of the prosecution in my libel on Acting Governor Colonel Caine, in September last, I have to avail myself of your columns to acknowledge this handsome testimonial, which is most gratifying—and I have to beg that the donors will receive my warm thanks for their great kindness. The circumstances of my imprisonment, from first to last, have been remarkable, and I am not surprised at the matter having created public sympathy. But for this public demonstration, however, I should have remained here until I received an answer to my petition to the Queen for leave to appeal against the excessive demand for which I am imprisoned; and should it be that, eventually, I succeed in obtaining a reduction of the bill of costs, I shall look on the money which has been subscribed—and which will be paid to the Master of the Crown Office under formal protest—as a fund to be disposed of for some public good. That there will be a reduction the following recital will, I think, show you.

1st.—The trial—determined by my imprisonment among felons as having been a criminal prosecution—should have been, as imperatively ordered, prosecuted by the Attorney-General and Crown Solicitor (officers paid by the Crown)—and the information should have been signed by the Attorney-General—not by the Master of the Crown Office—an office not even mentioned in any local ordinance, and, before my trial, never exercised here.

2nd.—So prosecuted by private counsel, each available barrister in the colony being retained against me, the ordinance for practitioners in law is most distinct on the point of what fees are payable. To wit:

Section 9 runs.—"No barrister acting in his capacity of attorney shall instruct or authorise any other legal practitioner to appear for him as barrister, and no attorney acting as such shall instruct or authorise any other attorney to appear for him as barrister, and in all such cases the instructions and authority shall be absolutely null and void."

In the face of this, however, on taxing the bill of costs, the Master of the Crown Office allowed Mr. Pollard no less than \$996:20—(The first charge was \$1,314:07)—he, Mr. Pollard, having received his instructions and authorisation from Dr. Bridges direct—Dr. Bridges at the same time acting both as attorney and barrister.

3rd.—Sections 2 and 8 of the same Ordinance ordain that.—II. "When the same practitioner acts as barrister and attorney in the same matter, the remuneration received by him shall be regulated accordingly—*Exempti gratia*. He shall not be allowed to make any charge, or take any fee for or upon pretence of Attorneys' consultations to, or attendances on counsel, or the drawing or copying of papers for the perusal of counsel or the like." And VIII. "Every legal practitioner shall, at every step in any proceeding, describe himself and be described on the record and otherwise as barrister or as attorney, according to the truth of the case, and the capacity in which he may then be acting."

Admitting Dr. Bridges, therefore, to have acted throughout as an attorney only—with Mr. Pollard as counsel—these sections distinctly direct the Taxing Master to disallow him all charge as counsel;—and yet, in direct opposition to this direction, the sum allowed to him as counsel is \$900—as attorney \$440—(at first he wanted \$1,841, and he got \$1,840.)

The fourth ground of objection is the excessive and unreasonable amount of fees to counsel. Together, the Taxing Master allows Dr. Bridges and Mr. Pollard a total sum for counsel fees of \$1,896—while for my plea of justification in the trial of Regina v. Tarrant of 1858, the total amount allowed to counsel was \$500 only; in the cheaper case barrister pleading against barrister, in the trial under remark, I, of necessity, defending myself. You will naturally say with me, upon what principle of law does the Taxing Master review bills of costs? Upon what principle estimate the value of a barrister's services? What! Refuse to allow such an experienced and talented counsellor as Mr. Chisholm Ans ey more than \$60 a day on a trial, and yet give Mr. Pollard \$233! Dr. Bridges, in addition, getting his \$350!

The particulars here related formed the basis of my application to the Judge for a review of the Master's taxation; but notwithstanding the glaring illegality of the allocatur, the only order made, and against which I appeal, was for a review on the ground that only so much should be allowed as the Imperial Act warrants—no notice whatever being taken of local enactments. Even on this order, however, such items were allowed as Special Jury fees—fees payable strictly in connection with the trial generally, and having no earthly relation to the expense of raising my plea of justification. Then followed execution on my chattels—refusal of a short liberty to take my private papers from the mass. Sharp arrest as I left the criminal gaol and continued harsh, cruel and illegal treatment; all applications for rules and liberties of the Queen's Bench being rejected, the only offer of release being coupled with a condition by Dr. Bridges that I leave the Colony!

In all the annals of English jurisprudence I do not think there is the parallel of such a case of hardship and oppression; and repeating to subscribers my thanks for coming to my aid, I subscribe myself, very faithfully yours,
(Signed) WILLIAM TARRANT.

SIR CURSETJEE JEJEEBHAY.—In consequence of the death of the late Sir Jamsetjee Jejeebhoy, Baronet, his eldest son, the present Baronet, has, by virtue of Act No. 20 of 1860, of the Legislative Council of India, assumed the names of Jamsetjee Jejeebhoy, in lieu of his former names of Cursetjee Jamsetjee Jejeebhoy, and an advertisement to this effect has appeared in *The Times*. On the 3rd instant Sir Jamsetjee Jejeebhoy, Bart., and suite, arrived at Cheltenham, and visited the manufactory of Mr. Alderman Copeland, M.P. Very splendid services are being manufactured for Sir Jamsetjee, and he was enabled to see them in the various stages. It is said that the Baronet at one time entertained the idea of presenting the Queen with the somewhat unusual gift of a seventy-four, and that the vessel was actually built and on the point of being launched, when, on being inspected by the Government surveyors, she was found, from some defect in her timbers, to be worthless. She still remains on the stocks at Bombay.

MR. WHITE, M.P. FOR BRIGHTON, ON CHINA.—Mr. White delivered at the Athenæum, at Brighton, a long and able lecture. Having glanced at the magnitude and importance of his subject, the lecturer observed that writers on China and the Chinese were divisible into two classes—those, of what he might call the school of Voltaire, who extolled the Chinese, as Pagans, in a superlative degree, and those who, condemning all sceptical philosophy, depreciated the Chinese because they were not Christians, and abused them in hatred of their infidel eulogists. Hence this had become a party question, and it was most difficult to arrive at the truth; but a residence of ten years in China, and a diligent study of its people and institutions, ought, he felt, to qualify him to pronounce an opinion, which would not be conformable with the exaggerated estimate of the French school, or the unduly depreciating views of its opponents. Mr. White then described the physical characteristics of China, its language, government, and religion. The lecturer remarked that the Chinese have no feudal laws, no hereditary councillors, or born legislators. They have not the law of primogeniture. They have no State Church; and, what is more extraordinary, they have managed to rub on for so many hundreds of years without a single barrister or practicing attorney throughout the empire. Seeing that in China the meanest subject might attain to the highest dignity but that of sovereign, that the people had the right of association, a free press, a large enjoyment of local and municipal rights, they could understand how it was that the natives of China, though said to be subjected to a despotism, are neither serfs nor slaves, as are the toiling millions in so vast a proportion of Christendom. Taking a general view of the Chinese character, he was inclined to regard them as the Anglo-Saxons of Asia. Having shown that “vox populi, vox Dei,” is a Chinese truism, Mr. White observed that travellers are too apt to stigmatise Chinese authorities as bad and corrupt. Nothing could be more absurd than such sweeping censures. His own experience led him to believe that the Mandarins as a body faithfully execute their duties, and that justice is as righteously administered as in any country he had ever witnessed. Moreover, he entertained the profound conviction that, tested by Jeremy Bentham's definition of a good government, namely, “The greatest happiness of the greatest number,” that of China succeeded better than any other, except, perhaps, our own and that of the United States. Not a few of the provincial governors are known to be truly good men, and he might mention that when such an one retires from his post, it is the curious custom for the inhabitants to ask him to leave them as a memento—his old boots! Here we have the origin of the ancient custom of throwing an old shoe after departing friends for luck. The subject of national education next engaged attention. There was credible evidence to prove the existence of public schools in China fully 2,000 years before Christ. The great stimulus to education was found in the public competitive examinations. Not only was the passing of an examination indispensable to render a man eligible as a candidate for office, but the social rank and personal distinction accruing to the winners of academic honours were the ever powerful incentives to educational action. It was a pleasant feature of Chinese society to see the friends and neighbours of any poor boy who displayed talent clubbing their contributions to enable him to win the much coveted literary degrees. Should their protégé be successful, they and their district of course derive reflected honour from his celebrity. The Chinese had just pretensions to call themselves an eminently literary people, and he might mention that a late investigation had discovered that some of the most recent improvements in mathematics had been known for ages to Chinese scholars. One more point was deserving of notice, namely, that in no country in the world was taxation so light as in China, and even now they are without the burden of a National Debt. Neither has the food of the people ever been subject to a tax by a Chinese statesman. He was quite certain that the 350,000,000 of Chinese do not, in the aggregate, pay as much in taxation as is paid by the British Empire—by not one-tenth of the population of China. The Imperial revenues of China might be estimated at under £55,000,000, while we have attained to the inordinate, he had almost said the profligate, expenditure of £76,000,000 sterling per annum. A vote of thanks to the lecturer, moved by Mr. J. Bridgen, and seconded by Mr. W. D. Savage, was carried enthusiastically. Mr. W. Coningham, M.P., said the lecturer had told them that when any high officer of State failed in the object he had in view, he was degraded and placed in a lower official position; but he forgot to tell us how he was rewarded in case of eminent success; if he had done so, he, Mr. C., should have proposed that they should have adopted that plan to express their satisfaction at the excellent and admirable lecture to which they had listened—(applause). He had risen to propose a vote of thanks to the chair, which he did with the utmost satisfaction. This was unanimously carried. It was announced that Mr. White would deliver to the Young Men's Christian Association a lecture on “The Incidents and Personal Adventure connected with his Residence in China.”

LORD ELGIN.—More than twelve months since we announced that Lord Elgin was the intended new Governor-General of India. The subject has been again revived, and the belief is also general in India. Notwithstanding that we have disagreed with part of his lordship's policy in China, we consider him the most fit among those who are eligible for the appointment, according to the views of Government.

MARRIAGE OF SIR JOHN BOWRING.—We have authority for stating that a matrimonial engagement has been entered into between Sir John Bowring and Miss Castle, of Clifton, and that the marriage is likely to take place in the beginning of November. Sir John's first wife was Miss Leeson, of Hackney, Middlesex, and he has been a widower about two years. Sir John Bowring is in the 69th year of his age.

We have much pleasure in attesting to the superiority of Elstob's Belts for use in this country, and especially in India and China. The following is from the *Army and Navy Gazette*, which is of course an authority on such matters:—“Throughout the East it is the custom of the natives to wrap folds of woollen or cotton cloths round the spine and abdomen; Turk, Persian, Afghan, Hindoo, and Greek, all do this as a preventive of Cholera, Lumbago, Rupture, &c.; experience, however, teaches us that this does not meet the requirements of our men, and we recommend Elstob's Angola Belts, in preference to anything of the kind we have ever heard of.”

Sir John Bowring made a long and able speech at the Exeter Discussion Society, on the 4th inst., strenuously advocating the use of the ballot as a security for honest representation.

The directors of the P. and O. Company have given notice that the rates for all passages booked by the Company's steamers sailing on and after the 1st January, 1861, will be as follows:—From Southampton to Aden, £70; to Bombay, Ceylon, Mauritius, or Reunion, £100; to Madras, £105; to Calcutta or Penang, £110; to Singapore, £115; to Hong Kong, £130; to Shanghai, £150. These rates are exclusive of the charge for transit through Egypt, viz., £7 for each first-class, and £3 10s. for each second-class passenger; and are about ten per cent. higher than those ruling at present.

The photographic views of Japan, taken by the special artist of Messrs. Megretti and Zambra, have arrived in good order, and will shortly be ready for sale.

The *Illustrated London News* says, “Mr. Whampoa, ‘son of the merchant Prince of Singapore,’ was baptised a short time since, by the Free Church of Scotland minister at Lerwick, Zetland.”

MR. FRANCIS PIGOTT, M.P., has been appointed Governor of the Isle of Man, and not Sir John Bowring as expected.

We have received (too late for lengthened notice on the present occasion) a pamphlet just published by Messrs. Smith, Elder, and Co., entitled “Is our War with the Tartars or the Chinese?” Mr. John Scarth, the author, sides with the rebels.

Monetary and Commercial.

From the fact of Government engaging a considerable quantity of tonnage for the conveyance of stores to China, said to be a portion of 20,000 tons, it may be inferred that arrangements have been made to garrison Peking or Tien-tsin for a considerable time, and rumours on good authority are current that the period arranged for extends over two years.

The sum of fifteen million francs, or £600,000 sterling, is in course of transmission to Paris, on account of the *Société d'Escompte*, which company, as noticed in the last number, are about to open branches in China.

A meeting of capitalists interested in the welfare of India was held on the 11th inst., at the offices of the Agra and United Service Bank, for the purpose of considering the preliminary steps to be taken with reference to the double income-tax upon enfaced Indian Rupee Loans. Mr. R. W. Crawford, M.P., was in the chair, and a resolution was unanimously adopted to form a committee “for the purpose of ascertaining the legal position of the holders of the securities of the Government of India in reference to the income-tax question, of collecting subscriptions towards the necessary expenses thereof, and of taking such steps as they may consider expedient for the protection of the interests concerned.”

It appears to be quite authentic that the French Government have guaranteed the *Messages Imperiales* a return of 5 per cent. on the capital for the new steam line to China, and that the contracts for the boats have been settled in France.

The trade with Japan is now showing some activity. Three vessels have arrived with full cargoes, as detailed in the List of Import Manifests.

The total of £1,179,694 in specie, brought by the steamer *Tasmania* from Mexico on the 27th ult., was contained in 2,168 packages, weighing more than 156 tons. The whole was landed in seven hours, deposited in 36 railway waggons, brought up to Nine Elms station during the night, and transferred in the morning to 36 waggons and vans, drawn by upwards of 100 horses, for conveyance to the Bank of England, where it was deposited at 5 P.M. This is the largest amount of specie brought at one time to Southampton by any of the Royal Mail steamers.

The specie by the last mail, was as follows:—Madras, £3,067 gold; Calcutta, £10,120 silver; Singapore, £5,000 silver; Hong Kong, £35,875 silver, and Shanghai, £35,567 silver.

ARTICLES OF IMPORT.

TEA.—The principal feature is the arrival of the *Falcon* and *Ellen Rodger*, with the new season's teas, from Foo-chow-Foo. The former vessel's teas were placed on the market on the 28th ultimo, but, notwithstanding importers were willing to take very moderate prices, the sales proceeded very

lowly at from 1s. 9d. to 2s. 3d. for good to finest chops. The teas out of the latter vessel were on the market on the 6th instant, and a few of the finest chops realised up to 2s. 2d per lb., but the medium kinds seem difficult of sale. The quality of these teas we consider to be generally inferior to those of last season, with a smaller proportion than usual of really fine teas. The transactions in good common Congou have been moderate, but owing to its scarcity, the quotation remains at 1s. 3d. to 1s. 3½d. per lb.; low to fair common have been only saleable at a decline of 1d. per lb. Fair to good Sincune Kai and Kaisow kinds have been difficult of sale at 1d. per lb. reduction; fair to good Ho Hows, Ning Chows, and second class Honams and Monings were sold 1d. per lb. lower at the public sale, since which they have been in moderate demand at the decline. In fine Kaisows, of old import, business has been limited. Fine Monings have sold 1d. per lb. lower. Tayshans have sold irregularly, averaging about 1d. per lb. reduction. Oolongs, of old import, have declined about 2d. per lb.; the new ones have been inferior to those generally arriving early in the season, and have sold from 1s. 8d. to 2s. per lb. No new season's souchongs have been sold; other kinds remain much as before. A few flowery pekoes, of new season, have realised about 5s. per lb. Poo-chow scented orange pekoes, of old import, sold 2d. per lb. lower; in the new but little has been done. Common scented capers remain much as before; good and fine but little in demand. Common to fair Canton-made scented orange pekoes, from 1s. 3d. to 1s. 6d. per lb., are in fair request, but other sorts not much wanted. In green teas there is but little alteration to notice; the quantity offering on the market is small, but there has only been a limited inquiry. Owing to a larger supply of young hysons, including some of Japanese growth, faced in Shanghai, there is a decline of 1d. to 2d. per lb. in the medium kinds. In all other descriptions there is no quotable alteration in prices. The stock on the 1st of October on all descriptions of black was in London 44,851,041 lbs. of black and 6,490,245 lbs. of green. The total delivery in London for the present year have been 51,611,251 lbs. of black and 7,924,782 of green. The stock at Liverpool was 2,544,963 lbs. of black and 84,281 lbs. of green. The total delivery in Liverpool for the present year has been 5,581,500 lbs. of black and 570,959 lbs. of green. The imports in London from the 1st of January to the 1st of October have been 57,987,923 lbs. of black and 7,991,698 lbs. of green, and at Liverpool 4,711,074 lbs. of black and 304,440 lbs. of green.

SILK.—The market has continued very inactive, without any present symptoms of improvement. The demand for manufactured goods is still very feeble, and the high prices of the raw material seem effectually to check any enterprise on the part of our manufacturers, and even foreigners move with great caution. In China silk the second arrival of new silk was taken with even greater reluctance and hesitation than the first, although importers made no attempt to uphold prices, a concession of 6d. per lb. being readily made upon landing. The third arrival is now in course of unloading. In Chinese thrown silk the deliveries at last make some impression upon the stock, but this solely from the absence of arrivals; we cannot quote any improved demand. In Canton silk nothing new. The sold stock on the 1st inst. amounted to 6,454 bales of China, and 636 Japan; the unsold stock, 8,869 of China, and 503 of Japan. The current quotations are as follows:—

	s. d.	s. d.	Superior.	s. d.	s. d.

Japan . . .	18 0	20 0	22 0	30 0	
Yuenfa . . .	14 0	24 6			

SUGAR.—In Foreign descriptions the transactions have been of comparatively moderate extent, but 12,783 bags clayed Manila brought forward with a more buoyant market met some competition, and were all realised at and afterwards, at improved prices,—good middling to fine brown, 35s. to 39s.; damp, 37s. 6d. to 38s. The business reported by private contract comprises 15,000 bags clayed Manila at 37s. 6d. to 38s. 6d.; 4,000 bags China at 39s. 3d. to 40s. 3d.; and 478 bags of Penang at 37s. to 40s. for good brown and low yellow.

COFFEE.—Under the expectation of an augmented supply, less disposition to purchase has been shown since our last, but with only a light quantity at present offering, no tangible decline can be noted. Ceylon.—500 casks, 300 barrels and bags plantation, by auction, sold at rather easier prices,—good ordinary pale, 65s. 6d. to 66s.; low middling and middling, 70s. to 73s. 6d. Of native there has been no public sale, and little done on the spot privately; but 1,000 bags, good quality, have been sold for arrival at 63s.

RICE.—Transactions have been on a fair scale; the market retains a firm tone, the total sales privately being about 20,000 bags; Nakrenzie old, 10s. 3d. to 10s. 9d.; New, 11s. 3d.; Madras, 11s. to 11s. 6d.; good Ballam, 11s. 4½d., and a few white Bengal. In auction, 1,229 bags low middling and middling white Bengal fetched 11s. 6d. to 12s. 6d.; and 1,200 bags common Padang, 9s. 6d. to 10s. 6d.; 3,630 bags low heated Rangoon were withdrawn at 9s. 6d. to 10s.

PEPPER.—Supplies being offered rather freely, prices at the public sales have again slightly given way; but of 3,425 bags Singapore, the bulk has been taken off; greyish to fair black, 4d. to 4½d.; 684 bags Penang were all sold; Trang kind, 4d. to 4½d.; fair, 3½d. to 3¾d.; privately, few transactions have occurred. White still finds only partial buyers, and is again rather cheaper; 479 bags middling Singapore were chiefly realised at 6d.; 37 bags Penang were bought in; but privately, about 200 bags of the latter description were placed at 5½d. for common quality.

SAGO.—450 boxes, offered at public sale, were principally taken, good bright small, 18s. 6d.

SAGO FLOUR.—Privately, 500 bags have been placed at 15s. 6d., being steady.

TAPIOCA.—706 bags fine white Penang were mostly taken off at 6d. to 6½d.

SPICES.—Cinnamon: quotations remain, 1st, 1s. 4d. to 2s.; 2nd, 1s. 1d. to 1s. 7d.; 3rd, 8d. to 1s. 2d.; and 4th, 6d. to 8d. per lb.; market flat. Cassia lignea: of 217 boxes at auction, a few lots of damaged alone sold: of 573 packages cassia vera, one-fourth sold at 52s. to 58s. per cwt. for fine

thin: cassia buds firm, but no sales. Cloves: of 14 cases Penang at auction, the whole sold at 1s. 1½d. to 1s. 2½d., being the previous value. Mace: of 66 cases Penang, 17 cases Cochin, and 8 cases Singapore, at auction, nearly all sold at 1s. 5½d. to 2s. 1d. per lb. for fair to good palish, and 8d. to 1s. 3d. low to good red. Nutmegs: auctions have comprehended 214 cases Penang, 53 cases Singapore, 36 cases Cochin; three-fourths sold, fine bold at 3s. 11d. per lb.; ordinary small, part shrivelled, to fine medium, 1s. 1d. to 2s. 7d.; prices ruling from par to 1d. per lb. reduction.

HEMP.—Manila, sales at £20 10s to £22 for middling to fair roping.

COTTON.—This market has been uninterruptedly firm: demand animated: prices of all descriptions well maintained, and some ¼d. to ½d. per lb. higher. Quantity offering very limited.

JAPAN WAX.—450 boxes saucer sold at 61s. 6d.

TOBACCO.—Java qualities in demand, with very little in first hands.

TIN.—Market very inactive, and sales small. Quotations for Banca, 135s. to 136s.; and for Straits, 130s. 6d. to 131s. 6d.; antimony ore, £16 2s. 6d.

MISCELLANEOUS.—India-rubber, transactions small at former quotations. Camphor, no demand. Sapanwood, no sales reported. Soy, small business at last quotations. Rhubarb firm, with no demand. Mother-o'-pearl shells, no sales. Tortoiseshell, quotations nominal. Star anniseed dull, at 78s. to 83s. Sticlac, no sales. Gum Benjamin, 4 cases at auction retired. Rum, nominal, 1s. 6d. to 1s. 7d.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh Bars, £6 2s. 6d. to £6 12s. 6d.; nail rods, £6 15s. to £8; hoops, £9 to £9 10s.; sheets, single, £9 10s. to £10; Staffordshire bars, £8 to £8 10s.; rails, £5 7s. 6d. to £7.

STEEL.—Swedish keg, £18 10s. to £19 10s.

COPPER.—Sheet and Sheathing, 11½d.; yellow metal, 9½d.

TIN. 136s. for block; 187s. for bar. Tin plates, best charcoal, I.C., 31s. to 32s. per box.

LEAD.—English Pig, £21 5s. to £21 10s.; shot, patent, £25; sheet, £22 5s. to £22 7s. 6d.; Spelter, £20 5s.; Zinc, English Sheet, £26; Quicksilver, £7 per bottle.

EXPORT OF METALS TO CHINA. The exports for September have been 688 tons of bars and nail rod, 436 tons of rails, &c., 5 tons of hoop and sheet, 24 tons of steel, 9 tons of sheathing copper, 56 tons of yellow metal, 195 of pig lead, and 2 tons sheet lead. The total exports from the 1st Jan. to 30th Sept. have been rails, &c., 436 tons; pig iron, 40; bar and nail rod, 13,474; hoop and sheet, 622; steel, 55; copper sheathing, 147; yellow metal, 330; pig lead, 1,687; sheet, 59; spelter, 393; and zinc, 15 tons. Tin plates, 3,235 boxes, and quicksilver, 1,705 bottles.

EXPORT OF BULLION TO CHINA, &c.

MANCHESTER MARKETS.

The yarn market has been rather strong. Manufacturers have bought rather freely, and home-trade yarns for thir use are ¼d. per lb. higher than last week. There is no change in fine yarns, but doubled are in more request, and sellers are asking higher rates. The German and Mediterranean houses are buying more freely, and China yarns are ¼d. per lb. higher. A slight business is also doing for India, at former rates. There is no great change in the cloth market.

Maria Wilhelmina; at London, from Foo-chow-Foo, Ziba; 11, at Deal, from Singapore, Zambia, from Akyab, Thor; 10, at Falmouth, from Akyab, Hamlet; from Batavia, Carlotta; 12, at Deal, from Manila, Omega; 9, at Brouwershaven, from Padang, Fortuna; Sept. 28, at Boston, from Manila, Nautilus; Oct. 11, at Antwerp, from Akyab, India; 13, at Falmouth, from Maulmain, Thames; 12, at Liverpool, from Manila, Elias; 13, from Bassein, Bomarsund. Oct. 15, at London, from Shanghai and St. Helena, Sir George Pollock; from Batavia, Elizabeth; from Shanghai, Beverley; 14, at Deal, from Japan, Georgiana; 13, at Plymouth, from Rangoon, Oregon; 13, at Falmouth, from Batavia, Juliane; from Akyab, Emma Col-sin; 14, from Rangoon, Broomielaw; at Liverpool, from Akyab, War Cloud; 15, at Plymouth, from Akyab, Menzies; 14, at Falmouth, from Bankok, Orion; from Akyab, Elipse; from Maulmain, Myrrha; 16, at Liverpool, from Singapore, Sebastian Cabot; 14, off Cork, from Akyab, Echo.

DEPARTURES.—Oct. 9, from London to Hong Kong and Whampoa, Strathallan; 8, from off Portland, for Bombay and China, Flying Spear; 10, from Glasgow, for Singapore, Sappho; 11, from Southampton, for China, Horizon; from Liverpool, for Hong Kong, Rapido; 13, from London for Singapore and Penang, Barracouta; for Hong Kong and Canton, Marchioness of Londonderry. Oct. 15, from London, for Hong Kong and Whampoa, Traveller; 13, from Liverpool, for Shanghai, John Norman.

SPOKEN.—Prins Mauritz, Batavia to Amsterdam, Sept. 26, 37 N., 88 W.; Gambia, Singapore to London, Aug. 9, 15 S., 4 W.; Valparaiso, Amsterdam to Batavia, Aug. 20, 1 S., 23 W.; Sydpoien, Batavia to Stockholm, Sept. 6, 24 N., 37 W.; Ludwig, Batavia to Stockholm, Sept. 13, 34 N., 38 W.; Fortuna, Padang to Rotterdam, Aug. 10, 15 S., 7 W.; Mystery, London to Hong Kong, Sept. 6, lat. 9 N., long. 26 W.; West, London to Batavia, Sept. 9, lat. 16 N., long. 27 W.; Woodman, Batavia to Falmouth, Sept. 15, 37 N. 36 W.; Maastroom, Batavia to Rotterdam, Aug. 2, 30 S. 41 E.; Sir George Pollock, China to London, Sept. 16, 37 N. 39 W.; Helena Jacoba, Batavia to Amsterdam, Sept. 25, 42 N. 22 W.; Antonio, Batavia to Falmouth, Sept. 26, 40 N. 31 W.; Canton, from Batavia, Oct. 8, 49 N. 8 W.; C. W. Eduard, Cardiff to Hong Kong, Aug. 25, 7 N. 26 W.; Hollandia, Cardiff to Hong Kong, Aug. 25, 5 S. 25 W.; Juliane, Batavia to Falmouth, Sept. 21; Zouave, New York to Shanghai, Aug. 29, 2 N. 38 W.; Andra, Boston to Hong Kong, Sept. 20, 41 N. 67 W.; Don Juan, Havana to Macao, Sept. 12, 32 N. 35 W.; Pathfinder, Swansea to Hong Kong, Sept. 15, 10 N. 25 W.

CASUALTY.—The Alma (barque), of Nantes, Pelien, from Java to Nantes, arrived at Surinam Sept. 20, from Cayenne, where she was condemned and sold. Her upper works seem to have been a little strained, otherwise the vessel appears to have little the matter with her.

The Macassar, Rip, from Shields to Singapore, arrived in the Downs, was supplied with an anchor and chain, from thence on Oct. 10.

Laid on at London, for Singapore and Penang, William and Jane; at Glasgow, for Macassar, Sophie; at London, for Hong Kong, Sultana.

IMPORTS FROM CUSTOM HOUSE MANIFESTS.

From SHANGHAI to LONDON, per Invincible, entered Oct. 3:—2,563 chests, 4,991 half-chests, 2,272 packages tea, 134 bales silk, 65 packages merchandise, 351 bags copper ore—order; 790 half chests, 328 chests tea—Huth and Co.; 1,152 half chests tea—Elias.

SIR ROBERT PEEL, Penang to London, July 28, 3 S., 91 E.

FREIGHTS AND CHARTERS.

The circular of Messrs. W. S. Lindsay and Co. has the following:—The coal shipments lately have been on a small scale, while contracts are running which sooner or later must be supplied. For China good ships are wanted for the berth, and 60s. is still offered for coals to Hong Kong; 65s. to 67s. 6d. Shanghai. Charters are offering from Bombay, the Madras coast, Calcutta, and the rice ports;—but the uncertainty as to the continuance of the China war makes the merchants unwilling to pay increased rates:—and the last mail from India brought rather lower quotations from the principal ports of shipment, consequent rather on the high prices of produce, than any actual excess of tonnage. There are very few ships loading for Australia and New Zealand. Small vessels are in demand at about 80s.

per ton register, as larger ones only load up very slowly. Emigration to New Zealand has been somewhat checked by the war which is taking place at Taranaki, although the safety of the other provinces is not at all prejudiced by this dispute with the natives.

CASUALTIES.

The Dirk Arnold, Kayll, from the Downs for Singapore, put into Sunderland, 29th Sept., leaky, crew refusing to proceed.

The Hertog Bernard, Holte, from Amsterdam for Batavia, arrived at Texel, 26th Sept., with damage, and part of cargo thrown overboard.

The Alliance, Corry, from London for Singapore, put into Madeira, 2nd Sept., to land the master—sick, and sailed next day.

The Van der Palm, Marcus, from Batavia for Rotterdam, which put into Cowes, 26th Sept., with damage, having been in collision, will have to discharge to repair.

The Procyon (British), from Liverpool to Shanghai, put into Bahia, 1st Sept., leaky; cargo was being discharged.

The Constance, (ship) of Liverpool, bound from Cardiff for Woosung, when loaded was found to be making water; 100 tons of coal were discharged, and the leak was discovered to arise from a defect under the rudder brace, which was remedied, and she proceeded.

The Shepherdess, from Akyab to Liverpool, was abandoned in a sinking state, 16th Sept.; crew on board the Norfolk, Attwood, arrived off Dartmouth.

The Scotia, Ward, from Sourabaya, which put into St. Helena, 12th July, leaky, and with part of cargo thrown overboard, has discharged the whole of her cargo, been resurveyed, and recommended to be sold as irreparable at that port. Another account from St. Helena reports the Scotia as condemned.

The Heister Adriana, Van Hees, from Cardiff to Hong Kong, which put into Simon's Bay, 8th July, very leaky, and with part of cargo (coals) thrown overboard, has been condemned, as the cost of repairs would probably exceed her value. Her cargo will be sold.

PASSENGERS INWARDS.—Per *Welleveden*, Captain Duinker at Brouwershaven from Batavia: Messrs. Jacobson and van Bostraten, Mrs. Ponsin, three military and three naval invalids. Per *Etise Henriette*, Captain Deterding, at Amsterdam from Padang: Captain J. B. Bramstede, of the infantry, with wife and servant, Mr. J. van Schmittenburg and two daughters.

PASSENGERS OUTWARDS.—Per *Cito*, Captain Grivel, from Amsterdam to Batavia: Messrs. J. & H. Hultman, C. Stoyton, and J. van Straten. Per *Burgermeester van Reenen*, Captain Meer, from Amsterdam to Singapore: Count Maximilian Fuyger. Per *Dorothea Henriette*, Captain Smit, from Helvoetsluis to Batavia: Captain van Ooyen, E.I. army.

STEAMER "LY-EE-MOON."—This vessel which has arrived safely at the Cape has been reported by the ship *Cossipore* as follows:—"The steamship *Ly ee-moon* Captain Norman Hill, belonging to Mr. Dent, of China, which left Southampton, July 3, for Hong Kong, touched at St. Vincent's July 21, Ascension July 28; sailed therefrom Aug. 3, and arrived at St. Helena on the 7th. On the passage she attained a high speed, but consumed an unexpected quantity of coal. On the 18th of July her floats were obliged to be taken off, and she proceeded three days under canvas only."

LAUNCH OF THE PENINSULAR AND ORIENTAL STEAMER "MOOLTAN."—On the 2nd instant a remarkably handsome screw steamer, named the *Mooltan* built expressly for the Peninsular and Oriental Steam Navigation Company, and the largest of their whole fleet, was launched from the dockyard of the Thames Ironworks and Shipbuilding Company at Blackwall, in the presence of a numerous company, including the Lord Mayor and the Lady Mayoress, Mr. Peter Rolt, Captain Ford, Lieutenant Kolokoltzoff, of the Russian navy, Messrs. Allen and Anderson, and Captain Hall, three of the managing directors of the Peninsular and Oriental Company, Mr. Churchward, and Captain Smethett. The vessel was designed by Mr. James Ash, the naval architect of the Thames Shipbuilding Company; her length between perpendiculars is 335 feet; length of keel for tonnage 311 feet 5 inches; breadth for tonnage 39 feet; depth of hold 31 feet; and her capacity in tons 2,521. Her engines are of 400-horse power, and by Humphrys and Tennent of Deptford. They are of peculiar construction, having four cylinders, two of them designed to work at high and two at low pressure simultaneously, by which a saving will be effected of about half the ordinary consumption of fuel. The vessel is furnished with a lifting screw, the first which has been introduced into the company's fleet. She will draw, when complete, about 19 feet of water, at a displacement of 3,200 tons. She has a teak spar deck, and is bark-rigged, with lower masts made of iron. She is capable of carrying 150 passengers, and is fitted up with all the elegance and convenience usual in vessels belonging to the Peninsular and Oriental Company. The launch was completely successful. The vessel was named by Mrs. Hall, wife of Captain Hall, R.N., and glided gently into her native element amid the cheers of the spectators, of whom there were many hundreds. For the present she is destined to run between Southampton and Alexandria.

PORT CHARGES AT ST. HELENA.—A charge of one penny per register ton is levied on all ships touching at this island, in aid of the funds for erecting and maintaining the civil hospital and prison. This tax has been complained of both by owners and masters as nothing short of an imposition, and many commanders of vessels actually sail past St. Helena rather than pay it. We should be the last to offer anything in the shape of extension of any charge upon shipping, under whatever form or excuse levied, from which our shipping received no equivalent; but there are grounds for the levy of this penny per ton on vessels touching at St. Helena, which cannot usually be urged for the imposition of a tax on shipping. According to a return published, it appears that during the year ending 30th November, 1859, 269 cases had been treated at the Civil Hospital, most of whom were seamen. Where indoor treatment is not considered requisite, seamen are furnished with advice and medicines gratis. They are thus enabled to pursue their voyage without detention or delay; while, according to the local regulations, seamen may be discharged from British ships for hospital treatment on payment of wages to the day of discharge, without any additional guarantee that they may not remain a burthen upon the authorities, to be sent home eventually at the cost of the Government. We do not think, under the circumstances, that either owners or masters need complain of the hospital charge at St. Helena.

HOLLOWAY'S PILLS AND OINTMENT.

ANTIDOTE TO DISEASE.—A Lady writing from India on June 22nd, 1860, for a further supply, says:—"I beg to address you on the subject of your invaluable Pills and Ointment. I would not pronounce a hasty opinion on any medicine unless I had really proved its efficacy. Members of my family have given your Pills and Ointment a fair trial in cases of Fever, Colds, Sore Throats, Piles, Muscular Rheumatism of the heart, and general debility, and in all these cases your remedies have always proved effectual." Can any testimonial be more gratifying? Though in India, the considerate writer enumerates many of the diseases prevalent in England, and those which usually require early medical and domestic treatment.

By Appointment, and Royal Letters Patent.
JOHN BRACHER (late **WILLIAM MARR & SON**), Inventors, Patentees, and Manufacturers of the strong WROUGHT-IRON FIRE and THIEF-PROOF SAFES, CHESTS, STRONG-ROOMS, IRON DOORS and FRAMES, 11, Cannon-street West, corner of Queen-street, facing Southwark Bridge, and Vulcan Safe Works, Skin-yard, Bankside, Southwark, London. MESSRS. R & B. have a large assortment of well-seasoned Saddlery and Harness, suitable for India and the Colonies, always on hand.

297, OXFORD STREET, LONDON (opposite Stratford Place).

The same Premises in which the business has been carried on for upwards of half a Century.

IMPORTANT TO INDIAN RESIDENTS.

TESTIMONIAL RECEIVED BY

TUCKER AND SON,

MANUFACTURERS OF IMPROVED INDIAN LAMPS.

"Messrs. TUCKER & SON.

"Edinburgh, Sept. 11, 1856.

"Sirs,—I have much pleasure in bearing my testimony to the excellence of the Lamps supplied by you to me when in India last year. They give a brilliant light, are not affected by the punkah, and are in every way suited to the Indian climate. In short, they are the best lamps I have seen in the country.

(Signed)

"A. Ross, Bengal Civil Service."

MANUFACTORY, 190, STRAND, LONDON.

Established 40 Years. Designs and Price Lists sent free by post to India.

**CARSON'S
ORIGINAL ANTI-CORROSION PAINT,**

PATRONIZED BY

The British Government,
The French Government,
The Russian Government,

H. R. H. The Prince Consort.
Hon. East India Company,
Most of the Nobility and Gentry,

Railway and Canal Companies,
The Principal Collieries,
Mill Owners, Iron Master &c., &c.

The Anti-Corrosion Paint is now used extensively

FOR ALL KINDS OF OUT-DOOR WORK,

Such as WOOD, STONE, BRICK, COMPO, CEMENT, &c. Also IRON STEAM VESSELS, BRIDGES, PIERS, or any description of Iron, and from its being expressly manufactured for exterior purposes, is peculiarly adapted for tropical climates, resisting the rays of the sun more effectually than any other Paint. It can be easily applied by any Labourer, being sent in various Colours, requiring simply to be mixed (no grinding is needed).

Merchants and Shippers' attention is particularly drawn to it as a most serviceable article for exportation.

A List of Colours, Prices, &c., also Copy of Testimonials, will be sent.

WALTER CARSON AND SONS,

(Successors to the Inventors), 9, GREAT WINCHESTER-STREET, LONDON, E.C.

FURNITURE FOR CHINA.

RICHARD LOADER and Co., of 23 and 24, Pavement, Finsbury, London, Manufacturing CABINET MAKERS, and GENERAL HOUSE FURNISHERS, respectfully solicit the attention of all Exporters of Furniture to their ILLUSTRATED FURNISHING GUIDE, the new Edition of which for 1860 contains numerous beautifully executed designs of every requisite for the complete Furnishing of Houses of all classes. This invaluable Pamphlet may be had gratis, and post free on application.

Goods manufactured expressly for export, and warranted in any Climate. References in China if required.

JACKSON & PAINE,
(EIGHTEEN YEARS WITH COLLARD AND COLLARD.)

NOTICE TO PASSENGERS BY THE OVERLAND ROUTE, via EGYPT.

PHILIP ZECH, Proprietor of the two well-known Hotels in Alexandria, the Hotel d'Europe, and the Peninsular and Oriental Hotel, begs to inform his friends, and Travellers in Egypt in general, that he has purchased SHEPHEARD'S HOTEL in CAIRO, which will still continue to bear the same name; and in returning thanks for the extensive patronage enjoyed by his two houses in Alexandria, hopes that the preference may likewise be extended to his house in Cairo, which will be managed in first-rate style, and in a manner intended to give every satisfaction to its frequenters, both as far as table, wines, internal and external service are concerned. Many alterations and ameliorations are being carried out at the present moment.

Curtis on Manhood.—New Edition.—A Medical Essay on Nervous Diseases.

Just published, the 120th thousand, with numerous plates in a scaled envelope, price half-a-dollar.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE, with plain directions for perfect restoration to health and vigour. By J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

CONTENTS:

INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatorrhoea and Impotence; Early Vicious Indulgences; Dangers of Neglect.

CHAPTER III.—A Review of the various Disqualifications of Marriage—whether resulting from the Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection.

CHAPTER IV.—The Author's plan of Treatment Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhoea and other Urethral discharges by microscopic examination.

CHAPTER V. and VI. on the modern Treatment of Gonorrhoea and Syphilis.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

"We feel no hesitation in saying, there is no member of society by whom the book will not be found useful—whether such person hold the relation of Parent, Preceptor, or Clergyman."—Sun.

Mr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by letter, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Mr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty Years; nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINNAM, QUEEN'S ROAD, HONG KONG.

The above mails received this morning were due on the 28th ultimo, and have been detained in the Red Sea, owing to a defect in the screw of the P. and O. steamer *Candia*. The Egyptian steamer *Persian* fell in with the *Candia*, and conveyed the mails and passengers from her to Suez. The *Massilia* (s.), which should have brought the above mails to Marseilles, broke her port cylinder, after leaving Alexandria, and transferred the mails to the *Vectis*, at Malta.

List of Passengers.

PASSENGERS INWARD.

By this mail.—From Hong Kong for Southampton: Lieut.-Col. Murray, 67th Regt., Bangel, child, and servant, Capt. Pierard, Don Julian Ribelles. For Alexandria: Mr. Ichistatsoff, Capt. Sellivanoff, Major Rockell.—For Point de Galle: Mr. S. W. Warren

PASSENGERS OUTWARD.

Santhageno.—To Hong Kong: Mr. A. J. Campbell.

PROGRESS OF THE THIRD CHINA WAR.

The following telegrams were published on the 1st inst. :—

The Taku Forts were captured on the 21st of August. The enemy were allowed to march out, leaving munitions, &c. The allies lost 400 men killed and wounded. No British officer was killed. The 61st and 44th Regiments and the Marines, with 1,500 French, were the troops principally engaged.

The following telegram from the French General has appeared in the *Moniteur* :—

"The 12th and 14th of August.—Combats which drove the Tartar army from its positions, and gave us their entrenched camps. August 17.—Bridge thrown across the Peiho, under the fire of the enemy. August 21. After a vehement resistance we carry by assault the most important of the Taku forts. 200 French and 250 English *hors de combat*, a single officer killed, 1,000 Tartars killed, found in the fort, among whom was the General-in-Chief. All the other forts surrendered successively. The same evening a capitulation gives us the whole country as far as Tien-tsin, and 600 brass guns of large calibre and proportions. The Ambassadors proceed to Tien-tsin, where the Chinese Commissioners attend them to open negotiations. The allied army is placed in echelon along their route. The Generals and Admirals all proceed there under escort. The sanitary condition of the army is good."

OUR SPECIAL CORRESPONDENT'S LETTER.

TAKING OF THE TAKU FORTS—BRAVERY OF THE CHINESE
COOLIE CORPS—ARRIVAL OF LORD ELGIN AND BARON
GROS AT TIEN-TSIN—DEPARTURE FOR PEKING, &c., &c.

PEIHO, Aug. 28, 1860.

The following narrative embraces a complete summary of the hostile operations which have taken place since August 1; when a portion of the allied forces effected a landing in the

mud, near the Peh-tang Ho, and the following day established themselves without opposition in the town of Peh-tang.

On the 3rd, a party of about 2,000 English and French troops, under General Colinet and Brigadier Sutton, proceeded to make a reconnaissance on the road towards Takoo. When some little distance along (about three miles), they encountered a considerable body of Tartar cavalry, in the rear of whom was seen what appeared to be an entrenched camp—an engagement at a somewhat long range ensued, and was kept up so long that the allied commanders-in-chief thought matters becoming serious, and sent out reinforcements—prior to the arrival of which, however, it had been deemed undesirable by the officers commanding on the spot to prolong the engagement and alter what was merely intended to be a reconnaissance into a general action, and the force accordingly was withdrawn, with a loss on the part of the English of one officer and three men wounded, and on the side of the French, of about twice that number wounded, one mortally.

After this affair no further hostilities took place for several days, the energies of both services being devoted to landing the remainder of the army, horse transport, commissariat stores, and munitions of war; the difficulties which had to be encountered in the effecting of which will, I have no doubt, afford ample scope for the pen of other writers. My sphere precludes me noticing the subject, further than to observe in passing that the manner in which this arduous task was surmounted is creditable in the extreme to those to whom it was entrusted, more particularly to the officers and crews of the gunboats, and also to the Chinese Coolie Corps, without whom the work performed by the navy would have been but half completed; the conveyance of material from the beach to the various depots on shore, through streets knee-deep in mud, forming the worst half of the business. By the 7th of August the disembarkation was so far complete as to determine the commander-in-chief in making a movement towards the Peiho, and the following "General Memorandum" conveyed to the army the method proposed of commencing active operations:—

GENERAL MEMO.

English Head-quarters, Peh-tang, 7th August, 1860.

It having been determined that the allied force shall advance early on the morning of the 10th inst., the following will be the order in which they do so:—

1. Two guns of Barry's (Armstrong) battery, with 200 men of the Royals; remainder of Barry's battery, and remainder of Royals and 31st Regiment; Fisher's company of Engineers, with tools, planks, &c., for crossing ditches; the whole under the command of Brigadier Stavely, C.B.

2. French column of the same strength; spare ammunition of French and English.

3rd. Millward's (Armstrong) Battery, 2nd Regiment, 60th Rifles, and 15th Punjab Infantry, and Papillon's half Company of Royal Engineers; spare ammunition of French and English.

4th. French main column.

5th. English reserve, consisting of Desborough's 9-pounder battery, 3rd Regiment, 44th Regiment, and 8th Punjab Infantry, Graham's Company of Royal Engineers, and Madras Sappers.

6th. French reserve.

7. Dhoolies and water carriers of the whole force.

The march in fours will be adopted in order to facilitate cavalry and artillery passing without confusion.

The advanced column having reached within 1,500 yards of the enemy's position (who will probably have opened fire), the English will debouch to the right of the road, sending out skirmishers; the French in like manner debouching to the left.

Barry's battery will open fire, and the French Artillery as soon as it can be brought to the front.

As soon as the advanced position is taken, the remainder of the English will advance, and upon the enemy's fire being reduced they will advance to the hard ground, turning the enemy's left by morning to their own right as soon as the ground will permit.

The French main column will follow the former one. The nature of the ground will, of course, guide after the first advance, but as obstacles may be found, such as dykes, mines, &c., as a general rule it cannot be wrong to follow the enemy's tracks until the enemy's works have been examined.

Each man will be provided with three days cooked meat and four days biscuit, three days rum to be sent in bulk with the

force by the commissariat, and issued as required on the spot. The troops will wear warmer clothing, with great coats folded and canteen attached. Wicker helmets and water bottles filled.

An officer and thirty men from each regiment will remain behind to take charge of the baggage, and mens kits and a house must be allowed by general officers commanding divisions solely for this purpose.

The tents will not be brought up until the following day. The Deputy Commissary-General will make arrangements for forwarding to the point rations and forage. The Deputy Military Storekeeper, ammunition.

The two guns and 200 men of the Royals will march over the bridge at the end of the town at 4 A.M., the remainder of the battery, and the Royals, at 4.10 A.M., 31st Regiment at 7.30 A.M. Fisher's Company R. E. at 4.40 A.M., and French column at 4.50 A.M. spare ammunition at 5 A.M.

Staff officers belonging to the remaining force will be at the bridge, and communicate the time at which the troops will follow to their own divisions and brigades.

The Cavalry Brigade will march at 3 A.M., on the 10th inst., and occupy the ground to the right of the causeway, in a spot to be hereafter pointed out to Brigadier Pattle.

It is to be clearly understood that no transport animals shall be allowed to leave the town until orders are given for their doing so by a staff officer from the head quarters of each army.

(By order) KENNETH MACKENZIE,
Deputy Quarter-Master General.

At the period of this order being issued, the weather had become fine, and there was every appearance of its continuing so; heavy rains, however, set in early on the afternoon of the 9th, and the clay plain surrounding the town soon became converted into a swamp, rendering it next to a physical impossibility for the army to move. The advance of the force on the 10th consequently was counterordered. On the 11th the weather began to show signs of improvement, and daylight the following morning was fixed on for the advance. For some reasons, which no doubt will appear in the despatches of Sir Hope Grant, it was deemed necessary so far to alter the details of the General Memorandum of the 7th, as to send the troops of the 2nd division out of Peh-tang first, and by a somewhat different route to the one originally intended, in conformity with which alteration the division of Major-General Sir Robert Napier, K.C.B., consisting of the 3rd, 44th, 67th Regiment Royal Marines, and 8th Punjabees, with Millward's (Armstrong) Battery, Rotton's Rocket Battery, and Graham's Company of Royal Engineers, mustered at 3 A.M., on the 12th August, in the streets of Peh-tang, and at the earliest dawn commenced their march along a causeway leading out of the town towards the Peiho, along which the column proceeded for a quarter of a mile, and then followed a road branching off to the right, after going along which, for a couple of miles, it became necessary to leave it, and take the troops, including artillery, over a very heavy alluvial plain, in many places an actual swamp. Here great difficulties were encountered; the artillery waggons stuck in the mud, and had to be abandoned—in a word it was by exertions, which British soldiers only can make, that at last Sir Robert Napier was able to get his division, after a march of several hours through mud and swamp, in a line with, and about a mile and a half to the right of the entrenched camp alluded to as having been seen by the reconnoitring party on the 3rd inst. The men were much exhausted and by no means fit to engage an enemy. The Cavalry Brigade consisting of 300 men of the King's Dragoon Guards, Fane and Probyn's Horse, with Sterling's Battery of the Royal Artillery, commenced to move out of Peh-tang as soon as the rear of Sir Robert Napier's column was clear of the town, and which was not until nearly seven o'clock. The cavalry moved to the right, with the view of covering the advance of the second division, and of leaving the high road to the entrenchments, it was intended to attack, clear for the advance of the 1st Division, under Major-General Sir John Michel, K.C.B., and the French, under General Cousin de Montauban, and which commenced immediately after the last of the cavalry brigade had passed over the bridge at the end of the town, in the following order—2 guns of Barry's Armstrong Battery; 200 men of the Royals; Fibus Company of the Royal Engineers with tools, planks, &c., for crossing ditches, remainder of Barry's Battery, and the Royals, the 31st Regt, the whole being under the command of Brigadier General Stavely, C.B. Then followed a French column of the same strength, in the rear of which came the spare ammunition of

the English and French columns. Derborough's Battery: 130 men of the Madras Artillery with 6-pounder rockets; 2nd Regiment, 60th Rifles, 15th Punjabees. Govan's Battery: Papillon's Half Company of Royal Engineers, spare ammunition, two 8-inch mortars; French main column, followed by the dhoolies and water carriers of the whole force. The 2nd, 60th, and 15th Punjabees were under the command of Brigadier-General Sutton. The Artillery of the force was under the orders of Brigadier-General Crofton. Sir Hope Grant superintended in person the movements on the left, in conjunction with General Montauban. Sir Robert Napier, with Brigadiers Jephson and Reeves, commanded the Infantry on the right, and the Cavalry was under Brigadier-General Pattle, of the King's Dragoon Guards. The Artillery on the right consisted of Millward's Armstrong Battery, Rotton's Rockets, and Stirling's Battery. A reference to the annexed rough plan will probably make the operations of the army on the 12th August, 1860, more intelligible to the reader.*

A and B are houses and fort on the north bank of the Peh-tang Ho, C is the town of Peh-tang, D is the fort defending the entrance to the river on the south, E is the point in the mud where the troops landed on the 1st August, F is a house that was used by the Tartar cavalry as a picket-house during our occupation of Peh-tang, dotted line C is the route taken by Sir Robert Napier's division, H shows the route of the cavalry brigade, J with the dotted line represents the road followed by the First Division and the French, K is a road leading to the fortified town of Tang-Koo, L is a cavalry entrenchment, with fortified wall, M a strong field-work of considerable extent defending N (the town of Sin-Hoo), O is a Tartar cavalry camp with permanent buildings and defences, P is the plain where the English first division met the cavalry brigade and second division after the capture of the entrenchments and town of Sin-Ho.

A considerable time was occupied in getting the troops moved out of the town, and it was not until 10 A.M., that the French main column, with General Montauban and staff, were able to get over the bridge. The second division (Sir Robert Napier's) was now out of sight, and the first division, with the French columns, advanced along the main road; with the view of carrying the entrenchments of the Tartar cavalry, known to be in front of the town of Sin-Ho. About 11 A.M., as the allied forces on the left were on the march, a cannonade commenced on the right, and was shortly followed by a heavy fire of musketry. This was Sir Robert Napier's division, engaged with a large force of Mongolian cavalry that had come down suddenly upon it, and nearly surrounded it—so much so, that the 67th Regiment, and the Royal Marines, had separated to form square, while one wing of the 44th protected the Armstrong guns, and fired in line on the cavalry as they advanced, emptying a good many saddles with their Enfield rifles: a portion of the Buffs, also, was engaged. On the cavalry brigade coming up, a body of Tartars rode boldly down upon the guns of Stirling's battery, but were driven back with severe loss by a gallant charge of a troop of Fane's horses, headed by Lieutenant MacGregor, who was severely wounded in four places. Had the after-tactics of the Tartars been equal to their courage and to the celerity with which they made their first movement, they might have given us some serious trouble; as they would appear to have got to the rear not alone of the infantry division but of the cavalry brigade also; as the latter lost all their field medical equipage (including the means for the removal of the wounded), the Tartars having got in between and the rear of the brigade. The troops, exhausted as they were with a severe hours' march, frequently up to their knees in mud, at every point repelled the daring onset of the Mongolian cavalry (the flower of the Imperial army), and drove them back into their entrenchments with a somewhat heavy loss, the Armstrong guns being reported to have done considerable execution. Our loss was three men killed, two officers and eight men wounded in the cavalry brigade, and three men wounded in the 44th Regiment, in all eighteen casualties. On the left, as soon as the first work of the enemy was approached, the artillery formed in line, the English on the right, the French on the left, in the rear of the guns, followed in skirmishing order portions of the infantry force of both armies. A very heavy fire was opened on the first fortification (an earthen field-work of considerable extent), and the Armstrong shells were pitched with great precision over the parapet by Barry's battery. The French artillery also made very good practice from their rifled field-guns and rockets, and

after a short resistance the place was carried. The whole force immediately advanced on the second line of works, which was also carried after a very brief resistance, the Tartar cavalry making the best of their way out of it by the rear and going at full gallop along the road to Taku; their onward progress considerably stimulated by a few Armstrong shells that were sent after them.

Notwithstanding the very heavy fire of artillery and rockets that had been brought to bear upon them, in their entrenchments, their loss did not appear to have been great, very few dead or wounded being found. Our loss was very trifling; consisting of one only—namely, an artillery-man of Barry Battery severely wounded from a Jingly ball. The loss of the French, I have not been able to learn, but I believe it was small also.

After the capture of the second entrenchment, the town of Sin-ho was taken possession of: the French encamped in its immediate vicinity, and Sir John Michel's division, with Sir Hope Grant and staff, passed through the main street of the town into some open country, and there, close by a permanent cavalry camp of the Tartars, met the troops of the second division and cavalry brigade, who had gradually worked their way round from the right.

The English troops rested during the remainder of the afternoon: a portion of the French force, however, made an advance upon the fortified town of Tan-koo, on the north bank of the Peiho, two and a-half miles from Sin-ho. It was approached by what appeared a good road, and at 4 P.M. the French artillery opened fire on the palace. The Chinese returned the fire gun for gun, and after about an hour's firing, the French withdrew, and returned to their camp at Sin-ho.

On the 13th of August, it was determined by the allied commanders-in-chief to attack the fortifications of Tan-koo, which are very extensive, presenting a line of fortified wall (of great thickness) of upwards of one mile. The morning of the 14th was fixed on for the attack; the French to proceed direct there, and take up their position to the left; the English to move on the right, on their way silencing two batteries on the south bank of the Peiho. A reference to the following plan will aid the reader in understanding the subsequent operations on the Peiho, which were brought to a brilliant termination by the fall of the great forts of Taku on the 21st of August, after a defence by the Chinese, second to none for distinguished gallantry in the history of the war.*

A Sin-ho, B is where the English army encamped on the night of the 13th August, prior to marching at daylight on Tan-koo; C, high road between Sin-ho and Tan-koo; D and E, forts on south bank of Peiho; F, fortifications of Tan-koo; G, town of Tan-koo; H I and K, towns of See-koo, Takoo, and Tan-koo; L and M, great forts on southern entrance to Peiho; N and O, great forts on north bank of river; P, staked barriers in mouth of river; Q, deep mud inverting shore; R, course taken by the troops that stormed the fort on the 21st August; S, line of attack of the allies; T, bridge of junks across Peiho, constructed for passage of army to south bank; U, village on south bank, taken by the French on the 17th August; V, the Peiho; W, high road from Peh-tang to Tan-koo; Y, line of march taken by the French on the 14th August; X, route followed by the English to Tan-koo, the batteries D and E being engaged and silenced on the way.

As the reconnaissance made by the French on the afternoon of the 12th had been the means of ascertaining that the main road from Sin-ho to Tan-koo presented certain obstacles to the advance of the army, it was determined to adopt a different route; consequently, on the evening of the 13th, the English army was moved from its encampment near the Tartar camp, in the rear of Sin-ho, to a spot on the north bank of the Peiho, distant about two miles in a straight line from Tan-koo.

At 6 A.M. on the 14th August the troops moved off from the English camps in nearly the following order:—Detachment 60th Rifles, two guns Barry's Battery, Royals, Sir Hope Grant and staff, with small escort of Probyn's Horse, 31st Regiment, remainder of Barry's Battery, Desborough's Battery, Govan's Battery, Detachment Gun Lancers, Head Quarter Staff, Millward's Armstrong Battery, 2nd Regiment. General Montauban and escort, followed by French column and Naval Brigade. Then a portion of the Chinese Coolie Corps (French), carrying scaling-ladders and escorted by a party of the Naval Brigade, two batteries of French artillery, main body of 60th Rifles, medical staff and dhoolies, French column, followed by the

* This will appear as soon as engraved.

* Another sketch appears here, which will be published when lithographed.

English reserve, consisting of the 3rd Buffs, Royal Marines, and 67th Regiment, with the 8th Punjabees. The Cavalry Brigade and the 44th Regiment remained as a rear-guard at Sin-Ho.

At half-past 6 A.M. the Artillery engaged the battery D, which was a small casemated one, situated in a little creek with two junks moored in front of it to mark its presence, but so placed as not to interfere with its fire. As soon as this battery was silenced the Artillery moved on towards Tan-Koo, leaving two guns of Barry's Battery under Lieutenant Moorsom to silence the battery E, which was giving some trouble by firing at the troops as they were advancing over the plain to Tan-Koo. This battery proved obstinate, and did not cease firing for a considerable time. At 8 o'clock Captain Wiles and seven seamen of the *Chesapeake* crossed over in a small boat from the north bank to the Junk Battery (D) and spiked the guns, setting fire to the junks by exploding powder bags. About half-an-hour afterwards Commander Gibson, of the *Chesapeake*, and the same party of seamen again crossed the river and tumbled the guns into the river. On this occasion some Tartars were lurking about the place, and one of the seamen was wounded by a matchlock ball. By this time the allied forces were pretty well in front of Tan-Koo, and in a short time a tremendous fire was opened from the whole line of artillery, flanked by heavy rocketed batteries, the trench being on the left, the English in the centre and right. Towards 11 A.M. the fire of the enemy was nearly silenced, and storming parties of French on the left, and Royals and 60th Rifles on the right, entered the place and drove out the remaining portion of the garrison. Several dead Tartars were laying about the guns, but the greater portion of the wounded appear to have been removed while the bombardment was going on. Altogether, considering the very heavy and concentrated fire which had been brought to bear upon the place, it was remarkable to see so few traces of it inside, there not being more than twenty dead bodies at the period of our entering laying about the guns; some of their wounds were of a very ghastly nature. It is supposed that large numbers of dead were removed prior to the capture of the place.

Shortly after the fall of Tan-koo, the battery E, on the south bank of the Peiho, which had given so much trouble in the morning, reopened fire, the attention of its garrison having been drawn to the tents, ambulances, &c., of the Field Hospital, which had been established by Surgeon-Major Telfer, the principal medical officer of the 1st Division, at a convenient distance in the rear of the army. Several well directed shots were sent close to the tent, where Dr. Rennie, staff-surgeon of the Royal Artillery was at the time amputating the leg of one of Desborough's gunners, whose limb had been shattered by a cannon ball. Dr. Selter immediately ordered the tents to be struck, and the mules, ambulances, coolies, &c., forming the medical field train to move on towards Tan-koo, with the view of withdrawing the fire from the vicinity of the wounded, and which was successful, as the firing ceased as soon as the tents were struck, and the train in motion.

Owing to the high elevation which the Chinese in Tan-koo gave their guns, and the consequent long-range firing which ensued, our casualties were very small, as the shots almost invariably passed a long way over the heads of the troops the French, however, seemed to have suffered more severely, a few round shot having got in amongst them. Their loss, I believe, amounted to twenty-five killed and wounded; our loss was one man of Barry's battery, wounded (since dead), and one man of Desborough's, severely. Sir John Michel had a horse shot under him.

The town of Tan-koo, which in general appearance resembles Pechang, was immediately occupied by the 3rd Buffs, Royal Marines, and 67th Regiment, with Millward and Govern's batteries, some Madras artillery, and Ratton's rockets. The first division returned to the encamping ground, where it had spent the night; and the men pitched their tents, understanding that they were not to move for several days.

On the evening of the 17th August, a party of the Chasseur de Vincennes crossed the Peiho, and took possession of the village marked U, on the south bank of the river. They met with some opposition, which they soon overcame. Then following they went a little way into the country, but their progress was stopped by a considerable body of Tartar horse, who had entrenched themselves in the vicinity of the road. The French failed in dislodging them; their force being small, and information having been sent to General Montauban,

he immediately sent over reinforcements of infantry, with some artillery and mountain guns, and the entrenchment was speedily carried. The same afternoon two guns of Barry's battery, with a company of the 31st, were sent out to cover the advance up the river of a number of small junks, with which the bridge across the Peiho was to be constructed. The battery E, on the south bank, was the one that was expected to give trouble, and the Armstrong guns were placed so as to command it, with the 31st lying down amongst the reeds in front, as a protection to the guns in case of any sudden attack being made upon them from an ambuscade. When the boats appeared the battery, as expected, opened fire, and Sir John Michel, who superintended in person, directed Captain Desborough to order the Armstrong guns to silence it, and which was done after a few rounds from each gun. The guns, however, were not disabled, the artillerymen having merely retired from them. By this time the junks had passed up the river, and the troops and guns were withdrawn.

At this time, it was intended that the plan of operations against the Taku forts should be the following—namely, that Sir Robert Napier, with the 2nd division, should attack the north forts, while the French and Sir John Michel's division should cross the Peiho by the bridge of junks, and simultaneously attack the south forts in the rear, while the gun and rocket boats opened fire from the sea. Circumstances led to this combined attack being abandoned, and it was determined that the north forts should be first attacked; the change of the preliminary arrangements being invested in Sir Robert Napier, whose division was to make the assault.

After a series of reconnaissances had been made, the following General Order appeared, detailing the force to be employed:—

Camp Sin-ho, 20th August, 1860.

A force, consisting of 1,500 English and 500 French, will assemble to-morrow morning, at six o'clock, at Tan-koo, and advance, under the directions of Major-General Sir Robert Napier, K.C.B., who will indicate the position of the troops and guns.

The English force will consist of 1,500 infantry of the 2nd Division, Millward's (Armstrong) Battery, two 8-inch howitzers, two 32-pounders, three 8-inch mortars, two 24-pounder howitzers, and three 5½-inch mortars.

The troops will carry three days cooked provisions with them. The whole of the cavalry and 1st Division to be ready to move as soon as ordered, and the officers not to leave the lines.

(Signed) KENNETH MCKENZIE,
Deputy Quartermaster-General.

In addition to the force here detailed, an after-order appeared, directing Barry's Battery of Armstrong guns, and two 24-pounder howitzers of Desborough's Battery, to proceed from the camp of the 1st Division, and join the siege train in front of Taku at daylight on the morning of the 21st.

In the course of Monday the 20th of August, Sir Robert Napier moved the troops (by the route marked R in the plan) from Tan-koo. They consisted of Millward's battery of six Armstrong guns, Beddingfield's siege guns, Pennycuik's mortar battery, Govan's battery, Hick's Gollandauze artillery, with mountain howitzers and rockets, Rotton's rockets, Graham's Company of Royal Engineers; the 44th Regiment Battalion of Royal Marine Light Infantry, and the 67th Regiment. The troops encamped on the flat alluvial plain in the rear of the fort, and not altogether out of range of its guns, as in the course of some firing which ensued, as the troops were taking up position, a shot from the fort knocked over the camp kettles of the 67th. Millward's battery opened fire, at a long range, and the Armstrong guns managed to keep the fort silent for the remainder of the day, the Chinese ceasing to fire, seeing that we had a long way the advantage of them in range.

During the night large working parties of the 44th were employed constructing batteries for the siege guns, throwing up cover for the infantry, filling up holes, and improving as much as possible the very bad ground over which the attacking force would have to advance, and which was much intersected by ditches, and in many places knee deep in mud.

In the evening the English and French gun-boats took up position as near to the bar as was prudent, and in the course of the night light balls, possessing great illuminating power, were thrown up from the south forts, with the view of keeping an eye on what the gun-boats were about. At half-past three on the morning of the 21st August the batteries began to move

to their positions, followed shortly by the Engineers and the right wing of the Royal Marines, the latter carrying the pontoons and scaling-ladders. At five o'clock the 44th, 67th, and left wing of the Marines moved towards the front. The Chinese immediately opened fire, and sent shot at a long range, bounding amongst the troops as they advanced. The French force having come up—mustering about 1,500 Infantry, with three batteries of artillery—the bombardment commenced, the English guns in the centre and on the left; the French on the right. The Infantry were ordered to lay down and shelter themselves as much as possible from the storm of shot and shell which two forts on the north and one on the south side were throwing over them, in addition to the fire they were exposed to from the fort which was then in course of being attacked. At 6 A.M. our already tremendous fire of artillery was increased by the arrival of Barry's (Armstrong) guns and Desborough's howitzers from the camp of the first division. At 6½ A.M. the chief magazine in the fort blew up with a fearful explosion, notwithstanding which disaster, the Chinese resumed their fire; standing to their guns with the most undaunted courage, and defending the fort as if nothing had occurred.

The French and English gun and rocket boats by this time had taken position near the staked barriers at the mouth of the river, and were throwing shot and shell with great precision into the forts; and the explosion of the magazine in the north fort nearest the mouth of the river, bore practical evidence to the deadliness of their fire. This fort, like its neighbour, was in no way daunted, but bravely continued its defence.

About 7 A.M., the French and English infantry began to close round the doomed fortress, and the sharp fire kept up from their rifles told with deadly effect on the Chinese that were serving the guns, still there was no silencing their fire. No sooner was a man killed at a gun than his place was taken by another. The French, with a wing of the 44th and 67th Regiment, had gradually advanced in skirmishing order close to the series of formidable obstacles constituting the land defences—namely, canals, ditches, staked ground abatis, &c., and the firing of salvos by the artillery about 8 o'clock indicated that all was ready for the assault. The Marines were in charge of the pontoons, and two companies of the 44th, under Captain Gregory and Lieutenant Rogers, had advanced ahead of them as a covering party, until their further progress was checked by the obstacles referred to. As there were no means of crossing, they in consequence suffered severely, and large numbers of men from them, as well as from the whole line of infantry, English and French, were now seen being conveyed wounded to the rear.

It is alleged that there was some mismanagement in regard to the English pontoons and scaling-ladders; suffice it to say, that the 44th and 67th regiments found themselves at the edge of the first of the water defences without any means of crossing—that on the right Colonel Knox, of the 67th, and on the left Lieutenant Rogers, of the 44th, followed by a considerable number of their men, jumped into the water and swam across. Captain Gregory, of the 44th, and several officers of the 67th, got across on planks and bamboo ladders belonging to the French, and waded nearly up to their necks through the remaining ditches. When the pontoons came up, they were found to be unserviceable, and the scaling-ladders were taken round by the Marines to the right, and converted into bridges. No description can convey any idea of the elaborate obstacles which the storming parties had to contend with in reaching the foot of the wall prior to placing their scaling-ladders—and the large number of wounded show the amount of fire to which they were exposed in getting across the ditches and staked ground. Great difficulty also was experienced in ascending the scaling-ladders, as the Chinese, with a coolness and daring without its parallel in modern history, came deliberately forward to the embrasures and laid hold of the scaling-ladders, shook the men off them, and pulled them in over the wall of the fort. In this way several scaling-ladders were taken from the assaulting parties, and it was not without great exertion that at last a footing was established on the walls. The French were first upon the walls, but Lieutenant Rogers, of the 44th, having made his way in by an embrasure on the left, is believed to have been the first man in the fort. The 67th entered about the same time on the right with the French, and the remaining portion of the garrison of the fort disputed the ground inch by inch, and were ultimately driven out through

the embrasures on the river face, and through some also on the left of the fort, with a heavy loss from rifle-firing and bayonet wounds. No prisoners were taken, with the exception of those whose wounds prevented them escaping. The colours of the 67th at last were seen waving from the summit of the fort, where they were placed by Ensign Chaplin, assisted by Lieut. Rogers and Private McDougall, of the 44th. The wing of the 44th engaged in front, brought their colours with them, but Sir Robert Napier ordered them to be taken back to where the headquarters were, namely, in the trenches, a little way to the rear.

Thus, about half past eight on the morning of the 21st of August, was captured one of the great Taku Forts. As soon as its fall was apparent, to the other forts, white flags were hung out upon the whole of them; and as this was supposed to indicate a desire for a cessation of hostilities, Mr. Consul Parkes, by the direction of the commander-in-chief, accompanied by Captain Grant bearing a flag of truce, proceeded to the other great northern fort to learn what proposals they intended making; but in place of displaying any signs of submission, they were cool and undaunted, impertinent almost, I believe, when requested to give up the fort. They stated that they had merely hoisted white flags in obedience to a signal from the opposite side; that they had no power to give up the fort, nor did they intend doing so; and that though we had taken one fort, it did not follow that we were to take them all.

Mr. Parkes then went over with a flag of truce to the south forts, and there was told that the flags of truce had been hoisted on the forts, in uniformity with instructions from the Governor-General of Pecheli, who was then at Taku, and who was prepared, on hostilities ceasing, to open up the river to the French and English, but that he had no authority to surrender the forts; nor could he be assured that in the event of his ordering them to be surrendered that San-ko-lin-sing, the Mongolian Prince commanding at Taku, would give them up. Under these circumstances a communication was sent to the Governor-General of Pecheli, that the truce would only be extended until 2 P.M., and that if the forts were not surrendered by that time hostilities would recommence.

The fort we had captured was the key to all the others, and our position was now a very commanding one. Preparations were made for commencing the attack on the other northern fort (which consists of two forts within one enclosure), during the truce the guns were placed in position, and all ready to commence at two o'clock. The Chinese, however, seeing the desperate position in which they were now placed, with the gun and rocket boats on their left, the guns of their own fort on the right about to be turned on them, with a formidable train of siege artillery in their immediate rear, very properly surrendered, and the fort was forthwith taken possession of by the Buffs and 8th Punjaubees, who had been brought up from Tan-koo to act as the storming party, in place of the 44th, 67th, and marines, who had so gallantly done the work during the earlier portion of the day, and who were naturally now much exhausted from the almost incessant labour of the last twenty-four hours.

The fort had just surrendered when a fearful storm of thunder, lightning, and rain, burst over the place, and soon saturated the plain, converting it in a brief period into one vast swamp, that it became impossible to move the heavy artillery out of—and out of which it was with the utmost difficulty that even the light Armstrong guns were extricated—never did an army returning from victory present a more disorganised appearance than did that which marched back to Tang-Koo after the capture of the North Taku Forts.

KILLED AND WOUNDED.

Our loss in the three and a-half hour's fighting in the morning amounted to 202 killed and wounded, while that of the French is stated to be about 120. The following are the details of our loss, as nearly as I can give them.

Royal Artillery, two officers and twelve men wounded.

Royal Engineers, one officer wounded, one man killed and two wounded.

Madras Artillery, three men wounded.

3rd Buffs, two men wounded.

44th Regiment, two officers wounded, fourteen men killed and forty-seven wounded.

Royal Marines, four officers wounded, one man killed and twenty-four wounded.

67th Regiment, seven officers wounded, six men killed and sixty-two wounded.

Chinese Coolie Corps, six Chinese wounded.

The total number of officers wounded is twenty-two. None

of them have been fatal wounds. Brigadier Reeves was wounded in four places, and Captain Broke, Sir Robert Napier's aide-de-camp, was shot through the thigh. Sir Robert Napier himself, had his field-glass knocked out of his hand by a matchlock ball.

In the evening, Mr. Parkes had a conference with Hung-Ho, the Governor-General, which ended in his signing a paper agreeing to the unconditional surrender of the southern forts and the whole province of Pecheli, from Taku to Tientsin. He was driven to this course, he said, though it was signing his own ruin, by the necessities of the people, and he sacrificed himself to the public good; in fact, there is no doubt that the pressure raised by the populations of Peh-tang and Sing-ho being driven into the interior has been the main cause of bringing about so speedy a termination of hostilities; Peh-tang alone had a population of 20,000, and a grievous amount of distress must have followed our somewhat ruthless occupation of it.

During the night of the 21st, the southern forts were evacuated, and Sangolinsing fled with an escort of 150 horsemen towards Tientsin, through which he hurriedly passed on his way to Peking, like Sir John Coke, to carry the news of his own defeat.

On the morning of the 22nd the navy so far removed the obstructions at the mouth of the river as to enable the gunboats to enter, and the following day Admiral Hope, in the *Coromandel*, accompanied by some gunboats, went up the Peiho to Tien-tsin. The forts were found to be quite new and of very massive construction, but the guns had been removed, and along with the other munitions of war had been buried. On the 24th Barry's Battery and the 67th Regiment were sent up in gunboats and took formal possession of the forts, of which there are two, one on each side of the river, about three miles below the walled city of Tien-tsin.

On the 25th August, Lord Elgin, accompanied by Sir Hope Grant, arrived at Tien-tsin in the *Granada* steamer, and the same day the cavalry-brigade, consisting of the King's Dragoon Guards, the two regiments of Seik Horse, and Stirling's battery arrived, having marched up by the road on the north bank of the river. In the afternoon the Royals arrived in gunboats. The infantry and Barry's battery, it is supposed, will remain as a military demonstration at Tien-tsin, and the cavalry brigade will accompany Lord Elgin as an escort to Peking.

Upwards of 500 guns have been captured in the Taku forts, amongst them a considerable number of brass cannon worth from eight to twelve hundred pounds each. The value of the metal taken will amount to a large sum, and it is presumed that it will be divided in prize money amongst the allied forces.

The Taku forts were of great strength, and their land defences, especially on the southern side, of the most formidable nature, involving a perfect labyrinth of canals, ditches, pits, zig-zags, abits, stakes, &c.

RUMoured INDEMNITY.

The latest report in circulation from Tientsin is that Prince Sang Golinsin has been degraded, and the Chinese have consented to pay an indemnity of eight millions sterling. This is currently reported, but I cannot vouch for its truth. There is no doubt that the sum specified might easily be paid, as the sequestration for four years only of the Shanghai customs (amounting annually to two millions sterling) for that period would make up the sum.

ANOTHER ACCOUNT.

On the 20th August orders were issued for the attack on the north forts by a force composed of 1,500 English, and the same number of French troops, with a very heavy train of siege artillery, including several 8-inch mortars, and two Armstrong batteries of six guns each. The regiments selected belonged to the second division: were the 44th, the 67th, and Royal Marines, commanded by Major General Sir Robert Napier. The troops moved from Tang-koo on the 20th, across a flat and muddy plain, cut up by canals and ditches, and took their position about a mile in the rear of the north fort furthest from the sea. The night was spent in throwing up batteries and trenches to act as a cover for the infantry, also in constructing bridges and improving the approaches to the fort. The same evening the gunboats, English and French, took up the positions within about 1,400 yards of the mouth of the river, and all was ready for the attack at daylight the following morning.

About 5 A.M. the guns of the fort commenced firing on the troops, and in a short time the artillery, French and English, took up position, and opened a tremendous bombardment on the fort, while the gunboats came as near as they dared venture, and pitched shell and rockets into the north fort, that we were not attacking, but which was firing briskly on the French and English lines, as was one also on the south side, the shot and shell from which came a long way to the rear. At 7 o'clock our Artillery succeeded in exploding the guard magazine of the fort, which went off with a fearful report. The garrison, however, continued unshaken, and the defence was carried gallantly on until 8 A.M., when the storming parties, consisting of the 44th and 67th, followed by the Marines with the pontoons, having gradually closed

round the rear, now opened a very heavy fire on the parapet and embrasures and in conjunction with the French effected, after many difficulties, a footing on the walls, and ultimately drove the gallant defenders out of the fort at the point of the bayonet but not until the ground had been disputed inch by inch by them. *The Chinese coolies behaved admirably; nothing could be more courageous than their general bearing; they carried the French scaling ladders right up to the assault, and when from the absence of pontoons there was a difficulty in getting across the formidable canals and ditches which surrounded the fort, the coolies jumped into the water up to their necks, and supported the ladders on their shoulders, so as to form bridges of them, and enable the storming parties to get across. It was by this ingenious contrivance that the first of the French and 67th were enabled to get into the fort on the right. The 44th highly distinguished themselves on the left, and suffered a larger amount of fatal casualties than any of the other troops, having had 14 killed and 47 men wounded, and which loss chiefly fell on one wing that was covering the advance of the Marines with the pontoons. Our total loss in killed and wounded was 22 officers and 180 men—while the French lost about 130. A considerable number of the coolie corps in addition have been killed and wounded.*

At 3 P.M. on the 21st, the remaining northern forts surrendered, a truce of four hours having been granted them to consider the matter, and in the evening the Governor General of Pecheli, at a conference at Taku, with the allies, unconditionally surrendered the southern forts and the province of Pechili, on a cessation of hostilities being guaranteed.

During the assault on the forts, Captain Gregory and Lieut. Rogers of the 44th, with Ensign Chaplin of the 67th, are stated to have highly distinguished themselves. Brigadier Reeves was wounded in four places. Sir Robert Napier had the glass knocked out of his hand by a bullet, and his boot cut open by another. His Aide-Camp, Capt. Brooke, was shot through the thigh, previous to which a bullet passed through his hat. Several officers of the 67th and marines have been wounded.

CHINA.

SHANGHAI.

An action, *R. Arnold v. J. W. Lewis*, for defamation, has been tried before H.M.'s Consul and accessors, resulting in a verdict for the plaintiff, with \$500 damages. The examination brought to light irregular practices in the importation of fire-arms, a subject which some time past has engaged attention at this port.

The latest dates from this place report that the rebels have withdrawn from that city, after an unsuccessful attempt at its capture. Further reinforcements of allied troops had arrived, and a feeling of security prevailed. No information has been furnished by our plenipotentiary, Mr. Bruce, on the subject of the collision; and the Parliamentary papers when published will, it is presumed, show that Mr. Bruce has again been at fault in treating the rebels with indifference, in fact in the great pooh-pooh style.

SWATOW.

The godowns of Messrs. Jardine, Matheson, and Co. were attacked on the 26th August by Chinese plunderers. Their plans for cutting off any assistance from the foreign residents were complete. The description or value of the property has not been reported. Had a gunboat been there, this could not have taken place.

CANTON.

At Canton everything remains quiet. The Imperialists have obtained a victory over the rebels or local banditti near Loching, where they have been obstructing the passage of teas, which may now be expected down freely. Late *Peking Gazette* contains a decree, appointing a new Imperial Commissioner and superintendent of trade at the five ports. Late reports concerning the governor-general and governor having an animus towards one another are totally without foundation, those two officers being on the best of terms, the latter having accepted the office of governor at the urgent request of the former.

MALACCA STRAITS.

SINGAPORE.

The following announcement has been issued in reference to the Indian Income tax:—

The undersigned is authorised by his Honour the Governor to inform the Secretary, Chamber of Commerce, Singapore, that under orders from the Supreme Government, no steps will for the present be taken towards bringing Act XXXII. of 1860 (Income-tax Bill) into operation in any part of the Straits Settlement. J. BURN, Captain. Secretary to the Governor of the Straits Settlement.

The *Singapore Standard* reports the following change amongst the Government offices:—We are informed that Captain McNair, superintendent of convicts at this station, is obliged to proceed to Europe on sick certificate; that J. D. Vaughan, Esq., the master attendant, also proceeds to Europe *via* the Cape on sick certificate for twelve months. During his absence, Captain Wilkinson will act for Mr. Vaughan. The Deputy Sheriff at Malacca having resigned, Mr. E. Baumgarten, registrar of imports at this station, is to succeed Mr. Neubronner, as deputy sheriff at Malacca. Mr. Cooper, the treasury clerk, is, we understand, to succeed Mr. Baumgarten.

BRITISH GUNBOATS IN THE CHINA WATERS.

57 Dove	78 Drake	85 Cockchafer	92 Weasel
69 Kestrel	79 Janus	86 Firm	93 Bomber
70 Slaney	80 Havoc	87 Stauch	94 Grasshopper
71 Leven	81 Haughty	89 Watchful	95 Banter
72 Algerine	82 Forester	90 Flamer	96 Snap
75 Clown	83 Opossum	91 Bustard	Sparrowhawk
76 Woodcock	84 Stirling		

In addition to the above there are ten steam transport vessels mostly belonging to the Indian navy, and 130 chartered sailing vessels for transport purposes. The *Feroze*, which has been placed at the disposal of Lord Elgin and suite, also belongs to the Indian navy. The *P.* and *O.* str. *Granada* is under the orders of Sir Hope Grant.

MERCHANT STEAMERS IN CHINA WATERS.—Engaged in the Canton, Hong Kong, and Macao traffic.—British: *Fei Ma*, Sir J. Jeejeebhoy, Iron Prince, Mee Lee, Zingari. American: *Pak Wan*, *Willamette*, *Cumia*, *Spark*. Portuguese: *Inveigado*, *Shamrock*.

ENGAGED IN THE COAST TRAFFIC BETWEEN SWATOW, AMOY FOO-CHOW, AND SHANGHAI.—British: *P.* & *O.*'s steamers, *Chusan*, *Formosa*, and *Rajah*; Messrs. Jardine, Matheson, & Co., *Hellespont*; Messrs. Dent and Co., *Yangtze*; Mr. Lapraik's *Undine*.

POSTAL REGULATIONS.

LETTERS and Newspapers are despatched to China, Singapore, &c., by two routes, viz., via Southampton, on the 4th and 20th of each month; and via Marseilles, on the 10th and 26th. They reach their destination at the same time.

BOOKS are forwarded through the Post-office to China (Hong Kong only). Books must be packed in covers open at each end. Each packet may contain any number of Books or Pamphlets; but it must not exceed 3 lbs. in weight. The Postage on Books is payable in advance by stamps.

Continental Intelligence.

FRANCE.

The *Patrie* states that Mr. Bruce, the English Minister in China, has received a despatch announcing that the Emperor of China would be disposed to conclude peace with the allies, after the capture of the Peiho forts. No reliance is placed on this statement.

According to advices received by the *Toulonnais*, a serious affair has taken place at Saigon (Cochin-China), in which the French garrison was engaged, and experienced some loss, particularly among the officers. The details are wanting.

A decree has been published showing the terms which the French have negotiated for trading with the Burman Empire. It was known on your side of the Channel, of course, that the French had been busy in that part of the world lately, and it is considered here that it is the small end of a wedge which the Emperor intends driving into Siam, Cochin China, and Western China, and if the scheme lately noticed by you for opening a trade between Western China and British Pegu is not pushed on rapidly, you will find Louis Napoleon will anticipate you, notwithstanding the prestige of the British; indeed, it is the opinion of many here that the Emperor will soon astonish you with his operations in the Far East. The establishment of a steam line to China and of a bank at Shanghai are notable proofs of the correctness of this idea.

It is announced that the battalions of foot Chasseurs now in garrison here and at Vincennes, has been called on to volunteer for service in China, and that the force volunteered *en masse*.

RUSSIA.

(FROM OUR OWN CORRESPONDENT.)

St. PETERSBURG, Oct. 18.

Although it is not impossible that the accounts received here from China down to the beginning of August (by the overland route via Kiachta and Siberia) may not much differ from those you receive in England by your own Overland Mail, yet it may interest your readers to peruse the Russian version of the latest state of affairs in "the Celestial Empire." According to these despatches the insurrection was extending in many directions, and had assumed a most alarming aspect, having now reached the coast provinces. In and around Peking the militia had been called out and armed, and this was also the case in the province of Shan-tung, whilst subscriptions were opened and collections made to enable the wealthy inhabitants to give proof of their patriotism in the support of these troops, as was done in Russia when the Druschins were embodied for garrison duty during the last war to enable the Government to send all the disposable regular forces to defend the Crimea. But in spite of these measures the bulk of the people are discontented, and make no secret of their disgust, but disparage the Government openly and in no very flattering terms. At the same time they complain loudly that their trade is completely paralysed, and that provisions and every other necessary of life are double the amount of their former prices. Owing to the conciliating conduct of the British towards the inhabitants of the coast where they have effected a landing—causing the Chinese a most agreeable disappointment, as they were led to expect the most brutal treatment, as well as rapine, fire, and sword—the whole of the population of Peking have declared in favour of the English, where they will be received with open arms as friends and deliverers, if they penetrate to the capital. In the meantime a body of six thousand men have been sent from Peking to operate against the foreign invaders and another corps of ten thousand troops despatched in the direction of Shan-tung. A report was in circulation at Peking that the Emperor—who it appears, therefore, is not dead, as announced by the *Wjedomosti* of this city a few days ago—was about to proceed to Manchuria on a hunting expedition, and intended to spend the approaching winter at Muk-den. A good many Mongolian princes and chieftains of Corea had been invited with their numerous suites to accompany the Emperor, several of whom had already arrived at Peking for that purpose.

A letter from the Amoor gives some interesting particulars of the first and completely successful trip of a new iron steamer on the waters of that river. The vessel is called the *Count Murawieff-Amoorsky*, out of compliment to the popular Governor General, to whose assiduous energy the possession of that valuable district is solely indebted. She carried not only thirty

sashen of cut wood as fuel, but twenty-five passengers and 300 poods of cargo, and then only drew twenty-two inches of water. Besides this she took in tow a large river boat with a cargo of 2,600 poods (52 tons), and 180 passengers, principally workmen and mechanics returning from Nicolayeffsky, and soldiers belonging to the different military stations on the banks of the Amoor. Under all these disadvantages she steamed up the river at the rate of fifteen wersts (ten miles) an hour against the stream, and twenty wersts with the current.

Another steamer, the *Kosakowitsch*, started a few days later from Nicolayeffsky for the Upper Amoor, with above 100 passengers and 3,000 poods, or sixty tons of cargo, consisting of sugar, rice, and other Chinese produce, as well as a good many bales of manufactured goods. She went up safely as far as Nertschinsk, passing Oust-Strelka, Stretensk, and the other towns on the river, and causing much astonishment among the unsophisticated natives.

GERMANY.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, Oct. 23.

The newly-established Discounting Company in Paris, with a paid-up capital of forty millions of francs, announces by circular and advertisement, for the information of the merchants of this city trading with China, that with a view to facilitating remittances and other pecuniary transactions with the Far East, they have established an agency at Shanghai, the members of which left France for their destination six weeks ago. The company add, that they are therefore in a condition to offer merchants any facilities they may require for open credits to pay for the Chinese produce they may in future be induced to purchase without the uncertainty and risk of sending out specie, which, on its arrival, may have to remain, for a time, unproductive, should any alteration in the prices of produce have taken place in the meanwhile.

From Hanover we learn with great satisfaction that the question of the Stade Dues is all but settled, the convention being signed, and only requiring the ratification of the different States. The particulars of the arrangement are as follows:—The annual revenue arising from this toll is taken at the average of the last seven years, and found to produce £30,000 per annum, which sum, taken at 15½ years' purchase, will be capitalised, and thus amount to £465,000. This handsome sum,—the more handsome when one considers the illegality of the toll altogether, and the ingenious fiction by which Hanover has been clever enough to bamboozle diplomatists and dupe congresses by representing, as circumstances made it convenient, the Stade Dues to be a sea-toll, and at other times claiming them as a river duty, though she pays annually not one farthing for the lighthouses and other expenses which fall exclusively on Hamburg,—will be paid to Hanover, viz., one-third by England, one-third by Hamburg, and the remaining third to be divided amongst the other maritime States, in proportion to the average amount paid by each during the last seven years, as was the case with the Sound Dues when they were abolished two years ago. It is scarcely fair to make this little free State of Hamburg bear so large a sum as one-third, or more than £150,000, for ships under the Hamburg flag, and cargoes belonging to Hamburg citizens have ever been, and are still, exempt from the payment of the toll; but, on the other hand, it forms so great an obstacle to the general commerce of this city, that there is every reason to expect that the BURGERSCHAFT will readily consent to the terms, however unjust and onerous, merely to get rid of them for ever and a day.

Although we are fast approaching the close of the shipping season, and may expect in another month the setting in of the frost, our markets are, on the whole, very calm, the usual bustle and activity not being perceptible in any particular article. Pepper and other spices are firm and in fair demand, especially for shipment to the north of Europe, where the frost sets in even earlier than with us. During the past fortnight there has been considerable business done in East India sugars, amongst which are 10,000 bags of brown Manila at 17½ and 18 marks banco per 100 lbs., 9,000 bags of brown China at 15 M.B., and about 1,000 bags of Java of different qualities, and at prices

ranging from 15 for brown to 21 and even 23 M.B. for good white. In drugs but little doing, though the market is well stocked, and offers a favourable selection for purchasers. The cargo of the *Concurrent*, just arrived from Batavia, consists of 4,531 bags of rice, 1,348 bundles of rattans, and 104 chests of gum damar.

Unpleasant rumours are afloat concerning the Prussian expedition to China and Japan. Thus much is, however, certain, that the departure of the *Elbe*, Captain-Lieut. Werner, from Singapore for the Bay of Yedo, which was fixed for the 25th of August, had to be postponed on account of a malignant fever, as some say, whilst others talk of scurvy, small-pox, and other diseases, which had prostrated a large portion of the crew, and would greatly imperil the ship whilst so short-handed. Later accounts, however, state that the above-named vessel had sailed on the 3rd of September, and it was hoped that the fresh air of the sea would have a beneficial influence on the health of the crew.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Oct. 23.

It will be in the recollection of your readers that in the last session of the States-General the Government plan for the emancipation of the slaves in the Dutch colonies was thrown out by a large majority, and this was one of the reasons which led to the Ministerial crisis and partial reconstruction of the Cabinet. Nothing daunted by the discouragement experienced by their predecessors in the late session, the present Government have prepared a new Bill on this philanthropic subject, and laid it before the Second Chamber. The principal features of the measure are as follows:—Six months after the passing of the Act all slaves in the colonies belonging to the Netherlands are declared emancipated and free men. The slave owners to receive compensation as follows; 375fl. (about £31) for each slave on sugar plantations, 260fl. on plantations of coffee, cotton, cocoa, and rice, 300fl. for slaves not employed on plantations; the emancipated slaves to be placed under the protection of the State, and the Governors of colonies to be empowered to take needful measures for their social comfort and moral improvement. The expense of the measure is estimated at 12 millions of florins, besides 2 millions to be employed in premiums for facilitating the importation of free labourers, for each of which the sum proposed to be offered is 150 florins.

H.N.M. screw steam-corvette *Montrado*, Captain-Lieutenant I. H. van Capellen, arrived on the 10th inst. at Helvoetsluys from the East India station, touching on her passage home at the Cape and St. Helena. The gallant commander, who is one of the King's naval aides-de-camp, repaired the following day to the Hague, to pay his respects to the King, who received him at a private audience. The *Montrado* left Batavia on the 5th July, so that the intelligence she brings has been anticipated by the overland mail. Her period of service having expired, it is expected that she will be paid off and undergo a thorough overhauling, and when this is completed, placed in the steam reserve.

Within the last few days a petition has been sent in to the King by the "Association for Dutch Emigration to foreign parts," under the presidency of a well-known philanthropic gentleman, Mr. J. Toussaint-Delincée, in which great stress is laid on the importance of directing the tide of emigration to Dutch possessions, and soliciting a grant of waste land for that purpose in the district of Djagu-Djaga, on the west coast of the Island of Sumatra.

The King has nominated the following gentlemen connected with the East Indian service to be Knights of the Order of the Netherlands Lion: Messrs. G. C. Schonck, late resident of Banjoemaas, retired from the service with a pension; C. van der Moore, resident of the Preanger Regencies; Lieut. Colonel G. Suermondt, commanding the "Schutterij," or local militia at Batavia; and J. H. Walbeehm, late of the Warehouse Department at Riouw, retired from the service with a pension and the rank of Assistant-Resident.

The steam corvette *Retah*, fitting out in dockyard basin for service in the East Indies, as mentioned in a former letter, is in such a state of forwardness that she has been taken out to make a trial trip, and test her machinery at sea. All accounts agree in stating the result as "highly encouraging and perfectly satisfactory." If this is really the case, it would appear that the

demands and expectations of the Dutch Government for the speed and general capabilities of their war steamers are exceedingly moderate, for the following is the result of the trial taken from the official report:—Under steam alone, at half-speed, 4½ knots; ditto, full speed, 7—7½; ditto with wind and tide (three fore-and-aft sails set), and half-steam speed, 8½; ditto, ditto, and full speed, 9 knots. Such a result would scarcely be termed "perfectly satisfactory" in England.

Fresh tenders for shipping to Java are invited by the Netherlands Trading Company. The vessels offered must be either such as have been chartered by the company subsequently to the 15th January, 1858, or new ships launched before 31st December, 1859. Those tendered in this country must be ready to sail on or before the 10th November next, and those now on the passage out, if accepted, must be placed at the disposal of the factory at Batavia by the 10th March, 1861. The company further advertises for offers to carry 500,000 Dutch pounds of blacksmiths' coal, 100,000 lbs. of coke, and seven tons of iron rails from Newcastle to Sourabaya Fifty working days allowed for loading and discharging. Freight payable when the ship sails.

The following table shows the wonderful annual steady increase in the use of the telegraph in Holland since its first introduction:—

Year.	No. of Telegrams.	Gross proceeds.
1853	45,674	51,862 florins.
1854	101,864	105,549 "
1855	140,011	157,382 "
1856	190,447	215,523 "
1857	224,803	254,911 "
1858	263,777	234,070 "
1859	388,473	307,194 "

P.S. The Netherlands Trading Company have just chartered the following ships:—*Delfshaven* and *Ida Elisabeth*, to sail from Rotterdam, and the *Vriendenstroom*, *Prince Mauritz*, *Eensgezindheid*, and *Cornelia Gertruda*, from Amsterdam. They also invite tenders for the passage of sixty-nine soldiers and eleven cabin passengers for Java, to sail on the 15th of November.

UNITED STATES.

(FROM OUR OWN CORRESPONDENT.)

NEW YORK, Oct. 9—12.

Our daily papers announce that the brig *Orbit* had returned to Vancouver's Island, from Hakodadi, without a cargo, as the Japanese would not observe the treaty. The French minister at Yedo had resigned, as his representations were all unattended to in respect to the treaty. The Japanese had concluded a new treaty with Portugal. The Russian war-steamers have been very active, moving about with large bodies of troops on board.

Accounts have been received from the Island of St. Paul de Loando, on the coast of Africa, of the arrival of the frigate *Niagara*, with the Japanese Embassy on board, on the 7th August. After coaling, &c., she would proceed to Mauritius on the 18th. The Japanese and all on board were well, but found the voyage very monotonous.

Mr. W. S. Lindsay has delivered a speech at New York, and after noticing the want of system and unity of regulation for ships of both nations on the high seas, he thus alluded to the vexed question of the American coasting trade:—

"England in 1850 opened her ports, and in 1854 all her coasting trade to American ships. One principle of these statesmen was reciprocity. While they opened the coasting trade and the trade to all their colonies, America prohibited England from her coasting trade, and also called the trade between California and New York a coasting trade. He thought this rather stretching the coasting trade. England might as well call the trade to Calcutta a coasting trade. Many British merchants felt this very keenly. Suppose an order was issued by England against all ships of non-reciprocating nations. There was such an order already passed, which might any day be put in force. He wanted that Americans should aid him in getting some reciprocation in our coasting trade. Certainly, America with her beautiful ships, need fear no amount of competition. This would greatly increase trade, and he thought America should at least make concessions in the coasting trade. England also has concessions to make. America makes no charges for the lights on her shores; England charges American ships for the lights on her coast, and also passing tolls; also, what are called local charges, and pilotage under her compulsory law, whether the ships take a pilot or not. American ships pay something like a million dollars for these four charges annually. He believed if America would make concessions in her coasting trade England would strike away these charges."

MONETARY AND COMMERCIAL.

Since our last there has been no great change noticed in East India goods. Teas have been quiet this week, and without change in prices of moment. A public sale was held on the 3rd inst., which was well attended. The greens were all sold, while some of the blacks were withdrawn. At private

sale 1,400 half chests green 1,600 do., do., and 800 do. Oolong, were disposed of at previous prices.

GUNNY CLOTH continues to rule dull; 500 to 600 bales have been sold (standard) in Boston, at 12c., 6 months.

INDIGO.—The stock of Manila has been reduced. The sales and resales of Manila since our last have reached 75 cases at 80c., and some 50 ditto at 75c. to 77½c. to 80c. in lots. Stock 1,443 cases, against 1,791 last year.

HEMP was in moderate demand, with sales of 400 bales of jute, in store, at P.N.I., 250 ditto afloat before arrival, at \$90, 6 months. At Boston, 400 bales Manila sold at about 6c., 6 months.

SPICES.—The sales have embraced 4,000 lbs. Number 1, nutmegs, in cask, at 40c.; 175 bags pepper, at 8½c.; 800 mats cassia, at 22c.; some 700 bags pimento, at 6½c.; and some cloves, at 8c.; and 500 mats cassia, by auction, at 22c., 6 months, and to-day 10,000 mats of cassia were sold on private terms.

TIN.—The market has become quiet, and sales of 200 slabs of strait were made, to arrive at Boston, at 31½c., 6 months; 150 to 200 Banca, at 32c. to 32½c. cash, and 500 ditto, to arrive.

TEAS.—We have nothing to add of moment this week. A public sale of some magnitude is announced to come off in a few days which checks private sales.

SALTPETRE.—The stock in market is quite light, and prices continue to rule firm, with limited sales at full prices. The stock in Boston, October 1, was 3,300 bags, against 9,854 at the same time last year.

SEEDS.—The late decline in Calcutta linseed has caused increased activity, and among the transactions within the past week have been 8,000 bags and 4,000 packets at Boston, to arrive there by different vessels at 172c. to 175c.; 9,000 ditto to arrive here by several vessels at 173c., cash, and 2,745 packets per *Lucretia* and *Highlander*, afloat here at 175c., sixty and ninety days, adding interest; and 3,500 bags to arrive here from Boston at P.N.I. The market at the close was firmer.

The stock of Calcutta linseed in Boston on the 1st inst. comprised 46,857 bags, against 56,159 bags and 700 packets at the same time last year.

SUGARS have been firm and active since my last report. The late storm in the State of Louisiana having injured the sugar-cane, the markets here became excited, and heavy sales were made at an advance of ¼ to ½ per lb. And on the 6th inst. 3,900 bags Batavia were sold for refining at P.N.I.

COFFEE continues firm, and stock moderate. The supply of Ceylon is light; Java continues firm, with sales of 1,600 mats at 16½c. to 16¼c.; 50 bags do. Government at 16½c. The sales have also embraced 6,902 bags Ceylon at 14½c.

ARRIVALS.—*Nautilus*, Elwell, at Boston, Sept. 28, from Manila; *Martha*, Lane, at Boston, Sept. 28, from Calcutta; *Polar Star*, Pearson, at Boston, Sept. 29, from Calcutta; *Highlander*, Sherman, at New York, Oct. 2, from Calcutta; *Lucretia*, Harding, at New York, Oct. 2, from Calcutta; *Hero of the Nile* (Br.), Pavey, at New York, Oct. 4, from Algoa Bay, C. G. Hope; *Union*, Small, at Boston, Oct. 3, from Calcutta; *Free-Trade*, Stover, at New York, Oct. 5, from Manila; *Clasmerdin* (Br.), Bennett, at New Orleans, Sept. 30, from Calcutta; *Mary Ann*, Remmonda, at Boston, Oct. 6, from Calcutta; *Geneva*, Barnes, at Boston, Oct. 8, from Calcutta.

DEPARTURES.—T. G. Bunker, Cooper, from New York, Oct. 4, for Shanghai.

LOADING.—At Boston, Oct. 9.—Sea King, Barker, for Calcutta; Wm. Wirt, Power, for Melbourne; Rattlesnake, Hendee, for Bombay.

At New York, Oct. 9.—Independence, Crowell, and Eureka, Cutler, for Hong Kong; Cincinnati, Gladd; Adisonack, Burmeister, and Gray Feather, Mayo, for Melbourne; Crusader, Moore, for do.; Tybel, —, for Sydney, N.S.W.

MR. SCARTH ON CHINA.—A pamphlet has been issued by Messrs. Smith, Elder and Co., on China, written by Mr. John Scarth. We must reserve a notice of it until our next. The *Globe* of 25th ult. contains a letter from Mr. Scarth from which we extract the following:—"In the *Globe* of the 18th instant I notice that you refer to my pamphlet, 'Is our War with the Tartars or the Chinese?' and make the following quotation from it, omitting the words which I now underline. 'If our unwilling acts result, through the present war, in driving the Imperial power from Tientsin and Peking, and we still shun the chiefs of the revolution, we are merely extending the disastrous anarchy which at present exists in so many parts of the empire.' As the whole tenor of the pamphlet served to show that it is on account of our avoiding and rejecting all intercourse with the leaders of the rebellion we have now so many difficulties to contend with, and that by entering into friendly communication with them order might take the place of anarchy, you will observe that you made a most important omission, especially as you change my meaning, and make me condemn a result likely to arise from the present war, when such a result as the overthrow of the Tartar dynasty would, in my opinion, be of benefit to ourselves, and a blessing to China, if at the same time we did not oppose the attempts of the Chinese to form a new Government."

MR. MOFFATT ON CHINA.—In a speech at Honiton this gentleman said:—"Nor do I forget that we have at this time a war on hand, a very costly war, for which the nation have been already taxed to the extent of nearly four millions sterling. In this unfortunate war with China, I have never been able to discover any satisfactory reason why we have been embarrassed and involved in the co-operation of the French; that nation had practically no commerce with China; they had no high plenipotentiary in the country to be insulted by Commissioner Yeh—and surely we were sufficiently powerful to redress our own wrongs as against the Chinese—without this entangling and most inconvenient aid from France. I have no fear for the isolation of England, so long as she is true to herself."

GENERAL LEMERY has been gazetted Captain-General of the Philippines; and proceeds by the mail of December, vice General MacCronon, who died on his passage out (in the Red Sea).

It is stated to be the intention of the Unitarians of England to present Sir J. Bowring with a bible on the occasion of his marriage on Tuesday next, in acknowledgment of the services he has rendered their cause.

Naval and Military.

Detachments of the 2nd battalion of the 1st Regiment, 1st battalion of the 2nd and 67th, and the Army Hospital Corps, have arrived from China via the Cape of Good Hope, in the mail steamer *Athena*, and a detachment of the 59th Regiment also from Cape Town.

The *Sultana*, now loading with stores for Hong Kong, will take out detachments of the Army Hospital Corps, &c. Details will be given in our next. The *Chatham*, *Veloze*, and *Rajah of Saravak*, are also taking out stores.

Major Bunbury, in command of the Army Hospital Corps at Chatham garrison, has received orders to hold in readiness detachments for the Cape of Good Hope and China.

The field-day in honour of the visit of his Imperial Highness the Grand Duke Michael of Russia, on Woolwich Common, took place yesterday, as previously announced. His Imperial Highness, attended by his personal staff, consisting of Messrs. Le Comte Levachoff, Le Comte Zouboff, Le Baron Wallen, and Le Capitaine Novitsky, entered the garrison precisely at 10 A.M., under a salute of twenty-one guns, fired from the Greenhill Battery. The Royal Standard of England was hoisted on the Royal Artillery flag-staff, and a guard of honour, under the command of Captain Field, was drawn up in front of the entrance to the mess-quarters, where the Grand Duke alighted from his carriage. His Imperial Highness, contrary to expectation, was accompanied to Woolwich by his Royal Highness the Duke of Cambridge, attended by one of his Aides-de-Camp, Colonel Tyrwhitt; Lieutenant-general the Right Hon. Sir James York Scarlett, K.C.B., Adjutant-general to the Forces; Captain Ynge, Deputy-Assistant Adjutant-General; General Sir Richard Airey, K.C.B., Quartermaster-general, &c.

On the subject of the steam rams and batteries *The Times* says:—

"So impressed are we with the importance of the new naval question that we cannot forbear from keeping it before the public eye while the subject is fresh, and the opportunities are all our own. It is of the utmost consequence that our position in this matter should be correctly apprehended, and that we should preserve ourselves on one side from the dangers of negligence, and on the other from the mischiefs of precipitation and alarm. Iron-cased ships must for the future, or at least until some new phase of marine architecture has been developed, enter into the composition of the British navy; but all our ships need not be cased in iron, nor is it quite certain what form the new discovery will ultimately take. We shall best elucidate the question by describing the progress of the invention itself. It is at least twenty years ago that the suggestion of sheathing ships of war in iron armour was first made, but the idea never received any practical expression till the Russian war, when floating batteries thus protected were employed by the allies against the works of the Russians at Kinburn. This experiment, in the opinion of many officers of good authority, should have been regarded as decisive, for it was shown beyond all doubt that the iron-plating of the batteries could resist and repel the shot from the Russian guns. Whether the vessels would have proved eternally or absolutely invulnerable may be another question, but as a matter of fact it was established by the best of proofs that ships might be protected even against heavy artillery, and at tolerably close quarters, by covering their sides with iron. Now, what the Emperor of the French has done is to turn this discovery to the best advantage. He saw in what respects the floating batteries were successful, and in what they were defective. They were successful in the main point of the theory—that is to say, they resisted hostile shot; but they were so cumbersome, so unwieldy, and so inconvenient in many respects, that the invention seemed hardly applicable to the general purposes of maritime war. Napoleon III., however, saw further into the matter. The French authorities were set to work, and the result, after two or three years of experimental efforts, is the production of the vessel of which so much has been said. The *Gloire* is a floating battery mobilized. There is the whole truth of the matter. The French architects, always among the best in the world, have contrived to eliminate one by one the faults of the original essay, until in the end they completed a model combining the solidity of a floating battery with the form and speed of a frigate. As soon as this was accomplished the Emperor saw his way. Orders were given for placing ten of the new vessels on the stocks, and the construction of line-of-battle ships on the old models was discontinued from that time forward. That is the whole story, and we must needs admit that it is greatly to the credit of the authorities across the Channel. We now know that the plates of the *Gloire* are in no degree superior to those which have been manufactured in this country, and we have been also apprised that the experiments conducted in France gave exactly the same results as were derived from our own. The only difference was in the conclusions, and here the French left us behind them. They saw, as well as we did, that under certain conditions a ship's armour could be perforated by cannon shot; but they saw also that, under conditions far more likely to occur, the shot would be repelled by the armour, and they seized the advantage without hesitation, although it was not shown to be quite absolute."

A number of the most intelligent of the Sappers and Miners of the Royal Engineers have been selected from among the companies at head-quarters, Chatham, to proceed to Australia, for employment at the Royal Mint at Sydney.

The completion of the *Warrior* is being pushed forward with as much activity as possible, and it is expected to be ready for launching in the month of December. The engines are to be of 1,250 horse-power, and their weight with boilers 950 tons. Her stowage for coal will be about 1,000 tons, and her total weight including armament and stores will be upwards of 9,000 tons. The speed expected is 14 knots, and there appears no reason to suppose that this rate may not be attained. The lines of the *Warrior* are remarkably fine and clean, and seem in every way suited for a fast ship. Her dimensions are 420 feet, over all, 380 feet between the perpendiculars, extreme breadth, 58 feet; extreme depth, 42 feet; tonnage, 6,100. She will be rigged as an 80-gun ship. The original intention of building the *Warrior* as a "ram" to run down other ships, and of disusing her real character by some artistic figure-head and false bows, has been abandoned.

The *Army and Navy Gazette* says:—"We are informed that at a Cabinet Council held a few days since at St. Cloud, at which the Emperor presided, it was resolved that important works should be immediately commenced, to strengthen the fortifications of Cherbourg and Algiers, and likewise that a number of steel-cased frigates should be constructed on the model of *La Gloire*. Admiral Hamelin, Vice-Admiral Bouet-Willamez, and Rear-Admiral Dupony spoke in favour of these measures. There is a report current in naval circles in this country that *La Gloire* has proved a failure, and that during her late experimental trip to Algiers she was very nearly foundering. The decision at which the government of Louis Napoleon has arrived does not, however, support the statement."

Vice-Admiral Sir Houston Stewart, K.C.B., the New Commander-in-Chief at Devonport, arrived there on the 15th inst.

Lieut-General Sir James Outram is so far restored to health that he is able to leave Brighton for the moment on a visit to his friends.

Considerable activity now prevails at the storekeeper's department of the Royal Arsenal, in the preparation for shipment of elongated shot for rifled ordnance, shrapnel, and other shells, Minie rifle balls, and other war stores, for China, New Zealand, Gibraltar, and various foreign stations.

While at Corfu the *Himalaya* was ordered to proceed to Zante to take in 1,200 shells for conveyance to England. These shells had but recently arrived from England, and to England they were ordered to be conveyed, there being no guns at Zante suitable for them. The guns were on their way from England to Zante, but of this fact it is presumed the authorities knew nothing. The 1,200 shells were placed on board the *Himalaya*, and by her conveyed to Malta, where Captain Seccombe brought the matter under the notice of the admiral and the governor, and the shells were landed by their order to be again sent to Zante the first opportunity.

The *Duke of Wellington*, 131, screw, made her annual trial of machinery at Portsmouth, as one of the steam reserve. The ship steamed out as far as Sandown Bay. Every part of the machinery worked beautifully.

The launch of the *Ro-ario*, of 11 guns, took place at the dockyard, Deptford. Miss Ward, daughter of Capt. Ward, christened the vessel. The vessel glided into the Thames with the greatest possible ease. The following were present:—Mr. Fincham, the master shipwright of the dockyard; Capt. Thurnburn, Capt. Pierce, the master superintendent of the dockyard; Capt. Buckle, superintendent of the dock and victualling yard. The above gentlemen presented a bun each to the 1,400 children of the Deptford National School, who were drawn up on each side of the ship. The length of the vessel between perpendiculars is 106 feet; extreme breadth, 30 feet 4 inches; ditto, from moulding, 29 feet 6 inches; depth in hold, 15 feet 6 inches; burden in tons, 668 76 94. The following is the armament of the ship:—Ten 32-pounders of 30 cwt. and 6 feet in length, and one 30-pounder pivot gun, 58 cwt., 9 feet 6 inches in length.

His Royal Highness the General Commanding-in-Chief having directed that in future lieutenants of the Royal Artillery shall, before being promoted to the rank of captain, undergo an examination as to their qualifications in the same manner as laid down in the "Queen's Regulations and Orders for the Army," p. 71, paragraph 30, the same is notified for general information and guidance. The subjects on which the officers will be examined, in addition to those enumerated in the regulations referred to, will be chiefly of a professional nature, and a programme is in the course of preparation which will be published when complete. The examination will commence on the 12th of April, 1861, with the then thirty senior lieutenants, and will continue from time to time with every officer as he becomes the 30th from the top of the list of lieutenants.

Commander Hawker, R.N., acting in the absence of Commodore the Hon. J. R. Drummond, C.B., at Woolwich, received information, on the 17th inst., of the successful issue of the course of trials on board the flagship *Royal Albert*, Vice-Admiral Sir Charles Fremantle, and other ships of the fleet, with Mr. W. H. Ward's "ocean marine telegraph." During the twenty-two days' cruise of the fleet, the ocean telegraph was repeatedly tested from ship to ship in thick and calm weather, and messages were transmitted under the superintendence of the Admiral, which were readily replied to over an ocean range as far as the ships' lights were visible. The invention is stated to have met with the entire approbation of the Admiral, a report to that effect having been forwarded to the Admiralty.

A vessel of immense proportions in the course of building upon Messrs. Palmer Brothers' extensive works at Jarrow is attracting a great deal of attention. The vessel is the iron-plated ram frigate *Defiance*, building under contract for our Government. She is intended to carry 36 heavy Armstrong guns. Her iron casing will be 4½ inches thick on the outside. Next that will be 20 inches of timber, and inside of that the iron framing of the ship.

Another valuable addition to our fleet has been made by the launch of the *Newcastle*, 51 guns, from Deptford dockyard. The weather was, unfortunately, very unfavourable, notwithstanding there was a large assemblage of the residents of the surrounding neighbourhood. At twenty minutes after two the signal was given that all was ready, the ponderous blows of the shipwrights' hammers were heard, and Mr. Buckle having dashed a bottle of wine against the bows of the vessel, and named her the *Newcastle*, hydraulic power was used, and in another instant the vessel glided into the river amid the deafening acclamations of those present. The *Newcastle* has been about two years building, and is a sister vessel to the *Forle*, launched from the same yard a few months since.

We much regret to have to announce that Admiral Sir Charles Napier, K.C.B., was, on the 29th inst., at his residence, Murchistoun-hall, Hants, seized with a sudden and severe attack of illness, which has caused serious anxiety to his friends.

CHANGES AND PROMOTIONS IN HER MAJESTY'S ARMY AND NAVY.

WAR OFFICE, PAUL-MALL.

1st Regiment of Dragoons—Captain James Ainslie, to be major, by purchase, vice Michael Stocks, who retires; Lieutenant Walter Balfie, to be captain, by purchase, vice Ainslie; Cornet William Lawrence Twentymann, to be lieutenant, by purchase, vice Balfie.

2nd Dragoons—Thomas Jessopp, gent., to be cornet, by purchase, vice Herbert, who has retired.

4th Dragoon Guards—James Colquhoun, gent., to be cornet, by purchase, vice Marriott, promoted.

6th Dragoons—Capt. Thomas Edward Gordon, from the 14th Light Dragoons, to be capt., vice Chapman, who exchanges.

9th Light Dragoons—Assist.-Surg. George Carleton Clery, from the 17th Light Dragoons, to be assist.-surg., vice Fuller, who exchanges.

10th Light Dragoons—Captain Edward Levett, to be major, by purchase, vice Richard Plane Smith, who retires; Lieutenant Eadailo Lovell Lovell, to be captain, by purchase, vice Levett; Cornet Thomas James Williams Bulkeley, to be lieutenant, by purchase, vice Lovell; Cornet John Cecil Russell, from the 11th Light Dragoons, to be cornet, vice Bulkeley.

14th Light Dragoons—Capt. Frederick Barclay Chapman, from the 6th Dragoons, to be capt., vice Gordon, who exchanges.

17th Light Dragoons—Assist.-Surg. Samuel Fuller, from the 9th Light Dragoons, to be assist.-surg., vice Clery, who exchanges.

18th Light Dragoons—Capt. George Harmer Perring, from the 21st Foot, to be capt., vice Gifford, who exchanges.

Royal Artillery—Second Capt. Henry Renny, to be capt., vice G. R. C. Young, placed on temporary half-pay; Lieut. William George Martin, to be second capt., vice Renny.

Royal Engineers—Brevet-Col. Sir William Thomas Denison, K.C.B., on the Seconded List, to be col.; Brevet-Col. Edward William Durnford, to be col., vice Stothard, removed as a general officer; Brevet-Major Thomas Bernard Collinson, to be lieutenant-col., vice Durnford; Second Capt. Edward Nicholas Heygate, to be capt., vice Collinson; Lieut. Edward Harding Steward, to be second capt., vice Heygate.

Military Train—Lieut. C. W. Farwell, to be capt., by purchase, vice Wolridge, who retires; Ensign George Edward Brace, from the 69th Foot, to be lieutenant, by purchase, vice Farwell; Thomas Gerard Lockyer, gent., to be ensign, without purchase; Quartermaster-Serg. Frederick Luttrell, to be quartermaster, vice McCall, appointed to an ensigncy in the 94th Foot.

Military Train—Captain Charles B. Wynne, from the 90th Foot, to be capt., vice Henry Richmond Hoghton Gale, who exchanges.

Grenadier Guards—Ensign Charles James Herbert, from the Rifle Brigade, to be ensign and lieutenant, by purchase, vice Bridges, promoted.

1st Regiment of Foot—Luke Edmonstone Miller, gent., to be ensign, without purchase, vice Frings, superseded for being absent without leave.

2nd Foot—Ensign Thomas Kelly, to be lieutenant, by purchase, vice Nicholletts, who retires.

7th Foot—Ensign Edward Wynne Griffith, to be lieutenant, by purchase, vice Keyser, whose promotion by purchase has been cancelled.

8th Foot—Ensign William W. Madden, to be lieutenant, by purchase, vice Leeson, who retires.

9th Foot—Capt. Charles J. Cramer Roberts, from the 49th Foot, to be capt., vice Grimston, who exchanges.

11th Foot—Ensign Edward Henry Hare, to be lieutenant, by purchase, vice Webb, who retires.

12th Foot—John King Dooner, gent., to be ensign, by purchase, vice Fiddes, promoted.

13th Foot—Ensign Richard Fitzgerald King, to be lieutenant, without purchase, vice Henzell, superseded for being absent without leave; Lieut. Edward Lutwyche England, to be adjutant, vice Bond, promoted to an unattached company; Lieut. Aubrey Henzell has been superseded for being absent without leave.

18th Foot—Ensign Charles Henry Stevenson, to be lieutenant, without purchase, vice Theobald, deceased; Ensign George Augustus Nicholls, to be lieutenant, without purchase, vice Bryant, promoted.

21st Foot—Capt. John Wynter James Gifford, from the 18th Light Dragoons, to be capt., receiving the former difference between a lieutenancy of cavalry and a lieutenancy of infantry, vice Perring, who exchanges.

27th Foot—Staff Assistant-Surgeon Joseph Henry Thomas King, to be assist.-surgeon, vice Cameron, appointed to the Staff.

29th Foot—Capt. Richard Coote, from the 46th Foot, to be capt., vice Gordon, who exchanges.

32nd Foot—The Hon. James Bruce Ogilvy, to be ensign, by purchase, vice Cherry, promoted.

36th Foot—Lieut. Edward Dorrien Newbolt, to be instructor of musketry, vice Lieut. Le Mesurier, who resigned that appointment.

40th Foot—Ensign John Thomas Whelan, to be lieutenant, without purchase, vice Brooke, killed in action; Ensign Frederick Dudgeon, to be lieutenant, without purchase, vice Whelan, whose promotion of the 4th of September, 1860, has been cancelled.

46th Foot—Capt. John James Hood Gordon, from the 29th Foot, to be capt., vice Coote, who exchanges; Ensign Richard Fletcher Armytage Howorth, to be lieutenant, by purchase, vice Mullen, who retires.

49th Foot—Capt. Rolland V. S. Grimston, from the 9th Foot, to be capt., vice Roberts, who exchanges.

56th Foot—Lieut. and Adjutant Henry Williams, to be captain, without purchase, vice Baxter, deceased; Donald James Gordon Stewart, gent., to be ensign, without purchase, in succession to Lieutenant Williams.

58th Foot—Ensign William James Hall, to be adjutant, vice Lieut. William Bolton, who resigns that appointment.

59th Foot—Major and Brevet-Lieut.-Col. Arnold Edward Burmester, to be lieutenant-col., by purchase, vice Brevet-Col. Henry Hope Graham, C.B., appointed inspecting field-officer of a recruiting district; Capt. and Brevet-Major Robert William Rorer, to be major, by purchase, vice Brevet-Lieut.-Col. Burmester; Lieut. Herbert Edward G. Crosse, to be capt., by purchase, vice Brevet-Major Rorer; Ensign Charles Wollaston Hutton, to be lieutenant, by purchase, vice Crosse.

60th Foot—William Warren, gent., to be ensign, by purchase, vice Worsley, promoted; James Blakie Keith, gent., to be ensign, by purchase, vice Meade, promoted. The appointment of Lieut. James S. H. Algar as adjt., vice Telford, resigned, to be ante-dated to the 7th of February, 1860. The second Christian name of Ensign Blunt is Scawen, and not Seaman, as stated in the *Gazette* of Sept. 21.

70th Foot—Ensign Rodney Stuart Riddell, to be lieutenant, by purchase, vice Crozier who retires.

73rd Foot—Major-Gen. Benjamin Oolando Jones, to be col., vice Major-Gen. Sir Michael Creagh, deceased.

74th Foot—Lieut. Robert Frederick Martin, to be capt., by purchase, vice Charles Wyldé Sherlock, who retires; Ensign Norman Magnus MacLeod, to be lieutenant, by purchase, vice Martin; Ensign Henry Smith Andrews, from the 12th Foot, to be ensign, vice MacLeod.

75th Foot—Staff Assist.-Surg. Alexander Mackay, to be assist.-surg., vice Woods, who resigns.

76th Foot—Staff-Surg. Arthur Bell, to be surg., vice Surg.-Major Scott, who exchanges.

Rifle Brigade—Lieut. Hector S. Vandeleur, to be capt., by purchase, vice the Hon. J. F. Pennington, who retires; Ensign Fitz Roy Wilson, to be lieutenant, by purchase, vice Vandeleur; Anthony Cope, gent., to be ensign, by purchase, vice Herbert, appointed to the Grenadier Guards.

2nd West India Regiment—Ensign Robert Straker Turton, to be adjt., vice Lieut. George William Reade, who resigns that appointment.

DEPOT BATTALION.—Major Charles Carew de Morel, to be lieutenant-col., by purchase, vice Brevet-Col. James Wells Armstrong, retired on half-pay.

UNATTACHED.—Captain and Brevet Lieut.-Col. Charles Spalding S. Evans Gordon, from the 23rd Foot, to be major, without purchase.

Gold Coast Artillery Corps.—Capt. and Brevet-Major Thomas Cochrane, to be major, without purchase, vice Major and Brevet-Col. Bird, promoted to an unattached lieutenant-colonelcy, without purchase; Lieut. Francis John Bolton, to be capt., without purchase, vice Cochrane.

MEDICAL DEPARTMENT.—Assistant-Surgeon John McLeod Cameron, M.B., from the 27th Foot, to be Staff-Surgeon, vice Bradshaw, placed upon half-pay; Surg.-Major Robert Thomas Scott, from the 76th Foot, to be staff surg.-major, vice Surg. Bell, who exchanges.

BREVET.—Lieut.-Gen. Sir Chas. W. Pasley, K.C.B., Royal Engineers, to be general vice Thackeray, deceased. Major-Gen. William Cuthbert Ward, to be lieutenant-gen., vice Sir C. W. Pasley. Col. Richard John Stothard, to be major-gen., vice Ward. Major-Gen. Charles Dixon, and Major-Gen. Sherburne Williams, retired full-pay, Royal Engineers, to be lieutenant-gens., in consequence of the promotion of Major-Gen. Ward, who stood below them on the Effective List of the Corps at the dates of their retirement, and Col. Thomas Hore, retired full-pay, Royal Engineers, to be major-gen., in consequence of the promotion of Col. Stothard.

7th Regiment of Dragoon Guards—Ensign G. H. Bacchus, from the 12th Foot, to be cornet, vice O'Dowd, promoted.

18th Light Dragoons—E. Bacon, gent., to be cornet, without purchase, vice Liebert, promoted.

Military Train—A. R. Warren, gent., to be ensign, without purchase.

11th Regiment of Foot—Lieut. F. Armstrong to be captain, by purchase, vice A. Martin, who retires; Ensign G. Coote to be lieutenant, by purchase, vice Armstrong. The commission of Lieutenant F. W. Osborne, as adjutant, to bear date the 19th August, 1860, instead of 18th September, 1860, as stated in the *Gazette* of the latter date.

13th Foot—H. Hart, gent., to be ensign, without purchase, vice King, promoted.

14th Foot—Captain W. R. Russell, from the 58th Foot, to be captain, vice W. A. Dobie, who exchanges.

18th Foot—A. J. A. Jackson, gent., to be ensign, without purchase, vice Stevenson promoted; J. G. Butts, gent., to be ensign, without purchase, vice Nicholls, promoted.

NAVY.

PROMOTIONS.

LIEUTENANT to be COMMANDER on the Retired List.—John O'Reilly (1828), who entered the service in March, 1812.

ENGINEERS.—C. Bonwick, as Second Class Assistant Engineer to the Satellite.

APPOINTMENTS.

LIEUTENANTS.—Henry W. Mist to be flag lieutenant to Rear-Admiral R. F. Stopford, for temporary service; Sackville W. H. Thompson, to the Diadem; Hamilton Dunlop, to the Trafalgar; David Boyle, to the Centurion; W. H. Elton, to the Miranda; Cornwallis W. Martin, George R. Bell, J. W. O. Grady, E. B. Richards, R. F. Broadrick, J. H. M. Calcraft, W. F. Gregory, G. R. Keene, W. G. H. Morgan, G. M. F. Molesworth, T. D. Williams, and B. H. Thompson, to the Marlborough, additional, for disposal; John Brazier Creagh, to be additional of the Royal Albert; T. C. Cholmeley, and G. R. Bell, to the Hawke; W. W. Howell, to the Formidable; C. E. T. Woodman, to the Asa; A. J. Cheek, to the Centurion; A. Salway, to the Donegal; R. Chambers, to the Southampton.

MASTERS.—H. W. Inglis, to the Mersey; J. C. Solfield, additional, to the Indus.

SECRETARIES.—Arthur Jones, to Sir Houston Stewart; Henry Perry to Vice Admiral Johnstone; Charles A. Pritchard, to Admiral Stopord.

SURGEONS.—Lewis Carmichael Urquhart, M.D., to the Conqueror; John H. Carruthers, to the Formidable; J. Andrews, to the Valorous; E. H. Cree, to the Orion; D. J. Durgan, to the Mersey.

PAYMASTERS.—James C. Meagher to the Desperate; Edward C. Tuomine (additional) to the Cumberland; A. Allen, to the Industry; H. Pengelley, to the Atholl; C. P. Pielow (additional), to the Chesapeake; C. W. Milman, to the Doris.

SECOND MASTER.—S. S. Sugden, to the Quail.

ACTING ASSISTANT SURGEONS.—Robert Harding, to the Miranda; Wm. Johnston, to the Victory; C. H. Reason, to the Nile.

MASTER-ASSISTANTS.—John W. H. Allen, to the Mersey; Richard O. Jones and Arthur Douglas, to the Bacchante; W. Scriven, to the Himalaya; T. J. Morris, to the Miranda; T. G. Freeman, to the Dasher.

CHIEF ENGINEERS.—J. G. G. Dunn, to the Desperate; J. H. Bishop, to the Miranda. Second Class: Richard H. Jenkyn, to the Indus, for charge of the Charm. Third Class: Thomas Lewis, to the Cumberland, for charge of the Cochin; William Watson, to the Indus, as supernumerary.

ASSISTANT ENGINEERS.—First Class: W. Stacey, to the Mersey; John Snell, to the Asia, for service in the Blazer; James Ross, to the Indus, as supernumerary; Alexander McLeod, to the Curlew. Second Class: Thos. Edgar, to the Miranda; Thomas Brown, to the Colossus; H. A. Henri and H. Duncan, to the Desperate; John Singer, to the St. Jean d'Acre. Third Class: R. Oliver, to the Miranda; J. Daly, to the Desperate.

ACTING ASSISTANT ENGINEERS.—Second Class: J. McCool, to the Cornwallis, for the Fly. Third Class: J. Stocker, W. Rowley, E. H. Willey, T. Torkington, and G. Alexander, to the Indus, as supernumeraries; F. Holden, to the Desperate; G. F. Gossage, to the Miranda; A. Gillaudera, to the Donegal.

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

Suggestions for the insertion of information required by our subscribers will have due attention and acknowledgment.

The "LONDON AND CHINA TELEGRAPH" is published at 3 P.M. on the day of the delivery of the Mails in London.

Subscription, including postage, payable in advance, to the "Express," Nine dollars per annum; to the "Telegraph," Five dollars.

In answer to inquiries in reference to the transfer of the Straits Settlements, we find that no further steps can be taken in the matter until the return of the Duke of Newcastle, the Secretary of State for the Colonies.

R. T.—Captain Crockett, late of the steamer Chevy Chase, laid up at Hong Kong with damaged machinery, has taken command of the steamer Fiery Cross, vice Captain White, at present in England, we believe, on sick leave.

R. T.—In consequence of the intelligence received by the previous mail of the interference of Governor Edwardes, of Labuan, in the affairs of the Sarawak Government, it is the intention of Sir James Brooke to proceed to Sarawak by an early mail. It is also announced that Mr. St. John, the British Consul-General of Borneo, will proceed by the same mail.

The Court of Inquiry on the ship "Templeman," which vessel struck on a rock at Nagasaki, will appear in our next, as also a correspondent's letter from that port.

A REGISTER is kept of the addresses of all persons connected with the FAR EAST, and reference can be made to the same by personal application at the office or by letter. Passengers arriving by either Overland route or sailing vessels, in England or on the Continent, will oblige by forwarding their address for the information of inquiring friends.

Our OFFICES in this city have been REMOVED from 337, Strand, to 7, George-yard, Lombard street, E.C. Newspapers and literary communications should be addressed to the Editor. Correspondence relative to Advertisements, Subscriptions, and the general business of the Paper should be addressed to the Manager, and not to the Editor.

Correspondents and Newspaper Publishers in INDIA, CHINA, JAPAN and the EASTERN ARCHIPELAGO are requested to address all communications, newspapers, &c., via Marseilles, to the Editor, Box No. 70, General Post-office, London, E.C., which has been opened specially for the same.

Post-office orders should be made payable at the Lombard-street Office, to MORTIMER WRIGHT.

Any information required by Subscribers, in reference to Commercial or General matters in CHINA, JAPAN, SINGAPORE, and other parts of the FAR EAST, will be supplied on application at the Office, where files may be seen of the Journals published in those countries.

NOTICE TO SUBSCRIBERS.

The long and interesting letter of our Correspondent at the Peiho has compelled us to give the shortest notice possible of other events in China, Japan, and other parts of the Far East. We shall be happy to supply, on application, any information we may have omitted.

The London & China Telegraph.

LONDON, SATURDAY, NOVEMBER 3, 1866.

THE THIRD CHINA WAR.

THREE facts stand prominently forward in the accounts which have reached us of the military operations in China. First, the British Expedition appears to have been despatched in a creditable manner, and to be suitably provided. Secondly, the French are scarcely entitled to make the same boast, and thirdly, the Chinese are not so contemptible an enemy as it has been the fashion to depict them. On the first of these facts we may observe that it is matter for congratulation that the lesson taught us with such severity in the Crimea has not proved an unprofitable one. All accounts agree that *this time* there is no lack of necessities for our soldiers and sailors—that they are neither ill-clad nor half famished, that their shoes are not rotten, and that their powder is not damp—that their military chief is a man of undaunted courage, and, as we believe, of very considerable ability; that, in short, our authorities appear on this occasion to have done all in their power to ensure success, and we are giving no approval to a war which, from its commencement we have denounced as iniquitous in saying that of this we are heartily glad. Without referring to the desire, which, in common with all Englishmen, we feel to complete

the restoration of that military *prestige* which our recent successes in India have done something to re-establish, we believe that being engaged in this war, there is no alternative but to bring it to a speedy and successful issue, and we shall be more likely to attain this result by keeping steadily in view our own efficiency, than by counting on the weakness of the enemy.

It is not perhaps expedient at present to dwell on the second fact to which we have adverted—the condition of our gallant allies. That the joint expedition is altogether a mistake is now very widely acknowledged, and we by no means dissent from the general opinion. In confirmation of this opinion, however, we have just received the statement of the difference in the plans of attack between the English and French Generals. Sir Hope Grant, we are told, thought an attack upon the Northern Fort immediately before him practicable, and that its possession would ensure that of the others. General Moutauban doubted this, but eventually agreed to send his forces to the attack, protesting, however, against sharing the responsibility of the plan of operation. To Sir Hope Grant's steady adherence to his own view we may attribute the success of the attack. We pass on, however, to the third fact we have referred to—that the Chinese are not so despicable an enemy as we have been in the habit of representing them. The letter of our special correspondent at the seat of war in the last issue of *The London and China Telegraph* informed us of the safe landing of the troops, their occupation of three forts at Pehtang and of a skirmish with the Tartar cavalry, in which about fourteen of our men were wounded. This skirmish was not so unimportant as it has been deemed. An eye-witness, and a most competent judge, writes that "The general impression is that it would have been better had it not taken place, and that 'The French had their flank nearly turned by the Tartar Horse on the occasion alluded to.'" We do not now refer to these statements for the mere purpose of pointing out how fully succeeding events have corroborated the views of our able correspondent, but because we are anxious that the relative positions of the Chinese and ourselves should be clearly understood; and because, moreover, we feel considerable doubt whether the policy which is now being pursued is the safest and the best. We cannot read of "five hours hard fighting," and of "400 of the allies being killed and wounded," without feeling assured that *the enemy is learning how to fight*. We are disposed to think that, although we are, as doubtless we expected to be, the victors, the Chinese have nevertheless fought better than in our experience they have ever fought before. But what is the result? As our contemporary *The Times* has remarked in a leading article, which does not, we suspect, reflect the policy of their "special correspondent,"—"we are as we were." The Taku forts are taken, and the ambassadors are at Tien-tsin. We shall not refer in this place to the particulars of their campaign, but we know from the Parliamentary Return just issued, that that this "victory" has cost us nine and a-half millions in treasure, and, as we learn with regret from the accounts just received, a very considerable sacrifice of life. We are all deeply concerned that this expenditure of treasure and of blood may not prove altogether profitless, but that it will secure for us the benefits of extended commercial intercourse and the establishment of a sure and lasting peace.

All accounts seem to agree that there will be no more fighting—we wish we could believe that, because the war may be said to be over, peace is therefore re-established. But the question which naturally suggests itself is—Have the ambassadors pursued, under the circumstances, the wisest course? We learn that they were "to start shortly for Peking, 'with a cavalry escort,'" and, moreover, that "the Chinese Government had promised them an honourable reception." We doubt not that they will have an "honourable reception," but we await the result with no little anxiety. Taking the facts as they at present appear, we confess that we think a more formidable demonstration at Peking than this cavalry escort, would make a new treaty more effectual and a new peace more permanent. We shall be glad to find our opinion an erroneous one: we shall be glad indeed to learn that our diplomatists are able to finish the work which our soldiers and sailors have so well begun: but certainly, the immediate termination of this dispute is not desirable without some guarantee of a longer interval of peace than the last.

We cannot conclude these remarks without calling especial attention to the unheard-of bravery of the Chinese troops, and the exposure of our men to the fire of forts which should have been silenced before the scaling orders were given.

RISING OF THE DUTCH TROOPS—MILITARY REBEL- LION IN JAVA—DUTCH COLONIAL POLICY.

It is now no longer a secret that the short-sighted policy adopted by the Government of the Netherlands in engaging the scum of other countries for military service in the East India Colonies has not failed to produce most bitter fruits. It will be in the recollection of our readers, that when the different foreign legions were disbanded, at the close of the war last year, numerous recruiting parties were sent out from Holland in all directions, who succeeded with very little trouble in enlisting between three and four thousand of these literally foreign mercenaries, chiefly Belgians, Swiss, and Germans. A conspiracy to seize the frigate doing duty as guard-ship at Batavia, and several attempts at open mutiny perpetrated on board ship whilst on the passage out (which it has been the unfortunate duty of our correspondent at Amsterdam to mention in his letters, from time to time), did not fail to open the eyes of the Government to the egregious mistake they had made, and the penny-wise-and-pound-foolishness of the system, as it proved at once the danger of committing the safety of such extensive and valuable colonies as those of the Dutch in the East Indies to a set of rabble, who are, in point of fact, not nearly so far to be trusted as the native colonial troops raised on the spot. It is true that an alteration of the system has already been partly effected, and in some of our correspondent's latest letters we have recorded the fact that the recruits received at the East India Military Depot at Harderwyk had been drafted, for provisional service, into different home regiments stationed at the Helder and elsewhere, to learn their duty and become acquainted with discipline and the rules of the service, as well as to keep them under close *surveillance* before shipping them off to their ultimate destination, and to give the officers an opportunity to watch their conduct and gain an insight into their characters, severally and individually.

We regret to state, that from accounts we have received from the most unimpeachable sources, there is every reason to believe that the late mutinous revolt of the Swiss troops at Samarang was of a far more alarming and formidable nature than was at first anticipated, from the tenor of the short announcement received by last mail. It appears that the mutineers, who had selected the so-called Wurtemberg Barracks as their headquarters, and the centre of the conspiracy, defended themselves there successfully from nine o'clock in the evening of the 17th August till 3 o'clock on the following morning, attempting repeatedly to break through the cordon of troops, consisting of native soldiers (Amboynese) and the *Schuttery*, or burgher guard, that were posted round the barracks. It was only after a long and bloody engagement, in which nine of the mutineers were killed and fourteen severely wounded, that the Government forces, after bringing up their artillery and scattering a plentiful distribution of grape and canister, were enabled to obtain the mastery and suppress the further extension of the rebellion.

As a matter of course and as a necessary precaution, the Indian Government immediately suspended the ordinary civil laws and proclaimed the introduction of martial law; a drum-head court-martial was appointed, thirty-five of the ringleaders were found guilty and hanged within an hour of receiving their sentence of death. Most providentially, the authorities became acquainted, in time to neutralise the result, with the intentions of the mutineers, by means of intercepted letters, which led to the discovery of a widely-spread conspiracy, which was to have broken out simultaneously at Djocjokarta, Ambavawa, and Sourabaya. In the latter city the preconcerted signal for the outbreak was the explosion of the powder magazine.

We are enabled to lay before our readers the following translation of a private letter from a Dutch official of rank, which contains further particulars of this mutiny:—

"You are aware that the majority of the foreign troops lately arrived in this island from home were the Swiss who were formerly in the Papal service and disbanded after the affair of Perugia last year, as well as some of those who had been in the pay of the King of Naples. Although it is not known what grounds they had for being discontented with their position, certain it is that a widely extended conspiracy was formed, with ramifications even to some of the native chieftains. It was settled that the outbreak should take place at the same day (18th August) at Samarang, Ambavawa, Sourabaya, and Djocjokarta, whilst the natives should suddenly attack the Dutch at Amont Bay. It appears that a Swiss soldier, who there is reason to believe was at the head of the conspiracy, sent a telegram to another Swiss soldier at Ambavawa, containing the words 'at twelve o'clock.' The telegraph official who received it, being struck with the singularity of such a communication from one private soldier to another, very naturally became suspicious, and, instead of forwarding it to its destination, sent it to the military

commandant, who quietly took steps to ascertain the meaning, and obtained information from Sergeant Heenan of such a startling nature that he immediately had the barracks surrounded by his troops, and sent off three regiments to Ambavawa. At Samarang the mutineers were soon overpowered, with the loss of many killed and wounded; but at Ambavawa there was more serious fighting, the Swiss having barricaded their barracks, where they defended themselves till all their ammunition was expended, by which many innocent people who were passing by at the time were unfortunately killed. Most of the Dutch inhabitants took their hasty departure with their wives and families and what valuables they could save in the hurry of the moment. When the mutineers had no more ammunition left they were obliged to surrender, and were allowed to come out two at a time under due military precautions, it being intimated to them that should more than two come out at one time they would be fired upon, which in several instances was actually done. Military law is proclaimed in all the garrisons; a court-martial summoned on the spot sentenced thirty-five unfortunates to death, and they were immediately hung up on the surrounding trees in the presence of their late accomplices. Measures are now being actively taken by the authorities to ascertain to what an extent the conspiracy had been carried to the natives, and what chieftains were compromised."

REBELLION IN CHINA.

(Continued from our last.)

MR. HENRY MARSHALL, the United States Commissioner, &c., to China, arrived in Hong Kong on the 16th January, 1853, charged with a letter from the President to the Emperor of China, of which he duly informed the Chinese Commissioner Pih, and requested at the same time that the latter would, at an early date, name a suitable and proper place for a personal interview. To this the Chinese Commissioners Yeh and Pih on the 3rd February replied, congratulating Mr. Marshall on his appointment; the more so as they had heard that the honourable gentleman was mild and even-tempered, just and upright. But, although desirous of a mutual interview, the Commissioners of the Tah-sing empire are, on account of other engagements and pressure of business, prevented from naming a felicitous day for a pleasant interview; at which Mr. Marshall felt great mortification, and determined not to lower his pride as an American, he resolved to proceed to Nanking to deliver his letter, which, however, he was prevented from doing immediately on account of "certain circumstances," which, in short, was the refusal of a vessel by the United States Commodore, who reserved, as also did his successor, for himself the right to judge if it would be for the public interest to comply with his Excellency's demand for a national vessel to convey him—a proceeding which happens also between other naval and civil authorities, and may result in the former assuming the functions of the latter, and concluding treaties or conventions which are worse than useless.

His Excellency Mr. Marshall, however, obtained at last the services of a vessel, and arrived at Shanghai in the United States steamer *Susquehanna*, on the 27th March, 1853, where he found the trade completely paralysed on account of the proximity of the rebels. He resolves to be guided by circumstances, and says,—“I now entertain a sanguine hope that, by judicious action, I shall succeed in procuring the consent of the Emperor to receive me at Peking.”

In his Despatch No. 13 (No. 12 has been lost with the steamer *Lauriston*, and its contents are not known, except so far as alluded to in this and subsequent despatches), the gallant Commissioner reports the proceedings of the *Hermes* up the Yang-tse-kiang an accomplishment which as he essayed in vain to perform with the steamer *Susquehanna*. He says:—“We were, however, not prepared to learn that Sir George Bonham had pursued the course I (Mr. Marshall) advised in a conversation with him, which is detailed in my last despatch (No. 12), though then he seemed to avoid it.”

In his Despatch No. 16 he forwards translations and notes of pamphlets and other papers issued by the rebels, and remarks thereon. The translations are worth perusal, and would be curious as republications. I send also a synopsis by the Rev. M. C. Culbertson, who supplies Dr. Parker's place during his absence.

“Very enthusiastic missionaries behold, in the doctrines avowed by the rebels, persuasive evidence that the moral bread which was cast upon these waters in bygone time is now returning after many days. They hail these declarations of religious belief as the aurora of a more enlightened civilization in China, and they believe that these papers afford convincing proof of the diffusion of a correct knowledge of the benign precepts of Christianity. The rebels avow their belief in one God who rules the universe; they accept, it appears, the statements of Genesis on the creation, but not more than Mahomet do they accept the Christian plan of salvation. They propitiate the Deity by sacrifices and by offerings in the temples; they permit polygamy; they are fanatical when their new religion is in question; the Christian sabbath is their day of rest; their king asserts his adoption by Deity, and proclaims by ‘authority’ the mandates of Heaven; he adopts the plan of Mahomet to inspire his followers with courage, and according to report,

with equal success. Their temporal code does not reflect any credit upon the discrimination of the new rulers, for it denounces death as the penalty equally for looking upon the empress or princess and for cutting the throat of a neighbour! I incline very much to believe that a cold and crafty agitator has revamped the matter contained in the religious tracts which, from time to time, the missionaries have published in China, and, without any exact idea of the nature of the new doctrine, has drawn around his standard of revolt the discontented spirits as well as the desperate of the provinces through which it has passed. The commentaries upon the commandments, for instance, must strike you as exceedingly absurd. How "opium smoking" can be considered a breach of the 7th commandment, passes comprehension. Could the rebels enforce the construction, they might well be hailed as the saviours of China, and would be entitled to the thanks of the United States, whose commerce with China is taxed in the prices of teas and silks to pay India for the poisonous drugs.

"I confess that I cannot anticipate any very salutary change from the success of these rebels, for the form and etiquette and spirit of exclusiveness which characterise the existing government seem to be retained, with a few unessential modifications. It may, however, be safely calculated that *this* is but the *initiative* of a revolution which, after successive efforts, will effect a great change in the condition of China, and will sweep away the ridiculous forms as well as the hoary vices of the despotism which for centuries has weighed China below her proper level in the family of nations.

"Whether it shall prove to be for good or for evil, the rebellion must thus far be regarded as a successful effort against the existing Government. How the dynasty will hold power remains to be seen; for, by the latest advices from the province of Kwang-si, a new rebellion against the government has appeared in great force, at the head of which movement are idolaters who condemn the religious fanaticism of the sect which possesses Nankin. The imperial government is almost powerless; its energies were soon exhausted; indeed, it possesses none of the elements of national strength, or if it had any, there was a gross deficiency of knowledge how to use them."

In a subsequent despatch, No. 17, of 30th May, he says:—

"The revolution promises a more rapid development than I anticipated in my last despatch. Scarcely is one phase perceived clearly before it is lost again in the movement which is hurrying China to a complete social and political disorganisation. I shall not be surprised to behold on this theatre within a twelvemonth a re-enactment of the worst scenes of the French revolution, or of those which characterised the dissolution of the Roman empire. Already one of the five open ports has fallen into the hands of the rebels. Amoy was taken on the 19th instant, and now is in possession and control of the insurgent chief who entered it; but it seems he is independent of the chief at Nankin, and disclaims all connection with him. The vice-consul at Hong Kong informs me that 'differences of opinion as to the form of Government to be established existed among those of the society who had charge of the funds intended for its expenses, and this uncertainty had resulted in the defection of some of the chiefs with their immediate commands, who had withdrawn from the body to the number of fifteen hundred men.'

"At Changchow, after taking the place, the rebels quarrelled with the inhabitants, and, before peace was restored, some eighteen hundred rebels were killed.

"At Tangwa, the inhabitants, after turning out the Mandarins, refused to admit the rebels, and proposed making it an independent town.

"These extracts from my private correspondence will prove to you the condition of the south. In a word—in my opinion, the fact is, that this ancient empire now disintegrates, and that the political edifice will fall from the absolute want of all the elements of strength, leaving this people a prey to every species of social disorder before quiet and good government can be restored. In all human probability, the Manchoo rulers will not again attempt, after this summer, to pass the Yellow River. The valley of the Yangtze Kiang, the Min, and the Hoangho, may fall to the Government at Nankin; while the southern and western parts of the empire may pass into other hands, in the subdivision of the lands and population that now constitute the Ta Tsing empire. These are matters, however, for speculation; my immediate purpose is to present to your consideration the facts existing, and without embellishment.

"Permit me to call the attention of the President to facts which are transpiring here, and upon which I should be glad to receive some general instructions to guide my course. American citizens in China have been induced, by promise of high pay, to assume commands in the Chinese naval and military services, and are now engaged against the rebels. These are very much irritated at the appearance of 'foreigners' in league with the Manchoes, and have offered a reward of \$2,000 for the head of a foreigner taken in the service of the reigning Emperor. Moreover, they cannot distinguish between foreigners, but regard all western people as forming a single class of 'barbarians.' Hence the enmity excited by the acts of a few operates against all, and jeopardises the lives and property of all. The American citizen who joins the rebel army would find death denounced as the penalty for his crime by the treaty. He places himself beyond the protection of his own country, voluntarily, when he enters the service of the Emperor to fight against the rebels. But shall he be permitted thus to throw off and resume his citizenship at pleasure, when the changes he makes to so great a degree involve the security of others? Again: it is the practice to acknowledge a government *de facto*, but shall the rebels in Amoy collect duties from American imports, while the government keeps in that port, and in all the open ports of the empire, consuls and a commissioner accredited to the reigning Emperor? The President will perceive that I may be called on at any time to decide between these parties on a question of duties. Should a detachment occupy the Custom-house in Shanghai, and demand the payment of duties to them, forcibly expelling the Custom-house officer, but not disturbing the governor of the province, or any of the provincial authorities who are engaged in the administration of the laws generally: should such an occupancy and such a demand be regarded as sufficient to authorise the payment of the duties to the rebels? It seems to me such a recognition of their right would be an indignity to the Emperor; yet the failure to pay might involve our commerce in disaster, and open difficult issues with the rebels. I throw out these suggestions to invite a general line of instructions from the department, so that I may regulate my course of action by the wishes of the President. While I am honoured with this mission it shall be my study to carry out the views of the department, and, in the absence of

instructions, to act according to the knowledge I possess, with an eye directed singly to the honour and good of my country.

"I enclose herewith extracts from a correspondence to which access has been kindly given, that you may have a more distinct view of the affair at Amoy than you will obtain, probably, from any other source.

"Should China separate into different kingdoms or free cities, the United States will be directly called upon to take position in regard to them. Now, I venture to suggest that a large margin shall be left to the Commissioner to act in that matter promptly, so as to secure commercial advantages.

"It may well be that the new government at Nankin, upon the withdrawal of the imperialist army from its present position, in order to add security to the throne, and to impress the people of China with the consistency, order, and solidity the new dynasty has already acquired, may be solicitous to form treaties of amity and commerce with western powers; to invite foreign ministers to reside near his court; to proclaim religious toleration within his realm, and certain securities to personal rights; to open additional ports of entry, and to throw open the navigation of the Yangtze Kiang. These points he may well agree to yield for the acknowledgment of his throne by western powers, since the moral influence such an act on their part would exert over the Chinese mind would effectually prevent further efforts by the Manchoes to regain the southern country, and might arrest a long career of misrule, anarchy, and the spilling of blood.

"There is another consideration which may well be suggested in this connection. The British minister has been to Nankin. His interpreter has revisited it since the departure of Sir George Bonham for Hong Kong. He goes to find out 'what the rebels are about,' and his intercourse with their camp and their princes has served to awaken in his bosom the warmest sympathy in their cause! The long articles in late numbers of the *North China Herald* (which I send you) are attributed to Mr. Meadows's pen. His position in the legation of Great Britain, his fluency in speaking and writing the Chinese language, lend every opportunity of assuming the protectorate of the young power to Great Britain, at least so far as to mould its first steps to suit the policy of that government. The vigilance of England will be nothing strange to communicate to the Secretary of State. The apprehension I have is, that Great Britain may obtain the opening of a western Chinese port (inland) from the new Emperor at Nankin, and the right to navigate the Yangtze Kiang closed from foreign commerce beyond the existing port of entry. I do not doubt that with that view her war with Burmah has been waged and her Indian empire extended. The portage from the Irawaddy to the Yangtze Kiang is very short. I suggest these considerations to you frankly, because they seem to me to point out the propriety of preparation to assume the part the United States may find it politic to take in face of an event now so likely as the dismemberment of this empire.

"N.B.—I have ascertained, from undoubted authority, that Sir George Bonham did receive at Nankin, from the high ministers of the new Emperor (the rebel chief), an imperial letter, which treated of the navigation of the Yangtze, expressed great good will towards western nations, and alluded to the willingness of the taipingwan to establish the most liberal commercial intercourse. Sir George Bonham never dropped even a hint to me of any such transaction, and doubtless has communicated it only to her Majesty's Government. My present knowledge is, beyond doubt, true; and it will serve to prove to you how essential it is that I shall have the means of moving from point to point. I hear from Captain Fishbourne, of the *Hermes*, that the rebels at Amoy do acknowledge allegiance to the chief at Nankin, and form part of the same combination.

"The news at Canton when the *Hermes* left was, that a body of fifty thousand rebels was organised to march on Canton. The British merchants at Canton had applied to Sir George Bonham to put British troops in the foreign hong. I have heard, also, this evening, that a detachment of four thousand rebels has lately left Nankin, and it is supposed they are marching on this section. This city is the military key of the whole country, and if it was in the hands of him at Nankin, the city of Peking would begin to suffer without much time lost. Events are crowding on each other at a wonderful rate, and the future of China breaks upon us with the deepest interest."

It is desirable to point out that the Catholics at Nankin suffered much at the sacking of that city in 1853, and it is probably owing to this that the French are so opposed to the progress of the rebels.

(To be continued.)

TRIALS OF THE OVERLAND ROUTE.—The intense heat of the Red Sea passage, which many of our readers will doubtless vividly recall, appears from late accounts to have been even more oppressive than usual. Sixteen of the passengers by the P. and O. steamer *Colombo* were so prostrated by the heat, that for some time they were not expected to survive; and, in consequence of the intense heat, three deaths actually occurred, viz., General McCrohon, Captain-General of the Philippines; Mr. J. McLaren, managing agent of the Libuan Coal Company; and a young lady whose name has not reached us. The body of General McCrohon was preserved in spirits and sent on shore at Aden, together with the members of his family, who purposed returning to Spain. Captain Dunn, of the *Colombo*, did all in his power to relieve the sufferings of the passengers by laying the ship for some time broadside to the light north wind, by which means the breeze was enabled to make its way through the open ports and cool the heated cabins and saloons. We are glad to learn that the company intend to provide ventilating fanners, worked by the engine, for the purpose of forcing a stream of cool air through the saloons and cabins below, in the hope of mitigating the sufferings and inconveniences of the Red Sea passage.

COST OF THE CHINA WAR.—A Parliamentary return delivered yesterday, shows the amount of grants made by estimates submitted to Parliament in the late session to meet the expenses of hostilities in China to be £4,206,104; the additions (as nearly as the same can be calculated) made to the army and navy estimates of the current year, on account of the contemplated operations—army, £431,320; navy, £680,600; votes to cover deficiencies in the estimates of last year, arising from the expense of preparing for these operations, £350,000; and votes of credit, £3,356,104; total, £9,524,128.

STATE DIPLOMACY OBSTRUCTING COMMERCE.

UNDER the above truthful heading, in reference to the present chief of our Foreign-office and his principal subordinates, the *Liverpool Daily Times*, of the 22nd inst., gives its readers an able and very instructive leading article in favour of the projected opening of the western half of China to commerce, from the port of Rangoon across Eastern Pegu. We regret that we cannot give space to the entire article, and that we are obliged to limit ourselves to the following paragraphs:—

"We have frequently attempted to point out the great advantages which may be expected to ensue from the adoption of the project for opening up intercourse with Western China, by means of a direct trade between Rangoon and Bamok. The proposal has been advocated for many years by Captain Sprye and his son, and lately by Captain Sherard Osborn. Our influential contemporary the *Times* also recently devoted a leader to a powerful argument in favour of the immediate prosecution of so grand an idea. As usual, the great obstacle in the way of securing a fair trial for this new route for our commerce in the East has been found in the ignorance of Government officials, and their shameful indisposition to take action in behalf of any movement that would disturb the antiquated routine of the Circumlocution-office. The subject, however, is gradually attracting greater attention, and the more it is discussed the likelier it seems to secure the approbation of those whose concurrence and support are all that is required to bring about for it at least a fair trial. The *London and China Telegraph* reviews the objections to the project as these have been stated, by a commercial authority of some standing, in a letter to the *Times*, under the signature of 'J. C.'"

It is clearly insufferable that a Government department, little capable of forming a correct opinion on a great commercial question, should be allowed much longer to act as an obstruction to the extension and development of so important a part of our trade.

ADMIRAL KEPPEL AND SIR GEORGE GREY.

THE following article on the late unseemly affair on board the *Forte*, alluded to in our issue of the 10th September, is from the *Army and Navy Gazette*. We may add that if the Admiralty cannot take notice of such private affairs they can at all events visit the offender in this case with a recall by his neglect of a proper respect to Her Majesty. Admiral Keppel, as the Admiral of the station, should have received his Royal Highness Prince Alfred, and not have sent his Flag Captain to perform that office, and we have reason to believe that this is the view which will obtain at the Admiralty:—

"It gives us unaffected pain to allude to a subject painful enough in its nature, because it affects the reputation of a distinguished officer whose gallantry had made him a man of mark in the profession, and whose social qualities had secured for him the regards of many friends. But it would be a dereliction of duty to be silent in reference to that subject, because it is painful to the feelings of individuals to speak of it. If the story be untrue or exaggerated, it will put a stop to a gross public scandal everywhere spoken of, if the slanderers are refuted. We have recently heard a great deal of the New Articles of War and Naval Discipline Act of 1860. They are to work wonders in her Majesty's ships, when they come into operation on the 1st of April. We have been obliged to enter so many 'blackguards' from the shore, while the quarter-deck law was so gentle and gentlemanly, and flogging was so disliked by the public, that it became absolutely necessary to do something to restore good order, and stem the tide of laxity in the fleet—to raise the morale of the common sailor to the level of the tone which distinguishes the officers in her Majesty's service. That this high tone was endeavoured to be kept up we see from the awards of courts-martial from time to time, sentencing a few exceptional officers to reprimand, degradation, or dismissal from the service, for drunkenness, and other minor immoralities, 'unbecoming the character of officers and gentlemen.' With officers of high character to carry out the new code, the naval service must be greatly benefited. The following is one of the clauses in the Naval Discipline Act of 1860, to which we have not thought it necessary previously to advert:—'All persons subject to this Act who are guilty of profane oaths, cursings, execrations, drunkenness, uncleanness, or other scandalous actions, in derogation of God's honour and corruption of good manners, shall be dismissed from her Majesty's service, or suffer such other punishment as is hereinafter mentioned.' Perhaps those who have lately read in the newspapers that Rear-Admiral the Honourable Sir Henry Keppel, K.C.B., who was appointed commander-in-chief at the Cape of Good Hope only some six months ago, is already about to be recalled, or transferred, rather according to other accounts, to another command, may imagine that till the 1st of April next there is no law under which a scandalous action, in corruption of good manners, in violation of the laws of hospitality and of social honour, attributed in clubs and in the streets to that very distinguished officer, can be adequately punished. But this is a mistake. The above clause of the Duke of Somerset's Naval Discipline Act exists *verbatim* in the old Acts of Parliament, which are still in force. If the gross delinquency to which we now publicly refer (as the details are in everybody's mouth) really took place, and is allowed to remain as a stigma on the pennants of England, it must be remembered that it is not because the Board of Admiralty are unable to do otherwise. This is not a case in which it may be said, 'Oh, we cannot take into consideration a man's private character, while he does his public duty faithfully.' Even this doctrine is very questionable, when private character becomes well known. With so long a list of unemployed flag officers, even private character might be regarded, at least as much as private connections, or titles, or political influence, as a motive for selection. But we waive these considerations for the present, because they do not apply. The offence we speak of was not private. It was perpetrated, it is true, against the private honour of an English gen-

tleman, who had the misfortune in a public capacity to be the guest of—we shall not shrink from saying, on the hypothesis that the charge is well-founded—a dishonourable British admiral; but as the relative position in which the two parties were placed arose out of their official and public status, we must claim on behalf of the governors of our colonies, of our ambassadors, and other functionaries, who, in the course of their public duties, are liable to be placed in similar positions as the guests of naval officers in vessels carrying the flag of England, protection against such wrongs as occurred on board the *Forte*. Besides, the offence was public in another sense. It was coarsely committed; and it is almost to be regretted that the interference of the officers of the ship prevented that summary vengeance, which even the law allows, when the greatest injury a man can suffer is inflicted before his eyes. If drunkenness and scandalous actions be proper grounds for dismissal from the service, as we occasionally see they are regarded in the case of subordinate officers, what shall we say of a man in the highest position who cannot, or will not, observe even decency in regard to time, or place, or person, in the gratification of his passions? The press is often eloquent on the subject of the law's inequality as regards the rich and poor, when mere fines are occasionally awarded for gross offences. We beg to assure the authorities that we should be regarded by the service at large—by those in whose hands the honour of their country, as well as of their neighbours' wives is safe—as very cravens, if we shrunk on the present occasion from demanding the same impartial enforcement of the laws for the discipline and good government of the navy, against an offender of rank as against subordinate officers or common seamen. The public remember some years since the scandal occasioned by the discovery of immoral practices in one or two convict ships. We blush to think the conduct of a Rear-Admiral on board her Majesty's flag-ship *Forte* has recalled such scandals to mind. The stain must be wiped out. The honourable K.C.B. must be replaced by a man of honour. If the same offence had been notoriously committed, and brought home to a common sailor against a messmate, he would have been discharged to the shore in disgrace, with the corner of his certificate (which is, as it were, his decoration) cut off."

THE BISHOP OF VICTORIA.

THE Bishop of Victoria has arrived in London from New York. His lordship sailed from the Bay of Yedo last June, and accomplished the voyage from Japan to England (exclusive of eight days spent in San Francisco, and about six weeks in the United States) in seventy days, by the isthmus of Panama. He purposes returning to China at the close of next summer. During his stay in these places his lordship was not unoccupied. The letter written by him to Judge McAllister, at San Francisco, will be in the recollection of most of our readers. We can but hope that his able advocacy of the cause of the Chinese in the State of California may not prove ineffectual. Next we hear of his lordship in New York, where he preached at the St. George's Episcopal Church. His discourse is described by the New York papers as a most able and eloquent one, in which he dwelt at considerable length on the missionary labours in China and Japan. "He reminded his congregation that the Word of God had not gone out in vain, and that at the present time there were about 2,000 baptized Chinese converts as the fruit of their labour. This was but a small number; but when viewed as the first drop of the full shower, when God shall pour out His spirit on all flesh, it was one for which they might thank God and take courage." His lordship attended at the annual convention of the New York Diocese, assembled in that city under the presidency of Bishop Potter. He related in the address which he delivered on this occasion some interesting facts relating to his exploratory visit of ten weeks to the newly-opened cities of Japan, from which country he had lately returned across the Pacific, by way of California, to the United States. He had spent five weeks in the Buddhist-temple residence of their zealous missionary, the Rev. C. M. Williams, in the city of Nagasaki. He had in the course of his wanderings spent eight days in the capital city of Yedo. Japan was in many respects a highly-favoured land. Possessing a fertile soil, the most picturesque scenery, an industrious population, and an abundant variety of material blessings lavished in richest profusion upon that favoured country by the Almighty dispenser of good, she contained within her own borders everything necessary to human subsistence and the comforts of life, and was independent of foreign products and the luxuries of European lands. Hence it arose that the Government of Japan was not very desirous of an extended intercourse with foreign nations. The fear of revolution, the remembrance of civil wars, the disastrous history of intestine troubles caused by former European intercourse and especially in connection with the Roman Catholic mission in Japan, all combined in producing a wide-spread jealousy and prejudice in the governing class, and their desire to reduce to the lowest possible amount the privileges and opportunities of access conceded to foreigners.

SIR JOHN BOWRING.

In a speech at Exeter Sir John introduced the subject of the Ballot. *The Times*, in noticing this, says:—

"Sir John Bowring reappears among his countrymen as a political Rip Van Winkle. It is now a good many years since he fell asleep to English electioneering and review writing, and was wafted away to Hong Kong to dream of inculcating on the largest population of the globe the sublime principles which he studied in his dogmatic youth. He now awakes again in England, and seems to fancy the patriots of the *National* installed at the Luxembourg, and our own Chartists shouting for the five points. The "Philosophic Radicals," to whom Sir John Bowring boasts of having belonged, were a race whose achievements fall very far short of their pretensions or even of their reputation. They were looked upon by well-meaning people of thirty years ago with a mixture of dislike, fear, and admiration, which, to our thinking, were quite undeserved. We need not enter for the hundredth time on a discussion of the Ballot; it will be time when the subject is again brought seriously before the country. Probably by that time one or two of the Philosophical Radicals may themselves be wavering in the faith. Sir John Bowring himself is, to judge from his speech, much more Conservative than he was ten or twelve years ago; and the only man of genius of the school, Mr. Mill, has in these latter days gone so far in his dread of democracy as to have given his adhesion to a system of electing members of Parliament which is worthy of Laputa. These changes have arisen from a larger study of his kind on a closer observation of passing events, and though we may despair of a man, who, after being a politician for so many years, can talk such nonsense as that 'juries in our civil and criminal courts gave their verdicts while keeping secret their individual opinions, which they are bound by oath not to divulge,' still we can imagine that the knowledge of our situation and the survey of facts will have some effect even on the mind of Sir John Bowring."

Sir John Bowring wrote, in reply to this, to the editor:—

"Sir,—As in your leading article of the 13th inst. you accuse me of 'talking nonsense,' in having stated that 'in our civil and criminal courts juries are bound by oath not to divulge their individual opinions,' I beg to assure you that I made no such statement. My avowal was, that in courts-martial secret voting was specially provided for, and that the individual opinions of jurymen were protected by the habit of secrecy. You state that 'no man of genius' belonged to the 'Westminster Review School,' with the exception of Mr. Mill (John Stuart). May I remind you that among the early contributors to that *Review*, while under my editorship, were James Mill, John and Charles Austin, George Grote, T. L. Peacock, W. J. Fox, W. Tooke, J. A. Roebuck, Charles Barker, Henry Southern, Southwood Smith, Edwin Chadwick, Albany Fonblanque, Leigh Hunt, John Black, William Ellis, Dr. McCulloch, J. C. Hobbhouse, General Thompson, and a host of other men, to whom, if you will not award the honours of 'genius,' you may admit they have at all events obtained literary and political distinction. I need not mention Jeremy Bentham, except to add that on one occasion Talleyrand said to me, 'I have known many of the remarkable men of my day, but as a man of genius, Jeremy Bentham eclipsed them all.'"

Spirit of the Press.

THE CAMPAIGN IN CHINA.

After long delays the allied forces were, towards the close of last summer, ready for action. The first intention was that the troops of the two nations should act separately, but either jealousy, or the means adopted to obviate it, determined that the campaign should be conducted by a combined force. On the 1st of August they reached the mouth of the Peiho river, and were informed by the inhabitants that the North and South forts were evacuated. The Allies accordingly landed at Peh-tang, and found that, in fact, no preparation had been made to oppose them. On the 12th a battle took place, which is described as nothing more than a skirmish of cavalry. The enemy was defeated, and an attack on the Taku Forts was in prospect. This enterprise was to be carried into effect on the 15th of August. To the great mass of our readers the telegraphic intelligence will probably convey no very definite notion of what is pending. It may be said, then, that the forts first spoken of are at the mouth of the Peiho, and that the Taku Forts lie a few miles up the river, and form, probably, the first of the series of defences which protect Peking, lying some 150 miles inland. In such a war as this it would be idle to speculate as to the chances of success in action against the enemy. That the Imperial troops will be defeated and dispersed whenever they venture to face the Europeans is a matter of course, and unless climate, or the nature of the country, or discussions between the Commanders of the two armies, or the unexpected accidents of war intervene, it is certain that within a very short time of the attack on the forts of Taku the Anglo-French forces ought to be under the walls of Peking. Such an event we can hardly picture to ourselves. It will be, perhaps, the most singular conquest, even in this age of revolutions. The celestial nation, so long divided from the rest of the world, the admiration of some, and the laughing-stock of others, is now evidently about to lose its isolation, and consequently its distinctive character. The coming invasion of the European race has cast its shadow before it. Rebellion, disorder, and ruin have already gained the mastery in the Chinese Empire. The Tae-pings have prepared the way for the dissolution of this old and exclusive monarchy, and for the supremacy of foreign civilization. If a Chinese campaign at all resemble those of Europe, a few days may bring the allied forces to the capital. But it is possible that they may then find that they have at their mercy an Emperor without authority, and a Government which commands little more than the neighbourhood of Peking. The perturbations which have affected Europe during the last thirty years have been felt to the extremities of the globe. It is a general remark that the "unchangeable East" no more deserves its name, and this breaking up of all Asiatic communities has extended itself to China in a most singular manner. In Mahomedan countries there is a dread of Christian Europe, and the people are affected unwillingly by the superior influence of their stronger, more active, and more civilised neighbours. It cannot be said that in the Turkish or Persian Empire, or in India, the Chris-

tian doctrines or the manners of Christendom have met with much sympathy. We owe all to the dread which the natives have of our strength and courage. They reverence the God of the Christians as the God of battles, who has always given the victory to His votaries. But the precepts, and still more the history, of the Christian religion have been treated by these races with invincible indifference and dislike. Strangely different has been the case with the Chinese. Certainly neither ourselves nor our missionaries have any reason to be proud of the result of so many years of labour, but still it is the case that this vast monarchy is now being broken up by a sect which pretends to take its teachings from our sacred books, and the doctrines of ministers of the Gospel. For years the rebellion has gone on. At first the Tae-pings gained advantages which made their name known throughout the world, and caused weak persons in every Christian country to believe that a great work was being done in the Eastern hemisphere. Then the tide turned in favour of the Imperial forces. The rebels were defeated again and again, and it may have been under the influence of these successes that the Court of Peking gathered confidence to defy the Western Powers. If so, the triumph has been short. Within the last few months the successes of the Tae-pings have been such as to endanger the very existence of the empire, and their last act surpasses in audacity anything that has been told of their mysterious fraternity. The latest news from China, later even than the news of the Anglo-French success of the 12th, is the account of the attack on Shanghai by the Tae-pings, made on the 18th of August. Shanghai is to Europeans by far the most important place in the Chinese Empire. The trade which in the old days was confined to Canton has now flowed Northward, and Shanghai, near the mouth of the great river of China, the Yang-tse-kiang, has every year obtained a large portion of the traffic between the empire and the outer world. Here the two great staples of tea and silk are traded for by nearly every European nation, as well as by the merchants of the United States, and the city, which is rapidly increasing in wealth and prosperity, may be said to be as valuable to foreigners as to the Chinese. This great mart of the world's commerce was on the 18th of August attacked by the rebels, or, as from their number and their successes they may be called, the revolutionary forces. We are told that previously the town of Nan-Tsin, in the silk district, had been attacked, and the success of the Tae-pings had encouraged them to attempt the capture of the first port of the empire. The forces attacked the south gate of Shanghai, but were repulsed by the French; only temporarily, however, for at the departure of the mail their forces had again gathered about the town, and an attack might be daily expected. It need not be said that this imminent danger had entirely put a stop to all business in the threatened town. Perhaps the next mail may inform us that the communication between Shanghai and the rest of the country has been cut off, the transport of goods from the coast interrupted, and the trade of all the northern ports for a time abandoned. It is certainly a singular thing that while European nations are advancing from the sea-coast on the capital, an internal rebellion should aid them by extending its ravages from the inland provinces to the sea. No one, indeed, can doubt that the whole system of Chinese government is rotten, and about to pass away. It has lasted all these ages because no other element has been introduced to disturb it. No sooner have European ideas come into contact with the Chinese than the brittle old fabric has been shattered like one of their own vases. The speedy downfall or transformation of the monarchy is evidently at hand. Whether the English and French authorities make common cause with the Taipings or not, they cannot help co-operating with them so far as to insure the submission and humiliation of the Court of Peking. Our conduct between the two rival factions must be guided by circumstances. It seems absurd to say that while we are at war with the Tartar Emperor we should protect him from his domestic enemies, yet there can be no doubt that we have a right, and, in fact, are bound to defend the cities with which we trade from all enemies. Our wars are carried on, not for the purpose of siding with either party to defeat the other, but for the liberty of peaceful intercourse with the people, whatever rulers may be installed in the seat of government. We make war against the Emperor because he is the *de facto* representative of the Chinese State; we shall make a treaty with him because we find him in the palace of Peking. Should the Tae-pings get the upper hand, they must be content to carry out the stipulations of the treaty, or we shall quarrel with them a'so. In the meantime, we trust we shall remain neutral in the civil war so long as the rebels refrain from attacking the places which contain the persons and properties of British subjects.—*The Times*.

THE DRIFT OF OUR CHINESE POLICY.

The more we hear of the progress of events in China, the more confident we feel of the conclusion which we stated in these columns many months ago, that we shall have to choose between a complete change of policy and a career of territorial encroachments such as that which has founded our empire in India. This is a tremendous alternative, but it scarcely requires more than the most ordinary sagacity to see that it is fast becoming the only practical alternative for England. Even *The Times*, which has been by far the most powerful advocate of the aggressive policy, is forced to admit that all the fatal consequences to the central authority of the Chinese Empire which were predicted as likely to result from an attack on Peking by the Western Powers are now actually ensuing, and that, in fact, the fruit of our expedition must be the imposition upon us of all kinds of new responsibilities, both in relation to the Emperor of China and to his rebellious subjects. On the one hand, the duty of defending Shanghai, which has been already attacked, and the other coast towns where British commerce is concentrated, against the victorious rebels, is impressed upon us by *The Times*;—on the other, it is admitted that our invasion has just given the impulse which has turned the scale against the Chinese Government, and that but for us the revolutionary forces might not have gained head. We are now, then, placed under the double obligation of defending ourselves against the Emperor's enemies, and overpowering the Emperor himself. In what can this end, except some assumption of power on the part of England and France to put an arbitrary termination to the civil war in China as being inconsistent with our foreign trade? Nor can it terminate in any other way unless the whole policy recently pursued by England in China be reversed. It seems to us, therefore, that the policy on which we are now fairly embarked in China can lead to no good result. We have either done far too

much already, or we are quite blind to the magnitude of what we are about. If it was our object to keep our relations with China as distant as is consistent with friendly commercial relations, we ought to have endured much rather than embarrass and paralyze the Central Government. If, on the other hand, it is our object to spare no pains to open up the country to European enterprises, then nothing short of our present attitude would have been efficient; but then, also, we cannot stop here. We must be prepared to take every step that is needful to maintain and deepen the impression we have made—to win and keep a constant influence over the regular action of the Government. Nor can we do this in any divided Oriental country, full of misgovernment and the result of misgovernment—revolution, without being prepared sooner or later to accept the trust of a protecting Power, and the duty of constant tutelage. If there be any Englishman who thinks that in India we have not got enough and more than enough of this kind upon our hands, he may look without alarm to the present drift of our policy in China. But all who, with the majority of the nation, believe that the Government of India is a problem which tasks our resources to the utmost, if it is not quite beyond them, must look with something like dismay on the present posture of Chinese affairs, on the conjunction of circumstances which is at once making us a powerful instrument in the hands of the Taeping rebels, and also bringing us, at another point, into collision with those rebels, and into a kind of collision which shows us significantly enough that they will not be disposed to give us less, and probably far more trouble, than the Government which it is their ambition to displace.—*Economist*.

Monetary and Commercial.

The money-market is hardly in a condition to encourage loan transactions without the most clearly-proved necessity. In the course of the last ten days there has been a heavy drain of bullion, which has not only absorbed every successive arrival, but has drawn £1,250,000 from the stock held by the Bank, which amounted, at the date of the last return (Oct. 17) to £14,585,136. This drain has caused apprehensions of advanced rates of discount; and though the Bank Directors have, so far, abstained from adopting that course at present, it is commonly believed they will be compelled to resort to it within the next fortnight. Their present rate is 4 per cent.

The causes of the drain upon our stock of bullion have not yet been satisfactorily elucidated. The idea that it was produced by the *Comptoir d'Escompte* buying for transmission to China and the East is, however, exploded, and the general conclusion is that the purchases have been made on account of the Bank of France, and for the purpose of replenishing its stock, which, last month, fell off £2,800,000. through withdrawals for corn purchases. This view is confirmed by the fact that in the present state of the Exchanges a premium must be paid in order to get the gold. It is understood that there are orders now in the hands of various bullion holders for £600,000. This theory may prove incorrect. At all events it suggests a rational explanation of a perplexing operation, and one not at all inconsistent with the proposed operations of the *Comptoir d'Escompte* in China.

For the last few days an unsatisfactory movement has taken place in the Enfaced Indian Paper called Rupee Stocks. Partly through the resolution of the Government to enforce payment of the double Income-tax on these securities, and partly through a resolution of the Stock Exchange, which requires the buyers of this paper to pay the interest accrued up to the day of completing the purchase, they have fallen into disfavour. There is really no market for them upon the Stock Exchange, and the Indian Banks will buy only at a serious reduction. It so happens, too, that just at the time when the public mind is in this state, there are large supplies from Calcutta. Some houses, thinking them preferable to merchants' bills, bought them, say the Five-and-a-Half per Cents., at 102½ for remittance here. But to-day they could not be sold for more than 101½; thus a loss of 1 per cent. has accrued upon all operations within these limits. If the downward movement continues, purchases may probably be resumed, in order to send it back to Calcutta, where for a time it may command a higher price.

There has been a talk of the India Council inviting tenders for a new loan. At present the report cannot be traced to any definite source. It is probable, however, that a loan may be announced before the close of the year.

The produce of Japan has played rather a conspicuous part in our public markets. A sale of Japan saltpetre attracted a good deal of attention from its novelty. Unlike many first importations, the quality was most satisfactory, and the price realised (43s. 6d. per cwt.) was within 6d. of our highest quotation for the finest Bengal. A sale of Japan vegetable wax followed, and although not the first, was remarkable for its magni-

tude, offering 11,900 boxes or nearly 900 tons. Such is the increasing requisition for this article, that in the face of so large a quantity prices advanced from £2 to £3 per ton, about 300 tons being disposed of at £60 to £65 per ton, and for these prices the remainder is confidently held. It will be seen that this single parcel represents a value of nearly £60,000.

At a special meeting of the Oriental Bank, on the 29th ult., Mr. H. Gordon in the chair, a dividend was declared for the past half-year at the rate of 14 per cent. per annum, free of income-tax. It was announced, with reference to the question of the double income-tax, that an amicable suit has been instituted between the Bank and the Indian authorities, and that it will shortly come before the Court of Exchequer. The Bank has reason to expect a favourable decision.

The Mediterranean Extension Telegraph Company are at present negotiating for laying a new line to bring Malta into communication.

THE RANGOON AND SINGAPORE CABLE.

The screw-steamer *Queen Victoria*, of 2,000 tons, is now at Greenwich, to receive from the works of the contractors—Messrs. Glass, Elliott, and Co.—one portion of the cable for the line from Rangoon to Singapore, and will be despatched about the end of the month for Rangoon. Two other screw-steamer, named the *Rangoon* and *Malacca*, of 2,000 tons, have been built specially for the purpose by Messrs. Palmer, of Newcastle, and will be shortly ready to receive their respective sections. The entire length of the cable is 1,300 miles; and it is expected that the *Rangoon* will be despatched early in the ensuing month, and the *Malacca* about the end of the same.

THE RED SEA CABLE.

In reference to the statement made in a previous issue, that the differences between the Red Sea Company and Messrs. Newall and Co., the contractors, would be probably arranged without recourse to legal proceedings, it has since been arranged, through the interference of Government, to place the matters in dispute in the hands of the Law Officers of the Crown, for the purpose of obtaining their opinion on the points at issue.

The specie by the last mail was as follows:—Alexandria, £10,000 gold; Mauritius, £25,000 gold; Madras, £2,619 gold, and £14,800 silver; Calcutta, £15,100 gold, and £71,700 silver; Singapore, £350 gold, and £51,850 silver; Hong Kong, £304,939 silver, of which £200,948 was on account of Government; Foo-chow, £9,672 silver; and Shanghai, £148,246 silver.

ARTICLES OF IMPORT.

TEA.—The China advices of August 26 have had a more decided effect upon the tea market than any to hand for some time past. The increased interruptions of trade, and the possibility of their being prolonged by the fresh complication which the unexpected hostility of the rebels had intruded, have created an impression that, at least for the next mail or two, nothing can be looked for calculated to influence the market to the buyers' advantage. Many of the large dealers throughout the country have, therefore, been induced to replenish their stocks, which, in the protracted absence of business, must necessarily be much reduced. Public sales which followed the receipt of the mail, indicated a marked extension of demand, and full prices were obtained for all descriptions. Since these sales the buying has been very general, and some considerable parcels have been cleared off. The bulk of these transactions were at the extreme of previous quotations, but the market being relieved of many speculative lots that had been pressing on it, manifested increased buoyancy towards the close, and several of the later contracts were at an advance of ½d. to 1d. per lb. Any important rise in the value of black tea is not, however, expected, as the quantity on the way is considerable.

SILK.—The public sales commenced on 24th, and are concluded. The quantity offered was about 1,800 bales Bengal silk, 3,000 bales China, 1,000 bales Japan, and 300 bales Canton. As usual the whole was allowed to pass without biddings; but it was a meagre assortment, comprising very little really desirable in any of the respective classes. Trade continues as bad and as unpromising as ever; but the progress of the season naturally induces some of our manufacturers to be turning their attention to preparation for the spring, at present without any noticeable effect beyond their having availed themselves of the anxiety of importers to sell at the last unloading, to buy some small quantities at a reduction of another 6d. per lb.—unfortunately the steamer just arrived from China brings only 250 bales, instead of her usual complement; we are thus left to wait another week for a supply.

Japan . . .	18	0	20	0	22	0	30
Yucufa . . .	14	0	24	6			

SUGAR.—The parcels brought forward by auction have been comparatively unimportant. 1,891 bags unclayed Manila, of common quality, were bought in at 33s. 6d. The private contract transactions on the spot also are of limited amount, namely, 450 baskets of Java, at 44s.; 1,700 bags Clayed Manila, at 38s. 3d.

COFFEE.—No auctions have been held, and privately sales have been made at former quotations.

RICE.—Market has again become active at an advance of about 3d.; about 56 000 bags have been sold; fair old to good new Nakrenzie Arracan, 10s. 9d. to 11s. 3d.; old Rangoon, Bassein, and Moulmein, 9s. 7½d. to 10s. 6d.; new Moulmein, 10s. 9d. to 11s.

PEPPER.—The market exhibits no change from its previous rather languid condition; in public sale, 560 bags Singapore were realised; fair quality at 4d. to 4½d.; also 757 bags Penang, at 3½d. to 3¾d.; and 600 bags good Aleppo, at 4½d. By private contract, about 1,000 bags Singapore have been sold, principally at 4d. cash, and a few Penang, at 3½d. White is scarcely saleable at former prices, and of 943 bags Singapore, at auction, only a trifling proportion was disposed of; fair, 5½d.; good, 6½d., but the remainder of the former quality has since been placed at rather less money.

SAGO.—Sales of about 250 boxes, at 18s. 6d. Sago Flour: Sales, 2,000 bags, at 16s. to 16s. 6d. Tapioca: Penang, sales at 5d.

SPICES.—Cinnamon: Auctions announce for the 29th quotations same as last. Cassia lignea: Sales of 583 boxes, at 86s. to 94s.; market active. Cassia buds firm, but no sales. Cloves: Sales at an advance of ¼d. Mace: A few cases of Singapore sold at 7d. to 1s. for very low quality. Nutmegs: Small sales at one-fifth to one-eighth for good to small medium.

HEMP.—Moderate sales of Manila at last quotations.

COTTON.—Market has continued firm, at an advance of 1s. 1d. for Surat.

JAPAN WAX.—11,914 boxes offered, of which 1,200 were sold, block, at 60s. to 65s.; and saucer, 65s. 6d. to 66s. 6d.

TOBACCO.—No change.

TIN.—Market dull at last quotations.

MISCELLANEOUS.—India-rubber, market dull, parcels at auction, retired quotations, 2s. to 2s. 1d. Camphor, arrivals from Japan, and sales advertised; quotations nominal, at 140s. to 150s. Sapanwood, sales of Manila at a reduction, say £5 5s. to £6 10s.; and 2,000 tons of Siam, £7 12s. 6d. to £8 2s. 6d. for damaged. Soy, offered at auction not accepted. Rhubarb very firm, at last quotations, at which holders do not sell. Mother-o'-pearl shell, no transactions. Tortoise shell, sales of Manila, at 17s. 6d. Star anniseed, no sales. Stielac, 64 bales, at auction, retired. Gum Benjamin, operations have been important; the following recent arrivals having been brought to auction and all sold, viz:—47 chests, Siam, 1st quality, at £28 5s. to £32 10s. p r cwt.; 2nd, £19 to £27; 3rd, £12 10s. to £17 10s.; 4th, £9; and 31 cases Sumatra, at £14 15s. to £15 15s., for good to very fine second. 38 chests low Sumatra all retired. Rum, same as last quoted.

COMMERCIAL POSTSCRIPT.

CITY, SATURDAY AFTERNOON.

The variations in the markets for East India and China produce have been confined to one or two articles, but in these have been important. Large public sales this week of tea have resulted in an advance of 1d. to 2d. per lb. for Assam, and ¼d. to 1d. for fine green teas of China growth; but general quotations are unaltered, and the demand has to a great extent subsided since the receipt of the China news. Some considerable sales of Manila hemp have been made at 20s. per ton advance; Manila sugar has also advanced 6d. to 1s. per cwt. Ceylon coffee, partly from heavy arrivals and partly from accounts of a large Brazil crop, has declined 1s. 6d. to 2s. for Plantation, and 1s. to 1s. 6d. for Native kinds. The quarterly sales of Ceylon Cinnamon have established a rise of 1d. to 2d. per lb. Cassia Lignea is 1s. to 2s. per cwt. dearer. Japan wax maintains its value firmly. China camphor, after receding 10s. to 15s. per cwt., shows some indication of recovery. Both China and Bengal silk meet a steady demand, without change in value.

The shipments of specie by the Ripon, which leaves Southampton tomorrow, are as follows:—Alexandria (gold), £5,275; Madras (gold), £4,766, (silver), £17,420; Calcutta (silver), £9,520; Singapore (gold), £850. Hong Kong (silver), £98,860; Foochow (silver), £1,900; Penang (silver), £1,200; Shanghai (silver), £14,071. The total is £152,862.

ARRIVALS.—Oct. 24, at Schelde, from Akyab, Echo: at Havre Roads, from Rangoon, Abbyla; 26, at London, from China, Julia, Capt. Carter; 24, at Helvoet, from Batavia, Vander Palm; at Flushing, from Akyab, Catherine; 12, at New York, from Penang, Borneo; 11, at Boston, from Manila, Romance of the Sea; 29, at Deal, from Hong Kong, Mercedes; at London, from Manila, Ethereal; from Foo-cow-Foo, Chrysoite; 27, at Texel, from Batavia, Medea; 31, at Plymouth, from Batavia, Duchess of Sutherland.

DEPARTURES.—Oct. 25, from London, for Hong Kong, Raja of Sarawak; 24, from Deal, for Batavia, Nyverheid, from Cowes, for Shanghai, Bloise; 25, from Deal, for Batavia, Jannetje; 24, from London, for Hong Kong, Chatham; for Newport and Hong Kong, Huntress; from Deal for Batavia, Zephyr; 23, from Cardiff, for Hong Kong, Ophelia; 26, from Deal, for Batavia, Cornelia Jacoba; 28, from Deal, for Sourabaya, Julie; 27, from Liverpool, for Hong Kong, Petchelee; 29, from Deal, for Sourabaya, Passaroeng; from off Dungeness, for Batavia, Twee Anthony's; 25, from Cardiff, for Hong Kong, Bommerleerward; 26, for Singapore, Elise Susanna; 29, from Liverpool, for Batavia, Australia; for Singapore, Peter Symons; 30, from Gravesend, for Hong Kong, Monico; 30, from London, for Batavia and Sourabaya, George and Henry; 29, from off Portsmouth, for Batavia, Doggerbank; 27, from off Dungeness, for Batavia, General Michaels; from off Portland, for Penang, Vesta; from Cardiff, for Singapore, Jan de Witt; for

Hong Kong, Anna Digna; 28, for Manila, Jan Daniel; for Singapore, Henrick Jan; 29, for Hong Kong, Orion; 31, from Deal, for Batavia, Wilhelmina Alida Maria; 29, from Cardiff, for Hong Kong, Bernard Hertog von Saxe Weimar. Nov. 1, from London, for Cardiff and China, Kasar. From off Dover for Batavia, Prins Mauritz; from Liverpool for Batavia, Ferdinand Brumm; 30, from Ilfracombe, for Hong Kong, Gorilla; 30, from off the North Foreland, for Hong Kong, Emerald.

SPOKEW.—Cecilia, Batavia to Amsterdam, 33 S., 17 E.; Pioneer, Cardiff to Hong Kong, 9 Oct., 3 N., 17 W.; Tasmania, Batavia to Holland, 15 Aug., 26 S., 44 E.; Clemens (Bremen barque), Singapore to Falmouth, 12 Aug., 25 S. 53 E.; Casas, Manila to Queenstown, 8 July; Glencune, Foochow-Foo to London, 8 Sept.; off Cape of Good Hope, Adolph (Hamburg brig), Batavia to Hamburg, 29 Aug., 35 S., 23 E.; Schoonverbond, Batavia to Amsterdam, 30 Aug., 35 S., 22 E.; Anne Matilda (brig), Batavia to Amsterdam, 31 Aug., 33 S., 27 E.; Johanna Christina, Batavia to Rotterdam, 1 Sept., 35 S. 22 E.; Shakespeare, Liverpool to Hong Kong, 4 July, 33 N., 19 W.; Marco Polo, Hambro' to Hong Kong, 12 Aug., 21 S., 27 W.; Vater Smidt (Bremen ship), for Singapore, 44 N., 11 W.

AT TABLE BAY, Aug. 25, sailed for China, Ly-ee-Moon (s.s.)

AT ST. HELENA.—Sept. 21, from Foo-chow-Foo, Cyclone, Hossack; 20, from Hong Kong, Carnatic, McNeil; from Rangoon, Hooghly; 9, Medea, Laurens, from Batavia, and sailed 10th for Rotterdam; Professor Schuringa, Speltjes, from Batavia, and sailed 10th for Amsterdam; Koning en Vaderland, from Batavia, and sailed 10th for Rotterdam; 15, Johanna, Picard, from Batavia, and sailed 22nd for Rotterdam; 18, Indianan, Smith, from Manila, and sailed 19th for New York; Eliza Hands, Lamb, from Singapore, and sailed for Liverpool 19th; Asia, Pens, from Hong Kong, and sailed for London 21st. From Mani'a: Cervantes, Aquirre, and sailed for Liverpool 22nd; Tigris, Fletcher, from Singapore, and sailed 24th for Liverpool; Rattler, Montechiaro, from Sumatra, and sailed 23rd for Gibraltar; 23, Michel Montaigne, Gachet, from Singapore, and sailed 24th for Bordeaux; Dina, Rademaker, from Batavia, and sailed 24th for Amsterdam; 24, Sir Robert Peel, Pedersen, and William Gillies, Wilson, both from Penang, and sailed 25th for London; Martha en Jacoba de Vrils, from Tjilatjap, and sailed for Amsterdam 25th; Willem Daniel, de Meister, from Batavia, and sailed 27th for Amsterdam.

AT ST. VINCENT, Oct. 29, H.M.S. Hornet, from England, and left 2nd Oct., for China.

AT RIO GARDE, Sept. 17, for Singapore, Willy, Capt. Nagemann. At Bahia, Oct. 12, for Singapore, Procymatia, Capt. Loram. At Pernambuco Oct. 9, from China, Home Capt. Bassett.

Shipping Intelligence.

ARRIVALS.

MELANCTHON, Shields to Hong Kong, Sept. 7, 18 S., 31 W.

FREIGHTS AND CHARTERS.

The Sultana, belonging to Messrs. Dunbar, has been chartered by Government for the conveyance of about 100 troops, and stores, for Hong Kong. The rate has not transpired, but it will be about £15 for the troops per head, and 42s. per ton for the stores.

A good business in tonnage to China is expected, as the Allied Army will remain on the spot until a substantial settlement of the dispute is obtained, and during that period a good deal of tonnage will necessarily be employed in ministering to the wants of the forces. Under these circumstances out-ward freights may be maintained.

Rates of freight current for vessels on berth to Shanghai, 60s. per ton dead weight; 45s. per ton of 40-feet measurement. To Hong Kong, 45s. to 50s. weight, 45s. measurement. To Singapore, 35s. to 40s. weight or measurement. To Manila, 35s. and 40s. To Japan, £5 weight, 90s. measurement. To Batavia, 50s. weight, 40s. measurement. At the United States: to Shanghai, coal and measurement goods, \$10 to \$12.

Coal is being shipped for Shanghai at 65s., to Hong Kong at 60s., and to Singapore at £42 per keel. During the last four months, 156,000 tons of coal have been shipped from this country to China and the East Indies.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Nominal quotation for Yedo, 70s. to 80s.

At Hamburg, for Batavia and Singapore, 40s. to 50s. China and Manila 50s. to 60s.

CASUALTIES.

The Oriental, which arrived at Falmouth 9th Oct. from Akyab, had thrown part of her cargo overboard.

The Alma (barque) of Nantes, Pelien, from Java to Nantes, arrived at Surinam Sept. 20 from Cayenne, where she was condemned and sold. Her upper works seem to have been a little strained, otherwise the vessel appears to have little the matter with her.

The Macassar, Rip, from Shields to Singapore, arrived in the Downs Oct. 10, and was supplied with an anchor and chain from thence.

The Becho, which arrived off Cork Oct. 14 from Akyab, had run aground in the preceding night, but got off with the succeeding tide and proceeded for Antwerp.

RISE IN THE P. AND O. CO.'S RATES.

THE directors of the P. and O. Company have given notice that the rates for all passages booked by the Company's steamers sailing on and after the 1st January, 1861, will be as follows:—From Southampton to Aden, £70; to Bombay, Ceylon, Mauritius, or Reunion, £100; to Madras, £105; to Calcutta or Penang, £110; to Singapore, £115; to Hong Kong, £130; to Shanghai, £150. These rates are exclusive of the charge for transit through Egypt, viz., £7 for each first-class, and £3 10s. for each second-class passenger; and are about ten per cent. higher than those ruling at present.

PASSENGERS INWARD.—Per Royal Netherlands Yacht Club, Captain Zaack, at Brouwershaven, from Batavia: Messrs. W. Parkinson and H. van Hengelaar, Mrs. Block, and two children; four military invalids. Per Konink Willem III., Captain Zeylstra, at Amsterdam, from Batavia: Mr. W. A. Ploegman and daughter, Miss Koenen. Per Fortuna, Captain de Ligny, at Brouwershaven, from Padang: Mr. Driesen and family, Kloppeburg and child; two military invalids.

THE P. AND O. STEAMER "ALHAMBRA."—The screw steamer, Alhambra, Captain J. D. Stewart, lately engaged in the mail service between Marseilles and Alexandria, and subsequently in the conveyance of French troops up the Mediterranean en route for China, has arrived at Southampton.

CAUTION.—FRENCH, P. Royal Exchange, London, Chronometer, Watch, and Clock Maker, established 1810, has NO CONNECTION whatever, and never had any, with the CITY OBSERVATORY, carried on by Mr. Jacob French, since 1854, as jeweller and watchmaker. Mr. Jacob French sold his premises in July last to Mr. Bennett, of 64 and 65, Cheapside. The words "Late French" in his advertisements being calculated to mislead the public, renders this caution necessary.

St. Paul's Export Scented Soap Works.

I. M. ROBSON, EXPORT PER-

FUMER and FANCY SOAP MAKER. Merchants can be supplied with sample cases from ten pounds and upwards on the shortest notice.

N.B.—Brushes, Combs, Sponges, and every article for the Toilet, 32, Lawrence-lane, Cheapside, E.C., Sole proprietor of the "Rose of England."

County to the Royal Heraldic Studio and Library; in a few days you will receive a Correct Copy of your Armorial Bearings. Plain Sketch, 3s.; in Heraldic Colours with written description, 6s.; Large Size, 12s. Family Pedigrees, with original grant of Arms, to whom and when granted, the origin of the name, all traced from authentic records, fee Two Guineas. An Index, containing the Names of nearly all persons entitled to use Arms, as extracted from the British Museum, Tower of London, Herald's College, &c. &c. The Manual of Heraldry, 400 Engravings, 3s. 6d., post free, by T. CULLETON, Genealogist, Lecturer on Heraldry at the Mechanics' Institute, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C. The Heraldic Colours for Servants' Liveries, 5s.

STAMP YOUR OWN PAPER—with Arms,

Crest, Initials, or Name and Address, by means of CULLETON'S PATENT EMBOSSEING PRESS, 15s. Best Make 21s. Any person can use them.—T. CULLETON, Die Sinker to the Board of Trade, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

WEDDING CARDS—For Lady & Gentle-

man—5s. each. 50 Embossed Envelopes, with Maid's Name printed inside, 13s. Visiting Cards—A Copper Plate engraved in any style, with name and 50 Cards printed for 2s., post free. N.B.—All orders executed by return of post, for stamps or cash. T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

FAMILY ARMS, &c., Embazoned for Paint-

ing on Carriages or Needlework, 6s.; Best Style, 12s., Gothic and Modern Monograms Designed, 5s. Arms Quartered, Impaled, and Painted on Vellum, according to the laws of Heraldry. By T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

ARMS, CRESTS, &c., Engraved in the Best

Style. Crest on Seals or Rings, 7s. On Steel Die, 6s. Initials, 1s. 6d. per Letter. Book Plate, Engraved with Arms, 10s.; or Crest, 5s. Postage and Registered Letter 1s. extra.—T. CULLETON, Heraldic Engraver by Appointment to the Queen, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

SOLID GOLD RING (18 Carat, Hall

Marked), Engraved with Crest, 42s.; Large Size, for Arms, 75s. On receipt of P. O. order the size will be sent to select from.—T. CULLETON, Seal Engraver, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

THE PEN SUPERSEDED.—Mark your

Linen. The best and only method of Marking Linen, Silk, Stockings, Coarse Towels, or Books, so as to prevent the Ink washing out, is with CULLETON'S PATENT ELECTRO-SILVER PLATES. By means of this novel invention a thousand pieces of linen can be marked in a few hours. Initials, 1s. each; Name, 2s. 6d. Set of Moveable Numbers, 2s. 6d.; Crest Plate, 5s., with the necessary directions for use. Post free. Certificate from the eminent Dr. Sheridan Muspratt, F.R.S., Professor of Chemistry, &c.

"Several trials with Mr. Culleton's Patent Electro-Silver Plates, for marking linen, induce me to pronounce them excellent; the letters are beautifully marked in a deep black colour, without blotting, and after a long boiling, with either potash or soda, they remain unaltered. Other plates which I tried decomposed the ink, and in many cases burned holes in the linen. I can testify Mr. Culleton's Plates are incorrodible, and will not hurt the finest fabric.—(Signed) "SHERIDAN MUSPRATT
"College of Chemistry, Liverpool.

"May, 15, 1854."

All orders to be sent to the Patentee and Sole Maker.

T. CULLETON, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

All Orders executed by Return of Post.

Sugar Machinery and Apparatus,

COFFEE, COCOA NUT, AND RICE MACHINERY, (OF YORK PLACE IRON WORKS,

ABERDEEN),

25, BUCKLESBURY, MANSION HOUSE,

LONDON, E.C.,

SUPPLY with the same satisfaction as hitherto their improved SUGAR CANE MILLS, worked by Steam, Water, Wind, or Cattle Power; Vacuum Apparatus, Clarifying, Boiling, Concentrating, and all kinds of Apparatus and Implements used on a Sugar Estate.

Improved Coffee Pulpers, Peelers, Sizing Machines, and Drying Stoves, &c.

Grinding Machinery and Hydraulic Presses, especially designed for reducing the Cocoa Nut to a Pulp, and extracting the greatest percentage of Oil.

Rice Machinery, consisting of Machines for thrashing the Paddy, and complete Rice Mills for Husking, Pearling, Polishing, and otherwise preparing the Rice fit for the London Market.

All the above-mentioned descriptions of Machinery arranged to be driven by Steam, Water, Wind, or Cattle Power.

Having personally visited various Sugar Colonies, their Steam Engines, Steam Boilers, Pumps, Water Wheels, &c., are expressly adapted for Colonial use.

G. B. and Co.'s practical experience of eighteen years, as Sugar and Colonial Engineers, will be some guarantee as to the quality of their Machinery, to the good working of which they can produce numerous References and Testimonials.

N.B. Descriptive Catalogue of G. B. and Co.'s Machinery forwarded on application.

Designs supplied for Sugar Houses for Estates of all sizes.

In addition to the above G. B. and Co. continue to manufacture and supply, as usual, all kinds of Machinery and Iron Work required for Colonial use, Iron Ships, Barges, and Steamers, Wrought and Cast Iron Bridges, Railway, Dock, and Harbour Plant, &c., &c.

Order through any respectable Colonial Merchant, or through G. B. and Co.'s Agents, where established.

First Class Awards at the London, Paris, and New York Exhibitions for

HOLLOWAY'S OINTMENT AND PILLS. SKIN DISEASES, SCROFULA, SCURVY.—This class of complaints not only afflicts the individual, but is too frequently transmitted to the offspring, entailing on the innocent victims unmerited misery. How important, under such serious consequences, it becomes thoroughly to eradicate strumous taints from the blood and glands must be as evident as it is incumbent on all sufferers. Holloway's Ointment and Pills uproot all such latent corruptions. The Ointment applied over the affected parts passes to the glands and blood, circulating round about, and completely cleanses both. This soothing Ointment possesses the power of ejecting the seeds of all virulent eruptions and ulcerous distempers from the system. Holloway's Pills generally be taken while his Ointment is being used.

Agents will be found in every city where English is spoken.

To prevent disappointment, be sure to ask for Piesse and Lubin's Perfumery.

LEA AND PERRINS' CELEBRATED WORCESTERSHIRE SAUCE.

PRONOUNCED BY CONNOISSEURS TO BE THE ONLY GOOD SAUCE, AND APPLICABLE TO EVERY VARIETY OF DISH.

EXTRACT of a LETTER from a MEDICAL GENTLEMAN, at Madras, to his Brother, at WORCESTER, May, 1861

"Tell LEA and PERRINS that their Sauce is highly esteemed in India, and is, in my opinion, the most palatable as well as the most wholesome Sauce that is made."

EXTENSIVE FRAUDS.—Lea and Perrins having discovered that several of the Foreign Markets have been supplied with spurious imitations of their "Worcestershire Sauce," the labels of which closely resemble those of the genuine Sauce, and in one or more instances with the name of L. and P. forged, they have deemed it their duty to caution the public, and request purchasers to see that the names of Lea and Perrins are upon the Wrapper, Label, Stopper, and Bottle.

L. and P. further give notice that they will proceed against any one who may infringe upon their right, either by manufacturing or vending such imitations, and have instructed their correspondents in the various parts of the world to advise them of such infringements.

Wholesale and for Exportation by the Proprietors, Lea and Perrins, Worcester; Chase and Blackwell, and other Oilmen and Merchants, London.

NOTICE TO PASSENGERS BY THE OVERLAND ROUTE, via EGYPT.

PHILIP ZECH, Proprietor of the two well-known Hotels in Alexandria, the Hotel d'Europe, and the Peninsular and Oriental Hotel, begs to inform his friends, and Travellers in Egypt in general, that he has purchased SHEPHEARD'S HOTEL in CAIRO, which will still continue to bear the same name; and in returning thanks for the extensive patronage enjoyed by his two houses in Alexandria, hopes that the preference may likewise be extended to his house in Cairo, which will be managed in first-rate style, and in a manner intended to give every satisfaction to its frequenters, both as far as table, wines, internal and external service are concerned. Many alterations and ameliorations are being carried out at the present moment.

Curtis on Manhood—New Edition.—A Medical Essay on Nervous Diseases.

Just published, the 130th thousand, with numerous plates in a sealed envelope, price half-a-dollar.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE, with plain directions for perfect restoration to health and vigour. By J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

CONTENTS:

INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatorrhoea and Impotence; Early Vicious Indulgences; Dangers of Neglect.

CHAPTER III.—A Review of the various Disqualifications of Marriage—whether resulting from the Youthful Abuse, the Folies of Maturity, the Effects of Climate or Infection.

CHAPTER IV.—The Author's plan of Treatment Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhoea and other Urethral discharges by microscopic examination.

CHAPTER V. and VI. on the modern Treatment of Gonorrhoea and Syphilis.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

"We feel no hesitation in saying, there is no member of society by whom the book will not be found useful—whether such person hold the relation of Parent, Preceptor, or Clergyman."—Sun.

Mr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by letter, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Mr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty Years; nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK: SOLD BY HINMAN, QUEEN'S ROAD, HONG KONG.

FACILITIES in BOOK-KEEPING

Duty paid—Double, at 21s.; Single, at 13s. 6d. per dozen. Champagne, and Claret, in Bond and Duty Paid.

PATRONISED BY THE COURT.

THE MALLOW SOAP is the best Soap for the Skin. Made only by J. Grossmith, 85, Newgate-street, London. Its perfume is exquisite and lasting. Tablets, 3d., 4d., and 6d. each. Sold everywhere.

The "SOVEREIGN OF SCENTS." A new perfume for the Handkerchief; needs but a trial to be approved.

JOHN TANN'S PATENT RELIANCE
LOCKS and FIREPROOF SAFES are the best and cheapest safeguard against Fire and Robbery.

WAREHOUSE, 30, WALBROOK, CITY, LONDON.

FIRE.—DESTRUCTION OF THE
PLANT, STOCK, and PROPERTY of the Largest Ropery and Ship Chandlery in the Country, Messrs. Frost, Brothers, of Shadwell, London. PRESERVATION of Books, Papers, and Cash, in MILNER'S SAFE, standing by the side of two other safes, (not Milner's) the contents of which were consumed.—See "Times," Sept. 7, 1860.

TO MESSRS. THOMAS MILNER AND SON,
Liverpool, and 47A, Moorgate-street, City, London.

Gentlemen.—We have very great pleasure in bearing testimony to the efficiency of your "Patent" Fire-resisting Safe. In the destructive fire which destroyed the whole of our premises on Sunday morning last, our books, papers, and cash, which were in the safe we purchased from you in March last, were all preserved; and this is the more remarkable because the contents of two other safes, not of your manufacture, standing in the same office within two feet of your safe, were consumed. Our most sanguine hopes have been realised in this severe test, and we leave you at liberty to make use of this letter in any way you may wish.—We are, Gentlemen, yours, &c.

FROST, BROTHERS.
Shadwell, London, Sept. 8, 1860.

TWINBERROW'S DANDELION, CAMOMILE, and RHUBARB PILLS, an effectual cure of indigestion, all stomach complaints and liver affections. In cases of constipation these pills never fail in producing a healthy and permanent action of the bowels, so that in a short time aperients will not be required, and, being quite as innocuous as castor oil, they may be given to children.

From Dr. Dick, Lansdown-terrace, Kensington.
"Sir,—Send me another bottle of your Dandelion, Camomile, and Rhubarb Pills for my own use. I lose no occasion of recommending these Pills, as I can conscientiously do so."

Prepared by TWINBERROW, Operating and Dispensing Chemist, 2, Edwards-street, Portman-square, London; and may be had of all Patent Medicine Vendors.

NO KALOS GEUSIS SAUCE is Genuine unless it has my Trade Mark upon each label and capsule, also my name and address upon each bottle. Price 1s. per Bottle. CALEB SOUL (the only successor to the late H. Trinder), 85, Queen-street, Cheapside, London. Can be ordered through any of the India Agency Houses; also of Messrs. CROSS and BLACKWELL, London.

BOTTLED ALES AND WINES, &c.
"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—"Melbourne Journal of Commerce," Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases, by using SEYMER'S BOTTLE PACKINGS and COOLERS. Price 7½d. per doz. Bottlers contracting for large quantities, effect so great a saving in labour, &c., that they can supply them at one-third less price to Shippers, who will find it most profitable to order their goods to be so packed in future.

SEYMER & CO., 22, BATHING, E.C.

THE LONDON AND CHINA TELEGRAPH.
THE FIRST VOLUME of this JOURNAL

was completed on the 11th Nov. 1859, and can be obtained bound, with an Index, price 23s.; subscriptions for Vol. II. commenced on the 28th Nov. 1859. Price 18s. per annum, or 6s. per quarter, not including postage. Terms for advertising, 2s. 6d. per five lines; and 6d. for each additional line.

On the 6th inst. it was currently reported that Messrs. Matheson and Co. had received a telegram announcing that in consequence of the Chinese Commissioners failing to arrive at Tien-tsin to meet Lord Elgin and Baron Gros, hostilities would be re-commenced. On the delivery of the Bombay mail on the 8th this intelligence was not confirmed.

List of Passengers.

PASSENGERS INWARD.

By this mail.—From Hong Kong for Marseilles: Messrs. Magniac, Challeit, A. Collett, and Geo. L. Beag. For Southampton: Major Lane, Mrs. Burcham.

PASSENGERS OUTWARD.

Per P. and O. str. Ripon, 4th Nov.—From Southampton to Hong Kong: Lieut. Trimmer, Mr. L. Rosenshal. 12th Nov.—From Marseilles to Singapore: Mr. and Mrs. Heineken and infant, one lady and two children, Mr. and Mrs. E. Cunningham.

Per P. and O. str., 13th Nov., via Bombay. From Southampton to Shanghai: Mr. J. Malcolm. To Singapore: Mr. Mooyer. To Hong Kong: Mr. F. Mayor, Mr. Lind. From Marseilles, 20th Nov., to Singapore: Mr. L. Bowman.

Per P. and O. str. Pers, 20th Nov.—From Southampton to Hong Kong: M

Miss Alexander, Capt. Worthington, Messrs. Herdrick and Ler. To Singapore: Messrs J. Watson, R. Henderson, W. H. Petter, S. Johnson, St. John, and Mr. Paul, Sir Jame Brooke. From Alexandria to Penang: Mr. and Mrs. E. J. Leveson. From Marseilles 28th Nov., to Hong Kong: Mr. Meard. To Singapore: Mr. Kerkoven, Mr. Curz. To Shanghai: Mr. Moncrieff.

Per P. and O. str. Ellora, 27th Nov.—From Southampton to Shanghai, via Bombay Mr. Van Cleef. From Marseilles, 5th Dec., to Shanghai, via Bombay:—Mr. Phipps.

Per P. and O. str., 4th Dec.—From Southampton to Singapore: Mr. and Miss Allen, Mr. H. J. Silverlock. To Shanghai: Mrs. A. Evans, and infant. To Hong Kong: Mr. Gray, Capt. Archer, Rev. T. Molesworth, Paymaster Pope, Mr. F. H. Barker, Mr. Freeman. From Marseilles, 12th Dec., to Singapore: Mr. and Mrs. R. Carnac, Mr. F. David. Solomon and two servants, Sergeant John Walsh. Per Elbe, from Singapore: Messrs. Grube and Jacob.

PROGRESS OF THE THIRD CHINA WAR.

ADVANCE UPON PEKING.

The following telegrams were published in yesterday's papers:—

A telegram was received on Sunday afternoon from Her Majesty's Consul at Marseilles, stating that it was reported from Hong Kong, on September 26, that the negotiations with the Chinese had not been brought to any satisfactory point, and that the Allied army had commenced its march upon Peking.

The settlement of negotiations is delayed owing to the question of the money indemnity. The Allied troops are marching on Peking, where Sang-ko-lin-sin is reported to be present with a large force. There is difficulty in providing carriage, as the coolies are deserting. Two thousand men protect Tien-tsin. Lord Elgin followed the troops on the 9th of September.

The rebels are inactive at Shanghai.

Trade is obstructed at Canton by the rebels.

The *Morning Post* and *Globe* yesterday gave out as authentic, and backed up the same with leading articles to remove any doubts on the subject, that "peace had been concluded," and that a telegram had been received by Government from Sir Hope Grant, dated 26th Sept., to the effect that he was preparing to embark his forces. The fact of our latest dates from Hong Kong being only up to the 28th Sept. by the present mail, and that by the most rapid conveyance, advices could not be received from Tien-tsin under ten days, should have been sufficient for the writers of these statements, that the thing was simply impossible. It turns out now that the telegram from Sir Hope was an old one of Sept. 4.

OUR SPECIAL CORRESPONDENT'S LETTER.

TIEN-TSIN, Sept. 12, 1860.

In continuation of my last I may add a few items:—

THE ARMSTRONG GUNS.

With reference to the performances of the Armstrong guns, they certainly have shown capacity for firing at long ranges with tolerable precision, but to suppose, as not improbably will be done by many at home, that the campaign on the Peiho has been in any way shortened through their agency, is a mistake. The very satisfactory results which have been attained are mainly owing to our overwhelming force of artillery, and to the cautious and judicious use made of it by Sir Hope Grant (in conjunction with General Montauban, whose artillery was always in action in line with ours)—and in saying that the same results would have been equally readily attained had the Armstrong batteries been common field artillery (such as Desborough's or Stirling's batteries), I am writing the unprejudiced opinion of one who has been a pretty close observer, and who, if he had a bias at all, it was one strongly in favour of the Armstrong guns. In a word, these guns unquestionably have many advantages over guns of the ordinary description, but they would appear also to be not altogether free from defect, apparently being delicate weapons, requiring more delicate handling, than probably can always be secured them in the excitement of quick firing in a general action; in proof of which I will merely mention the fact, that at the bombardment of the Taku forts on the 21st of August one of these guns was disabled from one of the concussion shells bursting in the breech—the result simply of the slight jar it received on being introduced into the breech-loading chamber, prior to the cartridge being put in. This, however, it may be argued, is more a defect in the projectile than the gun, and could not occur if shells with the ordinary, time fuses were employed.

THE CHINESE COOLIE CORPS.

At a period when the re-organisation of the Indian army is occupying so large a share of attention on the part of the legislature, and the difficulties found to be so great in replacing the old Sepoy army of Bengal, is it not worth while entertaining the possibility of making China an enlisting field for a force for Indian service, and it appears to me that a grave error will be committed if these men are disbanded without an effort being made to form those who are willing to take service as soldiers into an experimental Anglo Chinese Corps to be called—say—The Regiment of Hong Kong. This question of coolie enlistment is one still worthy serious consideration, more especially at a time when we have a prospect of having to expend annually some thousands of English soldiers in garrisoning a country to the climate of which, from their habits, they are unequal. The habits of the English soldier are those pre-eminently unsuited for a climate like India—he eats largely of animal food, consumes freely intoxicating liquors of the worst kind, and narcotises himself with the strongest forms of tobacco, dreads the sun, takes no exercise, and swelters in a state of drowsy imbecility in his barrack-room during the greater portion of the day—the practical result of which is that in a short time he either dies, or has to be invalided, and a vast expense entailed on the country in replacing men thus annually requiring removal from India, from causes more the result of vicious habits than climatic influences. The last thing, as a general rule, the English soldier thinks of in India is saving money—he only does so when he cannot find an opportunity of spending it, and when the opportunity comes what has accumulated usually all goes in one grand bout of sensual enjoyment. With Chinamen, enlisted as soldiers and serving in India, I venture to predict that the chief thing which would occupy their attention would be the saving of money—partly with the view of making remittances to their friends, gently looking forward to the time when their terms of engagement would expire, and they would be able to revisit their native country with the accumulated proceeds of their frugality. This propensity on the part of the lower orders of the Chinese to save money operates powerfully against their giving way to those habits which act so injuriously on the contributions of English soldiers in the East, and in saying this I do not attempt to make out the lower orders of the Chinese in the mass to be less vicious than English soldiers in India. I simply say that when earning dollars, from whatever source these dollars come, they are much better up to taking care of them than English soldiers as a general rule are,

and which chiefly result from the faculty of self-denial which they appear to be more capable of exercising, under certain circumstances, than English soldiers are.

I will briefly allude to what appears to me to be the greatest paradox of this most paradoxical of wars. On the 24th of August (three days after the fall of the Taku forts) news came up from Shanghai of the attack on the Chinese town by the rebels, and of its successful resistance by French and English troops—reinforcements of whom had been procured from Chusan—but as the rebels were still maintaining a threatening aspect, further reinforcements were requested, without loss of time. The 44th Regiment were forthwith embarked from Tan-Koo at an hour's notice, and sailed at once for Shanghai in the York and Athletae transports, towed by the Impertriz and the Urgent steamers, and Govern's battery of the Royal Artillery was ordered to follow as soon as it could be put on board. Full particulars of the proceedings at Shanghai will be found in the *North of China Herald*, and I will merely observe that at the very time the French and English troops were storming the Taku forts and bayonetting the Imperial troops on the banks of the Peiho, another body of the English and French troops were mounted on the walls of the Imperial city of Shanghai, and side by side with the Chinese soldiers, were repelling the fierce onset of the Emperor of China's rebellious subjects, with the Chinese Commander-in-Chief standing on one leg in extasies of delight at the fearful havoc which McIntyre's howitzers of the Madras Artillery, were making amongst the rebels.

The English Garrison at Shanghai at present consists of the 44th Regiment, the Regiment of Loodiannah, the 11th Punjaubees, 200 Marines, 1 Company of the 99th, 1 Company 19th Punjaubees, Govern's Battery, and McIntyre's Battery of Golan-dauze Artillery. The detachments of the 99th, 19th Punjaubees and Madras Artillery, were brought over from Chusan on an emergency, and they will return immediately, owing to fears being entertained of the rebels attacking Ningpo, and then making a hostile movement across on Chusan.

TIEN-TSIN, 12th Sept., 1860.

The concluding part of my last informed you of the arrival of Lord Elgin and Baron Gros at this place, and indeed everything looked *couleur de rose* for a settlement of all the difficulties. I reported that Lord Elgin would proceed to Peking with a cavalry brigade as an escort, at once. A change soon came over the spirit of the dream, and it does appear that the Chinese have been at their old cunning tricks again. After a delay of five days the special Commissioners, Kweiliang and Hung-fuh arrived, and matters seemed to be progressing satisfactorily until the questions of indemnity arose; this was on the fourth day, when the Commissioners declared they could not consent, and must refer to Peking, &c. This, with other appearances of trifling, induced Lord Elgin to end all negotiations abruptly, and declare he would now only agree to the conditions of peace within the precincts of the Imperial Court, and that the conditions should receive the immediate consent of the Emperor, with the "vermillion pencil."

Now, I have good reason for stating, that the Allied Generals had advised the Ambassadors, when they occupied Tien-tsin, that it would be desirable, if possible, after their brilliant success so far, to proceed no further as an hostile army, and no doubt this consideration weighed with them, and induced them to wait the arrival of the Commissioners five days, and lose four more in discussion. It is a matter of surprise that Lord Elgin did not moot at once the question of indemnity, and thus have cut the matter short; indeed, it was expected, for in my last I advised you of a report that eight millions would be stipulated for, and it was current that it had been agreed to.

On the 8th Sept. the army was therefore put in motion, leaving a garrison of about 2,000 men at Tien-tsin, and orders for those in the rear in the Peiho to follow on, leaving the Naval Brigades in charge of the Taku forts. Gun-boats, with stores and ammunition, have also been ordered to follow on; in fact, everything has been put in trim for attacking Peking, and there is reason to fear that resistance is intended by the Imperial Court. If so, the misery and suffering of people will be truly grievous. The troops will encounter considerable difficulties which have, indeed, already commenced, the natives becoming less willing to work for us, as we approach the capital. Several of the hired coolies and mule-drivers having decamped, how we are to get up the *personnel* of our army I cannot see at present, but that it's got to be done is sufficient for British troops. It is intended to halt and recon-

notre our position at Tung-chow, about ten miles from Peking, which place we hope to reach on the 18th Sept.

Things were progressing so smoothly that the final distribution of the troops had been determined on, and the following is stated to have been the arrangements: namely, that the 1st, 2nd, 3rd, 60th, and 87th Regiments were to have been sent home forthwith; that the 31st, with some artillery, were to have remained in garrison at the Tien-tsin forts, with the view of keeping the screw on until the terms of the Treaty were ratified; and that, as a reserve, in case of any contingency occurring, the gallant 44th and 67th (the two infantry regiments that have borne, in conjunction with the Royal Marines, the brunt of the war) were to have been stationed near Chee-Foo, a town between the entrance to the Gulf of Pecheli and the Shantung Promontory, where a small French force was also to be retained. These arrangements, of course, are now all altered, and it is quite impossible to speculate on what the consequences will be should the Emperor of China (in the event of such a person being found really to exist) adopt passive resistance, and make off into the interior on the approach of the army to Peking. Should such unfortunately occur, it is difficult to see what are the elements out of which a better one is to be constructed—the rebels, or an Anglo-Gallican protectorate? It is a question the solution of which had better be avoided, if we possibly can.

The hospital-ships at the Peiho are filling fast, and an hospital has been established at Tien-tsin, in which sixty patients had been admitted, and 120 more were expected in an hour, from amongst the troops that had marched towards Peking. Lieutenant Palliser of the Royals, Lieutenant Breedon of the Buffs, and Veterinary-surgeon Cleaveland of the Artillery, have died since the last mail left.

(FROM ANOTHER CORRESPONDENT.)

WITH THE FLEET OFF THE PEIHO.

A portion of the following letter, dated from off the Peiho, was written prior to the known reception between our Ambassadors and the Chinese Commissioners:—"Lord Elgin leaves for Peking on the 10th, he will take with him as an escort and guard of honour, 1,000 cavalry, 2 batteries of artillery, mounted as horse artillery, and 60 men with 6 officers (600 in all), from each infantry corps. Lord Elgin has had a very gorgeous chair of state made to travel, it will be transported by relays of coolies, for whom he has had made very handsome uniforms, with her Majesty's cipher and the crown embroidered all over it. Admiral Hope is not going up, as he feels some delicacy in going, but he has sent Rear Admiral Jones to represent the navy, and we are all to have leave to visit Peking, after Lord Elgin has had his interview with his celestial Majesty.

The Chinese have consented to everything and anything. They are to pay over to us seven millions of taels, which is two millions and a quarter English, and the French have had the impudence to ask the same to be paid to them. Canton is to be given up, and the factories rebuilt on a large wharf, built out into the river, which will be defended in the rear by a wide ditch and wall. The troops will be withdrawn from Tien-tsin in about six weeks time, and those left will occupy the Taku Forts; the remainder will winter at a place called Tangchow, about thirty miles westward of the French camp at Chefoo. The 3rd Buffs, 1st Royals, and 87th Royal Irish, return to England, but what regiments garrison Taku Forts, I cannot say. It is said the 67th and 44th who are recalled from Shanghai now the row is over there. The wounded are all doing well, several of the officers, who are chiefly of the 67th, go home invalided by this mail. Chaplin, an ensign of 67th, is very badly wounded, he was carrying the colours, and behaved most gallantly, having been the first on the walls at the assault. I believe he is recommended for the Victoria Cross. Another, Lieut. Burstem, of 67th, is spoken highly of, he was badly wounded. The heat is excessive, and many fever cases showing in both services.

The fleet are nearly all here, the *Pioneer* takes this mail down, the *Acteon*, *Cruiser*, *Algerine*, and *Dove*, are gone to complete the survey of this Gulf before the bad weather comes in, which will soon be now. A number of the transports, some 30, will be paid off at once. Fresh provisions of all kinds, capital fruits, and vegetables, are brought in readily now, and regular markets established near the camp, at a fixed tariff, ice also is to be had in plenty. Underneath all the forts are large stores of it. The French and English commission have been sitting in the Forts to divide the guns, stores, &c., and the French now have the North Forts and we the South. The engineers are busily em-

ployed undermining the forts, ready to destroy them when we do abandon them. The French will make but a poor show alongside our troops entering Peking, for our cavalry and artillery are in superb order in everything, and such fine men—their's miserably horsed and opposite; as for their infantry they are still worse, and they have no cavalry only a few dirty looking orderlies, and yet you see they will take all the credit of everything to themselves.

Since my last to you I have learnt why the Admiral only sent in four of our gunboats to attack on the morning of the 21st of August, it was because the French had only four to send in, and they did not like the idea of our having more than they had to do in the business. However, we beat them about the rocket boats, for they had more to send in. I only hope whatever we have to do in future, may be done without the French as we invariably have all the hard work to do, and they get all the credit. The arrangement of the fleet will be much the same as the army; some will winter here, some at Tangchow, and some go home. *Sampson*, *Fury*, *Inflexible*, *Highflyer*, *Robuck*, and *Adventure*, being amongst the first for England. Lieut. Symons, commanding H.M. steamer *Coromandel*, tender to the flag-ship of Admiral Hope, has received promotion, since the affair at the Taku Forts.

A SUDDEN CHANGE.

SEPT. 13.—I wrote the foregoing some days before as I intended to try to go to Peking, but the whole face of affairs is altered, all negotiations broken off, and the whole army *en route* for Tangchow, ten miles from Peking.

I am glad it has so turned out, as now the treaty must be done at Peking, and from our own camp, for there is no faith to be put in those rascally Chinese. The heavy siege train goes up by water, on flat kind of barges, in charge of Capt. Dew, of the *Encounter*, and Capt. Barnard, of R. M. Artillery, with a party of seamen and marine artillery. Now I believe there is a canal communication from Tien-tsin to Peking, which they will be able to go up. Notwithstanding the beautiful weather we have had, low fever is very prevalent amongst the man-of-war particularly. I put it down to the boat work they have had, as all the boats have been away from the ships for weeks now. There are no less than thirty fever cases on board this ship.

FROM ANOTHER CORRESPONDENT AT CHUSAN.

A correspondent from this place writes:—

The force left here to keep possession of the island and guard the stores consists of about two hundred English, about the same number each of French, and Indian troops. Two or three small gun-boats are about in the vicinity taking pirates, conveying despatches, &c. The French are engaging in the conveying business on a small scale, and adopting other petty means for making a little money, much to the annoyance of the Chinese.

(FROM ANOTHER CORRESPONDENT AT HONG KONG.)

Your correspondents at the Peiho will of course have advised you fully of the change from peace to war, and of course the corresponding effects are being felt here. Two vessels lately arrived from Bombay with horses were on the eve of returning when orders arrived from the North to send them forward to the Peiho, which looks like making every preparation for further hostilities. The expense of this expedition will be something fearful—I believe we are at present spending half a million a month on transport alone.

Our horse transport has proved a complete failure, the horses have died in the mud, like a second edition of Balacklava, and but for the wonderful energy and efficiency of the Chinese Coolie Corps, the whole expedition would have been at a standstill, for want of the means of moving. Major Cooper, the Commandant of the Military Train, is blamed for the failure, and has been deprived of his command and sent to England by the last mail; but the true cause of the failure has been the reckless way in which purchases of horses have been made, the little care that has been taken of them, and consequently the utterly inefficient material that Major Cooper had given to him to organise a Land Transport Corps out of; but in course of time about this plenty will come out.

The *Lammermuir*, a beautiful clipper ship, has sailed for the Cape with 180 invalids, preceded by the *Epsom* a few weeks before with about the same number.

The Sanitarium at Kowloon that we have heard so much of, and on which it has been proposed to erect new hospitals and

barracks for the garrison of Hong Kong, has become unhealthy, and fever is reported to be rife amongst the European troops stationed there. The 99th Regiment was the one detailed for the garrisoning of Hong Kong and Kowloon, which latter it is our intention permanently to retain.

Summary of News from the Far East.

JAPAN.

NAGASAKI.

The following is the letter of our correspondent from this port, dated 22nd August, and excluded from our last owing to the want of space:—

A great deal of serious inconvenience has of late been entailed upon the British and other merchants at Nagasaki, by the unjustifiable interference of the Custom-house authorities with various matters in which they have no right whatever to meddle. Foreigners residing here are constantly obstructed in the most ordinary affairs of everyday life by the interference of the officials, and to such an extent is this inquisitorial system of supervision carried that we are harrassed by a perfect plague of Custom-house interpreters, whose daily visits to make impertinent inquiries and attempt ridiculous extortions, are an intolerable nuisance.

The treaty, in one of its clauses, provides that British subjects resident in Japan shall be at liberty to hire natives of Japan to be their servants, or to perform any lawful services. But the Custom-house takes upon itself to abrogate this wholesome rule by prohibiting boatmen from towing foreign vessels in and out of the harbour, unless boats are hired from the Custom-house and a most disproportionate amount of remuneration paid to one of the officials who styles himself "boat master," or something of that sort. The harbour being quite land-locked and surrounded by high hills, ships are often unable to move from their anchorage without some such assistance, being quite becalmed, although there may be a fine breeze blowing outside the mouth of the harbour at the same time. In consequence of this, two vessels out of every three that leave here require to be towed outside by boats, and notwithstanding constant remonstrances through the Consuls it is impossible to hire them, except through the Custom-house, and then only by submitting to much trouble and delay. In numerous cases ships have suffered detention in this way; and lately the *Win-deck* was kept 24 hours in port, the officials having not only forbidden the owners of the tow-boats to go off to her, when they were perfectly willing to do so, but absolutely refused to supply boats themselves, or to allow the ship to be towed out at all.

The case of the *Templeman* (particulars of which you will find in the minutes of Naval Court forwarded herewith) is one in which from the same causes arose much more serious results. The boatmen in this case also would, if allowed, have willingly performed the services required of them, and would have been glad to have placed their boats at the master's disposal for the liberal payment offered. But they were not allowed to tow the vessel at all without a Custom-house official in charge, and in consequence of his misconduct she was stranded. There can be no mistake as to the meaning of the decision of the Naval Court—and yet no redress can be obtained.

Another serious cause for complaint is the reluctance of the Government to inflict proper punishment for theft and other offences. Robberies are of daily and nightly occurrence, warehouses broken into and property stolen, not only at night but in broad daylight; yet no steps are taken to check the evils, and although the officials declare that they punish thieves whenever they catch them, it is quite certain that robbing a foreigner is looked upon as a venial offence, if not indeed as a meritorious and deserving achievement.

The Custom-house itself—the focus in which are centred all our official relations with the Japanese Government here—is by no means behindhand in endeavouring to fleece us to the greatest possible extent. Although the Treaty establishes a fixed rate at which dollars are to be received in paying duties, the officials have lately deliberately endeavoured to set this aside, and establish a rate which would defraud us to the extent of some 50 per cent. This having failed, they are now trying a similar extortion on a smaller scale, to which, of course, we oppose a steady resistance, and are consequently always in hot water with the Customs.

The representations that are constantly being made to H.B.M.'s Consul on these and other grievances are destitute of any effect whatever; and we have now to carry on business as well as we can under a complication of obstructions and difficulties that daily increase, the end of which we have almost ceased to look for or hope for.

The following is the evidence given by Captain Balmanno, of the *Templeman*, which vessel struck on a rock going out of the harbour:—

"I was yesterday towed out of the anchorage by Japanese towboats, having engaged them to tow me clear of the islands. The officer in charge of them told me that was a second stage, and the men demanded more than the double fare—they asked \$15, to which I consented; however they stopped towing the ship about a mile this side of Paponberg, when she was drifting on shore, so I set the foretopsail and wore the ship round. My only alternative was to run back into the anchorage, or work out, which I determined to do as a breeze had sprung up. I was working out of the passage according to my Chart, with no danger marked near, except the Barracouta Rock, of which I was keeping well clear, when the ship struck. This was about noon. The Chart I used was Richard's corrected Chart of Liebold's Nagasaki Port, 1855, corrected to 1858."

The following is the award of the court:—

"It is the opinion of the court that the ship *Templeman* struck upon a rock not marked or erroneously placed in the Chart—that there is no reason to attribute negligence in the navigation of the ship; but there seems little doubt that the calamity was entailed upon the ship by the misconduct of the towboats supplied by the Japanese officials. Signed, Geo. S. Morrison, consul; C. B. Templer, Lieut. I.N., agent for Transports; W. Dundas Cloete, master P and O.S.S. Cadiz."

A notification has been issued by the Consul-General at Yedo in consequence of the complaints of the Japanese that foreigners had visited the Sacred City without right or permit. In the notification of Captain Vyse, the acting consul at Kanagawa, promulgating this for general information, he says:—One of these transgressions was committed by the editor of the *China Mail*.

CHINA.

SHANGHAI.

From Shanghai the latest news is the 19th instant. The insurgents had looted all the villages between Kading and Paoshun, and encamped at Nansza. Refugees had come to Shanghai, whose tails had been cut off by the rebels. Four rebel spies had been executed at Shanghai on the 12th; they confessed their crime, and said that the looting party were only about 1,500. On the 14th the insurgents were reported at Woosung; they are supposed to intend visiting the island of Tsung-ming, which is crowded with refugees. The rebels at Kading were said to be constantly corresponding with those at Tsing-poo, in hopes of effecting a union, but the latter cannot move from fear of the country people, who are in arms against them. They had planned an expedition in foreign clothes as soon as they had united, which has not, of course, come off. The Taiping Wang at Nankin wanted funds badly, and had applied to the Chung Wang at Soochow, who in consequence ordered plundering parties to go about. The latter is reported to have been promoted by Tsien Wang, because he made friends with the foreigners at Shanghai and elsewhere. The local militia have got up a crusade against the inhabitants of San Chieu-li for siding with the rebels. The rebels at Sung-keang, after plundering and looting about the country, have taken Chang-yen-Cheu after some resistance. All about Shanghai gratitude is expressed for the repulse of the rebels by the foreigners, and a monster vote of thanks is being got up to the Ambassadors. The insurgents have established a Custom-house at Soochow, taxing silks at 6 taels per bale.

NINGPO.

A correspondent from this place writes:—Ningpo at present is in a very disquieted state, in consequence of a recent large influx of piratical Cantonese. Some are direct from Canton, and others are from Suchow, ripe for engaging in the same scenes of murder and pillage here that they were engaged in there. This city has no adequate force to oppose them hence is in constant jeopardy. At present, however, the Cantonese are quarrelling among themselves, several collisions having taken place in which lives were lost.

The insurgents are making, of late, great headway against the imperial forces. They have firmly established themselves in Choo-chow, one of the ten ruling princes of the rising dynasty making that city his place of residence. It is now ascertained that their recent taking of Hangchow was a stragem to decoy the imperialists from which was closely beset, and near being taken. The insurgents are again about to try to retake Hangchow, which if they succeed in doing they will

undoubtedly hold permanently. They hold firmly the two original ideas with which they commenced their revolutionary operations, viz., the destruction of idolatry, and the institution of the worship of the one true God; and the overthrow of the Tartar dynasty, and the establishment of a native Chinese dynasty.

FOO-CHOW-FOO.

Dates from Foo-Chow are to the 20th Sept. A missionary had rented a house inside the city, but the Mandarins insisted on his withdrawing, as the treaty makes no mention of foreigners residing within the city. The British Consul has taken up the subject, and protested against such a narrow view of the treaty being taken. The native authorities have collected a fleet to prevent the Canton boatmen from going up to Foo-Chow.

SWATOW.

Dates are to the 13th Sept. Since the arrival there of the gunboat *Weasel*, a feeling of confidence had been experienced. There were still evident signs of hostility to foreigners, however, on the part of the natives. A proposed new site had been marked off for foreign residences by the Mandarin, but about 2,000 men from Swatow turned out on the ground, and on the first favourable opportunity offering pulled up the stakes. A fresh placard had been also issued against the "undutiful barbarians." Foreigners cannot show themselves at Swatow without being stoned; and persons landing on the North bank of the Han are subject, if they chance to meet a party of natives sufficiently strong, to be pelted back to their boats. The *Taoutae* had left for Canton, to see the Governor-General Laou on the above subject.

HONG KONG.

The *Friend of China* was to be established in Canton by Mr. William Tarrant, on the 1st Oct. last.

The Caldwell and Hong Kong Abuses Enquiry was still proceeding, and would occupy many more sittings of the Council.

An action had been tried by a native Indian firm against the owners of the steamer *Scotland*—W. S. Lindsay and Co.—for non-delivery of cargo, on the ground of insufficient security for freight alleged by the captain's agents, Messrs. Russell and Co. The Court ruled that the security offered was sufficient. The amount of damage sustained by the plaintiffs is about £1,000 to £1,500. A new trial has been granted.

We learn that the Portuguese concluded a commercial treaty with Japan on the 3rd August. It is signed by his Excellency I. F. Guimaraens, the Governor of Macao, and Midzgoetse Sanoekine Kami, Sakai Okino Kami, and Matsdaira Dzirrobe, and came into effect on the 1st October.

The French steamer *Weser* left on the 20th Sept. for Suez, calling at Saigon and other places *en route*. She will keep up the line.

CANTON.

The Imperialists gained an important victory over the rebels in the Lokcheong district on the 29th Aug., by the *Taoutae* Wu, and the district city was also recaptured on the 3rd Sept. As the rebels have been obstructing the passage of teas to Canton for some time from Hunan, it may now be expected that they will come down freely, as the passes are clear.

MALACCA STRAITS.

SINGAPORE.

The following statement of the trade of the Straits we extract from the *Straits Times* :—

Comparative Statement of the Imports and Exports of Prince of Wales Island, Singapore and Malacca.

Imports and Exports.		1849-50.	1859-60.
Singapore.			
Imports	Rupees	27,232,744	47,199,139
Exports		21,086,269	47,199,139
		48,319,013	103,713,024
Prince of Wales' Islands.			
Imports		5,745,791	15,800,000
Exports		6,953,081	11,500,006
		12,698,872	35,300,000
Malacca.			
Imports		736,065	5,748,887
Exports		580,149	3,452,396
		1,216,214	9,201,283
Total	Rupees	62,234,099	148,214,307

The disturbances at Sungie Ujong appear to have been finally settled, and the miners are beginning to return to their occupation.

Intelligence has been received of the discovery of some new coal mines at Siam.

It has been announced that the Bishop of Labuan will be raised to the See of Singapore on the transfer of that place to Singapore.

The *John Buchanan*, chartered to convey the officers and men to Labuan, on account of the Labuan Coal Company, sailed from this on the 28th Sept.

The Swiss rebellion in Java had quite subsided.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

- BURNETT—At Singapore, on 27th Sept., Mrs. S. Burnett, of a daughter.
 FINDLAY—On the 6th inst., at 15, Heriot-row, Edinburgh, the wife of George Findlay, Esq., late of Hong Kong, of a son.
 GEE—At Spring Gardens, on the 25th Sept., Mrs. H. H. Gee, of a daughter.
 GUBDAY—At Shanghai, on the 6th September, Mrs. A. M. Gubday, of a son.
 HUTTON—At Canton, on 9th Sept., the wife of the Rev. S. Hutton, Wesleyan Missionary, of a daughter.
 WONGSA—At Bangkok, on 7th Sept., the wife of H.R.H. Prince Krom Luang Wongsa, of a daughter.

MARRIAGES.

- BOWRING—CASTLE—On the 8th inst., at the Unitarian Chapel, Bristol, by the Rev. B. Apeland, Sir John Bowring to Miss Deborah Castle daughter of Michael Hinton Castle, Esq.
 GILFILLAN—ARMSTRONG—On 22nd Sept., at Singapore, by the Rev. A. D' Nicolson, Samuel Gilfillan, Esq., to Isabel, daughter of the late John Armstrong, Esq., of this place.
 SPEIDEN—McKEEVER—On the 17th ult., at the Cavalry Church, New York, by the Rev. Dr. Hawks, William Speiden, junr., of Hong Kong, to Marion, daughter of the late Commodore J. McKeever, United States Navy.

DEATHS.

- BARRAS—At Sin-Yuh-Shin, Shanghai, on 5th Sept., Mary, infant daughter of John Renwick and Susan Barras.
 BAUMGARTEN—At Malacca, on 17th Sept., after a lingering illness, Charlotte Luberta, the beloved wife of William Baumgarten, Esq., aged 36 years, deeply and deservedly regretted by a large circle of relations and friends.
 BELL—On Saturday, the 25th Aug., at half-past 1 P.M., from congestion of the brain, caused by sunstroke, at Fort Macao, China, whither he had gone from Canton for the benefit of his health, Lieutenant Alexander Bell, of H.M.'s 3rd Regiment Bombay Native Infantry, in his 31st year, son of the late Alexander Bell, Esq., of the Bombay Civil Service, Member of Council, most deeply mourned by his widowed mother, and sincerely lamented by a large circle of relatives and friends.
 BURHORN—On the 25th Aug., J. H. Burhorn, Master of Bremen barque *Julie*, aged 35 years.
 DARLING—At Hong Kong, on the 16th Sept., John Darling, Esq., of Canton.
 HANCOCK—At Shanghai, on the 9th Sept., Edith Elais, second daughter of Herbert Hancock, Esq., aged 4 years.
 MARQUES—At Hong Kong, on 24th Sept., Mr. F. Marques, Book-keeper at Messrs. Smith, Kennedy, and Co.
 MCGREGOR—On the 11th Aug., at Hong Kong, Capt. Alexander E. McGregor, 31st Regt.
 PEREIRA—At Hong Kong, on the 10th Sept., at 1 A.M., Ignacio D'Almeida Pereira, aged 39 years.
 ROZA DE SENNA—At Macao, on 24th Sept., Miss Idalina Roza de Senno, aged 24 years.

COMMERCIAL REPORT.

CHINA.—EXPORTS.

TEA.—At Shanghai the settlements consist principally of Japan sorts. Settlements are reported of two chops of Ningchow congou at 33 taels; 2,000 chests Shanghai packed at 15 to 20 taels. In green teas the market has been better supplied, but all have been purchased for the United States. These settlements comprise 6,000 half chests and 2,500 10 catty boxes Pingsuey and Hoochow teas, besides which 1,300 half chests Japan leaf have been taken. The stock for sale on the market is computed at 1,000 packages Hoochow; 10,000 ditto Japan, and some Shanghai packed. There are prospects of the new teas coming forward soon, the rebels having retired. At Foo-Chow-Foo there is a good supply of all descriptions, settlements have been 20,000 chests and 15,000 half chests of congou, at 15 to 22 for middling, up to 25 for Kysows. Souchong have been settled at 20 to 27, and Oolong, from 15 to 24. The unsold stock left upon the market is stated at 65,000 chests of Congou (of which one-third are Hohows and Ningchows, which are held for extreme rates.) 5,000 chests Souchong, 1,000 chests Flowery Pekoe, and 5,000 half chests Oolong, chiefly Foochow packed. At Canton, the rebels are intercepting supplies but a few chops of Ningchows would be placed on the market shortly. Four chops of which are reported to be settled at 28 taels. GREEN TEAS.—2,500 boxes Gunpowder and Imperial at 22 a 24 taels, 300 half chests Hyson at 27 taels, and 220 half chests Young Hyson at 22 taels.

SILK.—At Shanghai holders have shown more desire to ship off, and this, with the advices from home, have brought the rates down about 10 taels. Tassles, however, still fetch 430 taels, and Tysams 340 to 359. Total settlements being about 4,000 bales since last mail, leaving a stock of about 5,000. The present mail will bring about 2,400 bales, and about 8,000 bales are in course of shipment by sailing vessels.

DRUGS.—Cassia Lignea is quoted at Canton, \$17 75c. to \$18. Supplies are expected at Macao, where \$16 50c. is talked of. Cassia buds: None. \$32 to \$33 the quotation. Cassia oil: It will be seen from the tables that large shipments have been made; 30 piculs are being offered at Macao, at \$290 to \$300. Star Ainsseed can be had, at \$15 to \$16. Ainsseed oil has also been shipped largely, \$170 to \$175 is about the figure; the article is abundant. Vermillion: Canton, Sunshing chop, \$38 per box. Fire Crackers: 85c. per box, of 40 packs of the best quality. Matting: Canton, linter cargo, 10c. per yard of four quarter white, and 11c. for four quarter checked.

CHINA.—IMPORTS.

At SHANGHAI.—Business has somewhat recovered, and sales are announced of grey shirtings, 22,000 pieces; white shirtings, 3,500 pieces. T-cloths, 7,000 pieces; white broads, 1,300 pieces (at 1t. 9m. to 1t. 9m. 5c.); spotted shirtings, 3,500 pieces (at 1t. 9m. 5c.); chintz, 500 pieces (at 1t. 9m. 5c.); damasks, 240 pieces (at 4t.); velvets, 404 pieces (at 1m. 3c.); American drills, 20,000 pieces; long ells, 1,000 pieces; camlets, 50 pieces; lead, 300 piculs; iron, nail rod, 1,000 piculs.

At HONG KONG.—Cotton yarn 223 bales, market advancing; grey shirtings 9,250 pieces, in improved demand; white ditto, 1,500 pieces; T-cloths, 50,000 pieces, market better; long ells 850 pieces, in good demand; Spanish stripes 400 pieces, in heavy stock; lastings 360 pieces, stock heavy; lead 1,200 piculs, demand improving; tin plate 50 boxes, stock heavy; iron and window glass in excessive stock and very dull. Coals, the stock is small, but the demand being very slack. English steam have been sold at auction at \$9 to \$10; Sydney at \$6 to \$7. Provisions, ship-chandlery, &c.—All articles under this heading are in excessive supply; flour has declined, Gallego being quoted \$11; beef and pork are lower, and in less demand—it is difficult to give a quotation.

MANILA.

EXPORTS.—Current Clayed Sugar: No transactions reported, the nominal quotation is \$5.62½ per pecul. Unclayed sugars have been a trifle cheaper, Zebu and Iloilo having been sold at \$3.59½, to \$3.62½ per pecul. Some Taal now for sale is held for higher proportionate prices, but may be quoted \$3.50 per pecul. Hemp is rather easier again, in consequence principally of the absence of tonnage available for the United States: the quotation is \$4.18½ per pecul for current quality.

IMPORTS.—There has been little doing and if, as expected, the bad weather that set in a few days ago should continue, purchasers will not care to increase their stocks. It will, however, be a long time before any direct importations are received though the Amistad from Singapore will bring up some of the surplus stocks held there. No portion of the American goods ex Golden City have yet been placed. A few more, 2,000 pieces grey drills and sheeting, have been received per Mugli.

SINGAPORE.

EXPORTS.—There has been a moderate demand for produce during the fortnight, and such articles as are procurable have been taken freely at about former quotations, but the continued scarcity of pepper, coffee, sugar, &c., which are only coming in in very small quantities, tends to make the amount of business done in the aggregate smaller than usual. Tin has been purchased steadily at last mail's rates.

IMPORTS.—The non-arrival of the native fleet, and consequent want of demand for export, have rendered the past fortnight an exceedingly dull one for almost every description of goods.

STOCK OF IMPORTS AT SINGAPORE ON THE 30TH SEP., 1860

Grey twist, No. 16-24, 1,323 bales.	Long ells, 1,016 pieces
Do. do. 30, 404 "	Camlets, 947 pieces
Do. do. 40, 446 "	Lastings, 1,563 pieces
Do. do. 50-60, 10 "	Orleans, 2,602 pieces
Turkey red twist, 504 bales.	Flannel, 452 pieces
Imperial red do., 150 bales.	Beef, 179 casks
Other colours, 384 bales.	Pork, 175 casks
Grey shirtings, 87,650 pieces.	Beer in wood, 629 casks
" long cloths, 3,660 pieces.	Do. in bottle, 22,154 dozens
" madapollams, 20,888 pieces.	Iron, flat, round and square, 34,318 piculs

Per Matilde to Liverpool.—Sugar, 8,150 piculs; hemp, 3,240; sapanwood, 510; M.O.P. shells, 176; cigars, 100 mila.

Per Fearless to New York.—Hemp, 8,174 piculs; sugar, 7,000; sapanwood, 350; hides and cuttings, 126; cigars, 360 mila.

Per Boston to Boston.—Hemp, 6,712 piculs; sugar, 4,800; sapanwood, 400; hides and cuttings, 809; cigars, 200 mila.

Per Olympia to Melbourne.—Sugar, 8,852 piculs; cordage, 1,990; cigars, 1,023 mila.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From Liverpool: Sept. 16, Jamna, Premier. From New York: 8, Swordfish.

At HONG KONG, MACAO, and CANTON.—From London: Sept. 14, Herculean; 23, Great Britain, Clara; 24, Kathay. From Southampton: 21, Elbe. From Newport: 23, Eva Johanna. From Newcastle: 25, Cleveand. From Sunderland: 25, Columbine. From New York: 21, Maury. From Boston: 21, Sancho Panza.

At SINGAPORE.—From Liverpool: Sept. 27, Birch Grove. From Plymouth: Oct. 1, Beatrice. From Glasgow: Sept. 22, Asia. From Newport: 27, John N. Cushing. From Cardiff: 21, Guwitjee and Maria; 29, Cornelia.

SAILED.

From SHANGHAI.—For London: Sept. 7, Ballarat; 12, Lucknow.

From Foo-chow-foo.—For London: Sept. 3, Ceylon; 5, Maida, 17, Mary Ann Wilson. For Belfast: 3, Celestial. For Cork: 18, Queen of the Ocean. For New York: 8, Magnet.

From HONG KONG, MACAO, and CANTON.—For London: Sept. 18, Lamermuir; 20th, Crystal Palace; 18, Kelso; 19, Fort George. For Liverpool: 11, Jessie Beazley. For New York: 27, Fleet Wing.

From MANILA.—For London, Sept. 5, Menam. For Liverpool, 8, Monsoon; 20, Matilde. For New York 17, Fearless. For Boston, 18, Boston.

From SINGAPORE.—For Falmouth, Oct. 5, Johanna Kepler.

From PENANG.—For London, Sept. 4, Germanie.

LOADING.

At SHANGHAI.—For London: Assyrian Beemah, Kate, Carnie, Livingston, Ocean Mail, Wynaad. For New York: Phantom.

At Foo-chow-foo.—For London: Earl of Windsor.

At AMOY.—For Hamburg: Juno. For New York: Anne, North Wind, N. B. Palmer.

At HONG KONG, MACAO, and CANTON.—For London: Caroline Chisholm, Xulla, Patriotess, Friar Tuck, James Vinicombe, Janet Willis, Mary Lee, War Eagle. For Havre: Le Lion. For New York: Hotspur, Ocean Steed, Sea Serpent. For Havana: J. Wakefield, Live Yankee, Rael Oceano. For San Francisco: Columbo, Early Bird.

At MANILA.—For Cork: Arizona, Clifton, Recorder. For Boston, Albero, Golden City. For Melbourne, Neptune, Peru.

At SINGAPORE.—For London, Atalanta, Captain Cook. For Liverpool, J. N. Cushing. For New York, Quickstep.

At PENANG.—For London, Three Bells, Beucleuch, Toronto. For New York, Revely. For Boston, Versailles.

CASUALTIES.

SHANGHAI.

The Siamese Crown was totally wrecked on the 26th August, and while on the rocks part of her crew were murdered by pirates, the captain, mate, and remainder of crew being picked up by the Sydney. Contrary winds caused her to anchor, and on its coming on to blow, she drove on shore.

FOO-CHOW-FOO.

A typhoon was experienced on the 21st September, in which the Eagle fouled the Mandarin, the former losing foremast, jibboom, and bulwarks forward. The latter sustained no damage.

SINGAPORE.

The wreck of the Sir James Brooke (S.) has been sold for 1,050 dols., and the cargo remaining on board for 270 dols.

The Benjamin Sanier, laden with cotton, from Bombay to China, struck on Alligator Island during a heavy squall, on the 21st September, and became a total wreck. Her cargo is being got in, but all damaged.

The Africa, from Cardiff to Shanghai, with coals, struck on a nick in the Macclesfield Straits, on the 4th September. The Eva Johanna and Kendricka were close by at the time, and remained in company for two days, after

which she was abandoned, having thrown overboard three hundred tons of coals, but of no avail. The captain, mates, and men were then taken on board the other two ships.

PENANG.

The Burnham drove into the Henrietta during a heavy squall, on the 21st September, doing considerable damage.

The Marguard Family has been righted, the water being pumped out by the fire engine of the Municipal Commissioners of Police.

HONG KONG.

The Panic, from Bombay, with cotton, while in this harbour, was found on fire on the 16th September. Assistance was soon to hand, when she was got under all sail, and lashed to the steamer Sir J. Jeejeebhoy, which towed her down to East Point, and beached her, where she soon filled. Only 50 bales out of 2,000 on board could be recovered on the first day. The cause of the fire is supposed to have been spontaneous combustion. Reports since say she has been raised, and is undergoing repairs.

FREIGHTS AND CHARTERS.

At SHANGHAI.—For London, £3 for tea, and £5 to £7 for silk. For New York \$12 tea, \$20 silk. Shipping is rather more valuable than was anticipated, the transports not having been discharged so soon as was expected. The principal settlements are the Loch Lomond to Amoy and Swatow for \$3,500 with 30 lay-days; the Auguste and Meliore to Foo-chow-foo for \$1,350 for 20 lay-days.

At AMOY.—Good employment is still to be found for small craft. Vessels, however, are abundant.

At HONG KONG, MACAO, and CANTON.—For London, £3. There is a moderate supply of shipping, the rates being depressed by the anticipation of the transports being discharged; still a good business has been done, with a demand for small vessels. The most important settlements are—Xulla, Lord of the Isles, and Friar Tuck, for London, at £3.—The Lion, for Havre, at £6, and in Coast Charters.—President Turner, for three months, at \$1,000 per month.—Vater Gruner, to Shanghai and back, for \$2,700.—The Caroline, to Ningpo and back, for \$1,700 in full.

At MANILA.—There are no signs of higher rates being obtained for Europe, though tonnage is scarce. The Recorder loads at £2 15s. for United Kingdom, with 5s. extra for London; the Olympia for Melbourne at £3 for light weight.

At SINGAPORE.—The rates offered are still low, but with a fair demand for shipping, there being but few disengaged vessels in harbour. Current rates are £2 10s. to £3; to New York \$9 to \$11. The Benledi has been settled to load at Bangkok to a port in the United Kingdom, £3 10s. and 5s. extra if laden inside the Bar, and 10s. if ordered to the Continent. The Balaklava for London at £3 all round, to load at Sarawak and Singapore.

At PENANG.—For London £2 15s. for dead weight, £3 5s. light, and £3 10s. for measurement, at which rates the Beucleuch, Three Bells, and Toronto are loading.

PASSED STRAITS OF SUNDA.

From England and Continent to China: Sept. 11, Antonia Gertruida, Marinus Willem, Charra; 13, Tung Ya; 14, Britannia, Bato; 18, Chance; 17, Bride of the Seas; 16, Sebastopol; 22, Spiridon, Hesperus, Sir Isaac Newton. From New York: 21, Snow Squall. From China to England and Continent: 9, Wellington. To New York: 22, Christopher Hall. To Bombay: 13, Gertrude. From England and Continent to Singapore: 11, Guwitjee and Maria, Asia, Cornelia, Birch Grove; 12, Almonde; 17, John N. Cushing; 21, Beatrix. From Boston: 10, Quickstep. From Singapore to England and Continent: 13, General Wyndham. From Manila to New York: 12, Don Quixote; 16, Annie Berden. To Boston: 14, Arab. To Havana: 22, Emigrante. From England and Continent to Batavia: 12, Esther; 18, Pauline, C. Eleonore.

MERCHANT STEAMERS IN CHINA WATERS.—Engaged in the Canton, Hong Kong, and Macao traffic.—British: Fei Ma, Sir J. Jeejeebhoy, Iron Prince, Mee Lee, Zingari. American: Pak Wan, Willamette, Cumfa, Spark. Portuguese: Inveigado, Shamrock.

ENGAGED IN THE COAST TRAFFIC BETWEEN SWATOW, AMOY, FOO-CHOW, AND SHANGHAI.—British: P. & O.'s steamers, Chusan, Formosa, and Rajah; Messrs. Jardine, Matheson, & Co., Hellespont; Messrs. Dent and Co., Yangtze; Mr. Lapraik's Undine.

POSTAL REGULATIONS.

LETTERS and Newspapers are despatched to China, Singapore, &c., by two routes, viz. via Southampton, on the 4th and 20th of each month, and via Marseilles, on the 10th and 26th. They reach their destination at the same time.

BOOKS are forwarded through the Post-office to China (Hong Kong only). Books must be packed in covers open at each end. Each packet may contain any number of books or pamphlets; but it must not exceed 3 lbs. in weight. The postage on books is payable in advance by stamps.

Continental Intelligence.

FRANCE.

General de Montauban has, it is said, been named a senator as a reward for the skill he displayed in preparing and executing the attack on the Chinese positions. The modesty with which he speaks of himself in his official report is the subject of general remark.

The *Moniteur* publishes a second series of decrees granting rewards for distinguished services in the late affairs in China, the recipients on this occasion belonging to the army. General of Brigade Collineau has been promoted to the rank of General of Division, and Colonels O'Malley and de Bentzman to that of Generals of Brigade; a number of other promotions have been made from colonels down to sub-lieutenants. In the Legion of Honour there have been three promotions to the rank of commander, six to that of officer, and sixty-six nominations of knights. Among the last-named is the drummer Fachard, of the 102nd Regiment, whose gallant conduct was particularly mentioned in the official despatch of General Montauban. The list closes with the names of sixty-two non-commissioned officers and privates on whom the military medal has been conferred.

I extract the following from the *Lithographic Sheets* :—

"The letters of the correspondents are most impartial as to the brilliant part the French troops performed in the signal victory gained on the banks of the Peiho, which opens the gates of Peking to English and French interests. *The Times*, as usual, distinguishes itself by the abundance and clearness of its documents. It is a perfectly exact photography of the deeds and movements of the generals and soldiers."

Although the letter of the special correspondent of *The Times* has been principally quoted, or rather made use of, by the press here, I am happy to inform you that your correspondent's letter and "plan of attack" has been much sought after, and the copies you sent your agent here, Mr. Fowler, were soon used, and no doubt you have had a demand for "more."

The latest advices from Shanghai (states the *Patrie* of the 7th), announce that Kwei-Liang, Advising Mandarin to the Imperial Cabinet, and Hang-fou, Viceroy of the province of Cheh-li, the Commissioners Extraordinary, appointed by the court of Peking to carry on negotiations for a Treaty of Peace with the Ambassadors of France and England, arrived at Tientsin on the 6th September. We are assured that by the last accounts the treaty had been signed in that town, and that the exchange of the ratifications would take place in the very capital of China, according to special ceremonial, which was to be the object of a separate negotiation and convention.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Nov. 6.

Since my last letter the time and attention of the Second Chamber has been much devoted to the affairs of the East India Colonies. Your readers will recollect that during the month of May last the Chamber passed resolutions affirming that the regulation of the sugar contracts at Java should be settled by a law on the subject. To this measure the Colonial Minister was strongly opposed, declaring that he did not feel himself bound in any way by their vote, and that he should continue to act in the affair without the co-operation of the States General. This he has done, and the royal decree has been executed in the East Indies and the sugar contracts renewed according to the plan laid down by the Minister. The Chamber then appointed a commission of five of its members to examine further, but when they presented their report it was signed by only three of them. Notwithstanding this irregularity, the Chamber passed a fresh resolution by 34 votes to 8, confirming their previous conclusions of the 11th of May, against which M. Rochussen, the Colonial Minister, again entered his formal protest, alleging, moreover, that as the contracts have been renewed, it would be unwise and indeed impossible to disturb them now.

The Netherlands Trading Company have chartered the Dutch frigate-built ship *Bilderdyk*, Captain Loeschen, to convey 69 soldiers in the steerage, and 11 officers as cabin passengers to Java.

By the last mail copies of a little work were received here, printed at Sourabaya, and entitled "The Second Boni Campaign," which is deserving of notice, as it is published for a charitable purpose, the profits arising from the sale being destined for the relief of the widows and orphans of the crew of the Dutch war-steamer *Onrust*, which vessel, it will be re-

membered, was treacherously overpowered by the natives, and the officers and crew savagely butchered.

A letter from Harderwyk states that a detachment of foreign recruits for the E. I. army has been sent to the depot of the 2nd Regiment at Gonda to receive their equipment, after which they will be sent to Flushing and incorporated with the field and service companies of that regiment, to learn their drill and military duties previous to embarking for their destination.

I am enabled to inform you that the King has signed a decree by which the Recruiting-office hitherto existing at Biberick, on the Rhine (in the Duchy of Nassau), and conducted by Colonel Scharren, is definitively closed and given up, it being the intention of Government, after the late melancholy experience how little these foreign mercenaries are to be trusted, to alter the system of filling up vacancies in the E. I. army, and no longer to enlist promiscuously any ragamuffins who may offer themselves. The safety of the colonies and the dignity of the Dutch standard alike render such a proceeding indispensably necessary.

The steam-corvette *Reteh*, Lieut. de Kock, has received orders to leave Nieu Deep for her destination (the East India station) on the 10th inst.

Nothing daunted by the ill-success attending the ministerial liberal reform of the tariff of last session, which passed the First Chamber, but was thrown out by the Lower House, the Government has verified the promise held out in the late opening speech from the Throne, and again submitted the modified tariff to the Second Chamber for their approbation. Great credit is due to the Cabinet for their untiring exertions in the cause of free trade, and it is to be hoped they will not be disheartened by the clamour of the ignorant and prejudiced, but continue the good fight of a liberal and enlightened commercial policy against the benighted and antiquated system of protection and privileged monopolies.

According to the proposed alterations, the import duty on raw articles is to be abolished altogether, that on half-manufactured articles reduced to 2½ per cent., and on manufactures it is not to exceed 5 per cent. *ad valorem*. The protective duty on earthenware, glass, and woollen manufactures is to cease by degrees, being reduced for the first year to 10 per cent., for the second to 8 per cent., for the third to 7 per cent., for the fourth to 6 per cent., and finally for the fifth year and for the future 5 per cent. The import duty on all descriptions of grain is proposed to be 1½ florin per last of about 10 quarters, whilst that on tea—as an article of luxury—is to be raised to 25 florins per 100 lbs.

An important feature in the new tariff is that all articles not specially enumerated are to be imported duty free, among which the following will be included :—chemicals, drugs, dyeing materials, borax, camphor, dried ginger, &c.

The duty on exports is to be abolished, with the exception of three articles—bones, rags, and cattle. The Minister of Finances estimates that the duties levied according to the new tariff will produce 146,398 florins more than hitherto.

UNITED STATES.

(FROM OUR OWN CORRESPONDENT.)

NEW YORK, Oct. 23.

It is designed to establish a regular line of clipper ships between New York and Kanagawa, Japan. The chief promoter of this line is R. H. Gallaber, a merchant of New York, having a house in Japan. The first ship was announced to sail at an early day, between twenty and thirty passengers, and nearly one thousand tons of freight, consisting of machinery, frame houses, and assorted merchandise, having been secured for transportation on her outward voyage. Among other things depended on for a return cargo is a quantity of Japanese seed wheat, which has been ordered and is said to be of a superior quality.

AMERICAN DIPLOMACY IN CHINA.

(From the *New York Times* of Oct. 20).

A special correspondent of the *London Times*, who accompanies the British in their China expedition, has sent home a long letter enumerating the causes that led to the present war, and upholding the course that the Allies have thought proper to pursue in their dispute with the Celestial Emperor. We can hardly ask the *Times* correspondent to endorse the peaceful diplomacy of the United States while he is under obligations to justify the very opposite policy of his own Government. But we have certainly a right to expect that a correspondent placed in so responsible a situation would at least steer clear of deliberate misrepresentation. He says, in regard to Mr. Ward's visit to Peking, about a year ago, that— "This is all incorrect, and widely different from Mr. Ward's own version of his journey to Peking. It differs, too, very materially from the accounts published at

the time in British journals. Every possible respect was shown the American envoy while in the Chinese capital, and the arrangements for his visit were made under an Imperial order. It is true that his movements were closely watched, but proper allowances should be made for Chinese prejudices and exclusiveness, and for the fact that Mr. Ward had only recently parted from the British and French Ambassadors, then at open war with the empire. Mr. Ward, after the Anglo-French force had been repulsed on the Peiho, took a practical and business-like view of his position. Finding that he could not pass Taku, he applied to the Government of China to give him access to Peking; and the request was granted. American diplomacy, up to this time has effected much more in China than the arms of France and England combined; and while the independent attitude of the American minister has obtained for him the confidence of the Chinese on the one hand, and the Anglo-French party on the other, that same attitude will enable him, when the proper time arrives, to mediate between the belligerents, and save unnecessary bloodshed. The position of the American minister could not be more honourable than it is, and as the favoured nation clause is in our treaty, it will be impossible for either France or England to acquire any privileges by the present war that will not equally accrue to citizens of the United States.

MONETARY AND COMMERCIAL.

There has been a fair business in East India goods during the week, but at irregular prices for most descriptions. Teas have not been active, yet prices have been sustained. Spices have been steady, with sales to a fair extent. Indigo and Java coffee have been without change of moment.

TEA.—The public sale held on the 16th inst. was well attended, and the lots brought full prices. There was nothing of moment doing at private sale. Another auction sale was held on the 19th inst., and with a very large attendance. The greens were all sold at slightly improved prices; blacks also brought full rates, no Oologs being sold below 38c. At private there is nothing of moment doing. An invoice of 10,000lbs. fine Japanese Oolong, per *Urania*, via Shanghai, the first and only parcel of fine quality ever received here from that country, has been disposed of on terms not made public.

COFFEE.—The market has remained firm. The sales have embraced 2,000 packets Java at Boston, 16c., with some lots in bags here at 16½c., and 100 bags Ceylon, at 14½c. The stock embraces 550 mats and 750 bags.

HEMP.—The market was steady, but not active. The sales at Boston have embraced 500 bales Manila, at 6c., and 600 ditto Jute, at \$92. 50c. to \$95.

INDIGO.—The market is quiet. About 40 to 50 cases Manila have been sold at 85c. to 85c., and 15 chests Bengal sold on private terms.

TIN.—The market remains without change of moment. Sales, 3,000 slabs Straits at Boston, 32c. account, and some lots at 31c. cash, and 100 slabs Banca at 31½c. cash.

SPICES.—The demand has been moderate. The sales embrace 1,500 bags pepper at port, We notice sales of 200 cases No. 1 Nutmegs, in lots, at 40 to 42½ cents.; 62 do. Mace, before arrival, 37½; 554 bags Pepper, part 8½ to 8½; 1,000 mats Cassia, 22, 6 mos.; 50 bags Pimento, 6½; and 50 bales Cloves, 8, cash.

COTTON.—The export of cotton goods from the port of Boston for the month ending Sept. 30 has been as follows:—

	Packages.	Value.
To East Indies	100	\$5,500 00
Smyrna	190	12,038 69
Cuba	6	400 00
Hayti	103	13,116 00
British Provinces	491	23,611 81

THE ICE TRADE.—The export of ice from the port of Boston for the month ending September 30 has been as follows:—

	Tons.		Tons.
To China	550	To Cuba	415
Bombay	950	Porto Rico	150
Ceylon	1,010	New Orleans	5,173
Brazil	233	Mobile	250
Antigua	100	Savannah	305
Port Spain	226		
Total for September			9,362
Previously, since January 1			113,177
Total			122,539

ARRIVALS.—Borneo, barque, of Greenock, Nichols, at New York, Oct. 12, from Penang; Romance of the Sea, Clough, at Boston, Oct. 11, from Manila; Goddess, Crowell, at Boston, Oct. 12, from Calcutta; H. M. Hayes, Elliott, at Boston, Oct. 17, from Bombay, for Liverpool, put in in distress; Mattapan, Dunbar, at Boston, Oct. 18, from Calcutta.

DEPARTURES.—Adirondack, Burmeister, from New York, Oct. 10, for Melbourne; Crusader, Moore, from New York, Oct. 10, for Melbourne; Don Pedro II., Lewis, from Boston, Oct. 10, for Hong Kong; Rattlesnake, Hendee, from Boston, Oct. 11, for Bombay; Ariel, Jelly, from Providence, Oct. 15, for Zanzibar; Independence, Crowell, from New York, Oct. 17 for Hong Kong; Coringa, Ward, from Boston, Oct. 19, for Batavia; Philippe Delanoye, Terry, from Boston, Oct. 20, for Hong Kong.

LOADING.—At New York.—For Hong Kong: Eureka, Cutler. For Melbourne: Grey Feather, Mayo; James Littlefield, Potter; G. W. Bailey, Koopman. For Sydney, N.S.W.: Cincinnati, Gladd.

AT BOSTON.—For Calcutta: Geneva, Crocker; Mary Ann, Remmonds; Sea King, Barker. For Melbourne: Crystal Palace, Hammond; William Wist, Power. For Hong Kong: Nautilus, Elwell.

HONG KONG POST OFFICE.—The *Army and Navy Gazette* says:—“A correspondent from China has written to us complaining of the irregularities existing in the management of the post-office at Hong Kong; and strange enough his own letter brought conviction to our minds as to the truth of his statements, for on the envelope distinct directions were written that the missive should be forwarded to us *via* Marseilles. These were utterly disregarded, and the correspondence, which might have been useful to us had it been sent by the channel indicated, was comparatively valueless when received by Southampton.”

Literature.

Is our War with the Tartars or the Chinese? By John Scarth. Smith, Elder, and Co., 65, Cornhill.

There are not perhaps many of the opinions in this pamphlet which we should be prepared to endorse, but we are nevertheless bound to welcome it as a clear and forcible statement of the views of an able and, we are well assured, an honest writer. There is no possibility of mistaking Mr. Scarth's meaning—neither his policy nor his style is enigmatical. He has, right or wrong—what few men seem to have on questions relating to China—precise and definite notions; and he tells us, without circumlocution, the policy he would have us pursue. The substance of the pamphlet is indicated by the question with which we are met, almost at its commencement. “Does it not appear strange,” asks Mr. Scarth, “that the efforts of British diplomacy have been directed to uphold the present Tartar dynasty of China?”—Possibly it may; but we are not quite sure that we should be pursuing a much wiser course were we “to uphold” the rebels. We are not yet, we confess, altogether satisfied of what Mr. Scarth terms “the righteousness of their cause.” In other words, we do, unfortunately, *doubt their Christianity*. We are convinced that our only safe policy, as between the Tartar dynasty and the Tai-ping revolutionists, is strict neutrality. Our relations with neither of these contending Powers are at present very satisfactory, and we shall have enough to do without either assisting the Emperor to exterminate the rebels, or the Tai-ping insurgents to overthrow the Tartar dynasty. The pamphlet before us contains many fearless and sensible remarks on the opinions Lord Elgin is known to entertain respecting this revolutionary movement, as well as on the policy formerly pursued by his lordship under the influence of his “advisers-in-chief” Messrs. Wade and Lay. It contains, moreover, some truths which we hope are as deeply impressed on the minds of Lord Elgin and Baron Gros as they undoubtedly are on the mind of Mr. Scarth.

PAPER AND BAGS IN CHINA.—From a paper by Dr. Macgowan, in the *Technologist*, we extract the following:—“The graceful and useful bamboo is the source of paper supply in China. The paper made from its culms is sufficient to meet the demands of the Chinese. It is, for the most part, of a quality unfit for European books and newspapers. In some places the article is manufactured with such care as to answer even for foreign writing paper. The Anglo-Chinese newspapers, however, find it best to import their material from England. The paper mulberry also contributes to the paper demand in China, and so does rice-straw. Do you ask what becomes of the cast-off, or rather fallen-off garments of the uncounted millions of China? The world of letters can derive no aid from Chinese rags, until leather becomes more abundant in that country. Crispin claims them all for soles; the shoes of China have soles an inch thick, formed of suitably-prepared rags, faced with a thin strip of leather.”

THE COOLIE TRADE.—A meeting of the Court of Policy at Demerara was held on the 24th ult. In a report of the Auditor-general on the transactions of the Immigration Loan Commissioners, it was stated that during the season there had been fifteen arrivals of Coolie transports, with 4,786 immigrants, at a cost of \$232,523 42c. Of these people seventy-one died in hospital, six were still there under treatment, thirteen orphan children had been either placed with their relatives or sent to the Orphan Asylum, and the remaining 4,696 had been sent to the estates. On its becoming known that hostilities with China had been determined on, the rates of passage-money rose immediately. For the twelfth vessel taken up an agent in Calcutta paid £12, but for the remaining three he had to pay at the rate of £14 for each statute adult, thus causing an additional outlay of \$18,313 42c. for the same.

INDIGNATION AT THE WAR.—A correspondent of the *Morning Star*, signing himself Frederic Rennard, says:—“Permit me to say that I concur in every line you have written in condemnation of the iniquitous Chinese war, and have read, with feelings of disgust, the article in *The Times*, in which the writer seems to gloat with delight over the power which the Armstrong gun gives of carrying certain destruction to so many human creatures, our brethren, to whom we ought to have carried messages of peace, mercy, and goodwill, instead of murder, rapine, and robbery. It makes one's blood boil with indignation to read such atrocious articles as those in *The Times*. To be consistent the writer ought to praise the acts of such criminals as Mullins and Rush for their bloodthirsty propensities.”

THE RED SEA RAILWAY.—It is said to be the intention of the Egyptian Government to carry the railway from Suez along the African shore of the Red Sea, as far as a point closely adjoining Cape Guardafui, which would be within a short steaming distance of Aden. The coast is said to be a dead sandy level nearly the whole distance, offering no impediments whatever to the laying down of rails, of which the work would almost entirely consist, and as any amount of forced labour could be brought to bear upon the undertaking by the Pacha, it would not take long to complete. When this project is carried out, the overland journey will be shortened by five days; the danger of the Red Sea navigation will be avoided; passengers will escape the worst part of the voyage, and the P. and O. Company will save the great cost entailed by the present necessity for keeping up a coal depot at Suez.

A long review of Captain Sherard Osborn's recent work on China appeared in *The Times* of the 9th inst. The Mr. Meadows Taylor referred to by the reviewer is doubtless intended for Mr. T. T. Meadows.

It is rumoured in military circles that the French are going to have a medal struck for the Chinese campaign.

THE WAR IN CHINA.

(From a Supplement to the *London Gazette* of Nov. 2.)

FOREIGN OFFICE, Nov. 3.

The following despatches have been received at the Foreign Office from the Earl of Elgin, her Majesty's High Commissioner and Plenipotentiary in China:—

Steam sloop *Granada*, Pehtang, Aug. 20, 1860.
(Received Nov. 2, 8.15 P.M.)

My Lord,—I have the honour to enclose translations of three despatches which I have received from the Governor-General of this province, with a copy of my reply.

The rapidity with which these missives succeed each other is evidence of the desire of the Chinese authorities to arrest our military operations. It was not in my power to reply with corresponding celerity, because I thought it right before so doing to confer, not only with Vice Admiral Hope, who is on the spot, but also with Lieut. General Sir Hope Grant, at the headquarters of the army, and with Baron Gros, whose residence is at the anchorage in the Gulf. No reference is made in these despatches to the demands conveyed in Mr. Bruce's ultimatum. It is, of course, impossible to listen to overtures which are marked by so significant an omission. Moreover, I think it important, after all that has occurred, that the occupation of the Peiho forts by our military force, and the opening up of the river to Tien-tsin, should precede any serious negotiations for the re-establishment of peace; and with this view I have deemed it my duty to signify to the commander-in-chief my anxious desire that they will expedite to the utmost their measures for effecting these objects.—I have, &c.,

ELGIN and KINCARDINE.

The Lord John Russell, &c.

HANG, GOVERNOR-GENERAL OF CHIH LI, &c., MAKES A COMMUNICATION.

Whereas the Powers along the seas that trade with, or while they trade with, China, are always held to be at peace with her; since the arrival of the British minister he has been daily moving troops (or engaged in hostilities), the Governor-General cannot say with what intention. Himself looking up and identifying himself with his Majesty the Emperor's bounteous love for all living souls, on the receipt of the British minister's communication, he at once acquainted his Majesty with the truth (or made true report of its contents to his Majesty), and he has this day the honour to receive an Imperial decree, to the effect that his Majesty the Emperor has appointed a minister to await in the capital the British minister's arrival there, in order that they may confer together. In obedience to his Majesty's decree (the Governor-General) makes this communication, to which he hopes (the British minister) will be so good as to reply. A necessary communication addressed to his Excellency Lord Elgin, &c. Hien Fung, 10th year, 6th moon, 23th day (August 14th, 1860). Translated by THOMAS WADE, Chinese Secretary.

HANG, GOVERNOR-GENERAL OF CHIH LI, &c., MAKES A COMMUNICATION.

On the 23th inst. (August 14), the Governor-General, as the records show, wrote to apprise the British minister that he had had the honour to receive an Imperial decree to the effect that his Majesty had appointed a high officer to await in the capital the arrival of the British minister to confer with him and settle matters. The officer sent in with this, on his return, reported that a white flag was flying in the British camp, showing a desire for the suspension of hostilities (or indicating an intention to suspend hostilities). Evidence so complete of the British minister's desire to maintain friendly relations unbroken is extremely gratifying. Although it was not the Governor-General who negotiated the treaty of the 8th year (1858) with the British minister, still as his Majesty has been so good as to appoint a minister to await the British minister's arrival in the capital, negotiations could at once be entered on. It will doubtless be right, however, now that peace is solidly established between the two nations, that arms should be laid aside for evermore. As soon as the Governor-General shall receive the British minister's reply, he will send an officer to learn what day it will suit him to fix for an interview at which everything may be discussed. A necessary communication addressed to his Excellency Lord Elgin, &c. Hien Fung, 10th year, 6th moon, 29th day. August 15, 1860. Translated by THOMAS WADE, Chinese Secretary.

HANG GOVERNOR GENERAL OF CHIH LI, &c., MAKES A COMMUNICATION.

The Governor-General has twice addressed the British minister, and has as yet received no reply. On the 13th instant (16th August), about the hour of eight, he had the honour to receive an Imperial decree, to the effect that "his Majesty had instructed an Imperial commissioner to proceed (to this place) to negotiate, and that he will arrive immediately; respect this!" It becomes his duty to communicate this to the British minister, who, he trusts, will instruct the military and naval commanders in chief to suspend hostile operations, and so prevent any loss on either side, as this might occasion a breach of friendly relations. He therefore writes a necessary communication addressed to his Excellency the Earl of Elgin, &c. Hien Fung, 10th year, 6th moon, 30th day (August 16, 1860). Translated by THOMAS WADE, Chinese Secretary.

The undersigned, the Earl of Elgin and Kincardine, her Britannic Majesty's Ambassador Extraordinary and Plenipotentiary in China, has received three despatches from his Excellency the Governor-General of Chih Li, under date respectively the 14th, 15th, and 16th instant. The Governor-General announces, first, the appointment of a high officer, who is to await the arrival of the undersigned in Peking, subsequently the immediate approach of an Imperial commissioner, and requests him to call on the commander in chief of her Britannic Majesty's forces to desist from further hostilities. In his despatch of the 8th instant the undersigned apprised the Governor-General that the military and naval commanders in chief had been called upon to act, in consequence of the unsatisfactory reply given by the Great Council to the demands of the British minister, conveyed in his letter to the Council in March last, they are engaged in taking possession of the Taku forts, and opening up a passage for the undersigned to Tien-tsin; until this object shall have been accomplished, and sufficient as-

surances given of the resolution of the Chinese Government to concede the points demanded in the letter in question, the undersigned cannot call on the military and naval commanders in chief to suspend their operations.

ELGIN and KINCARDINE.

Tien-tsin, Aug. 26, 1860.

My Lord,—I have the honour to enclose the translation of a despatch to me from the Governor-General of the province of Chih Li, which was sent on board Admiral Hope's vessel when he reached this place on the 24th instant; also of a despatch to me from Hang and Wan, announcing the appointment of Kweiliang, with whom I negotiated the treaty of 1858, and Hang Fuh, the Governor-General of the province of Chih Li, to be Imperial commissioners to treat with me at Tien-tsin. I have, &c.,

(Signed)

ELGIN and KINCARDINE.

The Lord John Russell, &c.

HANG, A PRESIDENT OF THE BOARD OF WAR, GOVERNOR-GENERAL OF THE PROVINCE OF CHIH LI, MAKES THIS COMMUNICATION.

I beg to inform you that I, having in the first instance retired from Taku to Tien-tsin, have now caused to be withdrawn from the latter place all the troops forming its garrison, and also to be removed the guns from all the batteries. As we are now establishing friendly relations between our two countries, I hope that when your excellency comes to Tien-tsin you will not bring many vessels of war, which I fear might excite alarm in the minds of the inhabitants; to this end I address you. A communication. To his Excellency the Earl of Elgin, &c. Hien Fung, 10th year, 7th month, 7th day. (August 23, 1860.)

WAN, BY IMPERIAL APPOINTMENT MINISTER RESIDENT OF SENEING, AND HANG, BY IMPERIAL APPOINTMENT, MINISTER CONTROLLER GENERAL OF THE HOUSEHOLD, &c., MAKES THIS COMMUNICATION.

(Translation)—On the 9th day of the 7th month (25th August) we received at Tien-tsin an Imperial decree, dated the 8th day of the month, in the following terms: "We hereby appoint Kweiliang and Hang Fuh Imperial High Commissioners. Let Kweiliang proceed by express to join his colleague, and transact business. Respect this."

On the same day we received another decree, as follows:—"Let Hang-ki remain at Tien-tsin, to transact business under the orders of Kweiliang and Hang Fuh. Wantsun is to come immediately to the capital. Respect this." We make known the above to your excellency, and we request that you will await the arrival of his Excellency Kwei, Imperial High Commissioner and a member of the Council, who is to come to Tien-tsin, and in concert with his Excellency Hang, Imperial High Commissioner and Governor-General of the province of Chih Li, conduct negotiations with your excellency. This is important. A communication. To the Earl of Elgin, &c. Hien Fung, 10th year, 7th moon, 9th day.

Steam sloop *Granada*, Tien-tsin, Aug. 26, 1860.

I have the honour to inform your lordship that I arrived last night at this place. My despatches enclose translations of several communications which I have received from the Chinese functionaries. A perusal of these various documents will, I think, satisfy your lordship that the Emperor of China desires peace, although he has not quite yet made up his mind to concede all that I am instructed to demand. His reluctance to do so will, no doubt, be surmounted in due time. Vice Admiral Hope and Lieutenant-General Sir H. Grant have exerted themselves to the utmost to prevent the calamities of war from falling with severity on the peaceable inhabitants of the country. This course is recommended by policy as well as by humanity, for here, as in other parts of China, the people, when unmolested, prove to be the most useful purveyors for the wants of the army. The cavalry brigade, consisting of two squadrons of King's Dragoon Guards, and Fane's and Probyn's horse, with Stirling's 6-pounder battery, have just arrived. They performed the journey from Peiho to this place by land. Mr. Wade, who, at my request, accompanied them, reports that their march has been most prosperous; that the people, though greatly alarmed at their appearance, took heart when they found that they were not maltreated, and offered readily for sale such supplies as the country affords. Lieutenant-General Sir Hope Grant has found a suitable encampment for them in the vicinity of the town. The persons (gentry of this place) who were appointed to procure supplies for Sang Kolinsin's army have, at Mr. Parkes's instance, undertaken to perform that service for us. I have, &c.,

My Lord,—I have the honour to enclose the copy of a very interesting report which I have received from Mr. Parkes, who, at my request, accompanied Vice-Admiral Hope when he advanced upon Tien-tsin on the 23rd inst., and who has, since the admiral's departure, been rendering the most useful services in making arrangements for the reception of the Allied troops and Ambassadors at this place.—I have, &c.

(Signed)

ELGIN and KINCARDINE.

The Lord John Russell, &c.

Tien-tsin, Aug. 26, 1860.

My Lord,—I have the honour to make the following report to your lordship of particulars which have come under my notice during the proceedings of the last three days.

After quitting your lordship on the morning of the 23rd instant, I joined Admiral Hope, who proceeded up the Peiho in his tender, the *Coromandel*, accompanied by a division of five gunboats. At half-past 2 p.m. the forts of Shwang-keang were passed, and found to be deserted. The people of the various villages on the banks of the river turned out to look at the steamers as they passed along, and far from evincing any feeling of hostility, gave proof of their goodwill in hauling, entirely of their own accord, at the hawsers or ropes that had occasionally to be landed, and also in bringing fresh fruit and vegetables to the boats that were sent ashore on this service. At 7 p.m. our small squadron anchored at a point ten miles below Tien-tsin, and I had an opportunity of conversing with a number of respectable persons

who represented themselves as a deputation sent by the people of the city to pay their respects to the Allied commanders. From them I learned that the authorities entertained no idea of defending the extensive works recently thrown up by Sang Kolinsin for the defence of Tien-tsin, and that both garrison and guns had been withdrawn. That Sang Kolinsin himself had passed by the place the previous day (or within twenty-four hours of his abandonment of the Southern Peiho forts), but only with a small body of one or two hundred jaded horsemen, and that he himself was too dispirited to enter the city. The Viceroy, Hang-Fuh, they said, had also arrived from Tak this day at noon. Admiral Hope having determined, upon receipt of this intelligence, to occupy Tien-tsin with the small force he had with him, the gunboats pushed on the following morning, and having landed parties of marines at the two forts which command the approach to Tien-tsin, arrived off the city about 9 A.M. Several subordinate officers came off with polite messages from their superiors, in reply to which the admiral requested the Viceroy to come himself to the *Coromandel*. His Excellency complied without hesitation, and was accompanied by Hange and Wantanen, the officers commissioned by the Emperor to escort your lordship to Peking. Admiral Hope informed them that they must consider Tien-tsin to be in possession of the allied forces; that the people would be scrupulously protected, and the civil authorities allowed to remain in the exercise of their functions, and he showed them a proclamation which I had prepared by his direction for the purpose of apprising the people of this change in their position. The Viceroy and his companions made an ineffectual attempt to induce Admiral Hope to regard them as the governors of the city, but a reference made by them to Canton led the Admiral to observe that the situation of the two cities and of their respective native authorities must be considered parallel. While this interview was proceeding a party of marines had taken possession of, and hoisted the English and French flags on the east gate of the city, and the above-mentioned proclamation was posted in the same public thoroughfare. The Admiral having desired me to remain at Tien-tsin and to act with Capt. McCleverty as occasion might require, I proceeded to inform myself of the condition of the city. Having found out the temporary residence of the Viceroy and Commissioners, I had a long and friendly conversation with them on the position of affairs, my object being to make it plain to them that the Chinese Government had it in their power to arrest the progress of hostilities—hostilities which they, by their faithless acts, had entirely brought upon themselves, by agreeing unconditionally to the terms of your lordship's letter to the Viceroy of the 17th inst., and that delay in doing so was full of peril to them. The Viceroy told me that he had forwarded that letter to Peking the moment he had received it, but no further instructions had reached him on the subject. I pointed out that, during the short intervening period, all the Taku forts and Tien-tsin had fallen, and that our army was now on the march, remarks which led them to offer many personal assurances of their wish for the restoration of peace, &c. Having knowledge that a committee of supply had been formed by Sang Kolinsin, at Tien-tsin, to assist him in his operations, I requested the Viceroy to direct the native gentry who compose this committee to act as a board for the supply of our troops with fresh provisions, and, before the evening had closed in, I had the satisfaction of arranging with several members of this committee the manner in which large supplies of bullocks, sheep, fruit, and vegetables were to be brought in for our use. The following morning, the 25th, the first supply of provisions that had been ordered was punctually delivered, and the committee rendered me further assistance in a search which I then made for suitable quarters for your lordship, and undertook the repair of another building which may be required for the public service. At an interview which I had with the Commissioner Hange, he showed me an Imperial edict, dated the previous day (24th), appointing Kwei-leang and Hang Fuh (the Viceroy) to be Imperial commissioners for the transaction of business with your lordship, and ordering the former to travel by post to Tien-tsin. I spent the greater part of this day in visiting many of the streets of the city, and the country around it; and wherever I went, although I was unaccompanied by any guard, the people received me in a very friendly manner, and evinced but little alarm at the new state of things. I observed that women were being taken out of the city; but bullocks, droves of sheep, forage, &c., were being brought in, and most of the shops remain open. At one place, Peitsang, five miles from Tien-tsin, 300 or 400 of the villagers set themselves willingly to work, by my desire, to clear out some granaries which I thought might be required for the accommodation of our troops. I have noticed that the Viceroy has removed from the streets, as I requested him to do, the recent hostile proclamations of Sang Kolinsin. But one met my notice, issued only six days ago, in which the people are informed that the Allies have been defeated, and we are now suing for peace, and that therefore the people need not be alarmed, nor remove from the city. This morning I again had occasion to see the Commissioner Hange, and he showed me an Imperial edict depriving Sang Kolinsin of his three-eyed peacock's feather, his honorary position in the body guard, and his command in chief of the Manchoo-bordered blue banner. The edict characterises the above as a "light punishment."

I have, &c. (Signed) HARRY S. PARKES.
The Earl of Elgin and Kincardine.

French Head-quarters, Tan-koo, Peiho River,
August 25, 1860.

My Lord,—I have honour to inform your lordship that the Allied forces are in possession of the Peiho forts, and that the river is now open to Tien-tsin, whither it is the intention of the commanders in chief to proceed immediately, each with 1,000 men and a battery of artillery. The remainder of the Allied forces to move up to some eligible ground within about sixteen miles of Tien-tsin. In consequence of the heavy rains, the troops were unable to leave Pehtang until the morning of the 12th of August, when a force of 2,000 French and English, with two batteries of artillery, marched along the causeway to attack the Chinese entrenched camps, situated about five miles from Pehtang. General Janvrin's division followed. Sir Robert Napier's division previously moved to the right by a sort of cross road, which was supposed eventually to diverge towards the same direction. On arriving within range of the first camp, the artillery opened, and soon drove the Tartar cavalry, &c., out of it. The same with the second. Whilst this was going on, a large body of Tartar cavalry came down, and actually rode within two hundred yards of Sir Robert Napier's artillery. The infantry

opened fire, our cavalry charged, and dispersed them, causing them considerable loss. General de Montauban then marched a force with artillery along a causeway, to attack what appeared to be a large entrenched camp close to the River Peiho, but upon opening fire, found that nothing could be effected from the causeway, the ground on either side being impracticable; he sounded the retreat, and encamped his force on the ground between the two entrenched camps taken in the morning. Monday was employed in building bridges, &c., over the various creeks. On Tuesday morning a division of each force, with its artillery, the English to the right and the French to the left, marched to the attack of the entrenched camp above-mentioned. The artillery opened, and approaching to within 400 yards, silenced the fire of the Chinese guns; the infantry with difficulty crossed two big ditches, scaled the walls, and captured the camp and villages of Tungko. Sir R. Napier took up his quarters in the place with his division. The French marched back to their camp. The losses in killed and wounded were slight on the part of the Allies, the total not exceeding 20. On the 15th inst., the Emperor's *fete* day, salutes were fired. The time was employed till the 18th in getting up provisions, building various bridges, the tide constantly flooding the whole country, and in fixing upon a spot for one to be built over the Peiho, where the French engineer, having crossed the river with two companies of Chasseurs to reconnoitre the ground on the other side, was attacked by the Tartar cavalry, and a fire of gingalls, &c., opened upon him. The Chasseurs drove away the cavalry, and more troops having crossed the river the Chinese withdrew. The construction of the bridge immediately commenced.

Sunday and Monday nights were employed by Sir Robert Napier in throwing up batteries, &c., and on Tuesday, the 21st, about five A.M., a force of 1,000 English and 1,000 French, with all the heavy guns which could be brought up, commenced the attack of the forts. The Chinese were the first to open fire. The firing of our artillery, English and French, was excellent, and soon told with great effect upon the fort, a powder magazine inside of which was blown up. The besieged made a most determined resistance, and it was not till after two hours' heavy cannonading that the infantry was ordered to advance. Nothing could surpass the desperation with which the besieged fought, every description of missile being brought to bear upon the attacking parties. At length, after a very prolonged resistance, the English and French succeeded in getting a footing in different parts of the fort, each much about the same time, and the Allied flags were planted upon the top of the cavalier in the fort. The Chinese commander-in-chief, a relation of Sang Kolinsin was killed in this fort, the whole of which was strewn with the bodies of the dead and dying. The French loss in the attack was about 130 killed and wounded, and the English about 200. The gunboats, during the attack upon this fort, fired at long range upon the North Fort nearest the mouth of the river, in order to create a diversion. They also succeeded in blowing up a magazine in that fort. During the time given to rest the men, after gaining possession of the fort, a flag of truce was sent from the other side of the river, but as it was merely bringing a letter for Lord Elgin, and the object appeared to be to gain time, the order for the attack of the Lower North Fort was given at 2 P.M. To our surprise we approached without a shot being fired, and having crossed, with great difficulty the various ditches, &c., entered, no resistance being made by about 1,500 men, whom we found in the fort. It soon became evident, from the appearance of the Great South Fort opposite, that it had been evacuated; a small force was despatched across the river to occupy it. No sooner had we entered the Lower North Fort, than a tremendous storm came on, which soon rendered the whole country impassable for heavy artillery, and would have prevented our carrying on operations for some days had they not luckily been just in time brought to a conclusion. During the night the navy removed the various barriers at the entrance of the river, and at daylight the English admiral, accompanied by several gunboats, ascended the river as far as the village of Tangken, and the day before yesterday some of them were sent on to Tien-tsin. Thus in one day we got possession of all the forts. The prisoners taken were all set free, and some of our troops have already commenced their march upon Tien-tsin by land; 2,000 French and English have also started for that place in gunboats. Tien-tsin, I hear, has been made over to us by the Chinese authorities. I am happy to inform your lordship that in all the intercourse which has taken place between the allied commanders-in-chief, departments, &c., the utmost cordiality has prevailed, and has mainly contributed to produce the happy results which I have herewith briefly brought to your lordship's notice.—I have, &c.,

(Signed) ST. GEORGE FOLEY, Colonel,
Her Majesty's Military Commissioner at the Head-quarters of the French Army in China.

The Lord John Russell, &c.

P.S.—Upwards of 500 guns have been taken in the forts, more than 100 of brass, 50 of which are of a very large calibre.

ST. G. F.

Mr. Secretary Herbert has received two despatches with enclosures, of which the following are copies, addressed to him by Lieut. General Sir J. Hope Grant, K.C.B., commanding the forces in China:—

Head-quarters, Tangku, August 24.

Sir,—I have the honour to report that the Allied forces were unable to leave Pehtang until the 12th August, on account of the very heavy rain, which had made the country almost impassable. On that morning, however, the troops marched according to the following dispositions, namely, the 2nd division of infantry, an Armstrong battery, a rocket battery, Madras sappers, and the cavalry brigade, with three 6-pounders. The whole, under Major-General Sir Robert Napier, struck off to the right of the road leading from Pehtang to Sinho, for the purpose of turning the left of the Tartar position. This column experienced the greatest difficulty in getting through the deep heavy ground, which extended for more than two miles out of Pehtang, and considerably delayed the departure of the main column, under Sir John Michel, which moved along the causeway leading directly from Pehtang to Sinho, and which was composed as follows, namely, the 1st infantry brigade, a company of Royal Engineers, an Armstrong battery, 1,000 French infantry, and a French battery, all under Brigadier Staveley. This was followed by the 2nd infantry brigade, two 9-pounder batteries, and a rocket battery, succeeded by the main column of the French. On approaching the

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

Suggestions for the insertion of information required by our subscribers will have due attention and acknowledgment.

In answer to inquiries in reference to the transfer of the Straits Settlements, we find that no further steps can be taken in the matter until the return of the Duke of Newcastle, the Secretary of State for the Colonies.

A REGISTER is kept of the addresses of all persons connected with the FAR EAST, and reference can be made to the same by personal application at the office or by letter. Passengers arriving by either Overland route or sailing vessels, in England or on the Continent, will oblige by forwarding their address for the information of inquiring friends.

Our OFFICES in this city have been REMOVED from 337, Strand, to 7, George-yard, Lombard-street, E.C. Newspapers and literary communications should be addressed to the Editor. Correspondence relative to Advertisements, Subscriptions, and the general business of the Paper should be addressed to the Manager, and not to the Editor.

Correspondents and Newspaper Publishers in INDIA, CHINA, JAPAN and the EASTERN ARCHIPELAGO are requested to address all communications, newspapers, &c., via Marseilles, to the Editor, Box No. 70, General Post-office London, E.C., which has been opened specially for the same.

Post-office orders should be made payable at the Lombard-street Office, to MORTIMER WRIGHT.

Any information required by Subscribers, in reference to Commercial or General matters in CHINA, JAPAN, SINGAPORE, and other parts of the FAR EAST, will be supplied on application at the Office, where files may be seen of the Journals published in those countries.

THE PRESENT NUMBER—48—COMPLETES THE SECOND VOLUME OF THE "LONDON AND CHINA TELEGRAPH."

The London & China Telegraph.

LONDON, TUESDAY, NOV., 13, 1860.

WE have perused with deep interest the clear and unaffected official despatches of Admiral Hope and Sir Hope Grant, which will be found in another part of the present impression. From these various statements we learn enough to justify the warmest admiration of the judgment and military genius of the English Commander-in-Chief and of the discipline and bravery of the allied troops. The fame of our heroes is not in this country very long lived; still we are not likely to forget, at any rate for a year or two, the heroism of such men as Lieut. Rogers and Ensign Chaplin. We shall, however, avail ourselves of another opportunity of referring to the more general features of the campaign, our object at present being to point out a circumstance which is but too likely to escape in England general recognition—we mean the courage and endurance of the Chinese coolies. We are informed that the English and French Coolie Corps, by their cool bravery under a heavy fire, called forth universal admiration from the allied armies.

The French employed their coolies in removing the wounded, and in the still more dangerous duty of carrying the scaling-ladders to the assault. We are told that no troops in the world could have performed these duties with greater steadiness, alacrity, and coolness; and it is with regret we learn that a considerable number of them were killed and wounded while so employed. When the assault was first attempted the only means of crossing the water defences was by the use of the light bamboo scaling-ladders of the French, thrown across as bridges, with planks laid upon them, to facilitate walking. When the troops attempted to cross them they were found too weak in the centre to bear their weight, and the coolies jumped into the water, well nigh up to their necks, and supported the ladders on their shoulders, and thus enabled the French and English storming parties to get across. Though we did not employ our coolies at the same dangerous work, still their duties were not unattended with risk. They were constantly under fire while removing the wounded and carrying ammunition to the front; and it appears that nothing could exceed th

cool indifference they showed to danger. They seemed to take great interest in the bombardment, and when the place was taken they were seen clapping their hand with unfeigned delight.

The experience of this campaign has demonstrated the great physical endurance of the race, their docility, and amenability to discipline, combined with much intelligence and with indisputable courage. Some 4,000 of these men will return to Hong Kong with the expedition, accustomed to British rule, and to association with British soldiers—and above all, with a full confidence in the honour and financial integrity of the British service—the all-important point in securing a good and faithful servant in John Chinaman.

We are informed that the opinions of Major Temple, who has so ably organised and superintended the Coolie Corps, as well as of the English officers who are connected with it, is highly favourable to the capacity of the coolies for making efficient infantry soldiers. They are all now partially drilled, and they have shown great aptitude in learning the few military manœuvres hitherto taught them. From the peculiar nature of their weapon, the bamboo pole (to which they owe their sobriquet of the "Bamboo Rifle Brigade"), it has not hitherto been deemed necessary to extend to them a knowledge of the manual and platoon exercise, though there is no doubt they would very speedily acquire it. It is, we venture to say, matter for consideration whether it would not be desirable to organise permanently a Chinese Coolie Corps.

Our readers may be disposed to consider this point as not altogether relevant to the subject under our notice; viz., the present aspect of the China War. It would, however, be easy to show that, from a due appreciation of the Chinese element in our own army, we may come to a more correct estimate of them as a nation. At present it is abundantly evident that we do not understand them. When the last mail arrived we sang our song of triumph. Every one agreed that, if the enemy had fought well, the allies had fought still better; that, in short, the Chinese were quite satisfied with the lesson we had given them, and were once again "willing to treat." In another part of our impression it will be seen that the negotiations came to an untimely end and on the 8th of September our army had moved forward in the direction of Peking. The Tartar Government has, it seems, adhered to its old tactics. They surpass all rival Governments east or west in aptitude at learning the great official lesson, "how not to do it." Every possible chance of evading the negotiations has doubtless been tried. For ourselves, we are not sorry that they were broken off at Tien-tsin, because, as we have before intimated, we feel assured that the war will reach a speedier and more satisfactory termination by the appearance of the Ambassadors at Peking, not with a mere "cavalry escort," but with the whole of the expeditionary force. There is, in truth, every reason to believe that before the end of September the allied armies had reached Peking. What the Ambassadors have effected there the next mail will probably tell us. A new treaty has, we may venture to predict, ere this been signed with "material guarantees" for its fulfilment.

None of the accounts to hand make any mention of the American or Russian Ambassadors. Have they gone to Peking by way of Pehatang as in 1858?

SARAWAK.

In reference to the late affair at Muka, between Governor Edwardes, of Labuan, who is, in the absence of Mr. St. John, acting as Consul General in Borneo; and the Sarawak Government, noticed in our last, we find the following explanation in the *Singapore Standard*. The matter has been taken up by all the papers. Mr. St. John, as also Sir James Brooke, as noticed in our last, proceed by the next mail:—

"Some months ago, Mr. St. John, her Majesty's Consul General in Borneo, visited Sarawak, and having inquired into the charges against Serib Masahore, he was satisfied that the Serib was the instigator of the murder of Messrs. Fox and Steele, and a conspirator of a most dangerous character. He therefore addressed a letter to the Sultan of Bruni in his official capacity, recommending the surrender of Serib Masahore, that he might take his trial before the Courts of Sarawak. This letter was forwarded through Mr. Edwardes, and it is asserted, was withheld by him. In June last the Sarawak Government sent to Mr. Edwardes, in his capacity of Acting Consul General, what was considered ample *prima facie* evidence of the guilt of the Serib, and requested him to obtain his arrest and surrender. Mr. Edwardes having heard the statement of this man and his followers, told the Sultan that he believed him to be innocent, and recommended that he be not given up. The Serib thus whitewashed, returned to Muka, where he made his appearance just about the same time with the steamer *Victoria*, and gave out that she had come down to support him.

THE MEDICAL PROFESSION IN JAPAN.

FOR more than two years past a Dutch medical officer—Mr. Pompe van Meerdervoort—has been placed at the head of a Japanese native school of medicine at Nagasaki, where his indefatigable zeal in the cause of humanity has been crowned with the most brilliant success. The *Netherlands Medical Journal* contains an interesting account of the progress in the science of medicine making in Japan, from which we translate the following extract:—

"The Imperial Japanese Medical School at Nagasaki contains at present 32 students, admitted to the establishment after having previously acquired a sufficient knowledge of the Dutch language to prosecute their studies with success. A great many of these pupils, who are all about 25 years of age, live in the establishment, under the domestic and disciplinary direction of the Imperial chief officer of health, Mats Motto Lyoo Zoon, who has greatly distinguished himself by his scientific attainments, and appears destined in a short time to be placed at the head of the Medical Department in Japan. These medical pupils apply themselves to learning the profession with great spirit and energy, and have already made rapid progress. It appears to be the intention of the Japanese Government to employ them by-and-bye in instructing their fellow-countrymen, as the future establishment of a large college at Jeddo is seriously contemplated, but for obvious reasons it is as yet too early to execute this philanthropic design.

"Besides these measures for promoting the knowledge of medicine and surgery in Japan, other useful improvements have been introduced on the representation and by the practice of our Dutch medical men out there. Among others it may be mentioned that vaccination is no longer objected to by the mass of the people, more than 1,200 persons having been vaccinated by Mr. Pompe himself, and several thousands more by his pupils, with good success. At Sanga, the capital of the district of To-sen, a hospital is in course of construction, and nearly completed, being erected from the plans and drawings made by Mr. Pompe; though he has not yet been able to inspect it personally, as there is some difficulty in obtaining permission to go into that district not yet overcome. He hopes further to be enabled to establish a school of clinical surgery at Nagasaki. During the period that the cholera raged so severely at that town in July and August last year, as well as in 1858, Mr. Pompe was of great use in lending the aid of his practical assistance and valuable medical knowledge to the relief of numerous patients."

There remains still one great difficulty to overcome in the religion of the Japanese, which is opposed to the principle of opening and dissecting corpses, by which the practical study of anatomy has been hitherto inaccessible to the young students. Mr. Pompe has repeatedly, but fruitlessly, made representations to the Government on the importance of this branch of his profession; but at length the ice has been broken by the praiseworthy zeal of his pupils themselves, and at their urgent petition the governor of Nagasaki granted them for anatomical purposes the body of a malefactor condemned to be beheaded a short time since. This time the execution did not take place publicly, as is usual in Japan, but in the court of the prison, in order to avoid any display of outraged popular feeling, and the better to have the subject secretly conveyed to the dissecting room.

"Outside the town, and on a cliff overlooking the sea, a spot had been granted on which Mr. Pompe had a temporary room erected and fitted up for the purpose intended, as well as could be done in the hurry of the moment. The operation of dissecting was performed by Mr. Pompe, and attended by twenty-one students of the Imperial Japanese school, and twenty-four Japanese native medical men residing and practising at Nagasaki. It lasted from early morning till the shades of evening descended and prompted him to lay aside the dissecting knife, but not till most of the young men had in their turn had an opportunity of trying their hands at different operations and amputations. On the following day the work was continued, but not without some difficulty, as the Japanese laws and religious customs require the body of a decapitated criminal to be buried on the day of execution. But here again progress triumphed, for the students, proceeding all together to the governor, were so importunate that he yielded at length to their request, and permitted the innovation."

NON-TREATY RESIDENTS IN JAPAN.

Among the matters omitted in our last, owing to the long details of the operations on the Peiho, was a notification published by the British Consul, Capt. Vyse, at Kanagawa, a copy of which we append:—

It having been duly represented to her Majesty's Envoy Extraordinary and Minister Plenipotentiary in Japan, that the Japanese Government denies the right of any foreigner, not a subject of a Treaty Power, landing in Japan (with the exception of such Chinese as take up their residence at Nagasaki under the jurisdiction of the native authorities, by virtue of ancient privileges). The undersigned is instructed publicly to notify for the information of all concerned, that any shipmaster giving passage to such foreigners, will be compelled to take them away again; and any attempt to land them will subject him to further penalties for breach of treaty.

G. HOWARD VYSE, H.B.M.'s Consul, Kanagawa.

Besides Great Britain, we believe the United States, Holland, France, and Russia, are the only Powers that have treaties: while Portugal—through the Governor of Macao it was reported by last mail—has just concluded one, and a Prussian mission for that purpose is also on its way, if this Power will also act on behalf of the Free Hanseatic towns. We are not

aware but it should be so, as their shipping, compared with that of other Continental States, is more numerous in the China Seas than any other; in fact, of 294 merchant vessels in the China Sea, as per overland China mail of 12th September last, 49 were American, 23 Hamburg and Bremen, 15 French, 12 Siamese, 10 Dutch, 6 Danish, 6 Sweden and Norwegian, 5 Spanish, 3 Oldenburg, 3 Portuguese, 2 Prussian, 2 Russian, 2 Peruvian, 2 Austrian, 2 Italian, 2 South American, 1 Nationality not stated, making 145 vessels, leaving 149 vessels for the British flag. No doubt Japan will soon receive missions from other maritime states, for the purpose of making treaties. Had Commodore Perry understood Sir Henry Pottinger, he would have saved the Japanese and others a great deal of work and expense: on the other hand, it may have its good points by forcing every State to come forward and to act for themselves. Besides this, we hope the Japanese Government will insist that every Power, concluding a treaty of commerce with them, shall appoint responsible consuls or agents, in which demand we have no doubt they will be assisted by him who was our "most able" consul in China, and now in Yedo.

THE CAPTURE OF THE TAKU FORTS.

PLAN OF ATTACK.

We repeat in the present number the description, published in our last, of the operations of the Allies in the Peiho, intended to accompany the "Plan of Attack."

PLAN No. 1.—A and B are houses and fort on the north bank of the Pehtang Ho, C is the town of Pehtang, D is the fort defending the entrance to the river on the south, E is the point in the mud where the troops landed on the 1st August, F is a house that was used by the Tartar cavalry as a picket-house during our occupation of Peh-tang, dotted line G is the route taken by Sir Robert Napier's division, H shows the route of the cavalry brigade, J with the dotted line represents the road followed by the First Division and the French, K is a road leading to the fortified town of Tang-Koo, L is a cavalry entrenchment, with fortified wall, M a strong field-work of considerable extent defending N (the town of Sin-Ho), O is a Tartar cavalry camp with permanent buildings and defences, P is the plain where the English first division met the cavalry brigade and second division after the capture of the entrenchments and town of Sin-Ho.

PLAN No. 2.—A, Sin-Ho, B is where the English army encamped on the night of the 13th August, prior to marching at daylight on Tan-koo; C, high road between Sin-ho and Tan-koo; D and E, forts on south bank of Peiho; F, fortifications of Tan-koo; G, town of Tan-koo; H, I and K, towns of See-koo, Takoo, and Tun-koo; L and M, great forts on southern entrance to Peiho; N and O, great forts on north bank of river; P, staked barriers in mouth of river; Q, deep mud inverting shore; R, course taken by the troops that stormed the fort on the 21st August; S, line of attack of the allies; T, bridge of junks across Peiho, constructed for passage of army to south bank; U, village on south bank, taken by the French on the 17th August; V, the Peiho; W, high road from Peh-tang to Tan-koo; Y, line of march taken by the French on the 14th August; X, route followed by the English to Tan-koo, the batteries D and E being engaged and silenced on the way.

CAPTAIN HOWARD VYSE, VICE-CONSUL AT KANAGAWA.—In *The Times* of the 9th April some statements appeared on the official conduct of this gentleman, who has sent the following to *The Times*:—"As regards his observations upon the manner in which I perform my public duties, I have only to say that I am not responsible to 'C.' or anyone except my superiors in office. If they think me unfit for my post they have the power of removing me. But I believe I may safely assert that they will admit that, whatever my deficiencies may be, I have done my best to uphold the honour of my country in the opinion of the Japanese, to vindicate the rights of British subjects, and in my own person to maintain the character of an English gentleman. To the anonymous writer of personalities the latter will probably be considered a poor qualification."

PROPOSED ALTERATIONS IN THE MAIL SERVICE.—Mr. Biddell, the Director-general of the Post-office in India, has proposed a scheme for starting all the mails for India via Bombay, once a week. No provision is made in the scheme for the countries East of India. It is not likely that the change will be adopted.

MARRIAGE OF SIR JOHN BOWRING.—The nuptials of Sir John Bowring and Miss Deborah Castle, daughter of the late Mr. Michael Hinton Castle, of Bristol, took place on the 8th inst., at the Unitarian Chapel in that city. The bridesmaids, we believe, on the interesting occasion, were Miss Bowring, a daughter, and Miss Lewin, a niece of the bridegroom, the Misses Castle and Harwood, nieces of the bride, and Miss Brown. The ceremony was performed by the Rev. B. Apeland, of Hackney, assisted by the Rev. W. James, of Bristol. The chapel was crowded on the occasion.

THE WAR IN CHINA.

(Continued from page 555)

entrenched camp, the Tartar cavalry moved rapidly down to attack Sir Robert Napier, who was at this time two and a-half miles off, on my right flank. His report of that part of the engagement I beg to enclose. Sir John Michel's division deployed at the same time in front of the enemy's works, and opened with Lieutenant-Colonel Desborough's 9-pounders, a French battery being on the left, together with a French and an English rocket battery. These guns kept up such a heavy fire that the Tartars were unable to resist long, and they abandoned their works, being closely followed into their second entrenched line at Sinho, which they were unable to defend, and fled to Tangku. I enclose Sir J. Michel's report of this affair. The enemy's force was composed principally of cavalry, and numbered about 400 men. At Sinho I was joined by Sir R. Napier's division, and the cavalry, who had cut up a good number of the Tartar horsemen. The loss of the Chinese was about 100 men. On the 18th I reconnoitred the ground along the banks of the Peiho leading to Tangku, and found it tolerably firm, though intersected with creeks and ditches. I ordered these to be bridged during the night, and on the morning of the 14th an allied force moved from Sinho towards Tangku, keeping their right flank on the bank of the river. The English part of the force consisted of the 1st infantry division under Sir John Michel, and the artillery as per margin,* which formed one grand battery under Brigadier General Crofton, R.A. On arriving within a mile of Tangku, a battery and some junks on the right bank were silenced by two Armstrongs and two 9-pounder guns; and a party of sailors who had been brought up for the purpose crossed the river and burned the junks. The whole of the artillery was then advanced to within 600 yards of the entrenchment, and opened a heavy fire on the walls: two French batteries deployed on our left; the enemy replying with ten or twelve guns and a brisk fire of gingalls and matchlocks. The artillery gradually advanced to within 350 yards, and the enemy's guns being silenced a breach was commenced, when a passage across the double wet ditch was discovered at the river's edge by the 60th Rifles, and an entrance was effected, the Chinese retreating with great precipitancy. At the same time the French advanced with great gallantry and entered by the main gate, which had been partially broken in by the artillery fire. The garrison of Tangku retreated, some into the north forts and some across the river to Tangku. I am happy to say that our losses in these two engagements were very slight, owing to the enemy being completely paralysed by the superior fire of our artillery. Forty-five guns were captured in Tangku. My thanks are due to Major Generals Sir John Michel and Sir R. Napier, commanding divisions (the former had a horse killed under him on the 14th), also to Brigadier General Crofton, commanding Royal Artillery, and Brigadier Pattle, commanding the cavalry, for the able way in which they exercised their respective commands; and the whole of the officers and soldiers acquitted themselves to my satisfaction. I beg to enclose a list of casualties.—I have, &c.,

(Signed) J. HOPE GRANT,
Lieut. Gen. commanding H. M.'s Forces in China.

Head-quarters, Tangku, Aug. 24.

Sir,—I have the honour to report that after the capture of Tangku, on the 4th instant, I commenced bringing up siege guns and ammunition from Peh-tang, with a view to the reduction of the uppermost fort on the left bank of the Peiho, distant about two miles from Tangku.

The ground upon which it was necessary to advance was mostly of a very difficult nature, and intersected with broad and deep canals used in the manufacture of salt.

I placed Major General Sir R. Napier in charge of the advance, his division being quartered in Tangku. Under his superintendence bridges were thrown over these ditches and canals by Lieutenant Colonel Mann, commanding Royal Engineers; and heavy guns, as per margin,† with a good supply of ammunition having been brought into Tangku, the 67th Regiment and an Armstrong battery were pushed forward on the evening of the 19th, to within 2,000 yards, to cover the working parties making roads, bridges, &c. On the 20th, the road was made practicable to within 800 yards of the fort. Batteries were traced, and the heavy guns were brought out ready to place in position by daybreak on the following day. The Chinese opened fire during the day, and were replied to by Captain Milward's Armstrong guns at 2,000 yards, range with good effect, and the firing gradually ceased.

During the night batteries were constructed for the heavy guns and mortars, and for one field battery, also for two 8-inch guns, which were brought up by great exertions from Peh-tang during the night; and the whole were placed in position by daybreak on the 21st August.

It had been arranged with the admirals that the gunboats should cross the bar that morning, and should engage the outer north fort, and the flank of the outer south fort, at the same time that the attack on the inner north fort was commenced by the land forces.

At five A.M., however, the Chinese opened fire upon the troops from all their forts within range, and we were thus forced to reply an hour earlier than had been intended.

The artillery was disposed as follows:—a French 24-pounder battery of six pieces, one English 8-inch gun, and two Armstrongs, played on the inner south fort to keep down the fire; they might otherwise have poured on our right flank. Two Armstrong guns and two 9-pounders fired from Tangku across the river at an entrenchment which flanked the French right; three 8-inch mortars were in the centre at 600 yards, range, and to their left rear an Armstrong battery, two 32-pounder guns, and two 8-inch howitzers, all of which played on the fort we were attacking. In addition to this, two 9-pounder guns, four 24-pounder howitzers, the remaining two Armstrong guns, and a rocket battery were placed in the open ground about 800 yards in front of the fort.

The storming party of infantry consisted of a wing of the 44th, under Lieut.-Colonel MacMahon, and a wing of the 67th, under Lieut.-Colonel Thomas, supported by the other wings of those two regiments, and the Royal Marines under Lieut.-Colonel Gascoigne. A detachment of Royal Marines under Lieut.-Colonel Travers carried a pontoon bridge for crossing

the wet ditches, and Major Graham, R.E., conducted the assault. The whole were commanded by Brigadier Reeves.

The fire of the artillery was most effective, the guns of the fort (of which many were of very large calibre) were speedily silenced, and at about 7 A.M. the magazine blew up with a terrific explosion. A few minutes later the magazine in the outer north fort was also exploded by a shell from the gunboats.

The field guns were all advanced to within 500 yards of the fort, and redoubled their efforts.

The fire of the forts having almost entirely ceased, a breach was commenced near the gate, and a portion of the storming party was advanced to within 30 yards to open a musketry fire, the French infantry being on the right, the English on the left.

The fire of our artillery being thus partially compelled to slacken, the enemy emerged from their cover, and opened a heavy fire of musketry on our troops.

The French, under General Collineau, immediately pushed on to the salient next the river, crossed the wet ditches in the most gallant manner, and established themselves on the beam, from whence they endeavoured to escalate the walls; this, however, they were unable to effect, from the vigorous resistance of the Chinese.

The efforts of the appers to lay down the pontoon bridge were unavailing; no less than fifteen of the men carrying it being knocked over in one instant, and one of the pontoons destroyed.

At this juncture Sir R. Napier caused the two howitzers of Captain Govin's battery to be brought up to within fifty yards of the gate, in order more speedily to create a breach, and a space sufficient to admit one man had just been made, when our storming party (now joined by the headquarters' wing of the 67th, under Colonel Knox), who had partly crossed by the French bridge and partly swam over, forced their way in by single file in the most gallant manner, Lieutenant Rogers, 44th Regiment, and Lieutenant Burslem, 67th Regiment, being the first to enter, when they assisted in the regimental colours of the 67th, carried by Ensign Chaplin, who first planted them on the breach (assisted by Private Lan, 67th Regiment), and subsequently on the cavalier, which he was the first to mount. At the same moment the French effected their entrance, and the garrison was driven back step by step, and hurled pell-mell through the embrasures on the opposite side.

Here the same obstacles which had impeded our advance obstructed their retreat; in addition to two wet ditches and two belts of pointed bamboo stakes, there was swampy ground and a third ditch and bank.

The storming parties opened a destructive fire on them from the cavalier, and this was enhanced by the cannister fire of Captain Govan's guns, which had been moved to the left of the fort for this purpose.

The ground outside the fort was literally strewn with the enemy's dead and wounded; three of the Chinese were impaled on the stakes. A few fugitives reached the outer north fort, which opened fire to cover their retreat, and was answered by the Armstrong guns with good effect.

About an hour after this the whole of the forts on both sides of the river hauled down their war banners and hoisted flags of truce. General Montauban and I sent each an officer to ask their meaning, and summon them to surrender, but they only received an evasive and insolent reply, and were defied to come on to the attack.

Accordingly two fresh regiments, the 3rd Buffs and the 8th Punjab Infantry, having been brought up, I advanced to attack the outer north fort. Two 8-inch guns were placed in position against it; the other siege guns could not be brought up.* The field batteries were placed at 800 yards' range on an arc encircling the left and front, the French guns on our right. Not a shot was fired by the enemy, and the allied infantry pushed on, crossed the ditches, and scaled the walls without meeting any opposition; the garrison of 2,000 men being made prisoners.

This fort was stronger than the first. They are all constructed on the same plan, being redoubts with a thick rampart heavily armed with guns and wall-pieces, and having a high cavalier facing seawards, the guns of which were all turned in towards us; they have two unfordable wet ditches, between which and the parapet sharp bamboo stakes were thickly planted, forming two belts, each about 15 feet wide, round the fort, an abattis encircling the whole, and further covered by pieces of water, which force an advance to be made only on a narrow front.

Towards evening the garrisons of the south forts were observed to be evacuating them, and detachments of English and French were passed over in ships' boats, and occupied them. There is not now the trace of an enemy near us, and the whole of the forts and entrenched camps are in our hands, containing about 400 guns, many of which are of very large calibre.

It is difficult to account for the confusion and uncertainty which seemed to pervade the enemy when the first fort fell; but it now appears that the general in command was killed, and the second in command either killed or missing; and the confusion caused by this, together with the severe lesson received in the first fort, rendered them incapable or unwilling of further resistance.

I cannot conclude this despatch without expressing my sense of the very valuable services of Major-General Sir Robert Napier, who conducted the attack, and whose assistance has been most useful.

The service of the artillery under Brigadier-General Crofton was most excellent; its effects I have already described.

The engineering operations were conducted by Lieut.-Colonel Mann; and lastly, I must bring to notice the gallant conduct of the storming party, which was commanded by Brigadier Reeves, who, himself severely wounded in three places, did not quit the field until he had conducted his men into the fort.

The wounded were removed as soon as possible into Tangku, where every arrangement for their temporary reception was made by Dr. Muir, the principal medical officer.

Many others, both officers and soldiers, behaved in a manner deserving of being mentioned; but want of time does not permit me treat of it in this despatch, and on a future occasion I shall do myself the honour of bringing their names to your notice.

I would also wish to inform her Majesty's Government how cordially and

* 2 Armstrong batteries, 2 9-pounder batteries, 2 rocket batteries.

† 2 32-pounder guns, 2 8-inch howitzers, 3 8-inch mortars, 3 5½-inch mortars.

* The guns of the cavalier of the captured fort were manned and turned on.

sincerely our French allies have co-operated with us, as well as the admiration I feel for their gallant conduct in the field.

General de Montauban has always shown every disposition to act the roughly in concert with me, and to co-operate in every manner in his power. The services of the gunboats will doubtless be brought to notice by the naval Commander-in-Chief, and I beg here to record what a valuable and efficient colleague I have found in Admiral Hope, whose unwearied exertions throughout the whole campaign, and in discharging the onerous duties of transporting this large force to the seat of war have contributed greatly to the success of operations.—I have, &c.,

J. HOPE GRANT,

Lieut. Gen., commanding H.M.'s forces in China.

The Right Hon. Secretary of State for War, &c.

Head-Quarters, 1st Division, Camp near Sin-ho, Aug. 24.

Sir,—I have the honour to report that, in obedience to the orders of his Excellency the Commander-in-Chief, the first division, under my command, marched from Pehtang about half-past ten A.M. on the 12th inst.

On reaching the enemy's second picquet-house, which is about 300 yards from their entrenched position, skirmishers of the 1st Royals were sent to the left, and some of the 31st to the right, and shortly afterwards Colonel Barry's battery of Armstrong guns, and Captain Martin's battery of 9-pounders (the whole under the command of Captain Desborough), opened fire on the enemy's entrenchment at a distance of about 800 yards. After a cannonade of 25 minutes the enemy's cavalry were seen moving to their left from the entrenchments.

The guns then advanced to within 500 yards, and played on the enemy's position, as also on the cavalry who were moving to their right. The fire of two Armstrong guns quickly dispersed their cavalry, and in a few minutes the advance was sounded, and the enemy's position found to be abandoned.

The enemy now retired to the entrenched village of Sin-ho, but Sir Robert Napier's division having turned their left, the cavalry of the enemy, in large numbers, escaped behind this village towards the Peiho forts.

The Armstrong guns, at a range of from 2,000 to 2,500 yards, made good practice on the fugitives.

This engagement having been entirely that of artillery, only one man of the division was wounded.—I have, &c.,

(Signed)

J. MICHEL,

Major-General, Commanding 1st Division.

Camp, Tangku, Aug. 24.

Sir,—I have the honour to report, for the information of his Excellency the Commander-in-Chief, the result of the operations of the force under my command, employed in the advance from Pehtang, and the attack of the Tartar post at the Sin-ho entrenchment.

The troops left their billets at 4 A.M. of the 12th inst., and moved out in the following order:—

An advanced guard of 200 men of the 3rd Buffs, with two Armstrong guns of Milward's Battery, under the command of Lieut.-Colonel Sargent, 3rd Buffs.

4 Armstrong guns, Milward's Battery.

23rd Company Royal Engineers.

3rd Buffs.

8th Regiment Punjab Infantry.

44th Regiment.

Bolton's Rocket Battery.

Royal Marines.

Madras Sappers and Miners.

Right Wing 67th Regiment.

Reserve Ammunition.

Hospital Stretchers, &c.

Rear Guard.

Left Wing 67th Regiment.

CAVALRY BRIGADE.

Two Squadrons King's Dragoon Guards.

Probyn's Horse.

Three guns, Stirling's Battery.

Fane's Horse.

The head of the column moved at four A.M., but though two days' hard work had been devoted to repairing the roads, the deep, tenacious mud rendered them so difficult, that it was not till half-past seven that the rear of the column cleared the gate of Pehtang.

According to his Excellency's instructions, the force above enumerated struck off from the causeway by a track to the right, at half a mile from Pehtang. The Commander-in-Chief was himself a witness of the extreme difficulties which had to be overcome in extricating the troops from the inundated town of Pehtang, and advancing them through the deep mud, in which gun-wheels frequently were imbedded axle-deep. It cost two hours' hard labour to the troops to traverse the first two miles.

I advanced by brigades, in line of contiguous columns at quarter distance, my front covered by the advanced guard of two hundred of the 3rd Buffs and Milward's battery, under command of Lieutenant-Colonel Sargent. The cavalry was formed on my right.

A considerable halt was necessary to enable the rear to struggle through the heavy ground, and close up, for I was aware that I was liable to attack from the north, as well as from the enemy in front.

Observing the approach of the Allied columns to the direct attack of the entrenchment upon the causeway, and perceiving the enemy in great force, both in that entrenchment and in front of the village of Sin-ho, I marched directly towards them, taking their position in flank, and threatening their line of retreat.

On arriving within 1,500 yards Milward's Armstrong guns opened on the enemy. These were the first shots fired with that weapon in war, and the range and accuracy of their fire excited the admiration of the force. The Tartar horsemen were surprised by the fire, but not shaken. After some hesitation they streamed out in a long line through a passage across the marsh which separated us, and forming with great regularity and quickness, enveloped my force in a great circle of skirmishers. The northern portion formed by the cavalry, known to be in that direction, who hitherto kept out of sight, seemed suddenly to rise in position from the plain.

As soon as the enemy's movements were clearly defined I sent to Brigadier Pattle, commanding the cavalry, directing him to detach a troop to protect my right rear, and to take the opportunity to charge which the enemy so boldly offered him.

I then had the satisfaction of seeing the admirable charge of my cavalry, by which the Tartar horde in front of them was driven from the field in disorder. Milward's battery had continued to play upon the enemy as long as it was possible to do so without injury to our advancing cavalry.

About this time Stirling's half-battery, which, being unable to follow the movements of cavalry in such heavy ground, had been left with an escort of thirty of Fane's Horse, under Lieut. Macgregor, was charged by a body of Tartar cavalry of very superior numbers. Lieut. Macgregor gallantly led his small party against the enemy and defeated them, many Tartars being killed, and Lieut. Macgregor and many of his men being severely wounded.

Whilst this was going on, my attention had been diverted from my right front to a large party of Tartars, who were steadily approaching the Buffs, on the left front, apparently regardless of the fire of two of Milward's guns, under Lieutenant Harvey, of the Rifles, of the advanced guard, and of Bolton's rockets. They advanced to within 450 yards, and bore unflinchingly for a considerable time such a fire as would have tried any troops in the world. The 4th Brigade, under Brigadier Reeves, being similarly attacked at the same time, replied with a steady fire, which did considerable execution.

At length the courageous endurance of the enemy began to give way, and they fled from the field with precipitation.

I then advanced my force towards the western end of the village of Sin-ho, and joined the allied columns.

At no time throughout the day had we an opportunity of coming into contact with the enemy's infantry.

Trusting that the objects intended by his Excellency have been carried out by the force under my command, I beg to bring to his notice the excellent conduct and discipline of the troops of all arms, during a very trying day.

I am much indebted to the brigadiers commanding the several brigades of cavalry and of infantry, and to the officer commanding the field artillery, all of whom performed the duties entrusted to them to my entire satisfaction.

I received the most valuable assistance from my divisional and personal staff, whose labours were unremitting.

I beg to subjoin a list of officers, whom I desire earnestly to recommend to his Excellency's favourable consideration.—I have, &c.,

(Signed)

R. NAPIER,

Major General, Commanding 2nd Division China Force

To Captain Biddulph, Military Secretary.

THE FRENCH DESPATCHES.

The *Moniteur* publishes a series of despatches giving details of the proceedings against the Chinese. The general commanding the French troops in China has addressed the following report to the Minister of War:—

[Head-quarters, Sin-ho, August 18. ¶

Monsieur le Marechal,—I have the honour to address you the following account of the operations of the 14th:—The Allied army left Pehtang on the 12th, and after having repulsed the cavalry of the enemy, and driven their infantry from the entrenched positions which it occupied around Sin-ho, installed itself the same evening in the vicinity of this village, which is situated above all the defences of the left bank of the Peiho. The same day a reconnaissance on a road from Sin-ho made known to me that there was at about three miles below a large entrenched camp situated around the village of Tangku, and strongly defended both by natural obstacles and forces of infantry and artillery. This camp, which rested on the Peiho, could only be reached by two ways; one the road followed on the 12th, and of which the sides drowned, so to speak, by lagoons, did not allow any deploying of artillery or infantry; and the other, which was adopted by the English general-in-chief and myself for our principal and common line of operations, was the left bank of the Peiho itself. This ground was cut by numerous canals, which presented difficulties to our march, but these difficulties were overcome by the ever zealous and intelligent co-operation of the engineers, artillery, and pontoons. It thus became possible to approach near enough to the entrenchments to develop the batteries of the two armies, open an efficacious fire, destroy great part of the defences of the enemy, and send against them the columns of assault which, supported by the bulk of our forces, were to carry the works. Such was the plan adopted, and in the morning of the 14th the two armies moved in the following order:—The English army, supporting its right on the Peiho, descended parallel to the river, whilst the two brigades of Generals Jamin and Collineau, in close columns and at half distance for deploying, marched on its left and on the same line. All the infantry was preceded by artillery, which had on this occasion to engage first in the action; and the artillery was covered and supported, particularly on the left, by an advanced guard of infantry, consisting of a company of engineers, 200 marines, and two companies of riflemen. The ground which we had to go over was less firm than that assigned to our allies, but the march of the army nevertheless was not delayed. About eight o'clock the two batteries of 4, and the section of rocketmen deploying to the left of the English pieces, opened fire with them at about 1,500 metres (1,640 yards), from the entrenchments. The precision of the fire, in spite of the very vigorous, but fortunately ill-directed, reply of the enemy, soon produced the effect of allowing Colonel de Bentzman's column to approach their line by a movement in advance by demi-batteries. The battery of mountain howitzers entered in line as soon as the shortened distance rendered its fire efficacious. In the meantime our masses of infantry were kept at a distance, and I caused to be executed on our extreme left, on the road indicated above, a diversion by two pieces of four, supported by the 2nd battalion of marines. These two pieces were to maintain themselves on a line with the left of the army, and were to destroy the defences situated at the extremity of the road which it was following, that point having been recognised as that to which the column of assault was to proceed. The artillery approached to within 400 metres (437 yards), under a fire which diminished by degrees. Most of the enemy projectiles passed above it, and fell in empty space in advance of our infantry, which was then deployed in massed battalions. At about nine o'clock the fire of the Chinese was almost extinguished, with the exception of that

from some embrasures at their extreme right, which fired on our left. The moment had arrived, and after coming to an understanding with General Grant, I, approaching all my infantry by a movement in advance, gave orders to Lieut.-Colonel Schmitz, chief of my general staff, to form the troops of the advanced guard in columns of assault, and at their head to carry the enemy's entrenchments. This superior officer, though at the time rather seriously unwell, acquitted himself of his mission with remarkable energy. The company of Engineers, followed by coolies, carrying the ladders, the two companies of debarkation, Commandant Jauréguiberry; the 7th and 8th Companies of the 2nd battalion of Chasseurs, Commanders de La Poterie, next reached the edge of the counterscarp, through a rather sharp fire of musketry. Lieutenant-Colonel Schmitz leaped into the ditch, full of water, followed by Captains Chanoine and Guerrier, of the general staff, and Captains Paillot and Rienne, of the 2nd Battalion of Foot Chasseurs. He was the first to reach the top of the parapet and plant the national flag there in the sight of the whole army. He called the troops to him; they rushed into the interior of the works in pursuit of the defenders, now flying in disorder. At the same moment an English column had entered by another point, and the entrenched camp was in our power. A bridge thrown over the ditch soon enabled the other troops to complete the occupation, and the pursuit, though obstructed by the numerous canals intersecting the interior of the camp in all directions, continued to beyond the opposite side. At this moment, after conferring with General Grant, we determined to stop. A great number of dead left on the spot where they had fallen, about 100 more found in the deserted houses of the village, and the bodies of several mandarins of high rank who had cut their own throats when their troops took to flight, proved that the enemy's losses were considerable, and bore witness to the destruction caused by our rifled artillery. As to ourselves, the list annexed to this report will inform your Excellency that—thanks to the superiority of our fire and the impetuosity of our troops—this important success has not been too dearly bought. Fifteen pieces of bronze cannon, besides a great number of guns of very small calibre, have fallen into our hands. The enemy in their flight also left so many flags behind that I merely had them struck down, without thinking it worth while to remove them to my camp. I have the honour to address you by this mail a copy of the general order, No. 85. Your Excellency will there find the names of the officers and soldiers who distinguished themselves under my eyes in this brilliant action, and whom I have thought proper to mention in the order of the army. Colonel de Bentzman, commanding the artillery, seconded by Colonel Foulon Grandchamp, directed his batteries with a vigour and precision above all praise.—Accept, &c.,

C. DE MONTAUBAN,

Commander-in-Chief of the Expeditionary Army in China.

Camp of Sin-ho, Aug. 24.

Monsieur le Marechal,—I have had the honour of addressing to your excellency the report on the occupation of the right bank of the Peiho, which was effected on the 18th August by the troops of the 1st brigade (2nd battalion of Foot Chasseurs and the 1st battalion of the 102nd of the line). On the 20th General Jamin, by my order, made a reconnaissance for the purpose of examining the defiles in advance of his front. He soon met with works strongly occupied, and was obliged to halt before a fire of heavy artillery. It then appeared evident to me that on both banks it would be impossible to reach the forts without first carrying a large entrenched camp similar to that of Tangku, which we took on the 14th. From this moment the arrangement of the whole of the Chinese works was well known to me. On each bank, at the mouth of the Peiho, was an enormous fort commanding the sea and the approaches to the stockades; further up was another fort covering the fire of the former, and raking the river; and, lastly, for the purpose of protecting the whole line of defences, was a vast entrenched camp, situated at the extremity of the mainland and of the lagoons. The position of General Jamin's brigade covered my point of passage, and had the effect of threatening the only line which remained to the enemy. In accord with General Sir Hope Grant, I ordered the works of the bridge, which we were constructing in common, to be expedited as much as possible, but as, in consequence of the breadth of the river, which is in this place 260 yards, some days would be necessary to complete this bridge, it was decided that we should profit by this delay to attack the nearest fort of Tangku, on the left bank. The gunboats of the two fleets were at the same time to cover with their long-range guns the fire of the fort on the left bank below that which we intended to attack. The English brigade of Sir Robert Napier and that of General Collineau were designated for this operation, which was fixed for the 21st. General Collineau went to bivouac in the camp of Tangku in the evening of the 20th with a company of engineers, the 1st battalion of the 102nd of the line, and two battalions of marines. A battery of twelve rifled guns, a detachment of pontoons, under the command of Colonel Grandchamp, and a section of field hospitals were to join him at daybreak. This general immediately placed himself in communication with General Napier, who had taken a position in advance of Tangku, and had sheltered his siege materiel behind an epaulement. It was decided between them that in the attack of the following day the French troops should occupy the right of the English. In the morning of the 21st Collineau's brigade debouched on the field of operations, which passes through the swampy grounds extending in advance of Tangku. The company of engineers had prepared this march by filling up during the night a cutting in the road on the right. At daybreak the enemy's forts opened fire on the English artillery. General Collineau made the following arrangements:—Two pieces joining their fire to that of the English siege pieces, were directed against the forts attacked; the four other pieces placed on the banks of the river commenced a counter fire on the batteries of the forts of the right bank, the fire from which took us *en d'écharpe*. The 1st battalion of the 102nd (Colonel O'Malley), and the 1st battalion of marines (Colonel de Vassoigne), were deployed in the rear, and sheltered by a bend in the ground. The 2nd battalion of marines (Commandant Domenech Diego) remained in reserve at Tangku. Towards seven o'clock a formidable explosion took place in the fort which we were attacking. General Collineau immediately caused three companies of the 102nd to advance, which took up a position behind a little epaulement at about 300 metres from the counterscarp. The fire of our artillery then redoubled its intensity. At about half-past seven an explosion more terrible than the first greatly damaged the second fort on the left bank. However, the fire from the forts on the

right annoyed us exceedingly, and the English pieces of twelve and two English howitzers were brought on the line of the most advanced troops, and directed against them. The decisive moment approached. Captain Lesergent-d'Hendecourt, aide-de-camp to General Collineau, was sent by him to reconnoitre the obstacles; they consisted of three fosses full of water, traversing a muddy soil, and only to be reached by two slippery roads, about two yards wide. The interval between the last two fosses, and the foot of the ramparts where the fire of our artillery had not been able to make a breach, was covered with accessory defences of all kinds. By common accord Generals Collineau and Napier sent forward their columns of assault. The light company of the 102nd advanced, whilst coolies, carrying ladders under the direction of a section of engineers, commanded by Captain Bovet, marched towards the counterscarp. The 4th Company of the 1st Battalion of the 102nd followed close on the Light Company, and Colonel O'Malley took the command of that column. However, the fire of musketry caused us rather serious losses; the coolies, of whom several were struck, were unwilling to advance, and a new section of Engineers had to carry forward the ladders abandoned by them. Thanks to the skill and activity of the Engineers and the intrepidity of our soldiers, the obstacles were soon surmounted, and the ladders raised against the rampart. On the instant General Collineau sent a supporting column, composed of three companies of infantry of marine. Then occurred one of those memorable struggles which it is very difficult to describe. On one side some men of the 102nd, and of the marine infantry, mounting the ladders, one by one, bayonet in hand; on the other an enemy fighting desperately with muskets, pikes, arrows, and rolling cannon balls from the top of the walls. The French flag was planted on the summit by Drummer Fachard, of the 4th company, 1st battalion of the 102nd, one of the first arrived, and who supported an heroic struggle. Colonel O'Malley, Chef de Bataillon Testard, of the marine infantry; Chef d'Escadron Campeon, sent by General Collineau soon after the commencement of the action to urge on the movement; Lieutenant Rouvier, of the navy, commanding the coolies; Lieut.-Colonel Dupin, of the general staff, who had claimed the honour of marching with the storming column, drew our soldiers after them. The energy of the troops overbore all resistance; they entered the work, and then a fresh struggle commenced on that ground, which the enemy defended inch by inch with indescribable desperation. At last the fort was taken; the English also entered on their side; the enemy rushed towards all the issues, throwing themselves from the embrasures into the ditches, and making for the second fort, under a storm of shot which strewed the ground with their dead and wounded. But our losses were heavy and painful. Lieutenant Grandperrier, of the Voltigeurs of the 102nd, Quartermaster Blanquet du Chayla, attached to the corps of the coolies, were killed; and Lieutenants Balme and Porte, Adjutant Lunet, of the 102nd, were severely wounded. Out of eight officers of the 102nd, two only were spared by the fire; the company of Voltigeurs alone counts 62 men killed and wounded. Commandant Testard, before entering the fort, was covered with lance wounds and contusions, besides having been knocked backwards by a cannon ball thrown down on his head. Although leaving to Gen. Collineau the command which I had entrusted him, I was present through the whole affair, and was able to observe all its details. The sole taking of this first fort was a complete victory, but it was scarcely nine o'clock in the morning, and I had to ascertain if great consequences could not be derived from the success we had obtained. I therefore entered the fort to concert with General Grant. At that moment the fire from the right bank, which had so much disquieted us in the morning, had completely ceased, and white flags were displayed from all the enemy's works. Bearers of flags of truce presented themselves, demanding to communicate with the ambassadors. General Grant and myself told them that at two o'clock precisely, unless complete submission were made, hostilities would recommence. I took advantage of this delay to give repose to our troops. I had given orders to Colonel de Bentzman to bring up immediately the two batteries of four, the second battery of twelve, and the section of rocketmen. The four were to be directed on the second fort of the left bank, which became the new object of our attack; the twelve and the rocketmen were to deploy on the banks of the Peiho, in such a way as to attack in counter-battery the great fort on the right bank, the batteries of which could take our columns in flank. At two o'clock precisely General Collineau advanced on the second fort, leaving in reserve the troops which had been engaged in the morning, whilst the artillery deployed kept itself in readiness to open fire. He arrived with his troops at the brink of the fosse without receiving a single shot. The obstacles were crossed by means of ladders, the rampart was escalated, the marines penetrated by a postern situated on the very bank of the river, and our two columns met in the interior of the fort, pressing between them a garrison of 3,000 men, who had thrown down their arms and seemed plunged in stupor. This second fort, like the first, was armed with formidable artillery, and had on its walls pieces of enormous calibre. This new success gave the measure of the demoralisation of the enemy. Chef d'Escadron Campeon and Captain de Cools were at this moment engaged in collecting the means of crossing, and had seized a junk. I ordered them to cross to the right bank with some English officers, charged with a similar mission by General Sir Hope Grant, and to summon the Viceroy of Petcheli to immediately abandon all the defences of the Peiho. On reaching the opposite shore these officers attempted to enter the first fort, but were prevented by a military mandarin, who ordered the drawbridge to be raised before them. At this moment another mandarin, bearing despatches for the Allied generals, presented himself to them. These despatches, immediately opened and translated by Mr. Parkes, of the English army, offered to abandon to the Allies the forts taken in the morning, and the opening of the Peiho to the squadrons, but reserving to the Chinese the forts and works on the right bank. These proposals were rejected, and the French and English officers resolved to go and see the Viceroy in his yamoun at Ta-kou. They were well received by him, and a very long conference ensued with the Viceroy, who appeared at first immovable. At eight in the evening only the Viceroy yielded, and handed to the officers addressed by him to the commanders-in-chief of the Allied armies the act of capitulation, in which he gave up all the forts and entrenched camps on the two banks of the Peiho, with all their materiel of war, and left free access to the river. The next morning, at daybreak, this document was in our hands; but the evening before companies of our marine infantry and some English companies had landed on the right bank, the defences of which had been evacuated in the utmost disorder by the Tartar troops. In brief, the action of the 21st has made us masters

of five forts, two immense fortified camps, an enormous quantity of arms of all kinds, war stores, and 518 cannon of large calibre. In concluding this report I think it my duty to call your Excellency's particular attention to General Collineau, who in the desperate struggle of the 21st displayed the gallantry and energy you know him to possess. I cannot speak too highly of the calmness and military skill with which he directed the operation. This general officer had his right epaulet pierced by a ball during the assault. In fine, from the very outset of this campaign and in the midst of difficulties without parallel in Europe, the troops have always distinguished themselves by their constancy and eagerness for action. The Artillery, which had so important a part to play, has been what it has shown itself everywhere. The Engineers zealously accomplished the difficult task imposed on them. The service of the field hospitals was above all praise, as well for the care bestowed on the sick in our hospitals as for the first assistance afforded to the wounded on the field of battle. I annex to this report the lists of killed and wounded, the returns of the cannon taken in the forts, the General Order No. 91, relative to the affair of the 21st; and I at the same time address to your Excellency recommendations for promotion, to which I pray you to call the gracious notice of his Majesty the Emperor.

Accept, &c., DE MONTAUBAN.

The Minister of Marine has received the following despatches from Vice Admiral Charner, who commands the French naval forces in China:—

On board the *Alarme*, in the Peiho, August 23.

Monsieur le Ministre,—As I have had the honour to inform your Excellency in a preceding report the progress of the expedition, from its departure from the banks of the Peihang, has been a series of successes. After everywhere repulsing the enemy, it arrived on the 18th under the walls of the forts established on the north bank of the Peiho; when I received notice that the allied armies would in the morning attack these formidable positions where the Chinese had for some time before collected all their means of defence. Feeling certain that the navy at the decisive moment could effectually co-operate in this attack, I had some days before sought out the best position from which our gunboats could batter the forts without interfering with the movements of the assaulting columns. The point which appeared to me best calculated for this purpose was situated on the left bank of the Peiho, but it was only accessible to craft of very slight draft of water, such as our small iron gunboats. I had four of them at my disposal, and in the afternoon of the 20th I gave orders for them to anchor on the banks of soft mud at the point which had been previously fixed on. Rear-Admiral Page took the command of them. I proceeded at the same time with the larger gunboats towards the mouth of the Peiho, and at six o'clock in the evening anchored within the bar of the river, at about a mile from the southern ports. We were not disturbed in these different movements by the guns of the forts; but about half-past nine the Chinese threw some fire-balls at our vessels, which, however, did not reach them, but exploded at a short distance off. At five o'clock in the morning of the 21st the allied armies commenced their movements against the inner northern fort, and the gunboats, under the command of Rear Admiral Page, opened their fire against the fort nearer the shore, and continued it with good effect during the action, which lasted about six hours. At low water the gunboats were completely aground, and their fire, far from being impeded, improved in precision. The fire of these boats contributed to the success of the day, not only by the direct attack on the forts, but in clearing several points of the plain over which the armies advanced. The rifled cannon caused terrible ravages in the works of the Chinese fortifications. Four English gunboats took part with us in this bombardment. At seven o'clock a loud explosion was heard, and the dense mass of smoke which followed showed that one of the principal forts on the side of the plain had been blown up. This explosion was soon followed by another, which took place about nine o'clock, and caused the destruction of one of the fortified points of the coast. This was caused by one of the balls from our gunboats. The enemy, alarmed by these successive explosions, and pressed on the land side by the allied armies, which surrounded all the positions, and exposed to the constant fire of the gunboats, no longer endeavoured to prolong their resistance. About eleven o'clock a flag of truce was hoisted on all the forts and the Chinese demanded to capitulate, offering to give up their positions into the hands of the commanders-in-chief. On this day our troops and our crews were full of ardour and energy; those of our worthy allies and their vessels rivalled with ours, and the most perfect accord has never ceased to reign between the forces of the two nations united for the same cause. In the evening of the same day the destruction of the stockades and other obstacles which impeded the navigation was commenced, and on the 22nd at nine o'clock in the morning, a passage was made wide enough to permit small vessels to come up and put themselves in communication with the head-quarters of Sin-ho. The stockades constructed by the Chinese at the mouth of the Peiho are worthy of description. They were six in number. There was first a row of strong wooden posts outside the forts; then a double row of iron spikes of great weight driven deep into the ground, and at low water only showing their sharp points. Some of these pieces of iron, which were of the size of an anchor-stock, must weigh as much as from 15 to 20 tons. A third stockade was formed of floating cylinders, joined together and fastened to the banks by strong chains; the fourth was in every respect similar in form to the second, but composed of slighter materials; and, lastly, the other two were composed of a number of beams of wood, united by chains and cables, and fixed to the two banks of the river.—Accept, &c. CHARNER.

A second despatch from the same is dated on board the *Alarme*, Tien-tsin, 25th:—

On the 23rd, about ten o'clock in the morning, at the moment when the tide favoured, I entered the Peiho with the gunboats *Alarme* and *Matraile* and two small iron ones preceded by some hours by Admiral Hope, who also left with four or five of his small vessels. The river, which in many places is very narrow, very winding, and of difficult navigation for vessels of a certain size and of the draught of water of our large gunboats, retarded my progress, and in spite of all my efforts I only arrived on the morning of the following day at the part of the river at the foot of Tien-tsin. The mandarins and

the principal inhabitants of the town at the approach of the leading boats, came towards them declaring that the people made their entire submission, and requesting at the same time that the inhabitants and their property should be placed under the protection of the Allies, who took possession of the town in the name of France and England, and hoisted their flags on the principal edifice. A proclamation from each of the admirals was also posted up on the walls of the town, recommending the inhabitants to be peaceable, and promising that their persons and property should be respected. According to the information which I have been able to obtain, the feeling of the people of Tien-tsin does not appear hostile to us. A body of 1,800 men, composed half of French and half of English troops, sufficed to maintain security, and place our position out of danger from any attempt in case the Chinese Government should commence fresh hostilities.—Accept, &c.

CHARNER.

The list of killed and wounded published contains the following officers' names:—

Probyn's Horse.—Ensign Macaulay, slightly; Lieut. Stewart, slightly.
Fane's Horse.—Lieut. M'Gregor, severely.
Staff.—Capt. Brooke, 48th Regiment, Aide-de-Camp to Sir R. Napier, wounded severely; gunshot wound of thigh—Brigadier Reeves, 90th Regiment, severely; gunshot wound of foot, forearm, and shoulder—Lieutenant Kempson, slightly; contused wound of face.
Royal Artillery.—Milward's Battery.—Lieut. Gye, severely; gunshot wound in thigh—Assist.-Surg. Prescott, slightly; gunshot wound in neck.
Royal Engineers.—23rd Company.—Brevet-Major Graham, severely; gunshot wound of thigh.
44th Regiment.—Captain George Ingham, severely; contusion of back of right thigh—Lieutenant Robert Rogers, severely; gunshot wound in right side.
67th Regiment.—Lieut.-Colonel Thomas, severely; gunshot wound of face—Captain Miller, dangerously; gunshot wound, breast; Lieutenant Kingsley, dangerously; gunshot wound, knee—Lieutenant Burslem, severely; gunshot wound, shoulder—Lieutenant Lennon, slightly; contused by shell, arm—Ensign Turner, severely; contused by shell, arm and thigh—Ensign Chaplin, severely; contused by shell, arm and thigh—Ensign Fraser, severely; contused by shell, thigh.
Recapitulation.—Officers wounded.—Two dangerously, thirteen severely, seven slightly—total 22.
Royal Marines.—Lieutenant-Colonel T. O. Travers, slightly; contused wound, right leg—Captain Carrington, slightly; gingly ball through lower hip—Lieutenant G. Maires, severely; gingly ball, left shoulder—Lieutenant Barker, slightly; lacerated wound, right foot—Lieutenant Straghan, slightly; lacerated wound, right foot.

London Gazettes.

WAR-OFFICE, Nov. 9.

The Queen has been graciously pleased to give orders for the appointment of Lieutenant-General Sir James Hope Grant, K.C.B., commanding her Majesty's military forces in China, to be an Ordinary Member of the Military Division of the First Class, or Knights Grand Cross of the Most Honourable Order of the Bath.

Her Majesty has also been graciously pleased to give orders for the appointment of Vice-Admiral James Hope, C.B., Commander-in-Chief of her Majesty's naval forces in the East Indies and China, to be an Ordinary Member of the Military Division of the Second Class, or Knights Commanders of the said Most Honourable Order.

Naval and Military.

Tenders for stores for the use of the China expedition continue to be announced. The detachment of troops proceeding by the *Sultana*, named in our last, will proceed in about a week.

Salutes have been fired from the principal forts in honour of the victory at the Peiho.

Rumours were circulated at the head-quarters of the Royal Marines, on the 8th, to the effect that the battalion now serving in China would embark at Hong Kong for England on the 1st of October.

We believe, says the *Army and Navy Gazette*, that the earliest opportunity will be taken of advancing Lieutenant Rogers, 44th Regiment, and Lieutenant Burslem, 60th Regiment, to the rank of Captain, and Ensign Chaplin to that of Lieutenant, for the gallant conduct exhibited by these officers in the attack on the Taku forts. Although they have been recommended for the Victoria Cross, we understand that the formal recommendation which must precede its bestowal has not yet been received in England.

Captain James J. McCleverty, C.B. (1848), now in command of the *Cambrian* frigate on the China station, has been appointed to receive the Captain's Good Service Pension, vacant by the promotion of Captain Massie.

A correspondent of the *Army and Navy Gazette* has called attention to the booty money accruing on the capture of Canton. The editor, in reply, says:—"The Canton Booty—naval share—hangs fire at the Treasury: a question of apportionment, we believe. The lists to pay the £33,000 are nearly completed at Somerset House. In a month probably the notices will be issued."

Ensign Chaplin, who recently distinguished himself at the capture of the Chinese forts, is a son of the late Mr. W. L. Chaplin, for many years chairman of the South-Western Railway Company, and a brother of the present partner in the well-known firm of "Chaplin and Horne."

COMMERCIAL POSTSCRIPT.

CITY, TUESDAY AFTERNOON.

The bar silver brought by the last Mexican packet has been sold at 61½d. per oz., showing a decline of ½d.

ARRIVALS.—At Boston, Oct. 24.—From Penang: Minstrel, Kelly.

DEPARTURES NOT INCLUDED IN TABLE.—Nov. 8, from the Clyde, for Macassar, Sophia. Nov. 10, from London for Hong Kong, Sultana.

SPOKEN.—Zeenyonph, Dutch barque, bound to Batavia 1st Sept., 39 S. 22 E.; Coromandel, Liverpool to China, 31st Oct., 49 N. 10 W.; Yeelust, Dutch barque, Amsterdam to Batavia, 9th Sept., 39 S. 53 E.; Hero, Foochow-Foo to London 18th Sept., 21 S. 58 E.; Alice, London to Singapore 10th Sept., 40 S. 56 E.; Marie (French ship), Marseilles to Singapore 15th Aug., 36 S. 1 E. At Mauritius, Sept. 11, Ly-ee-moon (s.s.), Hill, from London and Cape of Good Hope, and sailed 15th for Singapore; Kap Hoorn, Dik, Rotterdam to Sourabaya, 31st Aug., off Rio Janeiro; Fidelo, Hanschildt, Hamburg to Macassar, Oct. 26, 41 N., 7 W.

MAURITIUS, Oct. 6.—The Louis Cezard, Thomas, from Bordeaux, to Batavia, which put in here Sept. 19th, leaky (making twenty inches water per hour). The Jan Van Brakel (Dutch barque), Verhey, from Batavia, to Rotterdam, which put in here Sept. 24, leaky, and the James Lemon (barque), Maculay, from London to China, which put in here Sept. 26, also leaky, are all discharging.

It is reported that the Africa (American ship), Jordan, from Cardiff to Shanghai, got aground in the Straits of Gaspar, and being surrounded by pirates, was abandoned, and was on fire before the crew lost sight of her, the latter are reported as having been landed at Singapore on Sept. 9.

Monetary and Commercial.

We hear nothing further about the reported loan for India. The Indian Council are not apparently in want of money just at present. But it is hardly likely they can pull through the financial year without assistance. Meanwhile, rupee paper is lower, and is saleable only to the banks. The Five per Cents. are at 95 to ½, and the Five and a-Half per Cents. at 101 to ½.

The Board of Trade returns for September show that the declared value of the effects for the nine months is greater by £3,687,035 than during the nine months of 1859, and by £5,988,754 than during the nine months of 1858. The tables are very imperfect in their details respecting the exports to China; but so far as they go they show a satisfactory increase. A statement will be found below.

The following has been issued to the shareholders of the Labuan Coal Company:—

"69, Lombard-street, Nov. 5.

"I am instructed by the directors of the Labuan Coal Company to inform you that the China mail has brought them advices from Messrs. Middleton, Harrison, and Co., the company's agents at Singapore, dated the 19th of September, announcing the safe arrival there on the 13th of September of Mr. Hunter, the company's mining superintendent, and staff of ten Europeans.

"The directors have witnessed with great satisfaction the zeal and ability displayed by Mr. Hunter, and they are deeply indebted to Messrs. Middleton, Harrison, and Co. for the promptitude and energy with which they have acted. Immediately on Mr. Hunter's arrival at Singapore, announcing to them the sudden death, in the Red Sea, on his passage out, of Mr. McLaren, the company's general manager, they at once, in consultation with Mr. Hunter, associated with him Mr. Robert Ooulson, of Singapore, to aid in the general management, engaged 40 Chinese artisans and miners, and arranged that a confidential bookkeeper from their own establishment should take charge of the company's accounts.

"Having chartered a fast brig to convey the party to Labuan (distant from Singapore 700 miles), Mr. Harrison, one of their partners, was kind enough to accompany the expedition to see all in order, and which would start within one week from Mr. Hunter's arrival.

"The arrangement with Mr. Coulson has the cordial approval of the Board, as he has had great experience in the management of native labour, having for years superintended coal mines in the East, and has a practical knowledge of Labuan, having resided there and worked the coal seams.

"Mr. Harrison informs the directors that he will be able to forward full reports on the mines from himself and Mr. Hunter by the mail of the 29th of November, pending which the directors have great satisfaction in finding that all the preliminary operations have been so promptly and judiciously undertaken.

"A. WILSON, Sec., pro tem."

The dollars brought by the last Mexican steamer have been disposed of at 62½d. per ounce, thus establishing an advance of ½d. on the price realised for those which arrived in the middle of last month. Small amounts have, however, been sold in the meantime at the present rate, and also at 62½d. The bar silver by the same packet is not yet sold.

The specie by the present mail is as follows:—Alexandria, £5,275 gold; Madras, £4,766 gold, and £17,420 silver; Calcutta, £9,520 silver; Singapore, £850 gold; Penang, £1,200 silver; Hong Kong, £98,860 silver—of this sum £85,250 is on Government account; Foochow, £1,900 silver; and Shanghai, £14,071.

ARTICLES OF IMPORT.

TEA.—Extensive public tea sales held just after the outward mail of the 26th ult., opened with brisk competition, at 1d. to 2d. per lb. advance for Haassam, and fully previous rates for China descriptions. Towards the close

the demand was checked by the news detailing the capture of the Taku Forts, and the dispersion of the rebels from Shanghai, and the market has since remained inactive. Prices are not quoted lower, but the tendency is in the buyer's favour. Good common Congou has been only in limited demand for export, and the price cannot be quoted over 1s. 3d. per lb. Some transactions in low and broken-leaf kinds have taken place, at from 10d. to 1s. 1½d. per lb. Fair to good flavoury kinds were at one time saleable, at ½d. to 1d. per lb. advance; but they are not difficult of sale at last month's prices. In common to fair Hohows and Ningchows considerable purchases were made from 1s. 5d. to 1s. 6½d. per lb.; but they have become difficult of sale at reduced prices. In second-class monings and wopaks, also, the advance at one time obtainable has been lost. In fine monings transactions have been trifling. The new kaisows have met with a fair inquiry, and further arrivals of really fine have commanded fully the opening prices; in good qualities sales have been made, from 1s. 8d. to 1s. 11d. per lb. Tayshans were in moderate demand at higher prices early in the month, but are now neglected; the lower qualities were taken by the exporters. In Oolongs we have but little alteration to notice. In Souchongs but little has been done. A small parcel of new season has been sold, at 3s. 1d. per lb., which, quality considered, is an extreme price. Flowery pekoes continues very difficult of sale, and prices are very irregular. Common to fair scented capers have sold about 1d. lower, as also fair scented orange pekoes. In Foochow teas the supplies have been moderate, and prices remain much as before. There has been a better demand for green teas, owing to the non-arrival of supplies at Shanghai, and uncertainty as to when they will reach that port. Fair to good taiping gunpowders show an advance of 1d. per lb. In moyunes the few sales are also at higher prices, whilst ping sueys have realised, both at public sale and privately, an advance of 1d. per lb. for fair to good qualities, and 2d. to 3d. per lb. for fine to finest. In Young Hysons there is not much to notice, some of Japan growth, faced in Shanghai, have realised full prices. Common to fair Hysons maintain former prices, but good and fine are with difficulty saleable at a fall of fully 2d. to 3d. per lb., there being scarcely any export demand. Canton made teas show but little alteration.

SILK.—China silk, which, prior to the overland advices, was selling somewhat freely, has since attracted but little attention, owing principally to the heavy settlements noticed at Shanghai. The quotations are as follows:—

Yucula	.	14	0	24	6					

SUGAR.—Only a moderate quantity of Penang has been brought forward which went off heavily, but small parcels in public sale lately fetched advanced rates. The inquiry for clayed Manila has improved, and large transactions have been effected on enhanced terms. Unclayed has continued scarce, and though no sales of moment have occurred, proportionate rates to those lately current for other sorts could be obtained. Of Siam, &c., several parcels have offered, and been mostly sold at fair rates. Java has been realised to some extent, principally by private contract, at fully former quotations.

COFFEE.—The abundant arrivals expected at the date of our last advice, and which then produced a languid tone, have since had a still more depressing influence on the market, and as several cargoes of Ceylon have been received, and a large portion latterly brought to auction, prices of plantation have declined 1s. to 2s. per cwt., more especially for the palish qualities; but from the previous scantiness of supply, and contracted purchases of the home trade as well as exporters, a fair demand has existed at this reduction, and nearly the whole of the quantity offered has been disposed of; native likewise has been unfavourably affected, and though only a moderate amount has yet come to hand, the comparatively limited business done has been at a similar decline.

RICE.—The sales of the month are about 250,000 bags Madras, chiefly from 11s. 3d. to 12s. 3d.; low to fine white Bengal, 11s. 6d. to 15s.; Bal-lam, 11s. to 11s. 6d.; Nakrenzie Arracan, good old, 10s. 7½d. to 11s.; new, 11s. 3d. to 11s. 6d.; very ordinary to good Rangoon, 9s. 9d. to 11s. 3d.; and Moulmein, 10s. 6d. to 11s.; and afloat, the following cargoes, viz., two of Madras, together about 1,200 tons, at 11s. 9d. and 12s.; three of Rangoon, 2,700 tons, at 11s. 6d. to 11s. 7½d., and lately 12s.; two of Bassein, 1,400 tons, at 11s. 3d. to 11s. 6d.; also of Nakrenzie, five, comprising about 3,200 tons, at first, at 11s. 3d. and 11s. 4½d.; but since at 11s. 9d. (with part Larong at 11s. 7½d.) up to 12s. 1½d., the latter fully insured.

PEPPER.—Large parcels have been realised, viz., 10,000 bags Singapore, greyish to good black, 4d. to 4½d.; 3,000 bags Penang, at 3½d. to 3¾d., and a few brown Batavia at the same prices. Home-trade kinds are still dull of sale, but without change in value, only 1,500 bags good Alleppy and Travancore having been taken at 4½d. Business in white has been confined to Singapore, of which 1,200 bags have been sold at cheaper rates, chiefly fair quality, in the early part, at 5½d.; a few good at 6½d., but with more inquiry recently: middling to fair quality has brought 5½d. to 6½d.; good and fine, 6½d. to 7d.

SAGO.—Large business has been done privately, chiefly in small grain, at about 17s. 6d. to 18s. per cwt. Of 723 packages at auction, two-thirds sold at 16s. for ordinary medium, 14s. siftings, and 13s. to 15s. 6d. ordinary Borneo sort. The market has now become very quiet. In Sago Flour a fair trade has again been done within our quotations privately; and of 600 bags at auction one-fourth sold at 18s. 6d. to 19s. per cwt.

SPICES.—Cinnamon: the quarterly sales have gone off with much spirit, at an advance of 1d. to 2d. per lb., nearly all offered finding buyers: the following are the details: 242 bales, 1st sort, 1s. 6d. to 2s. 2d.; 775 2nd, 1s. 2d. to 1s. 8d.; 332 3rd, 10s. to 1s. 4d.; 180 4th, 9d. to 1s. Cassia lignea has further advanced 3s. to 4s. with a brisk market, and of 3,274 boxes at auction two-thirds sold at 90s. to 96s. per cent. for 3rd to 1st quality. Cassia buda: Sales at 190s. Cloves: firm for all sorts. 3 cases Penang sold at auction at 1s. 2½d. to 1s. 3d. per lb. for good; and 424 bags Zanzibar, one-third sold at 3½d. to 4d. for low to good. Mace: steady,

but still very cheap; 26 cases Singapore, 10 cases Penang, and 3 cases Batavia offered at auction, and two-thirds sold at 2s. per lb. for good pale, and 11d. to 1s. 4d. ordinary to good reddish. Nutmegs: the small sorts are 1d. per lb. cheaper; 314 cases Singapore, 15 cases Batavia, and 3 cases Penang, sold at auction at 1s. 1d. to 2s. 5d. per lb. for inferior small and shrivelled to middling good bold.

HEMP.—For Manila the market has improved; and of 3,462 bales at auction, about one third sold: fine white at £35 to £35 7s. 6d. per ton; ordinary to good roping, £22 10s. to £25 10s.; prices being 20s. per ton higher.

COTTON.—Market remains firm, and rates in some instances have advanced $\frac{1}{2}$ of a penny for Surat.

JAPAN WAX.—The last quotations maintained: block at 60s. to 65s., and saucer at 65s. 6d. to 66s. 6d.

TOBACCO.—Imports of Java from Holland have been large. About 60 bales of Manila are in the market for private sale.

TIN.—Market a little more active at 134s. to 135s. for Banca, and Straits 130s. 6d. to 131s. 6d.; antimony ore, £16 2s. 6d.

MISCELLANEOUS.—India-rubber: market flat, and supplies increasing, quotations nominal at 1s. 11d. to 2s. Camphor: operations have been of some interest: auctions embracing 234 cases China, and 243 tubs Japan, which were all taken at £6 10s. to £6 12s. 6d. per cwt., and the drug has since become very firm at £7. Sapanwood: market still much depressed, and of 55 tons Manila, and 13 tons Siam at auction, a few of the former sold at £5 7s. 6d. per ton for middling, being very cheap. Soy: auctions have included 50 hogsheds China, sold readily at 4s. to 4s. 2d. per gallon, and 350 tubs Japan, only a few of which sold at 1s. 9d. Rhubarb: market quiet; parcels at auction retired. Mother-o'-pearl shells: quotations as last. Tortoiseshell: market more active; 4 cases Manila sold at 23s. 6d. to 25s. per lb. for middling to very good but reddish mottle; 3 cases Singapore sold at 21s. 6d. to 22s. 6d. for very good clean shell in sorts, and 19s. small and defective. Star anniseed: market quiet, no sales. Stielac: parcels at auction retired. Gum Benjamin: market firm. Sales of Siam, £21 10s. to £23 10s. for second quality. Rum: no sales to report.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh Bars, £6 7s. 6d. to £6 12s. 6d.; nail rods, £6 15s. to £8; hoops, £9 to £9 10s.; sheets, single, £9 10s. to £10; Staffordshire bars, £8 to £8 10s.; rails, £5 10s. to £7.

STEEL.—Swedish keg, £18 10s. to £19 10s.

COPPER.—Sheet and Sheathing, 11½d.; yellow metal, 9½d.

TIN, 136s. for block; 137s. for bar. Tin plates, best charcoal, I.C., 31s. to 32s. per box.

LEAD.—English Pig, £21 5s. to £21 10s.; shot, patent, £25; sheet, £22 5s.; Spelter, £19 15s. to £20 0s.; Zinc, English Sheet, £26; Quicksilver, £7 per bottle.

EXPORT OF BULLION TO CHINA. &c.

The following return shows the shipments of bullion from England during the present year by the P. and O. Company's mail steamers:—

On Hong Kong, ditto	4s. 9d. $\frac{1}{2}$	Do. 4s. 3d. to 4d.

MANCHESTER MARKET.

This market has been chiefly influenced by the Liverpool cotton market, and the intelligence from India and China has had no perceptible effect. Sellers of yarn have asked prices impossible of attainment, though, in a few cases, $\frac{1}{2}$ d. to $\frac{1}{4}$ d. per lb. has been paid over the rates of last week, especially on cop twist and worst for local consumption. Transactions in cloths have been to a smaller extent than those in yarns, inconsiderable as the latter have been, and the position of the manufacturer has certainly deteriorated. An advance of $\frac{1}{4}$ d. per piece over the reduced rates of last week has been cursorily obtained on China shirtings, but, as a rule, buyers hold aloof from extensive dealings.

FREIGHTS AND CHARTERS.

The shipping trade has continued very steady; and in looking at the reports which come to hand from all quarters, it appears that the supply of tonnage is very evenly distributed in proportion to the trade of the respective ports, so that while ships are fully employed, there does not appear to be any extraordinary demand which remains unsatisfied.

The French Government continues chartering for coals and stores for China, the rate of freight having advanced to 82 francs; and the English Government have issued tenders for the conveyance of 1,000 tons of stores to Hong Kong, and current rates have advanced about 5s. per ton, which assists in maintaining the value of the ships for the berth.

Coal freights are very firm, and in some instances higher rates have been given; present quotations are £43 Calcutta, £40 Bombay, £43 Kurrachee, £33 Andaman Islands, £40 Point de Galle, £38 Penang; Cardiff to Hong Kong, 60s.; Shanghai, 65s.

Rates of freight current for vessels on berth to Shanghai, 65s. per ton dead weight; 50s. per ton of 40-feet measurement. To Hong Kong, 50s. weight, 45s. measurement. To Singapore, 35s. to 40s. weight or measurement (nominal). To Manila, 35s. and 40s. To Japan, £5 weight, 90s. measurement. To Batavia, 50s. weight, 40s. measurement.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Nominal quotation for Yedo, 70s. to 80s.

At Hamburg, for Batavia and Singapore, 40s. to 50s., China and Manila, 50s. to 60s.

CASUALTIES.

According to advices from the Cape of Good Hope of 19th Sept., the unsold portion of the cargo of the Admiral des Ruyter, de Witt, from Passarwan to Amsterdam, condemned there, had been shipped on board the Witch of the Seas, for London, to be forwarded from thence to Amsterdam.

At St. HELENA.—Sept. 21, from Foo-chow-Foo, Cyclone, Hossack; 20, from Hong Kong, Carnatic, McNeil: from Rangoon, Hooghly; 9, Medea, Laurens, from Batavia, and sailed 10th for Rotterdam; Professor Schuringa, Speltjes, from Batavia, and sailed 10th for Amsterdam; Koning en Vaderland, from Batavia, and sailed 10th for Rotterdam; 15, Johanna, Picard, from Batavia, and sailed 22nd for Rotterdam; 18, Indiaman, Smith, from Manila, and sailed 19th for New York; Eliza Hands, Lamb, from Singapore, and sailed for Liverpool 19th; Asia, Pens, from Hong Kong, and sailed for London 21st. From Manila: Cervantes, Aquirre, and sailed for Liverpool 22nd; Tigris, Fletcher, from Singapore, and sailed 24th for Liverpool; Rattler, Montechiaro, from Sumatra, and sailed 23rd for Gibraltar; 23, Michel Montaigne, Gachet, from Singapore, and sailed 24th for Bordeaux; Dina, Rademaker, from Batavia, and sailed 24th for Amsterdam; 24, Sir Robert Peel, Pedersen, and William Gillies, Wilson, both from Penang, and sailed 25th for London; Martha en Jacoba de Vrils, from Tjilatjap, and sailed for Amsterdam 25th; Willem Daniel, de Meister, from Batavia, and sailed 27th for Amsterdam.

At St. VINCENT, Oct. 29, H.M.S. Hornet, from England, and left 2nd Oct., for China.

At RIO GARDE, Sept. 17, for Singapore, Willy, Capt. Nagemann. At Bahia, Oct. 12, for Singapore, Procymania, Capt. Loram. At Pernambuco Oct. 9, from China, Home Capt. Bassett.

PASSENGERS OUTWARD.—Per *Zephyr*, Capt. de Vries, from Rotterdam to Batavia: Mrs. Welsink and three daughters; Mrs. Hutchinson and two children; Mr. and Mrs. Malherbe and family; Mr. and Mrs. T. A. van Nagen and family; Messrs. T. Enklaar, de Bruyn, Deutz, Slicker, Miss Embrecht, and Miss Staverman. Per *Vesta*, Capt. Gerrebrand, from Amsterdam to Batavia: Mr. and Mrs. Bogstra and family; Messrs. Townsend and Diepehorst. Per *Jaunette*, Capt. Lutcke, from Amsterdam to Batavia: Mr. and Mrs. van Heemskerck and family; Messrs. T. G. Pfeiffer, J. C. Kroesen, J. T. Wessels, Mr. and Mrs. L. Wessels, J. W. Mensing, J. H. Gelpcke, J. Mullermeister, Mr. and Mrs. C. Kramers, Miss Kramers, one Javanese servant. Per *Johannes Lodewyk*, Capt. van der Wal, from Amsterdam to Batavia: Lieut. Bezemer, R.N.; Mr. Ziedes des Plantes, B.I. Civil Service, wife and family; Messrs. Kruseman, Brenkman, and Hawlit. Per *Twice Anthoys*, Capt. van Ryn, from Rotterdam to Batavia: Mr. and Mrs. L. H. Deeleman and three children; Mr. and Mrs. B. A. de Quay and child; Mr. and Mrs. J. C. Hoffman and six children; Mr. and Mrs. G. D. Jansen and three children; Mrs. Groneman de Wildo; Miss C. Weimar, Messrs. C. N. van der Lecuw, J. Deketh, C. Visser, M. H. Brandes, Ottenhoff, W. C. Klis, E. D. Levysohn, Norman, Cambier, J. A. Vis, two Javanese servants.

PASSENGERS INWARD.—Per *Canton*, Capt. Tweehuys, at Amsterdam, from Batavia: Capt. de Broom and family, First-Lieutenant Quartermaster Roebby and family. Per *Vrede*, Captain van der Plas, at New Deep, from Batavia: Mr. and Mrs. J. H. Herlots and family. Per *Gertrude Maria*, Capt. Drenth, at New Deep, from Java: Mr. and Mrs. F. H. Boers, Messrs. I. Kolm, J. H. Smulders, H. van Stockum, van Hamerts and two children. Per *Graafstroom*, Capt. Ruhaak, at Brouwershaven, from Java: ten military invalids. Per *Commissary Royal van der Heim*, Capt. van Zanten, at Brouwershaven, from Java: Lieut.-Colonel E. Rappard and family; five invalids.

INGENIOUS APPARATUS FOR WORKING SHIPS' PUMPS, WINCHES, &c.—An interesting experiment, which was witnessed by the officials from Lloyd's, the Liverpool underwriters, and several mercantile and engineering gentlemen has been tried in the Mersey, with a view to show that by the adoption of an apparatus invented by Mr. Formby, of Liverpool, a vessel's pumps, winches, &c., may be worked by the motion of the vessel herself through the water. The apparatus is in the form of a screw, which, immersed in the water, is made to revolve, and communicates motion to the pumps, &c. On long voyages, when vessels spring a leak, or require frequent pumping from other causes, such an apparatus would be found of the greatest value, as there are few things more harrassing to a crew than constant pumping.

THE P. AND O. STEAMER "VALETTA."—The P. and O. Company's steamship *Valetta*, Captain N. Roskill, which has been thoroughly overhauled and refitted, and had some improvements and additions effected in her machinery, sailed from Southampton on the 5th inst. for Marseilles to resume her station between that port and Alexandria, in connection with the mail service. It had been arranged that the *Valetta* should make one voyage on the Peninsular line before her return to the Mediterranean, but her immediate departure for the latter station was necessitated by the accident to the *Massilia*.

ASTOR HOUSE. SHANGHAI.

THIS PRIVATE HOTEL is admirably suited for Commercial Purposes. It is between the English and French Legations, and commands an entire view of the river.

NOTICE TO PASSENGERS BY THE OVERLAND ROUTE, via EGYPT.

PHILIP ZECH, Proprietor of the two well-known Hotels in Alexandria, the Hotel d'Europe, and the Peninsular and Oriental Hotel, begs to inform his friends, and Travellers in Egypt in general, that he has purchased SHEPHEARD'S HOTEL in CAIRO, which will still continue to bear the same name; and in returning thanks for the extensive patronage enjoyed by his two houses in Alexandria, hopes that the preference may likewise be extended to his house in Cairo, which will be managed in first-rate style, and in a manner intended to give every satisfaction to its frequenters, both as far as table, wines, internal and external service are concerned. Many alterations and ameliorations are being carried out at the present moment.

Curtis on Manhood—New Edition.—A Medical Essay on Nervous Diseases.

Just published, the 120th thousand, with numerous plates in a sealed envelope, price half-a-dollar.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE, with plain directions for perfect restoration to health and vigour. By J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

CONTENTS:

INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatorrhoea and Impotence; Early Vicious Indulgences; Dangers of Neglect.

CHAPTER III.—A Review of the various Disqualifications of Marriage—whether resulting from the Youthful Abuse, the Folies of Maturity, the Effects of Climate or Infection.

CHAPTER IV.—The Author's plan of Treatment Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhoea and other Urethral discharges by microscopic examination.

CHAPTER V. and VI. on the modern Treatment of Gonorrhoea and Syphilis.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

"We feel no hesitation in saying, there is no member of society by whom the book will not be found useful—whether such person hold the relation of Parent, Preceptor, or Clergyman."—Sun.

Mr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by letter, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Mr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty Years; nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINNAM, QUEEN'S ROAD, HONG KONG.

FACILITIES IN BOOK-KEEPING

FIRE.—DESTRUCTION OF THE PLANT, STOCK, AND PROPERTY OF THE Largest Ropery and Ship Chandlery in the Country, Messrs. Frost, Brothers, of Shadwell, London. PRESERVATION OF Books, Papers, and Cash, in MILNER'S SAFE, standing by the side of two other safes, (not Milner's) the contents of which were consumed.—See "Times," Sept. 7, 1860.

TO MESSRS. THOMAS MILNER AND SON,
Liverpool, and 47A, Moorgate-street, City, London.

Gentlemen,—We have very great pleasure in bearing testimony to the efficiency of your "Patent" Fire-resisting Safe. In the destructive fire which destroyed the whole of our premises on Sunday morning last, our books, papers, and cash, which were in the safe we purchased from you in March last, were all preserved; and this is the more remarkable because the contents of two other safes, not of your manufacture, standing in the same office within two feet of your safe, were consumed. Our most sanguine hopes have been realised in this severe test, and we leave you at liberty to make use of this letter in any way you may wish.—We are, Gentlemen, yours, &c.

FROST, BROTHERS.

Shadwell, London, Sept. 8, 1860.

TWINBERROW'S DANDELION, CAMOMILE, AND RHUBARB PILLS, an effectual cure of indigestion, all stomach complaints and liver affections. In cases of constipation these pills never fail in producing a healthy and permanent action of the bowels, so that in a short time aperients will not be required, and, being quite as innocent as castor oil, they may be given to children.

From Dr. Dick, Lansdown-terrace, Kensington.

"Sir,—Send me another bottle of your Dandelion, Camomile, and Rhubarb Pills for my own use. I lose no occasion of recommending these Pills, as I can conscientiously do so."

Prepared by TWINBERROW, Operating and Dispensing Chemist, 2, Edwards-street, Portman-square, London; and may be had of all Patent Medicine Vendors.

TOILET REQUISITES.

CALEB SOUL and CO., EXPORT PERFUMERS AND FANCY SOAP MAKERS, 85, Queen-street, Cheapside, London, or of any Indian Agency Houses.

FOR FAMILY ARMS.—Send Name and

County to the Royal Heraldic Studio and Library; in a few days you will receive a Correct Copy of your Armorial Bearings. Plain Sketch, 3s.; in Heraldic Colours with written description, 6s.; Large Size, 12s. Family Pedigrees, with original grant of Arms, to whom and when granted, the origin of the name, all traced from authentic records, fee Two Guineas. An Index, containing the Names of nearly all persons entitled to use Arms, as extracted from the British Museum, Tower of London, Herald's College, &c. &c. The Manual of Heraldry, 400 Engravings, 3s. 6d., post free, by T. CULLETON, Genealogist, Lecturer on Heraldry at the Mechanics' Institute, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C. The Heraldic Colours for Servants' Liveries, 5s.

STAMP YOUR OWN PAPER—with Arms,

Crest, Initials, or Name and Address, by means of CULLETON'S PATENT EMBOSSEING PRESS. 16s. Best Make. 21s. Any person can use them.—T. CULLETON, Die Sinker to the Board of Trade, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

WEDDING CARDS—For Lady & Gentle-

man—5s. each. 50 Embossed Envelopes, with Maid's Name printed inside, 13s. Visiting Cards—A Copper Plate engraved in any style, with name and 50 Cards, printed for 2s., post free. N.B.—All orders executed by return of post, for stamps or cash. T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

FAMILY ARMS, &c., Emblazoned for Paint-

ing on Carriages or Needlework, 6s.; Best Style, 12s., Gothic and Modern Monograms Designed, 5s. Arms Quartered, Impaled, and Painted on Vellum, according to the laws of Heraldry. By T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

ARMS, CRESTS, &c., Engraved in the Best

Style. Crest on Seals or Rings, 7s. On Steel Die, 6s. Initials, 1s. 6d. per Letter. Book Plate, Engraved with Arms, 10s.; or Crest, 5s. Postage and Registered Letter, 1s. extra.—T. CULLETON, Heraldic Engraver by Appointment to the Queen, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

SOLID GOLD RING (18 Carat, Hall

Marked), Engraved with Crest, 42s.; Large Size, for Arms, 75s. On receipt of P. O. order the size will be sent to select from.—T. CULLETON, Seal Engraver, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

THE PEN SUPERSEDED.—Mark your

Linen. The best and only method of Marking Linen, Silk, Stockings, Course Towels, or Books, so as to prevent the Ink washing out, is with CULLETON'S PATENT ELECTRO-SILVER PLATES. By means of this novel invention a thousand pieces of linen can be marked in a few hours. Initials, 1s. each; Name, 2s. 6d. Set of Moveable Numbers, 2s. 6d.; Crest Plate, 6s., with the necessary directions for use. Post free. Certificate from the eminent Dr. Sheridan Muspratt, F.R.S., Professor of Chemistry, &c.

"Several trials with Mr. Culleton's Patent Electro-Silver Plates, for marking linen, induce me to pronounce them excellent; the letters are beautifully marked in a deep black colour, without blotting, and after a long boiling, with either potash or soda, they remain unaltered. Other plates which I tried decomposed the ink, and in many cases burned holes in the linen. I can testify Mr. Culleton's Plates are incorruptible, and will not hurt the finest fabric.—(Signed) "SHERIDAN MUSPRATT," College of Chemistry, Liverpool.

"May, 15, 1854."

All orders to be sent to the Patentee and Sole Maker. T. CULLETON, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

All Orders executed by Return of Post.

SUGAR MAKING MACHINERY

TO SUGAR PLANTERS, MERCHANTS, & OTHERS,

CONNECTED WITH THE
SUGAR COLONIES.

G. BUCHANAN & CO.,

Engineers and Manufacturers of

**Sugar Machinery and Apparatus,
COFFEE, COCOA NUT, AND RICE MACHINERY,
(OF YORK PLACE IRON WORKS,
ABERDEEN),
25, BUCKLESBURY, MANSION HOUSE,
LONDON, E.C.,**

SUPPLY with the same satisfaction as hitherto their improved SUGAR CANE MILLS, worked by Steam, Water, Wind, or Cattle Power; Vacuum Apparatus, Clarifying, Boiling, Concentrating, and all kinds of Apparatus and Implements used on a Sugar Estate.

Improved Coffee Pulpers, Peelers, Sizing Machines, and Drying Stoves, &c.

Grinding Machinery and Hydraulic Presses, especially designed for reducing the Cocoa Nut to a Pulp, and extracting the greatest percentage of Oil.

Rice Machinery, consisting of Machines for thrashing the Paddy, and complete Rice Mills for Husking, Pearling, Polishing, and otherwise preparing the Rice fit for the London Market.

All the above-mentioned descriptions of Machinery arranged to be driven by Steam, Water, Wind, or Cattle Power.

Having personally visited various Sugar Colonies, their Steam Engines, Steam Boilers, Pumps, Water Wheels, &c., are expressly adapted for Colonial use.

G. B. and Co.'s practical experience of eighteen years, as Sugar and Colonial Engineers, will be some guarantee as to the quality of their Machinery, to the good working of which they can produce numerous References and Testimonials.

N.B. Descriptive Catalogue of G. B. and Co.'s Machinery forwarded on application.

Designs supplied for Sugar Houses for Estates of all sizes.

In addition to the above G. B. and Co. continue to manufacture and supply, as usual, all kinds of Machinery and Iron Work required for Colonial use, Iron Ships, Barges, and Steamers, Wrought and Cast Iron Bridges, Railway, Dock, and Harbour Plant, &c., &c.

Order through any respectable Colonial Merchant, or through G. B. and Co.'s Agents, where established.

HOLLOWAY'S OINTMENT AND PILLS.

FEMALE COMPLAINTS.—The disorders peculiar to women are the most delicate and difficult to be conducted to favourable terminations. Upon their early and judicious treatment hangs the momentous question whether women enjoy strength, soundness, and cheerfulness, or pine away in weakness, disease, and misery. Holloway's inestimable preparations are the most reliable remedies for restoring weakened or suspended functions. The Ointment should be rubbed on the back and stomach for at least ten minutes every night and morning till restoration take place, and perfect functional regularity be induced. While thus using the Ointment, Holloway's Pills should be freely taken in order to purify the blood and cleanse the system, by which natural process all obstructions will be readily removed.

RIMMEL'S TOILET VINEGAR super-sedecies EAU DE COLOGNE, as a TONIC and BRACING LOTION, a reviving scent, and a powerful disinfectant. 1s., 2s. 6d., and 5s. Sold by all the trade.

E. RIMMEL, Perfumer, 96, Strand, and 24, Cornhill London, and 17, Boulevard des Italiens, Paris.

Agents will be found in every city where English is spoken.

To prevent disappointment, be sure to ask for Piesse and Lubin's Perfumery.

PROGRESS OF THE THIRD CHINA WAR.

The following telegram was published in the daily papers yesterday, which has been confirmed by the mail delivered this morning:—

Mr. Boulby, (*Times*' correspondent), Mr. Loch, secretary to Lord Elgin, Mr. Parkes, Messrs. De Norman and Anderson, of Fane's Horse, and Captain Brabazon, have been made prisoners whilst engaged in choosing camping ground. They have been taken to Peking, where they are well treated.

Engagements were fought on the 18th and 21st September at Chang-Kia-Wan and Jang-Chan. On both occasions 30,000 Tartar cavalry advanced, and were completely routed by the Allies.

Two thousand Tartars were killed, and 50 guns taken. The Allies had only 18 wounded.

The Chinese have sent in a flag of truce, with the provisions for a treaty.

Lord Elgin demands the release of the prisoners before negotiating.

The Emperor's brother has been appointed chief commissioner to make peace.

Tea to the value of £250,000 sterling was taken at Chang-Kai-Wan.

(FROM OUR SPECIAL CORRESPONDENT.)

HO-SI-WU, Sept. 26.

This is one of the naval stations, about thirty-five miles above Tien-tsin, between which two places the stores and provisions of the army are conveyed in flat country boats navigated by the navy, accompanied by a strong guard of the same: the heavy siege train was brought up in this way. From here the hills at the back of Peking, which is some twenty-five miles distant, can be plainly seen, the whole country being a dead flat, but well cultivated, and with good roads. On the 18th, Sir Hope Grant, with a division under Sir J. Michel, composed of Marines, part of the 99th, Rifles, part of the 3rd Buffs, a Punjaub regiment, two batteries of Artillery, and all the Cavalry, with a small French force, had a sharp action with the whole Tartar army, under Prince Sangolin-sin, near Tang-chow, which ended in their being completely routed, their whole artillery, consisting of seventy guns, being captured, together with a very strong entrenched camp (in which we found a million pounds of tea). 700 killed and wounded on their side, but on ours very few indeed. It took place entirely through the treachery of the Chinese, as there was a suspension of hostilities for the time; but it appears to

have been a last attempt of San-go-lin-sin to retrieve his lost honours, in which he signally failed, and it is reported that he has now committed suicide rather than wait to lose his head at Peking, by command of his Celestial Majesty. I regret to say, that Mr. Parkes, accompanied by Mr. Locke and Mr. De Norman, of Lord Elgin's staff, Boulby, the *Times* reporter, Captain Brabazon, of the artillery, and Colonel Walker, O.M., general of cavalry, as also Lieutenant Anderson, of Fane's Horse, with some twenty troopers, have all been taken prisoners, and carried off to Peking. Great fears are entertained about Parkes's safety, but Sir Hope Grant has sent to say, should one hair of any of their heads be injured he will sack and burn Peking, and he immediately sent down for reinforcements to come up. So the 31st and 67th, and another Punjaub regiment was sent up from Tien-tsin. The 44th are ordered up from Shanghai, and the *Cambrian*, in tow of the *Australian*, has been sent down to Talien-whan Bay to bring up all the rest of the troops from there and break up the establishment, as the bay I mentioned in my last letter will be our wintering place for the Northern part of the forces. The capture of Parkes and the others took place as follows (except Anderson and his troopers, who were taken in another way). The army was halted about half-way between this place and Tang-chow, at the repeated solicitations of the Chinese Commissioners, who were most anxious to treat, and Parkes and his party, escorted by a strong detachment of King's Dragoon Guards, went to Tang-chow, held a long conference with them, and were on their way back to camp when they came across the whole Tartar force, which prevented them continuing their journey. So Mr. Parkes and the others turned back to go to ask the meaning of it from the Commissioners, and have never been seen since, leaving the dragoons there. After a little while the Tartars began to close round on the dragoons in a very suspicious manner, and presently a French officer who was with them (in attempting to snatch his sword from a man who had drawn it nearly out from its scabbard on pretence of examining it), was cut down. Of course there was nothing for them to do then but attempt to cut their way through, which they did in most gallant style, through showers of musketry which opened on them directly the Chinese saw our people were aware of their treachery; so they only just charged in time, or they would all have been taken prisoners. Three or four of their number were slightly wounded, and as soon as they got back to camp and told their story, Sir Hope set out with all his little force, and came upon the enemy, drawn in tremendous force. About five miles their line appeared to be, looking as if they could have eaten up our little army in a very few minutes, but the Armstrong shells soon changed the face of affairs, and mowed them down in numbers. Fane's Horse we lent to the French for the day, and these, with Probyn's, and the K. D. Guards, made dreadful havoc amongst them, charging through and through them and over them. It was a hand-to-hand fight everywhere latterly, and strange to say we lost very few on our side. The French Infantry were very closely engaged. Immediately the reinforcement came up the march is to be resumed for Peking without any more delays of any kind; no more talking until we get inside Peking. Lt. Anderson and his party of Fane's Horse were taken prisoners, having ridden unsuspectingly into the Chinese camp for news. Orders have just been sent down to the fleet for more sailors and all the rest of the marines of the fleet to be sent on shore immediately. A short time ago all the supplies of fresh provisions, &c., were stopped about Tien-tsin, and the shops shut up by order of the head mandarin, so we sent out and caught and keep him a prisoner at large in the Forts of Tien-tsin, since which everything comes in abundance; sheep, poultry, even game, fruit, vegetables, all at a very fair price; and the country people seeing now how well we treat them, do all they can for us. The shops are all open, and any quantities of china, furs, silks, and curiosities are to be bought, but of course we get cheated; possibly nothing less than a dollar is now asked for the most trifling thing. The plan is to ask the price of an article by signs (a curious language our's of barter is) and when found, as Captain Cuttle says, make a note of it, offering by and bye just one tenth of it, when probably you may come to a deal. Most ridiculous pictures of the costumes of our army are displayed for sale in the shop windows, some of which you shall see, as I am sending them home to England. The news of the fleet here is as it was; *Nimrod* and *Pioneer* run the mails for us between here and Shanghai. I forgot to say that every day they are discovering more beautiful large brass guns buried in-

side the Tien-tsin Forts. The Chinese thought they were very cunning, but they have not quite succeeded in hiding them. The Engineers are busy in blowing up some of the Forts; at the mouth of the Peiho one has already been destroyed, on the South side the outermost one on the land side, and the French are making docks on the North side to winter their gunboats in.

Latest.—We have just got intelligence of another action having taken place close to Peking, in which the Chinese have been again well thrashed; they have now fallen back on Peking to make a stand, there are a large number of guns mounted on the walls. It is expected that our troops are in Peking by this time, as they followed them up close. No other particulars of the engagement has yet arrived. The English mail arrived up here, and we are all much disgusted at being left to the tender mercies of Lord C. Paget about our extra pay; we thought Baillie Cochrane would have known better.

(FROM ANOTHER CORRESPONDENT.)

TANG-CHOW, Sept. 23.

The allied forces have encamped near here after as hard a journey from Tien-tsin—through fields of cut millet—as can be imagined. I can assure you that our hardships have been little short of the Crimean campaign; and considering the difficulties, our army is in first-rate order. Of course we have not made a hardship of it.

On the 18th, as our advanced column was moving on towards Tang-Chow, they were fired on from an earthwork where some brass guns were mounted; the fire was returned by our Artillery, when a party of 25,000 or 30,000 Tartar Cavalry were observed in the town behind. They were charged by the Seikh Cavalry and French, and the earthwork was attacked at the same time. About 2,000 Tartars were killed, and above 50 guns taken, as well as a large quantity of ammunition, and the whole force routed. We had 16 or 18 wounded, none killed, but one since died of his wounds. This success is unfortunately more than counterbalanced by the capture of Mr. H. S. Parkes, and others. It appears that he, accompanied by Messrs. H. Loch, De Normann, Boulby (*Times* correspondent), Anderson (Fane's Horse), and Brabazon (Royal Artillery), went on from the front to Tang-chow to make arrangements for the encampment of the army, and the supply of provisions. A spot was fixed on where the advanced column should encamp, but on the above-named party returning to the forces, they discovered that the Tartar Cavalry were occupying the ground agreed upon for our encampment. Mr. Parkes immediately rode back to Tang-chow to remonstrate, and the others of his party followed him, together with 12 or 15 Sowars, when they were captured.

Since our success at Taku this is the first overt act of hostility that has taken place. On the whole line of march the people have shown their fears by closing their houses in all the towns and villages passed through, yet supplies were procurable at all the halting places, until the city was reached by the advanced column. The same proposal was made here to the chief people in the place that they should establish a market, but they refused to do so. It then became necessary to take forcibly what was required, and pay for it; this they also opposed, and shut up their houses; the consequence was that the stores were broken open by authority, necessary supplies seized, and the example being thus set, other houses were soon entered, the inmates fled, and a general looting was practised. In some pawnbroker's shops were found large quantities of gold and silver bars, ingots, and ornaments, which fell to those who discovered them first.

After Mr. Wade's arrival with Lord Elgin at the front, when these events occurred, he went to Tang-chow to make inquiries, but only learnt that the foreigners had left that place on the previous morning. He then went to a Tartar encampment close by, with a flag of truce, and was then fired upon.

Captain R. Dew arrived, a few days ago, with a flotilla of more than thirty boats, bringing commissariat stores. They found the river very shallow in some places, but seldom under two feet; eighteen inches might be depended on. They were three days coming up, the tide ending soon after quitting Tien-tsin, and the current running down about two knots an hour. Since they arrived, other boats have passed for the French camp, a few miles higher up the river. This is the driest season of the year, and the drought has been unusually long.

On the 21st the forces went out to meet the Tartars, who were 30,000 strong, and spread over some six or seven miles of ground, evidently with the intention of surrounding us. By

manceuvring our troops, however, they became divided, when they were attacked and thoroughly routed, and after crossing the canal disappeared.

Some Chinese officials have come in to Lord Elgin and say that the missing party is safely lodged and properly treated in a large public building at Peking.

The Emperor's brother is now appointed Chief Commissioner to make peace, and pretends to repudiate the hostile acts of the military, but no reliance is placed on this, as it is believed they will not allow the Allies to enter Peking without an attempt to prevent them.

A flag of truce has come in, with large supplies of provisions. This may save Tang-chow, but it is believed to be only another attempt to gain time.

Peking is in sight about 7 or 8 miles distant by road, Tang-chow about 3 or 4, and the encampment is situated between the two, and on the Canal which runs from the Peiho to Peking.

His Imperial Majesty Hien Fung has, according to report, resolved to follow the example of the last King of the Ming dynasty, and put an end to his own existence, as soon as the barbarian enters his capital. He scorns the idea of running away.

FROM ANOTHER CORRESPONDENT.

HONG KONG, 13th October.

It will be evident to folks at home now, that there is some reality about a Chinese war, and it is not all "play pidgin" as it used to be. Of the capture of our new C. B. Mr. Parkes and others, you will hear. Reinforcements of about 150 men of the 102nd Regiment (French), who have just arrived from France by the mail, went forward yesterday to Shanghai, as also Lady Grant and Sir Mordaunt Wells, the Chief Justice of Calcutta, who is on a tour for his health. What the prospects are for a final settlement of the war, it would be, I think, unwise to attempt to foretell. We are in for a winter in Peking now, that is certain. The Chinese, it appears, only parley and offer to treat, in order to gain time to make further resistance. The last barrier to our entrance and occupation of Peking is now reached, and by next mail you will hear of the Allied armies being quartered therein, for Lord Elgin and Sir Hope Grant will not now be hurried into any concession. Their opportunity was lost at Tien-tsin, and the Chinese must now pay the penalty.

Summary of News from the Far East.

JAPAN.

The following is taken from the Circular of Messrs. Fraser and Co., dated Nagasaki, 10th Sept. :—During the past month Teas have continued to arrive freely, and considerable settlements have been made for Shanghai. Raw Silk comes forward slowly, and, owing to the eager demand evinced by foreigners, the stock is low. Several transports have arrived and departed for the Peiho with provisions, coals, &c., for the Allied forces. In political affairs, we have nothing of importance to add to our last report.

IMPORTS.—There has been a good demand for all descriptions of manufactured goods, and sales have been made from the late arrivals from Shanghai and Hong Kong. American drill are saleable at Mex. \$3 40 per piece of 40 yards. Large transactions take place in barter for teas and silk. Sugar and candy are steady at \$6 to \$6.50, and sapanwood \$3 75 per picul.

EXPORTS.—The principal part of the business doing is in teas for the Shanghai market. Goods adapted to Chinese consumption continue neglected, on account of the unsatisfactory reports from China; but upon the revival of trade there, a large business will quickly follow. Our quotations are as follows :—Green teas, common mixed, \$6 to \$8; good common, \$12 to \$15; medium, \$16 to \$18; fine to finest, \$20 to \$24 per picul. Raw silk: small stock, \$3 to \$5; per catty Copper, \$20 to \$26 per picul; Coals, \$4 25c. per ton; Vegetable Wax, \$12; Beeswax, \$32 to \$33 per picul.

CHINA.

SHANGHAI.

The *North China Herald* has the following items on the rebellion. It appears now certain that the object of the rebels in advancing on Shanghai was to be near to foreigners, in order to obtain arms and ammunition.

Our Chinese correspondent asserts that the insurgents in

their march on Shanghai showed more mercy than they usually do. This did not prevent the utmost consternation from taking possession of the inhabitants of the five Hsiens of Shanghai—Tsing-poo, Chia-ting, Hwa-ting, and Lao-hsien—who fancied that the Imperial authorities, having neither money nor soldiers, would leave them to their fate. They are preparing a testimonial for the English and French, at the same time they intend requesting that the troops may sweep the country clean. They went to the two Consuls yesterday with documents, and were promised that the affair should be referred to the Allied Ministers, whereupon the deputation withdrew.

On the 21st Sept. a fire broke out in the Waloo, destroying some 150 houses, and indeed demolishing half the place.

SWATOW.

From Swatow we hear of the bombardment of another unfortunate village. This time H.M.'s gunboat *Weasel* has been the assailing party. Certain information of the names of the Chinese who made the attack on Messrs. Jardine, Matheson and Co.'s agent's house, on Double Island, the planner of the raid and the disposer of the plunder, being obtained by the British Consul, the gunboat on the 16th Sept., left this port for the village of Boehoey, situate up the Haimun Creek. After a delay of three days for the local authorities, who on the plea of the diminutive size of the attacking force and the dread of the villagers' vengeance being turned towards themselves in case of the defeat which they anticipated, ultimately refused to assist. The usual demand in such cases being made, i.e., restoration of plunder and the delivery of ringleaders, and compliance being refused by the villagers, who did not attempt to deny their participation in the robbery, the gunboat tried the persuasive powers of shot and shell: ineffectually as far as obtaining any desire for treating was concerned. A landing party was sent on shore with a howitzer, and were driven back to their boats—providentially without mishap. The gunboat then taking another and superior position to the former, threw more shell amongst the houses, and sent a boat in to observe their effect. The boat, with an officer and four men were taken prisoners, lured, as has since been heard, by a letter being held up. The *Weasel* had, of course, to withdraw for fear of compromising their safety. Letters have been received from the prisoners, who appear to suffer more from anxiety of mind than from their wounds or personal discomforts. The gunboat returned to Double Island on the 1st October to await reinforcements. The steamer *Undine* had arrived all safe at Swatow, on the 11th. She behaved very well in a heavy seaway.

HONG KONG.

The *Hong Kong Register* has the following summary of proceedings at this place :—"But little of local interest has transpired since the date of last mail. A most unusual activity prevails in building enterprises, which promise to improve the town in every quarter. Every available spot of ground is seized upon with avidity, while new land is being brought into existence by extending the sea frontage, and filling in low lands. The Abuses Commission Inquiry makes haste slowly, and is almost as near a termination as it was in August." The *Friend of China* has, we hear, made its *debut* at Canton; but we have not been fortunate enough to receive the first copy.

MALACCA STRAITS.

SINGAPORE.

The following corrected statement of the trade of the Straits we extract from the *Straits Times* :—

Comparative Statement of the Imports and Exports of Prince of Wales Island, Singapore, and Malacca.]

The Batavia folks have had a visit from the Japanese Ambassadors, who are on their way home from New York, in the United States steam frigate *Niagara*. The *Niagara* coaled at Onrust, and left for Japan on the 10th of October. Whilst the politeness of the Americans to those who visited their ship was very much praised, the childish jealousy with which the visitor, were prevented from holding any intercourse with the Japanese caused much dissatisfaction. It really looks as if America now wished to monopolise that which she formerly grudged to Holland. Meanwhile, we would remark that the manifestation of this feeling of jealousy and envy on the part of the Dutch is exceedingly ill-timed and in bad taste. The Americans deserve credit for their enterprise. Their expedition to Japan was productive of great benefit not only to themselves, but to commerce and trade generally. The tone of the Batavia journals is altogether uncalled for, and will only result in exciting the animosity of Jonathan, without in any manner reflecting credit on the Dutch.

The news from Banjermaessing is still very gloomy. The Dutch troops had been beaten back with the loss of several officers, killed and wounded. The *Gottorp*, laden with guns and stores for the Amoor, has put into Batavia.

H.M. Surveying schooner *Saracen* has arrived here from the Straits of Banca. The report of the Commander with reference to the work accomplished is most satisfactory, and shows that considerable energy has been brought to bear in the task undertaken. The officers of the *Saracen* were allowed three months to complete the survey of the Straits, but they have done the work in eight weeks—and done it well, too. A new route has been found, which will greatly expedite the passage of vessels through the Straits. We stated some weeks ago, that ships bound through had always hitherto hugged the Sumatra Coast, and that it usually required eight or ten days' sailing to get through. By keeping along the coast of Banca Island, however, all the difficulties are at once removed, and the passage through can always be accomplished in two days. The tides meet about midway in the Straits, at Nanka Islands, and ships taking advantage of the tides, always get through in forty-eight hours, even if there is no wind to assist them. This is a very important discovery, and cannot be too prominently brought to the notice of ship masters. We are therefore glad to learn that a new Chart of Banca Straits has been finished and placed in the Harbour Master's office here, for inspection. We also notice with pleasure that full sailing directions are to be printed immediately and sent down to Anjer, for the guidance of ships coming from England. Hitherto, British ships have been mainly dependent upon Dutch surveys and Dutch charts of these waters, to the reproach of the British Government. We are glad that at last we have an accurate survey, by English enterprise, of a dangerous and intricate passage, but a passage which is largely availed of by British vessels.

Lieut. Armstrong, of the Madras Artillery, proceeded in the steamer *Shandon* to Malacca, to relieve Lieut. Shortland, of the same corps, commanding the artillery at Malacca. The latter officer will come on here and proceed to Labuan to relieve the artillery officer at that station.

We hear sad accounts of hurricanes and storms in Netherlands India. A hurricane passed over Kadoe from the south-west, accompanied with hail the size of a pigeon's egg. Houses were torn in pieces, trees uprooted, and much damage done. At Celebes, also, there had been severe storms. The British brig *Coreyra*, Captain Walsen, was totally lost at Djambana (Bali) on the night of the 23rd September. The authorities sent a cruiser to render assistance. The cargo consisting of 3000 bags rice, and 250 piculs coffee, destined for Singapore, was all lost. Crew saved. The wreck is advertised for sale.

Any plan having for its object the improvement of our bazar supplies, will be, we are sure, interesting to every citizen of Singapore. The exorbitant price demanded for articles of food in our bazars can only be remedied by an increased supply and more active competition. We are therefore glad to notice that a movement has recently been set on foot by some of the traders of Siam and the contiguous Malay States, which will result in keeping up a good supply of cattle for our markets, at a less expense than has hitherto prevailed.

The English clergyman at Batavia, the Rev. Mr. Moncreiff, died on Friday night, the 12th Oct., and was buried on Sunday, the 14th October. He left a widow and two children.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

- BARFIELD—On the 16th inst., at Swansea, the wife of A. Barfield, Esq., of a daughter.
- HANSON—At Singapore, on the 9th inst., the wife of Mr. Charles Hanson, surgeon, of a daughter.
- HOSTE—On the 19th inst., at 20, Charles-street, Berkeley-square, Lady Hoste, of a son.
- LITTLE—At Bonnington House, Singapore, on the 16th October, the wife of Robert Little, Esq., M.D., F.R.C.S.E., of a son.
- MARTIN—At Hong Kong, on the 27th September, the wife of Mr. F. L. Martin, of a son.
- PEARCE—On the 13th inst., at North Brixton, the wife of Richard Pearce, Esq., of a daughter.
- THOMSETT—On board H.M.S. *Princess Charlotte*, Hong Kong, on the 7th October, the wife of H. G. Thomsett, Esq., R.N., Acting Harbour Master, of a daughter.
- WELLMAN—At Murray Barracks, Hong Kong, on the 5th October, the wife of Captain W. H. Wellman, 99th Regt., of a son.

MARRIAGES.

- MAJOR—BARTLET—On the 6th inst., at Aldersgate Church, London, Mr. John Major, late of Hong-Kong, to Ellen, second daughter of Captain John Bartlet, of Burton Bradstock, Dorset.
- PLUNKET—MURRELL—On the 18th inst., at St. Andrew's Church, Singapore, by the Rev. A. D. Nicolson, Chaplain, Charles Bushe Plunket, J. P., Deputy Commissioner of Police, to Emmeline Rebecca Murrell, of Norfolk, England.
- SMITH—BILLINGS—At Hong Kong, on the 1st October, at the Cathedral, by the Rev. Mr. Irwin, Mr. Henry William Smith, to Miss Ann Billings.

DEATHS.

- BIRD—On the 24th Sept., at Shanghai, Alexander Bird, Esq., formerly Vice-Consul at Whampoa.
- BLAIN—At Canton, on the 11th October, drowned from the capsizing of a boat, Mr. Blain, of Messrs. D. W. McKenzie and Co.
- CRAMPTON—At Shanghai, on the 19th September, William Crampton, Esq., aged 45 years.
- HORDER—At Hong Kong, on the 26th September, Mr. Charles W. Horder, of Messrs. Lane, Crawford and Co., aged 22 years.
- HOWELL—On the 27th, on board the U. S. ship *Haze*, Mr. J. W. Howell, aged 24 years.
- LAVILLE—Near Madras, Mrs. Laville, youngest daughter of Captain W. C. Leisk, of Singapore.
- MONCREIFF—At Batavia, on the 12th Oct., the Rev. Mr. Moncreiff English clergyman.
- REHDEN—At Canton, on the 11th October, drowned from the capsizing of a boat, Mr. Rehden, of Messrs. Dent and Co.
- SAYERS—Died suddenly, on the 3rd October, Sayers, late chief officer of the British barque *Robert Passenger*.
- THOMPSON—On the 18th inst., Mr. Adam Thompson, of No. 25, New Bond-street, in his 68th year.
- WALKER—At Hong Kong, on the 11th October, Mr. T. L. Walker, late Assistant Surveyor-General.

COMMERCIAL REPORT. CHINA.—EXPORTS.

TEA.—Supplies at Canton have come forward more freely. At Foochow the supplies are large, and at Shanghai the new teas have commenced to arrive. The exports to Australia are particularly large. The settlements at Shanghai are reported to be 1,000 chests Ningchow and Oopack Congou at 30 to 32 taels. 2,500 chests Hoochow ditto at 20 to 23 taels, and 800 chests Shanghai packed ditto at 15 to 18 taels; 7 chops of contract Ningchow Congous have been delivered, and considerable quantities of Oopack and Ningchow are expected at Ningpo very shortly. The stock for sale upon the market is reported—3,500 chests Oopack, Ningchow and Hoochow, and 4,000 chests old and Shanghai packed. In other kinds than Congou there is nothing doing. There are 500 pkgs. old, and 200 ditto new Flowery Pekoe upon the market, but there is no demand. Greens.—There have been no direct arrivals, but some Pingsueys have been brought to market via Ningpo. Settlements of these have been made to the extent of 2,000 half chests, and 1,750 ten-catty boxes at rates not reported. At Canton about eighty chops of the new Oonams and Oopacks have arrived down, and about twenty more are expected. The following transactions are reported during the fortnight:—Congou, 8 chops at 23 taels for good Oonams up to 30 taels for the fine Oopacks, besides 7 chops contract teas, 1,100 half chests Tayshan at 18 to 19 taels. Canton Greens: 12,000 boxes Gunpowder, at 18 to 21 taels, and 100 half chests Young Hyson, at 24 taels; leaving upon the market 80 chops Congou, 10 ditto Souchong, 1,500 half chests Oolong, 600 ditto Plain Or. Pekoe, and 500 chests Flowery Pekoe. At Foochow-Foo the settlements are:—Congou, 40,000 chests and 37,000 half ditto, at 9½ to 17 taels for dusty to fair common; 18 to 22 taels for good common to middling; 23 to 25 taels for fine. Common to Medium Ningchows have brought 24 taels. Raw Silk.—Shanghai.—Supplies from the country continue to arrive in great abundance. The settlements of the fortnight are reported at 5,000 bales, being 30,000 bales for the season, against 23,000 bales at corresponding period last season. About two or three thousand bales have lately been shipped from Ningpo direct for Hong Kong. The unsold stock on the market is estimated at 7,000 bales. The following are the quotations:—Tsatlee, No. 1 and 2, none; No. 3, 373 to 385 taels; No. 4 and 5, 320 to 350 taels. Taysams, No. 1, 345 to 350 taels; No. 2, 330 to 335 taels; and No. 3, 310 to 315 taels. DRAUGS, &c.—Cassia Ligna, the quotations at Canton is \$17 50c. to \$17 75c.—sales reported 500 piculs; stock, 5,000 piculs. At Macao it is quoted \$16 75c. to \$17 50c., with a very small stock. Cassia Buds, no stock—wanted at \$32 to \$33. Cassia Oil, at Canton, \$325; at Macao, \$300; no settlements—stock ample. Star Anniseed, 100 piculs are offered at Macao, at \$15 15c., no buyers. Anniseed Oil, in ample stock at Macao, \$165 to \$170 the quotation. Vermilion, the best Canton, \$38 per box. Matting, as last quoted. Fire Crackers, 82c. per box for the best. Camphor is becoming a monopoly, and is likely to be maintained at about \$22 to \$25 for some time.

CHINA.—IMPORTS.

Business at Shanghai has been so trifling that any quotations are only calculated to mislead:—

At Foochow large sales had been made during the fortnight between the departure of the mails. 12,000 pieces grey shirtings had gone into consumption at following rates—5½ to 5½ catty, \$2.40 to \$2.50; 6½ to 6½ catty at \$2.80; 7½ catty \$2.85. White Shirtings: 1,000 pieces at \$2.80 to \$3.05. T-Cloths: 38,000 pieces 6 to 6½ lb, \$1.65 to \$1.95; 7 to 7½ lb, \$1.90 to \$2.85. American Drills: Large sales, amounting to 35,500 pieces, 40 yards, at \$3.50 to \$3.80 per piece. Lead continued to advance in price with considerable sales, say 2,400 piculs at \$9.50 to \$10. At Hong Kong and Canton sales of all imported goods have been on a fair scale. The quotations for sales at Canton are for Yarn:—Nos. 16 to 24, \$32.25 to \$35.25; Nos. 28 to 32, \$34 to \$37.50; and Nos. 38 to 42, \$35.75 to \$41.25. Stocks are much reduced and firmly held. A further advance may therefore be anticipated. Grey Shirtings.—Prices have for the past month displayed little change. The fortnight's sales amount to 16,500 pieces at following rates: 5½ to 6 catty, \$2.10 to \$2.30; 6½ to 6½ catty, \$2.65 to \$2.80; 7 to 7½ catty, \$2.90 to \$3.50.

COALS AT HONG KONG.—English steam are worth \$12 afloat. Sydney, about \$6 to \$7. Stocks are small, and rates likely to advance. Provisions, Ship Chandlery, &c.—The market is so entirely glutted with all descriptions, that it is impossible to give quotations. Good Gallego flour can be had at \$9. Heavy supplies of all kinds have arrived from San Francisco, and more are coming.

White Shirtings.—The lower numbers of these goods exhibit a slight improvement. Sales, however, are trifling, amounting to 1,000 pieces only; 54 to 58 reeds, \$2 40c. to \$2 50c.; 60 to 66, \$2 55c. to \$2 65c.; 66 to 72, \$2 75c. to \$2 85c. Sales of American Drills have forced woollen fabrics out of sale. Lead.—is scarce and wanted, and continues to advance in price. 350 piculs have changed hands. Quotations \$8 50c. to \$9 30c. Nail Rods.—Prices of this description of Iron remain unchanged, say \$2 50c. to \$3 10c. At these quotations about 4,780 piculs have gone into consumption. Tin Plates.—Sales, 200 boxes at \$6 10c. to \$6 30c.

MANILA.

EXPORTS.—Current Clayed Sugar: Small purchases have been made at \$5 62½c. per picul. Unclayed sugar there; has been no alteration. Zebu and Iloilo have fetched \$3 56½ to \$3 59½. The taal noticed in our last, part has been taken at \$3 59½, and the remainder is offered at \$3 50. Hemp continues without alteration, the quotation being \$4 12½ to \$4 18½ per picul. Coffee: There is but little on hand, which is held for \$15 40. Sapanwood: There is no demand, prices are nominal. Hides: Any that are available for shipment are taken at \$8. Cuttings, \$9. Cigars: The late demand for No. 2 cheroots has caused a small advance, being \$8 11½ per mil. Rice: The contract has been taken at \$2 44 per cavan, one half silver for supplying the troops &c., for three years.

IMPORTS.—Very little has been done in grey and white shirtings: 200 pieces of the former sold at \$3 for 8½ lbs goods. Grey long cloths and twills are extremely dull, most of the transactions lately having been damaged goods. White jacconets have been placed at \$1.75 to \$2.37½ per piece of 20 yards. Trouserings have declined considerably in value, 700 pieces are reported sold at 11 to 17 cents. per yard. Gingham: The sales have been small. Cambayas: Prices are very unsatisfactory. Coloured cotton having been placed at \$27 to \$29. Stocks are expected to be considerable before the end of the year. In metals the market is very dull, English bar selling at \$4, and pig at \$2 per picul. Coals have been sold in Singapore at \$10, deliverable here.

SINGAPORE.

The past fortnight has been exceedingly dull for all imports, and transactions have been very limited, as owing to the non-arrivals of the Bugis traders there existed no demand for Exports, and second hands are still fully supplied. Since a few days the Bugis boats have begun to arrive, and as it is reported that a large number is still to follow, a rather better feeling is prevailing with the native dealers, although they have not as yet begun to buy to any extent. For exports, there continues a good demand, but the supplies of some of our principal articles continue small. Several failures are reported among the Chinese, some of which are—Hoswee, debts drs. 30,000, payment guaranteed in full in 3 and 6 months. Ko Po Soon, debts about drs. 24,000; the estate has been placed in hands of trustees, and it is expected will realise about 30 per cent. Low Sam, debts about \$3,000.

The picul is 133½ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents. and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

At Shanghai (per Tael.)	6 months sight.	Bank. 6s. 5½d.	Private. 6s. 6½d.
Ditto	3 ditto	..	4 11
At Foo-Chow-Foo (per dol.)	6 ditto	..	4 11
At Canton	6 ditto	4 8½ to 4 8½	4 9 to 4 9½
At Hong Kong	6 ditto	4 8½ to 4 8½	4 9 to 4 9½
At Macao	6 ditto	4 10 to 4 10½	4 10½ to 4 10½
Ditto	3 ditto	4 10 to 4 10½	4 10½ to 4 10½
At Singapore	6 ditto	4 10 to 4 10½	4 10½ to 4 10½
Ditto	3 ditto	4 10 to 4 10½	4 10½ to 4 10½
At Manila	6 ditto	4 10 to 4 10½	4 10½ to 4 10½
Ditto	3 ditto	4 10 to 4 10½	4 10½ to 4 10½
At Batavia (guilders.)	6 ditto	4 10 to 4 10½	4 10½ to 4 10½

The exchange on India at Shanghai was at 312 rupees per 100 taels, and at Hong Kong 228½ per \$100. Bar silver at Shanghai — per cent. premium, and at Hong Kong — per cent. The current quotation at Shanghai for Mexican dollars was 75-0 cents., and the rate of exchange on Hong Kong was 26½ per cent. discount.

EXPORTS OF TEA AND SILK TO GREAT BRITAIN. SEASON 1860-61.

EXPORTS FROM CHINA.

Per Assyrian from Shanghai, Oct. 3, to London, 364,492 lbs. tea; 290 piculs galls; 25 cocoons 50 milos canes.
 Per Earl of Windsor, from Foo-chow-Foo, Sept. 22, to London, tea, 882,300 lbs.
 Per Mandarin, from Foo-chow-Foo, Oct. 1, to New York, tea, 592,540 lbs.
 Per Cossack, from Foo-chow-Foo, Oct. 3, to New York, tea, 463,600 lbs.
 Per Gazelle, from Foo-chow-Foo, Sept. 11, to Melbourne, tea, 223,000 lbs.
 Per Oscar, from Foo-chow-Foo, Sept. 23, to Melbourne, tea, 298,400 lbs.
 Per Norma, from Foo-chow-Foo, Sept. 28, to Sydney, tea, 404,000 lbs.
 Per Algernon, from Foo-chow-Foo, Sept. 29, to Sydney, tea, 523,500 lbs.
 Per Salacia, from Foo-chow-Foo, Sept. 29, to London, tea, 519,000 lbs.
 Per Crystal Palace, from Canton, Sept. 28, to London, tea, 499,066 lbs.
 Per Pekin, mail steamer, from Hong Kong, Sept. 28, to London, silk, 2,650 bales; to Continent, 357.
 Per Caroline Chisholm, from Hong Kong, Oct. 2, to Liverpool, tea, 411,500 lbs.
 Per Ann, from Amoy, Sept. 9, to New York, tea, 573,500 lbs.
 Per North Wind, from Amoy, Sept. 17, to New York, tea, 779,114 lbs.
 Per N. B. Palmer, from Amoy, Sept. 29, to New York, tea, 1,069,982 lbs.
 Per Ocean Steed, from Canton, Oct. 3, to New York, tea, 104,920 lbs.

EXPORTS FROM MANILA.

Per Clifton, to Falmouth, Sept.—sugar, 14,584 piculs; sapanwood, 320.
 Per Golden City to Boston, Sept.—sugar, 8,466 piculs; hemp, 5,662 sapanwood, 400; coffee, 16; cigars, 450 mils.

EXPORTS FROM SINGAPORE.

Per Atalanta to London:—Gambier, 6,890 piculs; coffee, 115; buffalo horns, 71; rattans, 789.
 Per Captain Cook, to London:—Tin, 162 piculs; gambier, 12,587; coffee, 67; sago flour, 162; pearl sago, 689; white pepper, 377; black, 483; cubebs, 17; teal seed, 683; gum Benjamin, 111; gum dammar, 152; sticklac, 72; gamboge, 10; nutmegs, 46; mace, 6; gutta-percha, 1,213; india-rubber, 1,574; split rattans, 35; rattans, 717; hides, 130; horns, 24; camphor, 122 cases; cassia oil, 21; anniseed oil, 20; essential oil, 6; gum mastic, 129 cases; malacca canes, 1,889 bundles.
 Per Johannes Kepler to Falmouth:—Gambier, 1,496 piculs; pearl sago, 1,493; cutch, 447; black pepper, 3,160; white, 136; rattans, 184; horns, 48; merchandise, 5 cases.
 Per Aquila to Falmouth:—Rattans, 60 piculs.
 Per Ina Russell to Europe:—Rattans, 532 piculs.
 Per Quick Step to New York:—Tin, 1,943 piculs; gambier, 4,703; black pepper, 1,410; cubebs, 15; pearl sago, 299; sago flour, 293; sugar, 344; tapioca, 521; gum dammar, 25; buffalo hides, 379; cow hides, 34; rattans, 920; tea, 907 boxes; camphor, 41 cases.

EXPORTS FROM PENANG.

Per Three Bells, Oct. 4, for London, tin, 2,558 piculs; sugar, 4,778; black pepper, 2,300; gutta-percha, 35; india-rubber, 1,320 tapioca, 1,023; buffalo hides, 196; rattans, 215; nutmegs, 307; mace, 65; isinglass, 7; tortoise shell, 1; dragon's blood 61; essential oil, 492 bottles; curry powder, 24; rum, 15,525 gallons; wearing apparel, 3 cases.
 Per Toronto, Oct. 4, for London, tin, 2,743 piculs; sugar, 1,946; black pepper, 3,342; white, 231; cutch, 362; gutta-percha, 9; india rubber, 182; rattans, 716; nutmegs, 262; mace, 45; buffalo hides, 71; fish maws, 62; rum, 11,390 gallons; shells, 178 baskets; preserves, 1 case.
 Per Versailles, Sept. 25, for Boston, tin, 1,029 piculs; nutmegs, 103; mace, 9; india rubber, 202; cow hides, 103; buffalo hides, 104.
 Per Revely, Sept. 27, for New York, tin, 1,000 piculs; sugar, 2,995; black pepper, 915; nutmegs, 76; mace, 10; cow hides, 346; buffalo hides, 141; wild cinamon, 40.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From London: Sept. 24, Florence; 27, Solent, Palma; 28, James Paton. From Liverpool: 28, Aerolite, Screamer; 29, Lebanon; 30, Weymouth. From Cardiff: 27, Leontine; 28, Main; 30, J. W. White. From New York: 28, Nabob.
 At HONG KONG, MACAO, and CANTON.—From Cardiff: Sept. 29, Emma; 30, Cornelis Antoine; Oct. 8, Antonia Gertruda. From Sunderland: Sept. 28, Minerva; Oct. 4, Chaa Sze. From Hamburg: Sept. 28, Alma.
 At SINGAPORE.—From London: Oct. 8, Ly-ee-moon (sr.); 10, Eliza Thornton; 16, Alice. From Liverpool: 14, Primula. From Cardiff: 10, Minister Pahud; 14, Brouwershaven; 15, Gil Blas. From

Newcastle: 14, Twee, Cornelissen; 15, Walcheren. From Hamburg: 15, Helene. From Glasgow: 15, Anna Maria. From Newport: 15, Helena and Anna. From Sunderland: 16, Theesclida. From Shields: 16, General der Steurs.

SAILED.

From SHANGHAI.—For London: Oct. 3, Assyrian.
 From Foo-chow-Foo.—For London: Sept. 22, Earl of Windsor; Oct. 5, Salacia. For New York: Sept. 3, D. Godfrey; Oct. 1, Mandarin; 3, Cossack.
 From AMOY.—For New York: Sept. 9, Ann; 17, North Wind; 29, N. B. Palmer.
 From HONG KONG, MACAO, and CANTON.—For Liverpool: Oct. 2, Caroline Chisholm. For New York: 3, Ocean Steed.
 From SINGAPORE.—For London: Oct. 15, Captain Cook, Atalanta. For New York: 9, Quickstep. For Boston: 19, Versailles.
 From PENANG.—For London: Oct. 4, Three Bells, Toronto.

LOADING.

At SHANGHAI.—For London: Gabalva, Kate Carnie, Livingston, Ocean Mail, Palmerston. For New York: Phantom.
 At Foo-chow-Foo.—For London: Mirago, Wagool, Art Union, Anglo-Saxon, W. Mitchell, Sunbeam. For New York: Edith Rose, Surprise. For Australia: Metaris, Mary Smith. For Canton: Antagonist.
 At HONG KONG, MACAO, and CANTON.—For London: J. Vinnicombe, War Eagle, Janet Willis, Rancee, Thetis, Herculean. For Havre: Le Lion. For New York: Hotspur, Sea Serpent, Progressive Age, Sarah. For Australia: Ashmore. For San Francisco: Ocean Pearl, Coquimbo, Jacob Bell.
 At SINGAPORE.—For London: Anglia. For Liverpool: J. N. Cushing, John Bibby. For Boston: Edward.
 At PENANG.—For London: Malvern, Sanderson, Julia, Beuckeuch.

CASUALTIES.

SHANGHAI.

Intelligence has been received through a French priest of an American barque having been captured by pirates near the mouth of the Yang-tze. Particulars are not known, but the U.S.S. *Saginas* is at present out investigating.

HONG KONG.

The *Cornelio Antoine*, from Cardiff, lost several sails and top gallant mast when off Pulo Sapato, by being struck by a whirlwind.
 The *Albura*, from Kanagawa, experienced a heavy typhoon on the 2nd Sept., but sustained no damage. Saw two vessels off Cape Alusia dismantled, supposed to be the *Shaw Allum* and the *Regina*.
 A heavy typhoon was experienced on the 19th Sept., off Keeling. Several junks and ships parted their moorings and went on shore. The *Kim-Whon-Him* lost jib-boom and head-gear by two junks driving athwart her.

FREIGHTS AND CHARTERS.

At SHANGHAI.—To London, £3 to £3.10s. for teas, and £5 to £6 for silk. To New York, tea, \$12; silk, \$20. Very little business has been done since our last, the only demand being for Hong Kong with peas, at 25 to 30 cents. per picul. Theodore and Julie are reported for Gulf of Pecheli, at \$1,000 Mex. per month.
 At AMOY there is still a good demand for small craft at higher rates.
 At HONG KONG, MACAO, and CANTON.—For London, £3. For New York, \$8 to \$10. Upwards of thirty of the British transports have been discharged from the North, most of which will probably be chartered from Manila or the Rice-ports, so that there is every chance of vessels being scarce before the winter is over, there being less tonnage in port now than there has been for some years. Should they come here the free emigration (which has not yet commenced) and rice trade will work off a large amount of tonnage. Much will depend upon political events and Government requirements for the prospects of the shipping interest during the present season. The charters reported are the Rancee, Thetis, and Herculean, for London or Continent at above rates. The Progressive Age, and Sarah, for New York, at above rates; the Ashmore, for Melbourne, at £2 10s. and £3. The Ocean Pearl and Jacob Bell, for San Francisco, at \$15,000.
 At MANILA.—For London, £2 15s. For New York, \$9. The Rosina has been chartered to London or Liverpool at above rate, and the Mellora to the Continent. The Starr, Eagle, and Charmer, to New York.
 At SINGAPORE.—For London, £2 10s. to £3 5s. For New York, \$10 to \$11. The principal demand for shipping has been to load from the Rice-ports, and a fair amount of business has been done. The charters are to London and Continent—Birch Grove, Anna Maria, Aquila, and Ina Russell.
 At PENANG.—For London, £2 7s. 6d. to £3 10s., at which rates the Malvern and Sanderson are loading. The Julia and Benclench at previous rates.

PASSED STRAITS OF SUNDA.

—From England and Continent to China:—Sept. 30, Red Riding Hood, Spray of the Ocean; Oct. 8, Polynaria. From New York: 2, Onward. From China to England and Continent: 6, Magpie; 10, Ballarat, Crest of the Wave; 11, Falcon. To New York: 1, Contest; 6, Argonaut. From England and Continent to Singapore: 1, Philotaxe, Minister Phaud; 2, Twee Cornelissen, Alice, Primula, Gil Blas, Maria; 3, Brouwershaven, General de Steurs, Theesclida, Anna Maria; 4, Helene; 5, Walcheren; 10, Elizabeth. From Singapore to Glasgow: 11, Zambese. From Manila to London: 1, Amoor. From England and Continent to Batavia: 5, Eva Johanna, Richard Thornton; 7, Amsterdam; 10, California, Louise. From Melbourne: 1, Hindostan. From Holland: Sept. 30, Tree Nymph, Jupiter; Oct. 2, Burgameester van Middleburg, Wm. Kroomprius der Nederlanden; 3, Pangerang M. Sah; 6, Landbouw; 6, Vooruit; 9, Het Goede Ver-trowuen Doeboyk; 12, Cosmopolite. From Batavia to Holland: 1, Elizabeth; 3, Maria Veronica, Ida, Soolo; 5, HeHevoetnia, Schoenderloo; 6, L'Union; 7, Straat Baly.

Continental Intelligence.

FRANCE.

The *Patrie*, which has lately been favouring its readers with its notions about China, is in ecstasies at having discovered a great analogy between the institutions of the Celestial and those of the French Empire. Nowhere except in France is centralisation carried to such a pitch as in China. The Minister of the Interior at Peking pulls the wires by which the movements of the Mandarins are guided, just as M. Billault directs the movements of the prefects from Paris. Universal suffrage alone is wanting to make the resemblance complete. No doubt the "progress of civilisation" which French bayonets invariably promote will introduce that latest improvement, and then the Chinese, as far as "institutions" are concerned, will have nothing to envy in the French.

The Paris papers announce that the King of Siam has declared war against the Emperor of Annam, who is now at war with France and Spain.

The *Moniteur* publishes a second series of decrees granting rewards for distinguished services in the late affairs in China, the recipients on this occasion belonging to the army. General of Brigade Collineau has been promoted to the rank of General of Division, and Colonels O'Malley and de Bentzmann to that of Generals of Brigade; a number of other promotions have been made from colonels down to sub-lieutenants. In the Legion of Honour there have been three promotions to the rank of commander, six to that of officer, and sixty-six nominations of knights. Among the last-named is the drummer Fachard, of the 102nd Regiment, whose gallant conduct was particularly mentioned in the official despatch of General Montauban. The list closes with the names of sixty-two non-commissioned officers and privates on whom the military medal has been conferred.

RUSSIA.

(FROM A SPECIAL CORRESPONDENT.)

ST. PETERSBURG, Nov. 20.

Official accounts have been received here from the Amoor, stating that some unpleasant differences had occurred on the Mandschurian frontier. It appears that for some time previously the Russian advanced posts had been insulted and threatened by the more numerous troops on the other side, until at last Lieutenant Filimonoff, the officer commanding the Russian picket, considered himself justified, to escape any disastrous consequences, in abandoning the frontier post and retreating with his men to the interior of the Russian territory. "In consequence of this disgraceful conduct in abandoning his post," says the despatch, "Lieut. Filimonoff has been suspended, and will be cashiered if the sentence is confirmed." In the meantime the frontier post has been reinstated in its former position, and considerably strengthened both in point of numbers and additional works of defence, and it may confidently be predicted that the aggressive neighbours, as lately in the case of the Khikanzes, will be severely punished for their infraction of the peace between the two nations.

A private letter from the Amoor, which I have had an opportunity to peruse, contains the following extraordinary circumstance:—

"A few days ago Lieutenant Maneffsky, in command of the military post established at the port of St. Olga, sent two of the men belonging to the 27th equipage of the fleet, named Lissine and Nazarov, to carry a despatch to the Russian Stanitz on the Ussuri. On their return Nazarov remained some distance behind, to shoot partridges, whilst Lissine continued to ride on leisurely, and presently heard the report of a gun. After the lapse of half-an-hour the latter stopped to await his comrade, but as he did not make his appearance, he remounted his horse, and rode back in search of him. At a distance of three or four wersts he saw on the road some traces of blood, then discovered some torn clothes and mangled remains of a human body, and identified the naval cap of his comrade as well as his gun, which was bent as if from the effects of a severe blow. He no longer doubted that his companion had fallen a victim to a passing tiger, and returned to St. Olga, where he made his report and gave the alarm. The commandant sent out three soldiers well armed, who returned with a confirmation of the accident, having found the unfortunate man's boots and part of his skull."

A similar case occurred not long ago at the Stanitz of Catharino-Nicolayeffskai, on the Amoor, where a Cossack soldier, called Fiedoreiff, who had been placed as sentry near the gate of the Arsenal, at the further extremity of the Stanitz, was found dead the next morning by the guard which came to relieve him, his clothes torn and his body frightfully mangled, evidently from the attack of a tiger or panther, several of whom had been seen prowling about the station.

The Russian semi-official organ, the *Journal de St. Peters-*

bourg, in reply to some observations in the *Nord*, publishes a long document explanatory of the policy of Russia in these latter times, which may be thus summarised:—

"The Russian journal, in the first place, states that the Government is not inspired by any of the ideas which some have been pleased to call those of 1815, or retrograde. The reforms which have been resolved on and commenced throughout the whole of the Russian empire, prove that it shares to a great degree in the general ideas of real and regular progress. At home its policy has nothing to call to mind errors which have been for ever and everywhere condemned. Abroad it has recovered its liberty of action, and has proclaimed its decided intention to follow a national policy, guided by the interests of the country, and founded on the maintenance of its rights and respect for that of others. As regards Piedmont, Russia only entertains for that State the most friendly feelings; her traditions naturally lead her to it, and as to Italy 'no Russian national interest is irrevocably attached to any particular solution to be given to the problem of her destinies.' However, says Prince Galitzin, who signs this doctrinal declaration, the question which is debated in Italy is not merely a local one, as it regards the fundamental principles of European society. The writer, starting from that point of view, alludes to most of the facts which have been accomplished since the treaty of Villafranca, and does not hesitate to throw a reproach on the Sardinian policy, which, he declares, justifies the recall of the Russian ambassador and the rupture of diplomatic relations between the two countries. So much for the past. As to the future, Prince Galitzin expresses his ignorance of the system intended to be substituted in Italy for that of the federation, which the peace failed to establish; but he remarks that, up to the present time, the pacific and rational solutions promised have not taken place."

The Russian corvette *Kababaya*, Commander Davidoff, and the clipper *Abrek*, Commander Pilkin, arrived at Kiel last week from Cronstadt, and after a stay of a few days, for the purpose of coaling and taking in supplies of fresh provisions, sailed for the Amoor.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Nov. 22.

The official *Staats Courant* publishes the text of the Royal Decree of October 27, No. 68, containing the new regulations for the admittance and residence of European foreigners in Netherlands India, which place great restrictions on their personal liberty and free movements. Strangers arriving in those colonies must now be furnished with a passport, emanating from, or else *vised* by, the Colonial Minister at home, or else Ambassadors or Consuls of the Netherlands in foreign countries. After giving a satisfactory account of themselves and their object in visiting the Dutch possessions, they will be furnished with a written permission to reside there for six months, at the expiration of which period the permission must be renewed from month to month. The above regulations extend only to those ports opened for general foreign trade. In all others no stranger will be allowed to land or reside unless furnished with a special permission to that effect from the Governor-general in writing.

A great sensation has been made on its becoming known that M. Gallois, the fortunate holder of one of the lately renewed sugar contracts in Java has sold his interest in the same to Mr. B. Andreas, for the comfortable sum of 275,000 florins. Most of the journals in this country give vent to their feelings of indignation and disgust at this act of favouritism. "We wish each of our subscribers," says the *Amsterdam Handelsblad*, "a similar piece of good fortune, but fear they will not obtain it unless they have the luck to command such powerful ministerial influence as that of the gentleman above-named."

According to official tables presented to the States' general by the Ministers concerning the trade of this country in 1859, it appears that there is a falling off as compared with the previous year. The following table will show at a glance the amount of the increase and decrease of the different items respectively:—

	1858.	1859.
Total imports	florins 416,736,669	339,670,200 florins.
Total exports	330,740,977	356,049,104 "
Transit trade	99,447,489	113,487,508 "
Imports for home consumption	313,229,144	288,699,170 "
Exports of home produce	231,183,488	242,561,596 "

In the arrivals and departures of ships, both from Europe and more distant places, there is a corresponding decrease visible.

Mr. A. R. J. Cramerus, of Batavia, has received his *exequatur*, and been recognised as Sardinian Consul for Netherlands India.

A letter from Harderwyk states that Lieut. P. F. Vreede, of the East India Artillery, hitherto employed in the colonial recruiting office in that town, has received orders to repair to his corps in the East, and will take his passage in the *Alcyon*, for Batavia.

Mr. H. de Bruyn, Chief Engineer of the Hydraulic Department in Netherlands India, Mr. T. J. Stieltjes, Adviser in technical affairs, attached to the Colonial Office, and Mr. J.

Dixon, principal Engineer for public works and railways in Java, will not leave this country to repair to their several posts till the month of January next.

In accordance with the Royal Decree, mentioned in my last letter, orders have been given conjointly by the Ministers for War and the Colonies, to enlist no more Belgians, Swiss, or Germans, so that in future the foreign recruits engaged for service in Netherlands India, will be confined to Norwegians, Swedes, and Danes.

A Bill has been introduced in the States-general by Ministers, on the subject of postage. The chief feature of the measure is to charge one uniform rate of 5 cents, or one penny, on all letters weighing less than 15 wigtjes, throughout the whole kingdom of the Netherlands, without any reference to the distance.

According to previous arrangements, the two steam-corvettes *Reteh*, Lieut.-commander H. P. de Kock, and *Harlemmermeer*, Lieut.-commander P. Konig, sailed from the Texel on the 10th instant. [The *Reteh* arrived at Plymouth on the 13th, and after coaling proceeded to her destination in the East Indies.—Ed.]

Subjoined is a list of passengers from this country to the East, since my last letter.

"PASSENGERS OUTWARD.

Per *Ida Elizabeth*, Capt. Dooren, from Amsterdam to Batavia: Messrs. H. A. de Groot, F. L. Wattendorf, J. W. Warlof, P. J. Spaan, von Bentheim, Baron d'Aulnis de Bourville, Mr. van der Berg and family, Mr. and Mrs. A. J. Spaan.

Per *Triton*, Capt. Adriaans, from Rotterdam to Batavia: Dr. P. L. Onnen, lady, and 7 daughters, Mrs. O. van Bennekem and child, Mr. Muller, Mr. van Ockelen, Miss Anna Scherias, Miss Smith, Mr. Bisdon, 1 native servant.

Per *Bildordy*, Capt. Loschen, from Harderwyk to Batavia: Capt. C. P. Scheepens, E. I. Infantry, Second Lieuts. of infantry W. Stolle and J. Eyken, Second Lieuts. of artillery A. Hynekamp, A. Scheltema, and G. A. Carlier, Second Lieut. of engineers C. A. van Lennep, Third-class Surgeons J. W. Gauda Quint, J. Goslings, and C. H. van Deelen—69 men supplementary troops.

Per *Prince Maurice*, Capt. Bart, from Amsterdam to Batavia: Capt. Peereboom, lady and child, 2 Miss van Olden, Lieut. Millenburg-Beekhuis, Lieut. Gude Billardt, Koper, Third-class Surgeon, Messrs. Cauwenberg, Osterloh, and Harfiteen—100 men supplementary troops.

Per *Henrietta Maria*, Capt. Tjebbes, from Amsterdam to Batavia: Mr. and Mrs. C. S. van Berenstein, Mr. M. S. Bouwensch, Miss de Revallet, and Miss Louise Ka Kaufman.

Per *Falck*, Capt. van Duyvenbode, from Amsterdam to Batavia: Messrs. A. van Scheltema, G. van Putten, D. de Jong, and C. Cordes.

Per *Wilhelmina Lucia*, Capt. Nolles, from Amsterdam to Batavia: Mr. and Mrs. T. J. Julius, Mr. J. E. van Ravensway.

Per *Duke Bernhard of Saxe-Weimar*, Capt. Stolte, from Amsterdam to Batavia: Mr. van Raders.

Per *Postillion*, Capt. van Sommeren Greve, from Amsterdam to Sourabaya: Mr. N. van Wassenaar, Mrs. van Oven, born von Merkelbach.

Per *Clio*, Capt. Wynmalen, from Amsterdam to Batavia: Messrs. J. A. voet and H. Gyselman.

UNITED STATES.

(FROM OUR OWN CORRESPONDENT.)

NEW YORK, NOV. 7.

THE NEW PRESIDENT OF THE UNITED STATES.

Mr. Lincoln has been elected President of the United States, and Mr. Hamlin Vice-President. The majority in New York for Mr. Lincoln was 10,000. The Republicans have gained largely on former majorities.

The *New York Herald* reports the result as follows:—
 "The great battle has been fought and lost by the allied forces in New York. The Presidential result may be summed up in three words—Lincoln is elected. In a more exact form, according to the returns before us, the several States have cast their suffrages for President and Vice-President as follows:—

LINCOLN AND HAMLIN.		BRECKINRIDGE AND LANE.	
Connecticut	6	Alabama	9
Illinois	11	Arkansas	4
Indiana	13	Florida	3
Iowa	4	Georgia	10
Maine	8	Louisiana	6
Massachusetts	13	Mississippi	7
Michigan	6	North Carolina	10
Minnesota	4	South Carolina	8
New Hampshire	5	Texas	4
New York	35	Total	61
Ohio	23	BELL AND EVERETT AND	
Pennsylvania	27	FUSION.	
Rhode Island	4	Delaware	3
Vermont	5	New Jersey	7
Wisconsin	5	Kentucky	12
Total	169	Maryland	8
DOUGLAS AND JOHNSON.		Tennessee	12
California	4	Virginia	15
Oregon	3	Total	57
Missouri	9		
Total	16		

RECAPITULATION.

	Electoral Votes.
For Lincoln and Hamlin	169
For Breckinridge and Lane	61
For Bell and Everett	57
For Douglas and Johnson	16
Whole electoral vote	303
Lincoln's majority over all	35

The actual figures may somewhat change the distribution of the States voting against Lincoln; but from the general run of the popular vote in the Free States we consider it perfectly safe to set down Lincoln's electoral vote at 176.

"The panic of 1860 has commenced in earnest. According to our Washington dispatch the greatest excitement prevails among the business men of Baltimore and Washington. The suspension of the oldest, and heretofore considered the safest banking-houses in the monumental city, combined with the intense anxiety of the people in the Border States as to the result of the Presidential election, has for the moment caused all business to be suspended in Baltimore and Washington. This state of things is the harbinger of what may be expected in case Lincoln should be elected. The panic, in the event of the success of the Black Republicans, will be extended throughout the country, and the crisis of 1837 and 1857 will be as nothing compared to the revolution of 1860-61. The merchants of New York should give heed to those signs of the times, and strive with might and main for the success of the Union ticket. Men of New York, the crisis approaches! The Empire State is the battleground. It is for you to decide the issue. The destiny of the country is in your hands. Rally, then, to the support of the Union, the constitution, and the laws."

The intense political excitement which has for several months past agitated the public mind for a week or two preceding the election of President, has interfered more or less with general business.

It is conceded that Lincoln, the Northern candidate, is elected, which is considered by his opponents as a disastrous event for the country; because, the fear is that one or more of the Cotton Southern States will secede from the Union. This movement would unsettle, more or less, our whole political and commercial fabric. Hence, the most conservative men look forward to the future with gloom and apprehension.

The heavy shipments of grain and flour to Europe, and especially to England, have tended to keep down the rates of sterling exchange, and to prevent the export of specie. In the meantime, since our last, the prices of stocks have fluctuated materially, and especially State Bonds. After having undergone within the past week material depression, they have opened this week with a better feeling, and closed yesterday at a decided advance; but to-day or to-morrow they may be lower again. The movements of the fifty-six banks in this city the past week, compared with those of the preceding week, may be seen from the following table:—

FOOTINGS.

	Oct. 27.	Nov. 3.	
Capital	\$69,404,527	\$69,404,527	
Loans	123,362,626	123,234,584	Inc. \$1,871,956
Specie	22,798,599	22,174,982	Dec. 603,608
Circulation	9,123,108	9,429,423	Inc. 306,320
Net Deposits	78,065,612	79,679,416	Inc. 1,613,804

Money continues abundant on call at 5 to 6½ per cent. For notes on discount the rates were higher, and 7 per cent. is the prevailing rates for the latter class of paper. Sterling exchange rules dull, and with a tendency towards lower rates.

The exports of cotton to Europe since the 1st Sept. last, exhibit a decrease of about 100,000 bales, and the receipts at the ports show a falling off in about the same ratio.

MONETARY AND COMMERCIAL.

Since our last report the movements in East India goods have been fair but somewhat irregular.

HEMP.—Jute has been in improved demand, with free sales, both in Boston and here, at \$100 to arrive, and at \$105 to \$110, six months, which is an advance.

INDIGO has been quiet, with small sales of Manila, say 50 to 60 cases at 65c. to 70c., and small lots of Madras at 85c., six months.

TEAS continue without change for blacks. A fair demand exists for greens. The market, however, exhibits firmness, and full prices are realised. Among the sales at private hands were 3,000 half-chests on private terms.

TIN.—Straits Pigs are in reduced supply, and the market firm, and holders have advanced their views to 32½c. with a light business doing. We quote Banca at 31½c. to 32½c. cash.

SPICES.—Sales of 1,000 to 2,000 mats of Cassia have been made at 22c. 800 to 1,000 bags of Pepper at 8½c. 100 cases No. 1 Nutmegs at 41c. to 42c., and 25 bags Pimento at 6c., and 100 to 200 bags for export, in bond, at 5½c.

ARRIVALS.—At New York.—From Shanghai, Oct. 31: Union, Wiley. From Canton, 31, Waverley, Reed. From Penang, 29, Resolute, Sheriff.

At Boston.—From Batavia, Oct. 24: Minstrel, Kelly. From Manila, Nov. 1: Indiaman, Smith. From Penang, Nov. 2: Hollander, Ward.

LOADING.—At New York.—For Hong Kong: Fire Dart (S), Eureka, Cutler.

At Boston.—For Hong Kong: Nautilus, Elwell.

THE WAR IN CHINA.

ADVANCE UPON PEKING.

The following telegrams were published in the daily papers on the 12th inst. :—

A telegram was received on the 11th instant from Her Majesty's Consul at Marseilles, stating that it was reported from Hong Kong, on September 26, that the negotiations with the Chinese had not been brought to any satisfactory point, and that the Allied army had commenced its march upon Peking.

The settlement of negotiations is delayed owing to the question of the money indemnity. The Allied troops are marching on Peking, where Sang-ko-lin-sin is reported to be present with a large force. There is difficulty in providing carriage, as the coolies are deserting. Two thousand men protect Tien-tsin. Lord Elgin followed the troops on the 9th of September.

The rebels are inactive at Shanghai.

Trade is obstructed at Canton by the rebels.

The *Morning Post* and *Globe* on the 12th gave out as authentic, and backed up the same with leading articles to remove any doubts on the subject, that "peace had been concluded," and that a telegram had been received by Government from Sir Hope Grant, dated 26th Sept., to the effect that he was preparing to embark his forces. The fact of our latest dates from Hong Kong being only up to the 28th Sept. by the present mail, and that by the most rapid conveyance, advices could not be received from Tien-tsin under ten days, should have been sufficient for the writers of these statements, that the thing was simply impossible.

OFFICIAL DESPATCHES ON THE REBEL ATTACK UPON SHANGHAI.

The following despatches have been published in the *London Gazette* :—

Head Quarters, Tien-Tsin, September 2.

"Sir,—I have the honour to report, that on the 24th of August a private letter was received from Lieutenant-colonel March, Royal Marines, commanding at Shanghai, stating that reliable information had arrived of the intention of the rebels to attack the city.

"The garrison of Shanghai then consisted of one company of Marine Artillery, about 400 of Royal Marine Light Infantry, and the Loodianah Regiment of Sikhs. I accordingly despatched the 44th Regiment forthwith to reinforce them, and sent Brigadier Jephson to take the command.

"On the 27th of August, a report arrived, informing me that the rebels had actually attacked Shanghai, and had been repulsed.

"Before leaving Shanghai, in June last, I had instructed the officer commanding at Chusan, to send reinforcements to that place if called upon; and accordingly a force, as per margin,* arrived there from Chusan on the 17th of August. On the 18th the rebels attacked the city, but were repulsed; and on the 20th of August they made a demonstration against the foreign settlement, but retired on being fired into. I enclose a copy of Colonel March's reports of these affairs.

"I have since heard that the rebels have retired altogether, and do not intend to molest Shanghai any further.

"I am informed also that Mr. Bruce has written to Hong Kong for the 11th Punjab Infantry, which I had previously requested him to do, in the event of his requiring assistance. There is consequently now a very large force at Shanghai, and I purpose leaving them there until the expeditionary force breaks up.

"The measures taken by Colonel March for the defence of the city and foreign settlement appear to have been taken with judgment and success.

"I have, &c.,

"J. HOPE GRANT, Lieutenant-General,
Commanding Her Majesty's Forces.

"The Right Hon. the Secretary of State for War, &c."

Shanghai, August 21.

"Sir,—I have the honour to report, for the information of his Excellency the Commander-in-Chief, that at about 2 p.m. on the 18th the rebels in some force approached the walls of the city, threatening the south-east, south, and west gates.

"1. They advanced under cover until they were near enough to be fired at with effect with canister and smooth-bore muskets. About 4 p.m. they retired to a distance of three or four miles.

"2. Captain Budd, of the Royal Marines, who commands in the city, and is posted at the south gate, informs me that he thinks the loss of the rebels from the fire on the walls must have been very considerable; they left behind several flags, &c.

"3. On the morning of the 19th they evinced an intention to advance, but suddenly withdrew.

"4. The officer in command of the forts in the city describes their numbers to be from 5,000 to 7,000.

"5. Yesterday, at 9 A.M., I was informed that our pickets on the racecourse were firing on the rebels. I called out all my force, and on my arrival on the racecourse found that the rebels, formed in four columns, and carrying black, red, white, and orange flags, were in some force a little to the left of the settlement, threatening the Ningpo joss-house: they were sufficiently near to encourage us to fire a few rockets and shell at them, with what effect I cannot say. About 2 P.M., they retired and took up a position about four miles off, their right being apparently a little in advance of the French convent of Sic-a-wei.

"6. They appear to be concentrating their forces for an attack on the city and settlement.

"7. Their numbers I should estimate at 6,000 or 7,000.

"8. This morning the rebels are encamped in two places, at a distance of about three miles from each other, and from the city.

"9. Up to this time, 10.30 a.m., they have shown no disposition to advance.

"I have, &c.,

"W. H. MARCH, Lieutenant-Colonel, Royal Marines,
Commanding the Garrison.

"To Captain Biddulph, &c., Military Secretary."

Shanghai, August 26.

"Sir,—I have the honour to report, for the information of his Excellency the Commander-in-Chief, that on the 22nd instant, was sent, by Mr. Forest, the interpreter to the legation, to the rebels the notification, a copy of which I forwarded in my letter to you (No. 1, 18th of August), and on the following day an answer, a translation of which by Mr. Consul Meadows is herewith enclosed, was received.

"1. On the morning of the 24th instant I was informed that nothing was to be seen of the enemy, and I learnt from Colonel Favre, Commandant of the French force here, that the missionaries who had left the convent of Sic-a-wei on the approach of the rebels had returned there. It has been reported to me that placards were found on the walls of the convent, announcing their return in ten days; they are now, I understand, at a place called Si-pool, about 15 miles off.

"2. From the accounts I have received, I am inclined to think that the force they brought down to Shanghai did not exceed 3,000 men.

"3. Captain Budd, of the Royal Marines, the senior officer within the city, speaks highly of the steadiness of the Royal Marines and Madras Artillery, under Captain McIntyre, of the latter corps, and that of the company of Royal Marines under Lieutenant O'Grady, and the detachment of the Regiment of Loodianah, under Captain Maxwell and Cavanah; the accuracy of the fire kept up at the various posts, is proved by the loss which the rebels, it is ascertained, suffered.

"4. With the zeal and activity displayed by Lieutenant Glasse, of the Regiment of Loodianah, commanding at the Ningpo joss-house, I have every reason to be satisfied.

"5. The firing of the Royal Marine Artillery, under Lieutenant Williams, from the racecourse on the 20th was also very good.

"6. Her Majesty's ships *Nimrod* and *Pioneer*, the former moored off the settlement, and the latter above the city, did good service with their long-range guns.

"7. I wish to bring to the notice of his Excellency, the spirited conduct of Mr. Interpreter Forest, in volunteering to take the notification sent by the commanding officers of the Allied forces to the camp of the rebels on the 22nd instant; he was attended in his somewhat dangerous undertaking by private Phillips, of the Royal Marines, likewise a volunteer, who carried a flag of truce.

"I have, &c.,

"W. H. MARCH, Lieutenant-Colonel, Royal Marines,
Commanding the Garrison.

"To Captain Biddulph, &c., Military Secretary."

"PROCLAMATION SENT TO REBEL CAMP AT SHANGHAI.

"Reports having reached us of an armed force having been collected in the neighbourhood of Shanghai, we, the Commanders of the Military and Naval Forces of Her Britannic Majesty at Shanghai, hereby give notice that the city of Shanghai and the foreign settlement are militarily occupied by the forces of Her Britannic Majesty and of her Ally the Emperor of the French, and they warn all persons that if armed bodies of men attack or approach the positions held by them, they will be considered as commencing hostilities against the Allied forces, and will be dealt with accordingly.

"Shanghai, August 16.

"To the Commander of the Forces in occupation of Soochow and other places."

"TRANSLATION OF REPLY.

"Le, Imperial Commissioner of the Sovereign reigning in virtue of the True Decree of Heaven, &c., hereby issues a notification,

"Whereas the appointed period of the Tsing (Mantchoo) dynasty having expired, the true sacred Lord was sent into the world to save it. And I, having been honoured with his command to perform the work of Heaven by punishing the crimes (of the rejected dynasty), have, from the time I rose in the cause of right in Kwang-se, never fought a battle without conquering, and never attacked a city without taking it.

"A short time back, on our armies occupying Soochow, your countries once and again pressed us to come to Shanghai to discuss personally the various matters connected with foreign trade. Hence it was, that after retaking Sing-Keang I came hither, not to seek a quarrel and to fight with foreign nations, but to offer them a treaty of open commerce.

"And on now perusing the communication of your countries, I am in the highest degree surprised at the extravagant perversity of its language.

"I would submit to you that I, under the loyal Prince, have the general command of a large body of officers and of an innumerable army, and could have no difficulty in causing the instantaneous destruction of an insignificantly small city, such as Shanghai. When I, therefore, come to the place, and station my troops motionless before it, it is really in a spirit of pure regard and of consideration for our common faith. Had I at once ordered a hostile advance, the members of the same house would have been turning against each other, and we could not have failed to incur the ridicule of the Tsing dynasty.

"With the Tsing dynasty your nations have now a quarrel; you cannot have forgotten the battle of Tien-tsin. But our State in at present carrying on a war, has no other object than to regain our own country. We are at enmity with the Tsing dynasty, but with foreign nations we have no quarrel.

"Your countries attach much importance to open commerce and trade. Now, the advantages to be obtained from us would be greater than those given by the Tsing dynasty, for, after the establishment of peaceful rela-

* 100 of the 99th Regiment; 100 19th Punjab Infantry; 3 Madras Artillery guns.

tions with us, unrestricted commerce might be carried on at all places without exception.

"But the wild and fallacious nature of the communication which has reached us is such as renders it quite inexplicable. I must conclude that there is no consideration for the feeling that should make us of one mind, in virtue of our common religion, and that there is, it may be, an intention of seeking a quarrel.

"For these reasons, I hereby issue a notification for the common information of the foreign nations (at Shanghai). If you desire to carry on open commerce, in accordance with an agreement, you can at once come and consult on the terms of an agreement. If, however, it is your wish to make difficulties and to engage in hostilities, then my troops move as a flood, my commands go forth unchangeable as the hills, and we can only await the time when victory and defeat declare themselves. I trust you will not bring sorrow on yourselves.

"An earnest notification.

"The 14th day of the seventh month of the 10th year of the heavenly kingdom of Taeping."

"True translation,
"THOMAS TAYLOR MEADOWS, Consul.
"True copies,
"ROBERT BIDDULPH, Captain R.A.,
Military Secretary."

Spirit of the Press.

THE CAMPAIGN IN CHINA.

THE TIMES.

The outcry against the Chinese War of 1857 has now almost died away; even faction is ashamed to repeat the charges which were advanced against the European community in the East less than three years ago. Every succeeding month has brought to light fresh proofs of the degradation and worthlessness of the Chinese Government, and has shown that, if Europeans are to remain in safety in its territory, we must make up our minds to resent every insult and to punish every offence committed against us. Such as was Yeh, such is Kweiliang, and such is Hengki. Mandarins, whether at the North or the South, are not to be trusted, inasmuch as sincerity in dealing with barbarians would be the greatest of crimes in the eyes of the Central Government. If English readers wish for a specimen of the manner in which their countrymen have been treated in every matter, small and great, for the last 18 years, then let them listen to the history of the negotiations at Tien-tsin. At the capture of the Taku Forts the loss inflicted on the Tartar army had been considerable, but the terror spread among them by the attack and the murderous arms of the Europeans was still more important. They fled, the officers themselves making no halt until they had placed a great distance between themselves and the Armstrong guns. The letter we print to-day speaks of the difficulties in the nature of the country to an advancing force, and the little use which had been made of these obstacles by the Chinese. Having retired from the field in such haste as to leave every bridge standing, the Tartar generals, no doubt, sent such despatches to Peking as induced the Chinese Court to feign a desire to negotiate.

We hear much of barbarian cunning, yet it would seem impossible for a civilised plenipotentiary of average capacity to be inveigled by such shallow devices as those to which the Imperial Mandarins had recourse on the present occasion. These personages seem to have considered that we were still the English of 1842 and 1856, and that all the old tricks concerning a reference to Peking and the limited nature of their own authority would succeed in delaying us, as they had done before. With these views they began prevaricating at their very first interview, in the early part of September. Possibly, they may have at first obtained some credence, and it may have been under the influence of Kweiliang's first blandishments that Sir Hope Grant sent off the despatch which was the cause of the recent false anticipations of peace. However, we are glad to say, for the credit of our negotiators, that the Mandarins were quickly made sensible of their mistake, and taught that when a country like England is forced into a third war within a term of twenty years the consequences are likely to be serious to the State whose weakness and perfidy provoke the conflict.

Unusual promptitude seems to have marked the conduct of the authorities on this occasion. The rupture of negotiations took place on the 7th, and on the 8th the army moved forward on Peking. On the 9th Lord Elgin followed, and on the 11th the outposts of the allied force had reached a place called Yung-tsun, forty-five miles from Peking. We may presume, then, that by the middle of the month the English and French were under the walls of the capital, and that, if the Chinese were disposed to resist, another battle must have been fought about this time. The anticipation in camp seems, however, to have been, that the Tartar army had been too much frightened to venture on any further resistance. The country people, who received our troops hospitably enough, reported that the Tartar army had been entirely cowed by the European artillery, and it is most probable that the appearance of the allies in the neighbourhood of Peking will be the signal for other overtures on the part of the Imperial Mandarins. It is possible that negotiations may have taken place which will allow the army to re-embark before the approach of winter, but, on the whole, we cannot be sanguine of any such issue of the campaign. It seems far more likely that the capital has been taken and occupied, and that it will be held through the whole winter. Nor can there be any reason to anticipate danger from such a proceeding. The enormous city into which the allies will penetrate is capable of giving shelter to a force fifty times larger than that which will visit it, and it is to be hoped, for the credit of the Commanders, that they will not scruple to take possession of the best quarters for themselves and the troops under their command. The Chinese Government has no claim on our forbearance. Its conduct has been marked throughout by every form of duplicity, and it is our duty to teach the besotted Emperor and his favourites that the rights of nations cannot be violated with impunity and we hope to hear by the next mail that the Allied armies are in full occupation of Peking, have imposed terms on the enemy as will insure peace for many a year.

MORNING CHRONICLE.

We have hopes that a satisfactory treaty may yet be concluded without pushing matters to the last and most hazardous extremity. All reference to past causes of quarrel has disappeared, as we are glad to perceive from the official despatches. There is nothing now said about exacting penalties, punishing treachery, or recovering prestige. Lord Elgin declares that his sole object is to conclude a satisfactory treaty, under conditions which shall hold out some reasonable prospect that its terms will be faithfully observed by the Peking Government. He tried to do this at Tientsin, and failed through the characteristic duplicity of the Chinese diplomatists. He offers to renew the attempt at Tungchow. These are symptoms which encourage us to believe that this effort will be more successful, and that Sir Hope Grant's telegram may, after all, be only a few days antedated.

MORNING HERALD.

We are not equally sanguine about the removal of all misgivings as to the future. It is rather early to talk of sending home the army two or three days after the signature of peace. We have done this once before, and have bitterly regretted our hasty retirement. Our dealings with the Chinese after all our familiar intercourse with them since 1842 ought at least to induce us to head our negotiations with the announcement that we give no credit, and to demand nothing more than we are in a position, inexpensively and without risk, to exact. This sudden talk of breaking up the expedition, however, suggests the very disagreeable inference that we are likely to fall into the trap from which only the recent sacrifice of human lives and treasure has extricated us. It is not for the barren honour of being represented at Peking that we have spent ten millions of the British taxpayers' contributions, but to avenge a treacherous massacre, to guard against the repetition of the outrage, and to prevent the periodical recurrence of a Chinese difficulty. Lord Elgin's position is no doubt one of considerable embarrassment; and the presence of Baron Gros can scarcely tend to smooth away the difficulties that lie in his path. But with a force such as he had to fall back upon in the month of September, it will be hard indeed if he has not made his own terms. Unless they secure to us complete indemnity for the past, and sufficient guarantees of our peaceful intercourse for the future, the results of Lord Elgin's second mission to China will hardly excite so much extravagant approval as was elicited by the treaty of Tien-tsin.

THE REBELLION IN CHINA.

(The Times.)

A war which is understood to be conducted without any disturbance of commercial intercourse between the belligerents may naturally be attended with other peculiarities of its own, and so the same Commander-in-Chief who reports the victory over the Imperialists records also with equal satisfaction a victory over the insurgents. This, however, is not the view taken by the insurgents themselves. They profess themselves unable to comprehend how two parties having a common enemy, and, as they ingeniously add, a common religion, can be the enemies of each other. They pretend to be mystified by this triangular duel, and inquire why we should interfere to thwart proceedings addressed to the very object which we ourselves have at heart. That is the substance of the little State paper inclosed in Sir Hope Grant's despatch which we yesterday published, and the document is undoubtedly calculated to embrace the already considerable reputation of Chinese diplomatists for acuteness and cunning. When the main body of the allied forces sailed for the Peiho a garrison was left at Shanghai, the British division of which was under the command of Colonel March, of the Royal Marines, who was further empowered to draw upon the reserves at Chusan for any necessary reinforcements. It was anticipated, in fact, that the rebels, whose devastations had been carried up to the environs of Shanghai, might venture upon attacking the city itself. This would be an extraordinary piece of audacity in men who had hitherto confined themselves to the pillage and massacre of defenceless communities; but, as the European garrison was small, and the insurgent army large, there was reason for suspecting that they might make the attempt. These apprehensions were justified by the event. At the very time that we were preparing our attack on the Imperialists in the Taku Forts the insurgents were preparing an attack upon us in Shanghai, and on the 18th of August the assault was actually made. Before hostilities commenced, however, Colonel March issued a proclamation, in which he briefly announced that if any of the "bodies of armed men" presumed to be in the vicinity of the town should approach the positions occupied by the garrison, they would be received as enemies, and dealt with accordingly. The military curtness of this notice, which was delivered at the rebel camp, provoked a remonstrance from Le, the insurgent commander, who argues the case with infinite dexterity. He observes that the Mantchoo dynasty is near its end—a conclusion which must have appeared probable to our own authorities also. He claims to be of the Christian religion, and identifies his cause with ours so completely as to speak of the allies and insurgents as "members of the same house." This being premised, he inquires why there should be any quarrel between us, and asks, with some point, whether we should not "incur the ridicule" of the Court of Peking by consuming in private strife the forces which ought to be concentrated against a common foe? As to his advance on Shanghai, he came there to offer a commercial treaty,—nothing more. He does us the justice to remark that we "attach much importance to open commerce and trade," and he proceeds accordingly to outbid the Imperialists on this score. Here, therefore, were two parties with a common purpose and no conflicting interests, and why should one of them threaten to fire upon the other? He protests that he cannot understand such "extravagant perversity of language." Fortunately for the inhabitants of Shanghai, Colonel March, though he might not have been able to confute these arguments, was able to repel the attack, which immediately succeeded, and one city, at any rate, has been saved from the onslaught of these murderous savages. They soon retreated before the fire of the Europeans, and the garrison has since been so strongly reinforced that no renewal of the attempt need be anticipated. By this time even the most sanguine of our countrymen in China have discovered the falsity of the character originally attributed to the rebellion. It is based neither upon religion nor patriotism. The insurgents have no knowledge of the Christian faith beyond such as enables them to parody its mysteries by an abuse of sacred names and a travesty of sa-

cred doctrines. Their course has been marked by the most dreadful havoc. Rapine and murder, even to the depopulation of vast cities, have distinguished their track, and anarchy and ruin are left behind them. Yet even these remorseless savages have the cunning of their race. They can discover the points most open to argument, and the offers most likely to be attractive. He adopts the character of a Protestant and a shopkeeper, denounces as enemies the people against whom we are fighting, speaks of "the true sacred Lord," as distinguished from the deities of heathenism, and insinuates that with respect to worldly policy he is quite a freetrader. How can there be any quarrel between us and him? Nothing can be finer than such words, but if they had been listened to Shanghai would by this time have shared the fate of Soochow. We have been gradually learning something of the Chinese, but we are not sure that their national character is becoming more comprehensible than before. It is full of contradictions. They are cowards, with a profound contempt for life. They are exclusive, with a strong propensity to roam. They are savage and sanguinary in their customs, with infinite docility and contentedness of disposition. They are all for trade, and yet it costs us a series of wars to trade with them. More than any people on the face of the earth they are pressed by the necessity of living. They are at one end of the scale while the West Indian negro is at the other. A Chinaman of the Eastern provinces has to strive and tug for life, and, though he will surrender this life without fear, and even sell it for a consideration, he struggles hard to preserve it. He will buy and sell with anybody, work for anybody, and under certain conditions, fight for anybody. He has a keen eye to his own interests, and yet takes a remarkably broad view of things in general. He is the man of all others in the world who ought to be the most anxious to keep on good terms with those who buy his goods and bring him money, whereas these are the very relations which we have hitherto found it impossible to maintain in peace. Does the fault lie with the Tartar aristocracy enthroned at Peking? If so, we trust that the next mail will bring us intelligence of a new era and more pacific prospects.

THE NEW PRESIDENT OF THE UNITED STATES.

The event which has occupied the attention of the United States for the last four years has at length come to pass, and virtually, although not as yet legally, Mr. Lincoln has been elected the president, and Mr. Hamlyn the vice-president, of the great American Confederacy. The event had been long foreseen, and will surprise nobody who has paid the least attention to American politics. It is the natural reaction against the outrages and excesses of 1855 and 1856, the protest of the freest and best educated part of the American people against the acts of high-handed violence and oppression which preceded the advent of Mr. Buchanan to power. If the South has at length found that it is not omnipotent in the councils of the country, that unpleasant discovery is owing to the foolish and intemperate use which the South has made of its prosperity. While demanding the most implicit respect for its own opinions, the South has been even ostentatious in proclaiming a bitter and cynical contempt for the opinions and the feelings of others. Slavery has been defended as the normal and perfect state of human society, and the North has been bitterly taunted with its honest industry, and the coarseness of manners which the fastidious Southern planter traces to that cause. While claiming for itself the monopoly of the government of the United States, the South has constantly held the language of disaffection, and the United States have been ruled by a party which was perpetually talking of disuniting them. So far from wondering that these things should have produced the result we have just witnessed, it has long appeared to us impossible that they should not. Mankind, if ruled at all, must be ruled either by force or persuasion. The South could not employ the former, and have long substituted the language of provocation and defiance for the latter. But these and many other circumstances, while they fully account for the change which has taken place, tend very considerably to diminish its significance. Had the South been always reasonable and conciliatory, we must have regarded the election of Mr. Lincoln as evidence of an intolerance of the very institution of slavery which might portend results fatal to the stability of the Union; but the South has really taken so much pains to bring the present result to pass that it has no right to be surprised at its own success.—*Times*

THE FRENCH IN SHANGHAI.—A Mr. Flowers, Vicar of Tealby, writes *The Times*. In a letter from my nephew, aged 16. He says:—"The French, like fools, have set the town on fire,—what for I do not know. The French soldiers behaved in the most cruel way; they gave the Chinamen a very short warning to quit their houses. When the time was up they set the Chinese town on fire. It is built of wood, and hundreds of sick were burned. Two Frenchmen were walking along the street to clear the people out before the fire came. They found some men drunk with opium. They would not or could not move, so they stabbed them and threw them into the river. We have counted 30 bodies in one day, chiefly women, that the French have — and murdered, some cut about dreadfully. Now I must tell you of two English. They found two old women sitting round a little fire, told them to go, and pointed to the flames. No; they shook their heads and pointed to the teapot. So they picked them up, carried them across the moat, up to their waists in water, and sent them off all safe."

CAPTAIN HOWARD VYSE, VICE-CONSUL AT KANAGAWA.—In *The Times* of the 9th April some statements appeared on the official conduct of this gentleman, who has sent the following to *The Times*:—"As regards his observations upon the manner in which I perform my public duties, I have only to say that I am not responsible to 'C.' or anyone except my superiors in office. If they think me unfit for my post they have the power of removing me. But I believe I may safely assert that they will admit that, whatever my deficiencies may be, I have done my best to uphold the honour of my country in the opinion of the Japanese, to vindicate the rights of British subjects, and in my own person to maintain the character of an English gentleman. To the anonymous writer of personalities the latter will probably be considered a poor qualification."

THE Illustrated News of the 17th inst. contains a portrait (very incorrect, however) of W. H. Adams, Esq., Chief Justice of Hong Kong. The same number also contains some very fine sketches from the *Paiho*.

DR. MACGOWAN AND HIS CHINESE TEACHER.—We were informed some time ago that Dr. Macgowan had discovered that his teacher was a purveyor of property and an impostor; it was, however, a private matter, and unfit for newspaper comment, but as the faithless man, at the instigation of certain parties, undertook to extort from his benefactor by a legal procedure, it is proper to make the facts known. The Doctor, on first landing in London, was so unfortunate as to find himself in a lodging-house, the master of which was in prison. His wife became so fond of the Celestial that Dr. M., after a few days, was obliged to remove him, taking up his residence with Mr. Summers, who, as professor of Chinese in King's College, had several young men as private pupils (two of whom, brothers, were studying for commercial life in China). The Chinaman managed to keep up communication with his admirer, and was finally aided to return to the house, making himself their teacher! The woman, her liberated husband, and the other parties, finding the business less profitable than was expected, concocted a plan (to squeeze the Doctor, whom they had already injured, by threatening a lawsuit), in which the said lodging-house keeper was to testify that the Chinaman had been starved. They have had the prudence to give that matter up. We, ourselves, who happened to see him at the time in question, can aver that he did not appear badly off in the way of "chow chow;" in fact, he appeared uncommonly sleek.

THE NEW G.C.B. AND K.C.B.—Major-General Sir James Hope Grant, K.C.B., whose elevation to the highest rank of the Order of the Bath appeared in our last, is the fifth son of the late Francis Grant, Esq., of Kilgraston and Pitcaithly, North Britain, the head of one of the best of the old "county families" of Perthshire; his mother was Anne, eldest daughter of Robert Oliphant, Esq., of Rossie, Postmaster-General of Scotland. He was born on the 18th of January, 1808, and entered the army as cornet in 1826. He served in China under the late Lord Saltoun, and subsequently in India, under Lords Gough and Hardinge. He was present at the Battle of Sobraon, where he commanded the 9th Lancers, as also in the Punjab in 1858-9. He was also present at the engagements of Ramnuggur, Chilianwallah, and Gojerat, and took an active part in the suppression of the Indian mutiny in 1857-8, for his services, on which occasion he was made a Knight Commander of the Order of the Bath. He became a major-general in the army in 1858. His recent service in China are too well known to our readers to need being repeated here. Sir James, according to the *County Families*, married in 1847 Helen, daughter of Mr. B. Tayler.—Rear-Admiral James Hope, C.B., of Carriden, county Linlithgow, who is now elevated, for his services in China, is the only son of the late Rear-Admiral Sir George Johnstone-Hope, K.C.B. (son of the Hon. Charles Hope-Vere, of Craigie-hall, and grandson of the first Earl of Hopetoun), by his first wife, the Lady Jemima Hope-Johnstone, fifth daughter of James, third Earl of Hopetoun. He was born on the 3rd of March, 1808, and married in August, 1838, the Hon. Frederica Eliza Kinnaird, second daughter of Charles, eighth Lord Kinnaird in the Peerage of Scotland, but was left a widower in May, 1856. He entered the Royal Naval College in 1820, joined his first ship in 1822, and having served on the West Indian and Mediterranean stations, was promoted to lieutenant in 1827. He escorted Lord William Bentinck to India in 1828, became flag-lieutenant to the late Admiral Lord Northesk in the following year, and subsequently was employed on the West Indian and North American stations in command of the *Racer* (16). He obtained the rank of Captain in 1838, and in November 1843, while in command of the *Firebrand* steam-frigate, he enacted a conspicuous part in the battle of Parana, where a hard day's fighting resulted in the destruction by the combined squadrons of England and France of four heavy batteries belonging to General Rosas at Punta Obligado, as also of a schooner carrying 6 guns, and of 24 vessels chained across the river. "On that occasion having volunteered," says O'Byrne in his *Naval Biography*, "Captain Hope gallantly pulled up in his boat and cut the chain which impeded the upward progress of the Allies. At the close of the action he landed as aide-de-camp to the late Captain Sir Charles Hotham, the senior British officer, and assisted in giving the *coup de grace* to the defeat of the enemy, whose numbers originally consisted of 3,500 men, in cavalry, infantry, and artillery, and whose batteries had mounted twenty-two pieces of ordnance." As a reward for his bravery on this occasion he was nominated a Companion of the Bath in April, 1846.

A TRIUMPH OF SCIENCE.—One of the most difficult operations ever performed by a diver has recently been accomplished in recovering the remainder of the treasure sunk in the *Malabar*, at Galle. This consisted in cutting away the large iron plates from the mail room, half an inch thick, and working through nine feet of sand. Heiack's diving apparatus was employed, as on the previous occasions, and £16,000 was thus got out in one day. The whole of the specie on board this vessel, upwards of £300,000, has now been saved.

The last number of *Punch* contains a caricature headed "New Elgin Marbles," representing Lord Elgin insisting on the Emperor of China "knuckling down, and no cheating this time." There is also a clever letter from *Punch's* special correspondent at Peking.

THE STEWARD OF THE SHIP "CYCLOPS," FROM HONG KONG.—The steward, a black man, had the impudence to sue the captain for wages. It appears that he was discovered to have hid himself in the bread-locker for a period of eighteen days. He had been entered on the log-book as fallen overboard, and was accidentally found by the second mate at night.

A DEPUTATION from the Anti-Opium Association had an interview with Mr. Samuel Laing at the Treasury. The deputation was introduced by Mr. Charles Gilpin, M.P., among whom was Dr. De la Porte.

A HANDSOME monument has been erected on Southsea-common, Portsmouth, by the officers and crew of her Majesty's ship *Shannon*, to the memory of the late Sir William Peel, captain of the *Shannon*, who died of a wound received at the head of his indomitable Naval Brigade during the Sepoy mutiny.

SIR J. BOWRING had an interview at Paris, on the 14th inst., with M. Thouvenel, Minister for Foreign Affairs.

THE Vectis, with the last mails from Bombay, put into Toulon (owing to very bad weather), from which place the mails were forwarded.

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

Suggestions for the insertion of information required by our subscribers will have due attention and acknowledgment.

A REGISTER is kept of the addresses of all persons connected with the FAR EAST, and reference can be made to the same by personal application at the office or by letter. Passengers arriving by either Overland route or sailing vessels, in England or on the Continent, will oblige by forwarding their address for the information of inquiring friends.

Post-office orders should be made payable at the Lombard-street Office, to MORTIMER WRIGHT.

Our OFFICES in this city have been REMOVED from 337, Strand, to 7, George-yard, Lombard street, E.C. Newspapers and literary communications should be addressed to the Editor. Correspondence relative to Advertisements, Subscriptions, and the general business of the Paper should be addressed to the Manager, and not to the Editor.

Correspondents and Newspaper Publishers in INDIA, CHINA, JAPAN and the EASTERN ARCHIPELAGO are requested to address all communications, newspapers, &c., via Marseilles, to the Editor, Box No. 70, General Post-office, London, E.C., which has been opened specially for the same.

Any information required by Subscribers, in reference to Commercial or General matters in CHINA, JAPAN, SINGAPORE, and other parts of the FAR EAST, will be supplied on application at the Office, where files may be seen of the Journals published in those countries.

THE PRESENT NUMBER—49—COMMENCES THE THIRD VOLUME OF THE "LONDON AND CHINA TELEGRAPH."

The London & China Telegraph.

LONDON, TUESDAY, NOV., 27, 1860.

VOLUME III.

WITH the present number—being the first of Vol. III.—we commence a Tabular Statement of EXPORTS from Great Britain, the Continent, and America, to China and all parts East of India, published as a SUPPLEMENT, in order that space may not be appropriated to it in the body of our paper. Arrangements have been made to supply the most accurate and *bona fide* statements of the cargoes on board of each vessel, which will cost a considerable sum per annum. We have fixed the amount of subscription to this Supplement at 12s., per annum. This is probably less than will cover the cost, but we trust that all persons interested in COMMERCE will find it worthy of support. We may notice what probably our readers have already done, namely, that the export lists hitherto published have been incomplete. The reason was simply that the cost of procuring a full and accurate statement could not be incurred without extra charge to our subscribers, and it was deemed better to commence the new lists with the first number of Vol. III.

Of course it will be optional either to subscribe to the paper as hitherto, at 18s. per annum, or to the paper and SUPPLEMENT, at 30s. Single copies of the SUPPLEMENT will be charged at the same price as the paper, viz., 9d. In addition to the Exports from Great Britain, &c., it will contain the Exports from all parts East of India, commencing from the next number.

The New York Correspondent's Letter and Commercial Intelligence, and other additions promised at the commencement of Vol. II., have been kept up, and we shall, from time to time, make such additions and alterations as may be found serviceable, and we hope to see a steady increase of our supporters commence with Vol. III. Our field being of limited extent, we require the unanimous support of those interested in parts EAST OF INDIA, in order to make such additions or outlay as may be desirable for the benefit of our supporters. We shall at all times be happy to receive suggestions from subscribers on this point, which shall receive due consideration. It is only with papers like ours, addressing a comparatively small constituency, that efforts can be made to meet the requirements of all classes. We are willing to make such efforts, if we have the necessary amount of support. The tables now commenced will form valuable data for statistical returns hereafter.

THE REBELLION IN CHINA.

THE Chinese Rebellion, which has been gradually spreading northward and towards the seaboard of China, has, according to the recent intelligence from that quarter, brought the insurgents into rather unpleasant proximity to the foreigners in Shanghai. This, however, was not the first time they have approached our settlement there, for in 1854 they caused the British community in that place very great inconvenience, and placed them in some danger. On this second occasion, it appears that the Rebels had a certain pretext for their procedure, for they had, according to their own account, been encouraged by some foreigners, of doubtful character, if we rely on the *North China Herald*, but still foreigners,—to come and occupy the native city of Shanghai. This excuse gave a sort of colour to their advance, and they affected to strengthen their plans by holding out large prospects of increasing commerce and free-trade, hoping thereby to prevent any interference on the part of the British and French authorities in the town. There were, doubtless, certain misgivings in the insurgent mind as to the welcome they would receive, for their approach was not without due caution.

They had prevailed on a few degenerate sons of the Western Ocean to furnish them with powder and weapons, and they thought the view of a large influx of dollars would probably induce the great majority to favour their admission to the town. Here, however, they miscalculated. It is by no means an insignificant attribute of the British intellect that it judges of men's morals by their acts much more than by their words. And if deeds are to weigh more than words in respect of these Chinese revolutionists, assuredly the evidences against them are increased by this last step of theirs. They advanced upon a village within six miles of Shanghai—Sen-ka-wei. Here was a Roman Catholic industrial college and school. The poor priest whom they found in charge they murdered, together with his unoffending pupils. To call such a band of plunderers PATRIOTS, is to assign a noble title to a horde devoted to cruelty and rapine. The designation of their leader the Chung-wang, or "Faithful King," is also a misnomer, for the word means not merely faithful to his own interests, but faithful and just in all his dealings with men. The ruinous heaps and burning towns which mark the course of his armies over a fair and fertile land tell a different tale. The veterans of his host, who are mostly Canton men, are characterised by all the murderous ferocity of their fellow-countrymen in the south. To admit such firebrands and troops, so intent on plunder, into close quarters with the foreign settlement, would have been an error. Mr. Bruce and his coadjutors undoubtedly took the proper course in keeping them at a safe distance.

With more knowledge of a purer faith than Mahomet had, they have well-nigh equalled him in his surging progress through the west of Asia. It is to be regretted that the views of English politicians and the English press, coupled with the ignorance and obstinacy of the native Imperial Government, stand in the way of our taking the initiative and clearing the entire province of these marauders. They have no British trade in the northern ports into a state of stagnation; they pillage and sack every village and town within their reach, and appropriate everything valuable that crosses their path. Surely the difference is small between these and the pirates of the sea-board, whom British ships are on the part of the Chinese Emperor ready to run down and annihilate. What course could be more beneficial to the native government than the opening of the great inland channels of the country to British enterprise? The presence of the foreigner would always secure the place, if only a proper understanding could be arrived at and sustained between the Mandarins and the foreign consuls. A British minister, on good terms with the Imperial Government, would hold in his hands the reins by which he might influence, through the Presidents of the Six Boards, the most distant regions of the empire. This is an arrangement greatly to be desired, because it would be most conducive to the tranquillity of this vast kingdom and advantageous to the interests of trade and civilisation. As for treating with the rebels and hoping to benefit our position by encouraging them, it is utterly out of the question. What form of good government or enlightened ethics have they produced or sanctioned? Nought but military glory, and that of a very inferior kind, and personal aggrandizement have as yet been aimed at, or at least been affected by them.

Their military organisation, doubtless, is superior to that of

the Imperial army, and they know, probably, more of the English and European habits than the ruling powers know; but the strange mixture of sound and unsound doctrine in their professed faith, and their pretence at a higher morality than their countrymen, which their works belie, render them a mockery. Buddhism is a more enlightened religion than theirs. No missionary ought to countenance a belief in parts of the Bible alone without the acceptance of the whole. Should such a rule as that obtain general acceptance, that a portion only of Holy Scripture is sufficient to warrant the profession of Christianity, the manifold errors of the West will get a footing in that land, instead of the simplicity of the Gospel. Let the various Missionary Societies beware of sanctioning by their favourable attention the blasphemous errors of these Chinese fanatics. There is no such thing as semi-Christianity; and there is no system of error without some admixture of truth. As the two cannot, however, properly exist together in harmony, neither can we expect from any ecclesiastical or civil polity which is wanting in sound doctrine for its basis, any really good results. We wish most cordially it were otherwise, and that the rebels were actuated by Christian and patriotic motives, for China is sadly in want of a more humane Government. Eye-witnesses of these rebels at Whampoa and Shanghai cannot, however, come to any other conclusion than that these elements are not possessed by the present bands, and from the published accounts of Mr. Holmes' visit to them at Nanking, it appears they are at headquarters, equally imbued with purely brigand principles.

OPENING OF WESTERN CHINA BY OVERLAND ROUTE FROM RANGOON.

We are gratified to find that Lancashire continues active in discussing this subject, so important for the commercial future of both England and India; and, we may add, for the 150 millions of fellow beings peopling the Chinese Western Provinces. Since we last noticed the subject, several admirable leading articles in its favour have appeared in Lancashire journals; and the proprietors of the vast salt works in Cheshire, an important division of our national industry, have, through their Chamber of Commerce, forwarded an additional memorial to the Prime Minister, the concluding paragraphs of which we submit to our readers:—

"That the attention of your memorialists has been drawn to the feasibility of approaching the Western Provinces of China by means of a new route from Rangoon through a portion of Burmah and the Shan States to the frontier Chinese city of Esmok, far removed from that portion of China to which we have access by treaty, and coming at once into the heart of China, with considerable saving in the sea voyage; that your memorialists are informed such route would be comparatively easy of accomplishment, the distance from Rangoon to the proposed emporium on the borders of British Pegu and Burmah being only 250 miles, and from thence on to Esmok a further 250 miles; in round numbers a distance of 500 miles, presenting, as your memorialists believe, few impediments to the construction of a railway or tram road.

"Your memorialists would therefore pray that, whilst every exertion should be used to obtain from the Chinese Government, permission to import salt into China as an article of merchandise, the opportunity likely to be afforded by the proposed communication with China through Rangoon should not be lost sight of, and that inquiries should be instituted by Her Majesty's Government, in order to test the feasibility of a scheme which appears to open up so many advantages to British commerce."

At a meeting of the Literary and Philosophical Society of Liverpool, on the 12th inst., a most interesting and instructive paper on the project was read by H. Duckworth, Esq., which elicited a discussion warmly commending it. We think it will be impossible for the 'circumlocution' 'routine' officials of Downing-street, longer to oppose, in their ignorance, this most wise movement on the part of our manufacturers of all classes, to have opened to them an almost boundless new market for their goods. We make the following extract from the report:—

The Liverpool Literary and Philosophical Society held their usual meeting, at the Royal Institution, Colquitt-street, on the 12th instant, the Rev. Mr. Higgins presiding. A paper was read by Mr. Duckworth, on the Proposed New Route to China, via Rangoon, and the establishment of a commercial emporium at Pegue (a stretch of 250 miles). This project has for a long time engaged the attention of Captain Sprye, who has lost no opportunity of bringing the matter before the public, as well as the authorities, and certainly represents the merits of the "new route," in such a manner, as ought, if founded on reliable facts, which we do not doubt, to recommend it to the most careful and serious consideration of the commercial men and Government of this country. The great question that requires a definite solution is only as to the feasibility of the proposed route, by determining whether there are insurmountable diplomatic and engineering obstacles in the way of its realisation, or not. To these points Mr. Duckworth in his excellent paper particularly directed attention; and demonstrated, we thought satisfactorily, that there did not exist any such obstacles, at least of so great consequence as to prove a barrier to the commercial enterprise of England. We have before adverted to the subject, and specified the details of the scheme of

Captain Sprye, viz., that a railway, or other mode of conveyance be constructed between Rangoon, in the Bay of Bengal, only recently acquired by the British, and Esmok, a city situate on the south-western frontier of China, a distance of about 500 miles. It is necessary, however, that that route should proceed partly through the territory of the King of Burmah, or of Shan princes who are tributary to him, from whom, of course, a concession of free passage will require to be obtained before the scheme can be realised. For this purpose, Mr. Duckworth in his paper proposed, with Capt. Sprye, that the Government should send a Commissioner to the Birmah court, with the view of effecting a treaty granting the privileges sought. There can be no question as to the desirability of establishing a free commercial intercourse with Western China, as by the description given by most trustworthy persons of its agricultural and mineral resources, as well as of the great and varied requirements of its millions of inhabitants; which must if once untrammelled trading relations are brought about, immensely add to the industrial activity and wealth of all Europe. It appears that the intermediate plans are blessed with material for every necessary of life, except salt, for which a most fabulous price is obtained from the "western celestials." This we regard as of no small importance to Cheshire, and the project should at least receive the steady and hearty support of the salt manufacturers of this county, through their organ, the Salt Chamber of Commerce, which body has already made some progress in introducing their product into our East Indian possessions.

After the paper a discussion took place, in which the majority of the speakers expressed a highly favourable opinion of the proposed route including the chairman.

Mr. Danson, however, in a pretty long address, objected to the method suggested by Mr. Duckworth of asking Government to send out a Commissioner for the purpose of effecting a treaty. It was not, in his opinion, the duty of the Government to take such a step, until the commercial body had first, at their own expense, made every inquiry as to the practicability of the project. They then might go and demand of the Government, if the report of their explorers was favourable, to take such diplomatic steps as would clear the way for British enterprise. He seemed also to think that if the Government first moved, it might excite the jealousy of France. At the same time, he regretted that there was not more harmony and unity of action among the mercantile men of Liverpool and elsewhere, as to justify any hopes in that quarter; the Chambers of Commerce throughout the country being at present, from want of a wise general combination, virtually powerless to adopt any energetic course in the matter.

He was followed by several other gentlemen, who, however, took quite a different view of the question from Mr. Danson; and advocated the propriety of the suggestion of the essayist that Government should first countenance so important a project by taking the preliminary and necessary steps.

A vote of thanks to Mr. Duckworth was moved by the chairman, which was seconded by M. W. Hadfield, Secretary of the Salt Chamber of Commerce, who was present as a stranger. After commenting on the merits of the essay, he alluded to the great inducements it had pointed out for the embarking of British enterprise and capital, Western China being most productive of such articles as possessed a large consumption in this country, while it was deficient of most of our staple manufactures and of some of our most valuable products; among these he named salt—a commodity so scarce, and consequently so valuable, as at present to bring an enormous price in parts of the intermediate country. With regard to the remarks of Mr. Danson, as to what was the duty of Government and what was not, he entirely disagreed with him, and pointed out several weighty reasons why our Government should first take an active part. Mr. Danson's fears as to the step creating jealousy between England and other Powers were simply absurd.

Literature.

The Lebanon: a History and a Diary. By David Urquhart. 2 vols. T. C. Newby, Welbeck-street, Cavendish-square.

The name of Mr. David Urquhart is too well known in connection with the East for any reasonable doubts to be entertained that a work on "The Lebanon," from his practised pen, would be full both of interest and instruction. This book has more than realised our expectations, and we have no hesitation in recording our impression, that the present "season" has not yet produced one of equal value. It consists partly of a History and partly of a Diary, written during the years 1849 and 1850. We are disposed, indeed, to ask why the latter was not published ten years ago; when, if there was less of painful interest in Syria than recent events have generated, there would, nevertheless, have been more freshness in the narrative, and perhaps more beneficial results from its publication? We are, however, well content as it is. A book written with power and truthfulness, such as this, is at all times welcome. We cannot particularise its merits, but we may state that no portion of the work has appeared to us more replete with interest than that referring to the Druze religion, in which some popular misapprehensions on the Maronites and Druzes are corrected. In truth, we think that every man who desires to make himself acquainted with a subject which, at no distant period, will force itself on the attention of Europe, will do well to read this book. What great events may grow out of Russian policy or French policy, or indeed English policy in the East, it is useless to conjecture; but that the interminable Eastern question is set at rest, even for a few years, is more than the most sanguine among

us can hope. It is well, then, as we think, to have the practical knowledge of such men as Mr. Urquhart to guide us, [and we feel that we owe him a debt of gratitude for the publication of these volumes. Whether we look to the more remote history of the Lebanon and trace the progress of events till it was incorporated into the Ottoman Empire, or whether we regard only its condition as affecting the vital interests of Great Britain at the present time, we shall find in this work matter of deep interest and instruction. In literary style it is a decided advance upon the former works of the same writer. The portraits are more lifelike—the incidents more varied, and the descriptions still more vivid and brilliant. On every account, we have great pleasure in commending it to the careful perusal of our readers.

LITERARY ANNOUNCEMENTS, &c.

Messrs. Longman and Co. have added to their list of works nearly ready—"Sir James M'Grigor's Autobiography," 1 vol.; "The Progress of Nations, or the Principles of National Development in their Relation to Statesmanship;" and "Sermons, chiefly on the Theory of Belief," by the late Rev. J. S. Boone.—Mr. John Murray will shortly publish a second and enlarged edition, revised and corrected to the present time, of Mr. Kerr's well-known edition of "Blackstone's Commentaries." His latest list also includes:—"Ancient Law," by Mr. Maine; "The Personal Narrative of Two Years' Imprisonment in Burmah," by Mr. Gouger; "Lincoln's Inn Sermons," by Rev. Wm. Thomson, Provost of Queen's; "The Great Sahara, or Wanderings South of the Atlas Mountains," maps and illustrations, by Rev. H. B. Tristram; "Essays Contributed to the 'Quarterly Review,'" by Professor Blunt; and numerous other works.—Mr. Bentley's Annual Dinner Sale took place at the Albion Tavern on the 13th inst. Among the most important of the works submitted were "Lives of the Archbishops of Canterbury," by Walter Hook, Dean of Chichester; "Journal and Correspondence of William First Lord Auckland," edited by the Bishop of Bath and Wells, 2 vols., with portraits; "Researches and Discoveries in the Levant," by C. T. Newton; "The Autobiography of Mrs. Delany," edited by the Right Hon. Lady Llanover; "The Greatest of the Plantagenets, an Historical Memoir," by Edmund Clifford; "The History of Rome," by Dr. Mommsen, translated by the Rev. W. Pitt Dickson, with an Introduction by Dr. Schmitz; and "Lithiaka, Gems and Jewels, their History, &c.," by Madame de Barrera, 1 vol., with illustrations.—Messrs. Macmillan and Co. announce a new book of travels altogether novel in its plan. It is entitled "Cambridge Tourists in 1860;" and will consist of a collection of accounts of tours by eminent Members of the University, in Iceland, Italy, on the Alps, &c. The volume will be published immediately. Their list also comprises "The Decalogue Viewed as the Christian's Law," by the Rev. Richard Tudor; a "Life of Dr. George Wilson," Regius Professor of Technology in the University of Edinburgh; "Lectures on the Apocalypse," by the Rev. F. D. Maurice; "Rays of Sunlight for Dark Days," a book of Selections for the Suffering; and other works. Messrs. Sampson Low, Son, and Co., announce to be ready during the month. "The Forest Hymn," by W. C. Bryant, illustrated, small 4to.; "Modern Minstrelsy," comprising a Biographical Sketch and Specimens of the Poetry of Living Poets, with a medallion portrait of Alfred Tennyson; "English and Scotch Ballads," edited by F. J. Child, a new edition, revised by the Editor; "The Handy-Book of Patent and Copyright Law," by James Fraser; "The Babes in the Wood," illustrated by Lady Waterford, coloured in *fac simile* of the original drawings; "Fancy Tales," from the German, by J. S. Laurie and Otto Striedinger, illustrated; "The Boy's Own Book of Boats," by W. H. G. Kingston; and other works. Messrs. Houlston and Wright have in the press a New Work, by Professor Miller, entitled "Nephalism the True Temperance."—Mr. J. Blackwood announces "The History of a Pilgrim, with some Account of the Shrine to which he Journeyed;" "Anne," a Romance of Indian Life; and "The Christmas Tree for 1861," a Book for Young People.

Correspondence.

INTERPRETERS FOR CHINA.

(To the Editor of *The London and China Telegraph*.)

SIR,—A few weeks since you called attention to the difficulties under which not only European commerce, but the public service, civil and military, laboured from the lack of efficient interpreters of the Chinese language. You also inserted a letter signed *Linguist*. Recent events have greatly enhanced the importance of this question, and it is to be hoped that the Government are seriously considering it, with the view of promoting facilities for the cultivation of the Chinese tongue in this country, and thus founding a nursery for accomplished interpreters in the "flowery land." In an article the other day in *The Times* on Capt. Sherard Osborne's work, it was stated that a Frenchman was the first European who had acquired in Europe a facility for writing and speaking the Chinese language with accuracy. Among the passengers who sailed for Hong Kong from Southampton on the 12th inst., in the extra overland steamer, the *Indus*, was a young English gentleman named Frederick Major, nephew of D. B. Major, Esq., of Streatham, who, I believe, is the first Englishman who has acquired in England such a thorough mastery of the Chinese language in the Mandarin dialect as to be able to speak it fluently, and also read and write it. Young Major had the advantage of being instructed by a learned Chinese pundit, resident in this country, whose qualifications may be judged of by the fact, that in a scholarly competitive examination in Peking he carried off the prize from 80,000 candidates. I am not aware whether Mr. Major has decided on applying his lingual accomplishment in connection with a commercial establishment in China, or purposes offering his services as a professional interpreter. His brother, who is also an excellent Chinese scholar, will follow by an early mail.

Yours, &c.,

LINGUIST.

Naval and Military.

The reinforcement of about 100 of the Military Train, which were engaged to go forward by the *Sultana* to Hong Kong, have been countermanded. The vessel has sailed with about 700 tons of war materials and stores.

We believe, says the *Army and Navy Gazette*, that the earliest opportunity will be taken of advancing Lieutenant Rogers, 44th Regiment, and Lieutenant Burslem, 60th Regiment, to the rank of Captain, and Ensign Chaplain to that of Lieutenant, for the gallant conduct exhibited by these officers in the attack on the Taku Forts. Although they have been recommended for the Victoria Cross, we understand that the formal recommendation which must precede its bestowal has not yet been received in England.

Captain James J. McCleverty, C.B. (1848), now in command of the *Cambrian* frigate on the China station, has been appointed to receive the Captain's Good Service Pension, vacant by the promotion of Captain Massie.

The Board of Admiralty having decided on effecting several important improvements at Chatham dockyard, and making considerable additions to that establishment, application will be made to Parliament early in the ensuing Session for powers to make the extensions and improvements contemplated. The chief improvements intended include the taking in of a considerable portion of land on the eastern side of the dockyard and St. Mary's island, the whole of which will be embanked, and the extensive area thus gained converted into docks and basins for the reception of the steam reserve.

The crews of Her Majesty's ships on the home station have started a subscription, which is to extend throughout the navy, for the purpose of erecting a monument to the memory of the late Admiral Sir C. Napier.

Inquiries have been renewed into the condition of the naval cadets on board the *Britannia* training ship at Portsmouth, and also of those who have been admitted into Haslar Hospital. Two deaths have taken place, one from measles, and the other (Mr. Kirwan, son of the Dean of Limerick) from fever. Twenty-two cadets remain in Haslar Hospital, 18 of whom are, or have been, suffering from measles, and the remaining four from low fever.

The screw steam-sloop *Petrel*, 11, christened by Miss Jane Alice Brown, daughter of the Master Attendant, was launched on the 17th inst. from the Devonport Dockyard.

A number of Major Rhode's patent picketing screws, which are eminently adapted for an extemporary encampment, or roadside bivouac of cavalry, have been received at Woolwich for experimental trials, by order of Sir Richard Airey, Quartermaster-General. The screws are for the purpose of tethering horses. This system is two-thirds lighter, and about an eighth cheaper, than the new French system of picketing horses adopted only last year, the weight of which, giving accommodation for 15 horses, is about 125lb., and the cost from 24s. to 28s.; whereas 15 of Major Rhode's heaviest tethering screws, with connecting lines attached, weigh only 37½lb., and cost from 18s. to 20s. only. The first trial is expected to take place on Monday next.

The following promotions in the higher ranks of the army will take place consequent upon the death of General Lygon:—Lieut. General Sir F. Cockburn, Colonel of the 95th, to be General; Major General Sir John Pennecfather, commanding at Aldershot, to be Lieutenant General; Colonel J. F. G. Campbell, C.B., to be Major General. The Senior Colonel is now Lord Frederick Paulet, C.B., Coldstream Guards.

Lieut. Colonel J. Travers, Royal Artillery, has left Woolwich to assume the command of the 5th battery, 13th brigade, stationed at Aden.

The colonelcy of the 13th Light Dragoons, vacant by the death of General the Hon. R. P. Lygon, is not likely to be filled up for some days; but we (*Army and Navy Gazette*) have reason to anticipate it will be conferred on Major General Sir James Hope Grant, G.C.B., a selection the propriety of which both the army and the public will cordially ratify.

The compasses of His Netherlands Majesty's screw steam-sloop *Reteh*, 8, Captain De Kock, at Plymouth, on her way to Batavia, require to be adjusted. The officers of the ship, accompanied by Mr. William Luscombe, Consul for the Netherlands, paid a visit to Port-Admiral Sir Houston Stewart, K.C.B., at Mount Wise, Devonport.

It appears to be generally understood that Rear-Admiral Sir Stephen Lushington, in command of the squadron on the south-east coast of America, whose time expires on the 30th of January next, will be succeeded by Rear-Admiral the Hon. Henry Keppel, at present in command of the Cape of Good Hope.

In consequence of the strength of the Royal Marine Artillery having been very much reduced, volunteering has been opened at each of the divisions of Royal Marine Light Infantry, and a number of volunteers have been thus obtained. On the 14th inst., the names of 50 men who had volunteered from the Chatham division were forwarded to the Deputy Adjutant-General for approval, and 17 of the number having been selected, the men left Chatham and proceeded to Portsmouth to join headquarters.

The right wing of the Royal Artillery depot at Woolwich, mustering about 900 men, assembled on parade on the 14th inst., in command of Col. Kennedy, for the purpose of selecting a sufficient number of gunners to be transferred to the new battery, in command of Major G. Davies, V.C., intended to replace Captain Mercer's battery, under orders for New Zealand. The staff and drivers have already been appointed, and accordingly the new battery is now nearly complete.

Lieut. Col. Middleton, C.B., has embarked for the Mauritius to assume the command of the Royal Artillery at that station, in the room of Col. Cockburn, who will return to England. Lieut. H. M. Moorsom is transferred from No. 6 battery, 12th brigade, to No. 1 battery, 4th brigade. Lieut. J. H. Wilmer, of the 11th brigade, is raised to increased pay therein, vice Trill, deceased.

The screw steamship *St. George*, 91, Capt. the Hon. F. Egerton, it is said, will go to Queenstown, and it is also said that her armament will be increased preparatory for the reception of his Royal Highness Prince Alfred as midshipman.

We (*United Service Gazette*) have great pleasure in announcing that Admiral Sir Graham Eden Hammond, G.C.B., has been nominated Rear-Admiral of England, vice the Earl of Dundonald, G.C.B., deceased. Sir Graham is, perhaps, the most distinguished of the old war officers, having served in Lord Howe's flag ship, the *Queen Charlotte*, on the glorious 1st of June; and having commanded the *Blanche* frigate under Lord Nelson at Copenhagen in 1801, exclusive of having performed a number of gallant services during the war.

The flag officer's good service pension vacant by the death of Admiral Sir Charles Napier, K.C.B., has been conferred on Admiral John Ayscough.

A captain's good service pension is placed at the disposal of the First Lord of the Admiralty by the promotion of Captain Thomas Leeke Massie to the rank of Rear-Admiral.

A telegram from Lisbon reports the loss of her Majesty's troop-ship *Perseverance*, which calamity took place off Cape Verdes. All the troops and crew were saved.

The officers, non-commissioned officers and men, amounting to about two hundred and forty, comprising Captain H. Mercer's 3rd battery, 4th brigade of Royal Artillery, have embarked on board the troop ship *Norwood* for New Zealand.

The *Euryalus* is to be fitted with a poop on the same plan as the *Forte*, and is expected to be commissioned for the flagship on the Pacific or China station.

On the delayed Indian Prize Money, *The Times* says:—The men who in 1857 saved the British dominions in the East are still waiting for the money which has rightfully belonged to them for the last three years. It will hardly be believed that the Delhi and Lucknow prize-money is not yet distributed, and that the complaints of the men and the remonstrances of highly-placed officers are treated with equal neglect. By the end of 1857 India had been saved, although not a regiment from England had arrived at the scene of war. By the end of 1858 the last sparks of the mutiny had been trodden out, and on New Year's-day, 1859, a proclamation declared that tranquillity had been restored. We are now nearly two years from this last event, and yet not a rupee have the brave men received who fought through this incredible campaign. Promises and excuses are all that they can get. They may think themselves fortunate if the answer to any inquiry be not tart or contemptuous. We feel it is only necessary to direct attention to this subject to receive, not, indeed, satisfaction, but a whole mass of self-justifications. Were Parliament sitting, we could easily anticipate the answer to any independent member. The Secretary of State for India would demonstrate that he had given the matter his fullest attention, and that every one else connected with the department had been equally solicitous.

GRANT FOR THE NAVAL FORCES ON THE CHINA STATION.

The Accountant-General of the Navy gives notice in this *Gazette* that preparations are now being made for the intended distribution of the sum of £33,000 voted by Parliament for the naval forces employed on the China Station, between the 1st of October, 1856, and the 26th of June, 1858, which will be distributed upon the principle of granting to each person so employed one month's additional pay of 30 days, according to their respective ratings on the last day of their service on that station, within the above-mentioned period. The names of her Majesty's ships entitled to participate are as follows:—

Acorn	Elk	Nimrod
Amethyst	Esq	Opossum
Acteon, with	Fury	Pique
Dove, gunboat	Forester	Plover
Algerine	Furious	Princess Charlotte
Assistance	Firm	Racehorse
Adventure	Hornet	Sybilie
Bustard	Highflyer	Sampson
Banterer	Haughty	Starling
Belleisle	Hesper	Staunch
Barracouta	Inflexible	Sans Pareil
Comus	Janus	Slaney
Calcutta	Kestrel	Spartan
Camilla	Leven	Surprise
Cruiser	Lee	Tribune
Cormorant	Minden	Volcano
Clown	Melville	Woodcock
Drake	Nankin	Watchful
Encounter	Niger	

CHANGES AND PROMOTIONS IN HER MAJESTY'S ARMY AND NAVY.

WAR-OFFICE, PALL-MALL.

7th Regiment of Dragoon Guards—Capt. Jacob Camac Murphy, from 3rd Light Dragoons, to be capt., vice James Vance Cleland, who exchanges; Lieut. Robert Bury, from 9th Light Dragoons, to be lieut., vice Robert Stewart Cleland, who exchanges; Samuel James Dakin, gent., to be cornet, by purchase, vice Wright, promoted in the 2nd Dragoon Guards.

Arthur Warry.	Frederick Wm. Nind.
Charles Kirkwood.	Frederick Wm. Carey.
John Andrew Kelso.	Francis Harry Emilius Day.
John Edward Toller.	Wm. Henry Moore Duthie.
Henry Knollys.	Price Lewes.
William Alexander Day.	Allan Henry Maclean.
Spencer Gardiner.	Gerald Charles Hall Parfby.
Henry Robert Yates Browne.	Allan Bedford Davies.
Edw. George Boughton Gattey.	Edward Woolcombe.
John Tyndale Greenfield.	

Royal Engineers.

Gentlemen cadets to be lieutenants with temporary rank.

Percy Rix Barber.	Archibald Henry Kildahl.
Thomas Glancy.	Albert Charles Smith.
Arthur Clitherow Ward.	

Royal Artillery—Second Captain A. T. G. Pearse to be adjutant, vice Ravenhill, who resigns the adjutancy only.

Military Train—Lieut. F. Roberts, from the 92nd Foot, to be lieut., vice J. Malley, who exchanges.

Corps of Royal Engineers—Lieut.-General William Cuthbert Ward to be colonel commandant, vice Gen. Thackeray, C.B., deceased.

1st Regiment of Foot—Ensign R. Cozens to be lieut., by purchase, vice Jones, promoted in the 2nd West India Regiment.

2nd Foot—Lieut. H. P. Philipps to be captain, by purchase, vice R. C. W. Stuart, who retires; Lieut. John Croome to be captain, without purchase, vice William Webber Martin, deceased; Ensign Claude Scott Stuart Pinkerton, to be lieut., without purchase, vice Croome.

4th Foot—Assist.-Surg. Arthur Charles Gaye, from the Staff, to be assist.-surg., vice John Lowe Erskine, M.D., appointed to the Staff.

5th Foot—Lieut. W. Fagan to be captain, by purchase, vice R. A. Law, who retires; Ensign W. T. Freeman to be lieutenant, by purchase, vice Fagan.

7th Foot—Ensign V. U. Langworthy to be lieut., without purchase, vice F. J. Foster, deceased; Sergeant-Major J. S. Smith to be ensign, without purchase, vice Langworthy.

8th Foot—Ensign Jeremy Peyton Jones to be lieut., by purchase, vice Robert Yallop Stokes, who retires.

9th Foot—Lieut. William Augustus Elmhirst to be capt., by purchase, vice William Henry Peel, who retires; Ensign Nathaniel Forts to be lieut., by purchase, vice Elmhirst.

10th Foot—Lieut. R. T. F. Stammers to be captain, without purchase, vice J. M. Smyth, who retires; Ensign J. L. Kelly to be lieutenant, by purchase, vice Stammers.

11th Foot—Ensign Vyvyan Williams to be lieut., by purchase, vice Stuart James Shortt, who retires.

13th Foot—Ensign Richard Hare Home to be lieut., by purchase, vice Bond, promoted to an unattached company, by purchase.

14th Foot—Ensign Henry Swanson, from 40th foot, to be ensign, vice Butler, promoted.

15th Foot—Lieut. Richard Lewes Dashwood to be capt., by purchase, vice Augustus Frederick Warburton, who retires; Ensign George Onslow Churchill to be lieut., by purchase, vice Dashwood.

16th Foot—Lieut. W. H. Carter to be captain, without purchase, vice A. Carey, deceased; Ensign A. E. Stabb to be adjutant, vice Lieut. Carter promoted.

20th Foot—Capt. and Brevet Major T. C. Lyons to be major, without purchase, vice Brevet Lieut. Colonel A. Campbell, who retires upon full pay; Lieut. the Hon. A. E. P. Vereker to be captain, without purchase, vice Brevet Major Lyons.

22nd Foot—Capt. Edward Simeon Webber Smith to be major, without purchase, vice Henry Draper Neville, deceased; Capt. James John Dudgeon, from 80th foot, to be captain, vice Charles Tucker, who exchanges; Lieut. Robert Conway Dobbs Ellis to be captain, without purchase, vice Smith.

23rd Foot—Capt. Charles Hewett, from half-pay unattached, to be captain, vice Brevet Lieut.-Col. Charles Spalding S. Evans Gordon, promoted, without purchase, to an unattached majority.

25th Foot—Capt. Thomas Edwin Blomfield to be major, by purchase, vice Mawditt Gausson Best, who retires; Lieut. Horatio Bland to be captain, by purchase, vice Blomfield; Ensign Alexander Bain Cisholm to be lieutenant, by purchase, vice Bland.

30th Foot—Lieut. Charles James Palmer Clarkson to be captain, by purchase, vice Edward Newstead Falkner, who retires; Ensign Henry Horace Eden to be lieutenant, by purchase, vice Clarkson.

31st Foot—Lieut. Frederick Young Cassidy to be captain, without purchase, vice Alexander Edgar McGregor, deceased; Ensign William Edward Tibbets to be lieutenant, without purchase, vice Cassidy.

36th Foot—Assistant Surgeon St. John Killery, from the Staff, to be assistant surgeon, vice Tobin, who exchanges.

61st Foot—Major and Brevet Lieut.-Col. H. G. Rainey to be lieutenant-colonel, by purchase, vice Brevet Col. W. Jones, C.B., who retires on half-pay; Captain and Brevet Major A. W. Gordon to be major, by purchase, vice Brevet Lieut. Col. Rainey; Lieut. H. J. Yonge to be captain, by purchase, vice Brevet Major Gordon; Ensign C. H. Atkinson to be lieutenant, by purchase, vice Yonge.

63rd Foot—Major W. F. Carter to be lieutenant-colonel, by purchase, vice T. Harries, who retires; Captain and Brevet Major C. Le Mesurier Carey to be major, by purchase, vice Carter; Lieut. S. Moore to be captain, by purchase, vice Brevet Major Carey; Ensign J. S. Smyth to be lieutenant, by purchase, vice Moore.

64th Foot—Ensign F. E. Wilson to be lieutenant, by purchase, vice H. Davies, who retires.

69th Foot—Ensign James Blakie Keith from the 60th Foot, to be ensign, vice Brace, promoted in the Military Train.

70th Foot—Ensign Charles Hamilton Prior, to be lieutenant, without purchase, vice Charles William Quin, deceased.

76th Foot—George Douglas Cookson, gent., to be ensign, by purchase, vice Pusey, promoted.

80th Foot—Captain Charles Tucker, from 22nd Foot, to be captain, vice James John Dudgeon, who exchanges.

82nd Foot—Major and Brevet Lieutenant-Colonel D. Watson to be lieutenant, by purchase, vice Brevet-Colonel the Hon. P. E. Herbert, C.B., who retires upon half-pay; Captain and Brevet Major H. C. Marriott, to be major, by purchase, vice Brevet Lieutenant-Colonel Watson; Lieutenant J. S. Hand to be captain, by purchase, vice Brevet Major Marriott; Ensign J. Johnston to be lieutenant, by purchase, vice Hand.

88th Foot—Captain Shurlock Henning to be major, by purchase, vice Brevet Lieutenant-Colonel Edmund Gilling Maynard, who retires; Lieutenant Edward Hopton to be captain, by purchase, vice Henning; Ensign Arthur Allen Owen to be lieutenant, by purchase, vice Hopton.

92nd Foot—Lieutenant J. Malley, from the Military Train, to be lieutenant, vice F. Roberts, who exchanges.

95th Foot—Ensign Robert Anderson to be lieutenant, by purchase, vice Knipe, whose promotion by purchase on the 22nd of June has been cancelled; Assistant-Surgeon Arthur Herbert Orpen, from the staff, to be assistant-surgeon, vice John Clarke, M.D., appointed to the staff.

97th Foot—Major F. A. Walter, from the 53rd Foot, to be Major, vice A. R. Harenc, who exchanges.

100th Foot—Staff Surgeon J. S. Chartres to be surgeon, vice Barrett, placed upon half-pay.

2nd West India Regiment—Major T. H. Smith to be lieutenant-colonel, by purchase, vice T. Gibbings, who retires; Major P. J. Macdonald, from half-pay unattached, vice J. O. Bovill, who exchanges; Captain W. Hill to be major, by purchase, vice Smith; Lieutenant H. J. Wise, to be captain, without purchase, vice J. L. Byrne, deceased; Lieutenant A. T. Jones, from the 1st Foot, to be captain, by purchase, vice Hill; Ensign F. L. Mathews to be lieutenant without purchase, vice Wise; Ensign H. Lowry to be lieutenant, without purchase, vice M. J. Macnamara, deceased; A. Roger, gent., to be ensign, without purchase, vice Mathews; F. A. Browne, gent., to be ensign, without purchase, vice Lowry; Ensign Sidney Watkin Williams to be lieutenant, without purchase, vice Charles Bury Cradock, deceased; George Hibbert Anchitel Kinloch, gent., to be ensign, without purchase, vice Williams; Assistant-Surgeon Edward Joseph Boulton, from the staff, to be assistant-surgeon, vice Charles Bagot, M.B., deceased.

3rd West India Regiment—Captain F. G. N. Clarke to be major, by purchase, vice W. B. Robinson, who retires; Lieutenant H. C. De la Poer Beresford to be captain, by purchase, vice Clarke.

Royal Canadian Rifle Regiment—Albert William Money, gent., to be ensign, by purchase, vice Wilford, promoted.

Rifle Brigade—Ensign Lucius F. B. Carey to be lieutenant, by purchase, vice George Augustus Curzon, who retires; Assistant-Surgeon James T. Tulloch, M.D., from the staff, to be assistant-surgeon, vice David Cullen, M.D., appointed to the 17th Light Dragoons.

UNATTACHED.—Ensign Colin Macdonald, half-pay 50th Foot, Town Major at Montreal, to be lieutenant, without purchase.

MEDICAL DEPARTMENT.—Assistant-Surgeon John Low Erskine, M.D., from the 4th Foot, to be staff assistant-surgeon, vice Arthur Herbert Orpen, appointed to the 95th Foot; Assistant-Surgeon Johnston Ferguson, from the 50th Foot, to be staff assistant-surgeon, vice Edward Joseph Boulton, appointed to the 2nd West India Regiment; Assistant-Surgeon Yorke Hobart Johnson, from the 17th Light Dragoons, to be staff assistant-surgeon, vice Arthur Charles Gaye, appointed to the 4th Foot; Assistant-Surgeon John Clarke, M.D., from the 95th Foot, to be staff assistant-surgeon, vice James Tulloch Tulloch, appointed to the Rifle Brigade; Staff Assistant-Surgeon J. J. Scott, to be staff surgeon, vice Knox, placed upon half-pay; Assistant-Surgeon J. R. Tobin, from the 36th Foot, to be staff assistant-surgeon, vice Killery, who exchanges.

STAFF.—Lieut.-Col. and Brevet-Col. the Hon. Percy Egerton Herbert, C.B., from the 82nd Foot, to be deputy-quartermaster general at head-quarters, vice Lieut.-Col. and Brevet-Col. the Hon. Alexander

Gordon, C.B., half-pay unattached, whose period of service in that appointment has expired.

COMMANDERS.—Lieutenant Alexander Phillips, of the *Ariadne*, to be commander; W. H. Edey to the *Hero*, vice Sterling, promoted.

LIEUTENANTS.—William Parsons and Francis S. D. Broughton.

APPOINTMENTS.

CAPTAINS.—George Hancock to the *Immortalité*; E. P. B. Von Donnop to the *Jason*.

COMMANDER.—N. B. Bedingfield to the *Prometheus*, vice Skipwith, *invalided*.

LIEUTENANTS.—A. T. Denham to the *Jason*; A. C. Dupuis, R. Wells, H. Austin, and E. Poulden, to the *Immortalité*; H. T. Boyer to the *Algiers*; R. S. Hunt (additional) for disposal, and J. T. Swann, to the *Harrier*; S. R. Huntley to the *Arrogant* (additional) for disposal; Edward L. Green and H. Eden to the *Bacchantie* (additional) for disposal; Richard Onslow and A. B. Wodehouse to the *Marlborough* (additional) for disposal; George B. Evans to the *Nile* (additional) for disposal; John G. F. Leacock to the *Chesapeake* (additional) for disposal; R. Hoops to the *Illustrious*, for service of the ordinary; the Hon. W. Chetwynd to the *Ariadne*; T. W. Simeon to the *Miranda* (additional) for disposal.

PAYMASTERS.—H. Gray (A), (additional), and H. G. Barlow (additional), to the *Formidable*; George Jeffery and E. Harris (additional), to the *Indus*; G. W. Anderson, to the *Immortalité*; R. W. Warwick to the *Jason*; A. Barrow, to the *Barracoute*; J. Retallack, to the *Meander* (additional), for service on shore.

ASSISTANT-SURGEONS.—F. F. Flynn, to the *Argus*; A. H. Kelly to the *Hibernia*, as hospital ship at Malta.

SECOND MASTER.—J. E. Price to the *Nile*.

MASTERS.—H. W. Inglis to the *Gorgon*; F. Townsend to the *Icarus*; C. G. Johnstone to the *Immortalité*; J. Waye to the *Jason*; W. H. Fawcner, to the *Mersey*.

STAFF-SURGEON.—John Sloan, M.D., to the Royal Adelaide, depot ship at Devonport.

SURGEONS.—William Davis, M.D., M.A., to the *Immortalité*; George B. Hill to the *Jason*; John Johnson, M.D. (c.), to the *Sanspareil*.

ACTING ASSISTANT-SURGEONS.—T. W. Orwin to the *Doris*; H. H. J. Sterling to the *Hibernia*; C. C. Mitchinson (additional) to the *Victory*; R. E. Fisher (additional) to the *Impregnable*; J. Rodgers (additional) to the *Nile*; William Carmichael, M.D., to the *Immortalité*; Charles C. Mitchinson to the *Jason*.

MASTER'S ASSISTANTS.—W. J. Taylor to the *Radamanthus*; John E. Pelley to the *Immortalité*; Allen C. Denny to the *Jason*.

ASSISTANT-PAYMASTERS.—T. O. Joynson (in charge) to the *Caradoc*; Thomas Backhouse to the *Immortalité*; Melville Maxwell to the *Impregnable*, as supernumerary.

SECRETARY'S CLERK.—Assistant Paymaster, James N. Robinson. to be *Impregnable*.

CHIEF ENGINEERS.—Francis Pearce from the *Cressy*, to the *Asia*, for service in the Duke of Wellington; Richard H. Cowan to the *Cressy*;

John Bonney to the *Racoon*; Thomas H. Symons to the *Jason*; Francis G. Barr to the *Immortalité*; E. J. Bird, confirmed in the *Cadmus*; James Roffe to the *Asia* for the *Sutlej*; Peter Wood to the *Mersey*.

ASSISTANT ENGINEERS.—FIRST CLASS.—James Leatham to the *Racoon*; Thomas A. Simmonds to the *Gorgon*.—SECOND CLASS: Walter Ashto to the *Marlborough*; G. L. D. P. Keeling, J. Ritchie and J. Stewart to the *Jason*; W. Young to the *Pembroke*.—THIRD CLASS: J. Taylor to the *Hero*; Peter M'Allister to the *Firebrand*; J. Kay to the *Indus* for the *Procris*; D. Carmel to the *Immortalité*.

ACTING ASSISTANT-ENGINEERS.—FIRST CLASS: R. Jago to the *Indus*, h supernumerary; T. West and S. Broad to the *Cumberland*, as supernumeraries; Stephen Matthews to the *Immortalité*. SECOND CLASS: John Osborne and John Crutchley to the *Immortalité*. THIRD CLASS: John Ferguson to the *Russell*; George J. Barber, James Wootton, Joseph Tapp, to the *Jason*; William Stewart, W. Vincent, and George Sullivan to the *Cumberland*, as supernumeraries; John Reeth to the *Indus*, as supernumerary.

CHINA AND JAPAN.—A few days ago Dr. Macgowan delivered a lecture before the Birmingham Chamber of Commerce, in which, says the *Daily Post*, he contrived to lay before the members of that body a valuable and highly interesting fund of information concerning the products, manufactures, and general commercial usefulness of that immense portion of the globe, in which he has resided during so great a portion of his life. Mr. H. Van Wart presided. After speaking, at length, upon the natural productions, inventions, and manufactures of China and Japan, the lecturer said that the commercial prospects of the two countries were very uncertain. It was not enough to secure treaties; there must be a something beyond that—a community of feeling and harmony of action. There were, however, three perpetual setons that were keeping up a perpetual irritation; the first was foreign possession, the next the opium traffic, and the next extra territoriality. The first was extremely offensive to the pride of the nation, and was really a source of great difficulty, because vagabonds of all classes committed atrocities of all kinds, and then took refuge beneath the flags of the nations who held the nearest cities. The second was now almost irremediable, because the Chinese had begun to grow opium themselves, and would never cease to blame Europeans for its introduction. But the third was probably the most difficult of all; we could not submit that our subjects should be tried by the Chinese laws, and yet it was a great evil not to do so, because villages were pillaged and families violated by bands of scoundrels, who claimed to be tried by laws other than the Chinese, and placed themselves under the protection of countries whom the Chinese dared not to interfere with, lest a quarrel should arise, and war should ensue. In conclusion, the lecturer expressed an opinion that if these evils were not remedied, many other expeditions like that now in China would be necessary—not only for that country but for Japan, and suggested that the first and last of them should be put a stop to by a system of passports, to be given to our own subjects only. He also took occasion to remark that his experience showed that so far from Christian mission injuring the commercial prospects of the countries by whom they were sent out, they had a contrary effect. At the close of the lecture, which was rendered the more interesting by the fact that the lecturer invited and answered questions put by the audience, Mr. J. S. Wright moved, and Mr. S. Thornton seconded, a vote of thanks to Dr. Macgowan, which was carried by acclamation. A similar compliment was paid to the Chairman.

ADMIRAL KEPPEL AND SIR G. GREY.—The *United Service Gazette* says:—"With reference to the reports in circulation reflecting most injuriously upon Rear-Admiral Sir Henry Keppel, Commander-in-Chief on the Cape of Good Hope station, we have reason to believe that the circumstances in question have been grossly exaggerated. The Admiralty, considering the disputed facts, have done most discreetly in not acting upon an imperfect or one-sided statement, and we believe that the case will be allowed to take its regular course in a law court, when Sir Henry Keppel will have an opportunity of showing that the conduct complained of was not such as has been described, neither was it attributable solely to himself, nor to the accused lady. We have strong reasons for believing that the gallant admiral's character has been willfully maligned."

SIR JAMES BROOKE, K.C.B.—Sir James Brooke, the *Times* says, sailed on the 20th instant from Southampton, in the *Pera*, for the seat of his government at Sarawak. The numerous friends and admirers of this distinguished man, will learn with pleasure, that his health is completely re-established, and that he is enabled once more to give the benefit of his temporary presence and advice to the enterprise with which his name is identified.

BRITISH GUNBOATS IN THE CHINA WATERS.

57 Dove	78 Drake	85 Corkchafer	93 Wensel
69 Kestrel	79 Janus	86 Finn	93 Bouncer
70 Slaney	80 Havoc	87 Staunch	94 Grasshopper
71 Leven	81 Haughty	89 Watchful	95 Banterer
72 Algerine	82 Forester	90 Flamer	96 Snap
75 Clown	83 Opossum	91 Bustard	Sparrowhawk
76 Woodcock	84 Starling		

In addition to the above there are ten steam transport vessels mostly belonging to the Indian navy, and 180 chartered sailing vessels for transport purposes. The *Feroze*, which has been placed at the disposal of Lord Elgin and suite, also belongs to the Indian navy. The *P.* and *O.* str. *Graada* is under the orders of Sir Hope Grant.

MERCHANT STEAMERS IN CHINA WATERS.—Engaged in the Canton, Hong Kong, and Macao traffic.—British: *Fei Ma*, Sir J. Jeejeebhoy, Iron Prince, Mee Lee, Zingari. American: *Pak Wan*, *Willamette*, *Cumfa*, *Spark*. Portuguese: *Inveigado*, *Shamrock*.

ENGAGED IN THE COAST TRAFFIC BETWEEN SWATOW, AMOY, FOO CHOW, AND SHANGHAI.—British: *P.* & *O.*'s steamers, *Chusan*, *Formosa*, and *Rajah*; Messrs. Jardine, Matheson, & Co., *Hellespont*; Messrs. Dent and Co., *Yangtze*; Mr. Lapraik's *Udine*.

LIST OF CONSULS IN HONG KONG.

For United States.....	James Keenan.....	Consul.
— France	M. A. E. Vaucher	Vice-Consul.

2nd Clerk	250	250
Total.....	£47,860	£47,360

Monetary and Commercial.

Since the mail of the 10th instant, very important changes have taken place in the Money Market. A heavy and constant drain for gold upon the reserves of the Bank of France for the last month, caused partly by payments for corn and partly by unproductive expenditure, to which French statesmen and capitalists are committed abroad, caused large purchases to be made here at a premium upon the fixed Mint price. These operations drew gold largely from the Bank; and about the date of our last, arrangements had been concluded for withdrawing £1,000,000 in the course of three days. £600,000 had actually been withdrawn, when the Bank Directors took the unusual step of holding a special court the same evening, at which they advanced the rate of discount from $4\frac{1}{2}$ to 5 per cent. The next day the Bank of France responded, by advancing their minimum from $3\frac{1}{2}$ to $4\frac{1}{2}$ per cent.: and the following Thursday the Bank of England adopted the still more decided measure of advancing from 5 to 6 per cent., at which the rate now remains.

These measures have had the effect of arresting the drain upon the Bank of England. But the efflux from the Bank of France continuing, that establishment found itself compelled, in order to meet the demands upon it, to apply for assistance to the Bank of England. The application was for the loan of £2,000,000 gold upon the deposit of £3,000,000 silver, upon the understanding that the Bank of England should be at liberty either to sell or to retain the silver. In other words, the operation, under these conditions, amounted to a sale of so much gold to France. The transactions having only just been completed, sufficient time has not elapsed to ascertain whether it will be adequate to meet the drain by which our neighbours are inconvenienced. At present, success seems doubtful, first, because it is still necessary to import corn to supplement the deficient harvest; and next, because French capitalists, instead of restricting their foreign operations, are increasing them by the negotiations of a loan of £16,000,000 to Turkey. The price of this loan is somewhere about 53, at 6 per cent., which greatly diminishes the nominal amount, but the actual sum will have to be provided in gold, and Turkish necessities being extremely urgent, it must be provided in a comparatively short time. There is, therefore, not much prospect of a falling off in the demand for gold.

In London, the transactions with the Bank of France has greatly contributed to remove the anxieties that the gold movement had engendered. The Money Market, from being excessively tight, has become entirely relaxed; and the best bills, which a few days ago could not be done at 6 per cent., now find takers at $5\frac{1}{2}$ to $5\frac{3}{4}$ per cent. The supplies have suddenly increased, and all the leading establishments have more money than they can employ.

Consols have improved, and they now stand at $93\frac{1}{2}$ to $\frac{1}{2}$, with rather a good inquiry. Indian Rupee securities are nominally a point higher, but there is no demand, and if any amount were offered, it is improbable that the improvement would be sustained. The Banks are the principal buyers.

In consequence of large amounts of bar silver being offered from the Continent, and there being now no demand for the East, sales have to-day been effected at 61½d. per oz., including the small quantity brought by the last West Indian steamer. This establishes a decline of ½d. per lb. from the last price. Nothing is doing in Mexican dollars.

It is understood that Mr. Kirkman Daniel Hodgson, of the firm of Finlay, Hodgson, and Co., is the Bank director who will be recommended, in March next, to succeed Mr. Latham as deputy governor.

The *Para*, which left Southampton on the 20th, took out £173,157 in specie, of which £79,082, was in gold, and £94,075 in silver. There was sent in silver £19,444 to Shanghai, £10,264 to Foo-chow-Foo, and £16,484 to Hong Kong, and in gold to Singapore £540. The rest was thus distributed:—50,000 gold, on Government account, to Malta; £15,000 gold, to Alexandria; £7,000 gold, to Mauritius; £1,000 gold, to Ceylon; £5,542 gold, and £23 silver, to Madras; £27,110 silver, to Calcutta, and £20,750 gold.

RANGOON AND SINGAPORE CABLES.

The *Queen Victoria* has now completed the lading of her portion of the cable, about 400 miles, and proceeds to sea in a few days for Singapore, calling at the Cape. The usual tests have been applied to the cable, and it has been pronounced the most perfect one yet constructed.

The core is composed of seven 17-gauge copper wires, and insulated in the usual way, by means of a half-inch gutta-percha covering. This will give a weight of about two tons to the mile, the cable being seven-eighths of an inch diameter. The core is served with hemp, and the yarn is put on spirally in the opposite direction to the wire coating, for the sake of securing additional strength. The wire coating consists of 18 No. 11 iron wire for the deep sea portion of the cable, while the shore-ends are covered with 12 No. 3 iron wire, and the midway with 12 No. 5 iron wire. Messrs. Glass, Elliot & Co. have turned out, amongst others, the following cables:—Spezzia and Corsica, Corsica and Sardinia, England and Denmark, England and Hanover, Dover and Boulogne, Sicily and Malta, Algiers and Minorca, across the Gulf of St. Lawrence, part of the Atlantic Cable, the Gut of Canso, Liverpool and Holyhead, Jersey and France, Island of Gotland to Sweden, Corfu and Otranto, &c. The most, if not all of these have worked well, and it is some guarantee for the cable now under notice.

THE MALTA CABLE.

The cable intended to connect Corfu, Otranto, and Malta, left the works of Messrs. Glass, Elliot, and Co. on the 23rd inst., on board the steamer *William Cory*. The whole line will be open as soon as the Sardinian Government are fully organised at Naples and Palermo. Our Government have already received some messages during the present week, including the one from China, noticed elsewhere.

ARTICLES OF IMPORT.

TEA.—The market for the past fortnight has been very quiet. The sales of the 13th went heavily, whilst the rise in the Bank rate also had an unfavourable effect upon the general tone of the market, and prices, though not quoted lower, were in favour of buyers. During the past week the arrivals of Kaisow and Moning of new season have been freely offered, and the sales of the former description show a decline of fully 1d. per lb., and the trade buying with but little spirit. The new Monings will prove a great disappointment, if the cargo of the *North Fleet* may be taken as a fair specimen of the out-turn of the crop; they are deficient both in quality and leaf, but have found buyers to a moderate extent from 1s. 9d. to 2s. 1d. per lb., being the full relative value. Low and good common congenous have been but little inquired for, and prices are 1d. to 1½d. per lb. lower, good common being 1s. 2d. to 1s. 2½d. per lb. The fair to good flavory kinds show a decline of ½d. to 1d. per lb. and are difficult of sale. Fair to good Ho-Hows, Ning Chows and second class Monings and Wopaks have been almost without inquiry, and prices are ½d. to 1d. per lb. lower. Kaisows of fair to good quality must be quoted fully 1d. per lb. lower, whilst fine have commanded former rates. In old season good and fine Monings business has been small at lower prices. Of the new season's we have written above. The new Tayshans have not yet been sold. Good to fine Oolongs have been sold fully 1d. per lb. lower. Soucheongs remain as before—also flowery Pekoes. Common scented capers sold 1d. per lb. lower at public sale. The new season's are inquired for, and good quality readily saleable. Scented orange Pekoes are not much in request, but prices are fairly supported. Green teas show a steady improvement in demand at fully previous prices for fair to good Gunpowders and young Hysons. Common to fair Hysons are also wanted, but good and fine continue neglected.

SILK.—We have but little change to notice in the condition of this market. Business has been on a moderate scale, and quotations are about as last quoted, say:—

Yucufa	14 0	24 6			

SUGAR.—With a continued disinclination to purchase, the market has been extremely dull and inactive since our last advice; the firmness of most holders has prevented a general decline, but in the limited business done a reduction of fully 6d. per cwt. has been partially established; 5,782 bags Penang at public sale went off heavily, but a decline of 6d. to 9d. per cwt. being submitted to, about three-fourths were taken at and afterwards, viz., common and middling browns, 35s. to 36s. 6d.; good and fine, 38s. to 39s.; low to good yellow, 39s. 6d. to 42s. 6d., viz., 556 baskets, 48 bags Java, which being held firmly, barely one-third was taken at and after the sale, viz., fine brown at 41s.; low to good yellow bought in at 42s. to 44s. The sale of the Dutch Trading Company, held on the 22nd, comprised only 17,191 baskets Java, which went off at an advance of 1 guilder on the valuations.

COFFEE.—The Colonial market has had a steadier appearance. Plantation Ceylon has been in fair request, and besides 176 casks, and 251 barrels and bags at public sale, 300 casks have been sold privately at a slight improvement on last week's rates; low middling and middling, 69s. to 72s. Native also has been rather more inquired for, and small sales have been concluded at somewhat better prices.

RICE.—The business has been very limited, say about 10,000 bags, mostly common old Rangoon and Moulmein, at 10s. 1½d. to 10s. 6d.; at auction, 10,964 bags Java met few offers, and only about 2,000 bags have been taken at and since, low middling and middling white, 13s. to 14s.; bold, 16s.; the rest being withdrawn at from 14s. to 16s. 6d.; 3,630 bags Nakrenzie and 838 bags Moulmein (damaged) were mostly realised at 9s. 6d. to 11s.

PEPPER.—A dull tone exists in the market; of 4,062 bags Singapore Black, in public sale, about half found buyers, fair quality 4d.; common and a large portion good first and second-class sea-damaged at 3½d. to 4d. White is also rather cheaper, and of 537 bags Singapore only 100 bags were sold, middling 6d.; fair 6½d. to 6½d.

SAGO.—Only a small proportion of 1,808 boxes, at auction, has been sold, common medium pearl, 17s.; fair bright medium, 18s.

Sales of FLOUR have been made at 18s., at auction, to the extent of about 500 bags.

SPICES.—Cinnamon market dull, quotations 1s. 6d. to 2s. 2d. for first quality, 1s. 2d. to 1s. 8d. for second. Cassia Lignea: The demand is checked; of 812 boxes, at auction, very little more than one-fourth sold at 87s. to 96s. per cwt. for 3rd to 1st pile. Cassia Buds: Market firm and

scarce. Cloves: Zanzibarare ½d. to 1½d. per lb. dearer, and good business has been done privately at 3½d. to 4½d. per lb.; 60 bags, at auction, retired; but 12 cases Penang sold under the hammer, at 1s. to 1s. 4d. Mace: 69 cases of Penang sold, at auction, at 1s. 1d. to 1s. 5d. for good red, and 9d. to 1s. for common. Nutmegs have declined fully 1d.; 229 cases Penang and 12 cases Singapore brought to auction, and three-fourths sold at 2s. 11d. to 4s. 2d. per lb. for good to very fine bold, and 1s. 1d. to 2s. 3d. ordinary small to very good medium.

HEMP.—Of 1,747 bales offered at auction, about one-third found buyers, at £24. 15s. to £26 per ton for fair to good roping, being full prices.

COTTON.—Market more quiet, and sales have been at lower rates; quotations 3d to 5½d. for Surat.

JAPAN WAX.—359 cases were sold on the 15th, Block 61s. to 62s. Saucer 65s. 6d. to 66s. 6d., and on the 16th 498 boxes were partly sold at Block 62s., Saucer 64s. to 66s.

TOBACCO.—No change in this market.

TIN.—Market steady, and sales at quotations for arrival, and on the spot, Banca at 134s. to 135s., and Straits 130s. to 131s., Antimony Ore

MISCELLANEOUS.—India-rubber: Depression in this market continues; sales of a few tons at 1s. 10d. to 1s. 11d. Camphor: rates have advanced from £6 12s. 6d. to £8 15s., at which rate large clearances are now being effected. Sapanwood: market dull, 14 tons Siam sold at £6 17s. 6d., and 9 tons of Manila at £9 10s. Soy: quiet, 93 hhds. China offered at auction, and a few sold at 4s. 2d. per gal.; and of 1,132 tubs Japan, half sold at 1s. per gal., being much out of condition. Rhubarb: transactions small, at previous quotations. Mother-of-pearl shells: market firm at 125s. to 140s. for Singapore, and 105s. to 125s. for Manila. Star annealed: small sales at 75s. to 80s. Sticlac: 41 cases Siam sold at auction at 87s. 6d. to 90s. Gum Benjamin: sales at £6 10s. to £6 15s. Gamboge: nominal, at £7 to £8 for pure, 18 cases at auction retired. Gambier: sales at auction of 2,373 bales at 17s. to 17s. 6d. Cutch: 1,400 bags sold at 25s. to 25s. 6d. Rattans: sales of 2,558 bales of Penang, and 1,027 of Akyab, at 3s. 1d. to 3s. 11d. per cwt. Elephants' teeth: no sales reported. Vermillion: nominal, at 3s. to 3s. 1d. Galangal root: nominal, at 25s. to 28s. Cubebs: sales at auction retired, quotation £10 10s. to £11. Dragons' blood: in reeds £10 to £13, no sales. Galls: firm, with inquiry for good blue. 1,007 packages Japan sold at auction at 54s. 6d. per cwt. for fine sifted; 46s. to 50s. good unsifted; and 22s. to 33s. siftings and broken pieces; prices being irregular, and 3s. to 5s. lower. Rum: No transactions of any note.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 7s. 6d. to £6. 12s. 6d.; nail rods, £6. 15s. to £8.; hoops, £9 to £9. 10s.; sheets, single, £9. 10s. to £10; Staffordshire bars, £8 to £8. 10s.; rails, £5. 10s. to £7.

STEEL.—Swedish keg, £18. 10s. to £19. 10s.

COPPER.—Sheet and sheathing, 11½d.; yellow metal, 9½d.

TIN.—136s. for block; 137s. for bar. Tin plates, best charcoal, 1 C., 31s. to 32s. per box.

LEAD.—English pig, £21. 5s. to £21. 10s.; shot, patent, £25; sheet, £22. 2s. to £22. 5s.; spelter, £20 to £20. 5s.; zinc, English sheet, £26; quicksilver, £7 per bottle.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from England during the present year by the P. and O. Company's mail steamers:—

	Gold.	Silver.
Shanghai	—	£1,405,008
Foo-Chow-Foo	—	46,745
Hong Kong	£40,846	2,169,240

Silver in Bars	—	—	0 5 1½
Mexican Dollars	—	—	0 5 2½
Carolin Dollars	—	—	0 6 2

MANCHESTER MARKETS.

The market was very inanimate and depressed at the commencement of the week, and cloths were 3d. to 4½d. per piece down. Yarns were ½d. per lb. cheaper. Some rather better accounts are said to have been received from Calcutta, and there has been more demand for 40-inch shirtings of 7lb. and 8½lb. weight. Some business has also been done in water twist and mock water. Sellers are firmer in their resistance to the low prices lately offering.

From MANILA.—At London: Carausius, Amoor, Menam. At Liverpool: Idas, Monsoon, Matilda. At Cork: Cassa, Britannia.

From PENANG.—At London: Rob Roy, Jalawar, Germania, Three Bells, Toronto.

From BATAVIA.—At London: William Simpson. At outports: Chili, Cecrops, Eberhard, Adolph. At Falmouth: General Jacobi, Koning Willem III.

FREIGHTS AND CHARTERS.

For Australia there is rather more inquiry for handy vessels at £8. 15s. to £4. 5s. per register ton N.N.M. For Ca'cutta 37s. 6d. on dead weight capacity, Bombay 37s. 6d. to 40s., Hong Kong, 75s. per register ton, Shanghai, 80s., are the highest rates obtainable. For coals to India tonnage offers sparingly, but rates do not improve, the contractors being tolerably well supplied. Bombay, £40, Galle, £40 to £42, Calcutta, £43. Andamans, £33, &c., are the current rates; and for Shanghai, in anticipation of a new contract, £38 to £70 is demanded.

Rates of freight current for vessels on the berth have advanced to for Shanghai, 50s. to 60s.; to Hong Kong, 50s. to 55s.; to Singapore, 35s. to 45s., weight or measurement; to Manila, 40s. to 45s.; to Batavia, 40s. to 50s.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s.; Shanghai, 50s. to 60s.; Singapore, 30s. to 45s.; Batavia, 30s. to 40s.; Manila, 50s. to 60s.; nominal quotations for Yedo, 70s. to 80s.

At Hamburg, for Batavia and Singapore, 50s., China and Manila, 60s.

CASUALTIES.

MAURITIUS, Oct. 6.—The Louis Cezard, Thomas, from Bordeaux to Batavia, which put in here Sept. 19, leaky (making twenty inches water per hour); the Jan Van Brakel (Dutch barque), Verhey, from Batavia to Rotterdam, which put in here Sept. 24, leaky, and the James Lemon (barque), Macaulay, from London to China, which put in here Sept. 26, also leaky, are all discharging.

The Cervantes, Aguirre, which arrived at Liverpool Nov. 16, from Manila, in towing up the river came in contact with a ship, and lost fore-topmast, jibboom, fore and main-yards, &c.

The Excelsior, Faithful, from London to Shanghai, put into Sydney, N. S. W., Sept. 17, much strained and leaky. She would have to discharge, be caulked throughout, and her cargo restored.

The Macao (Dutch barque), Sunderland to Singapore, was spoken Oct. 7, 3 N., 20 W., with decks swept and loss of all boats, in lat. 40.

The America, Krause, from Newcastle to Hong Kong, put into Portsmouth Nov. 21, with loss of sails, and making five inches water per hour; she has been surveyed, and ordered to be lightened for further inspection.

The Robin Hood, Cobb, which arrived at London on Nov. 19, from Foo-chow-Foo, reports that on Aug. 13 she struck on a coral reef in the Koti Passage, Brian Island, bearing S. by W. westerly, Paujung Island S. W. by W. W., and the centre of Servia on Flat Island W. N. W., but got off on the flood tide, after throwing a quantity of the cargo overboard, with damage to false keel, and copper badly torn.

The Clio, Wynmalen, from the Texel for Batavia, put back Nov. 20, with loss of topgallant mast, jibboom, and other damage.

The Rocket (Am.), from Penang, which arrived at Boston Nov. 6, had thrown about 30 tons of gambier and some tea overboard during a severe gale at East, Aug. 26, in lat. 35 S., long. 27 E., in which she sprung a leak.

At MAURITIUS, Sept. 11, Lyeemoon (S.S.), Hill, from London and Cape of Good Hope, and sailed 15th for Singapore.

At ST. HELENA.—Oct. 9, Wassenaar, Hofstec, from Sourabaya, and sailed 10th for Amsterdam; 11th, Cornelia, Henderson, from Whampoa.

The steamer Rainbow, which left Glasgow for Singapore last August, is intended for the use of the Sarawak Government. The steamer City of Nantes is intended to trade between Bankok and Singapore, and is now on her passage with a cargo for the former port, despatched by Messrs. Smith and Simpson, of this City.

Family Pedigrees, with original grant of Arms, to whom and when granted, the origin of the name, all traced from authentic records, fee Two Guineas. An Index, containing the Names of nearly all persons entitled to use Arms, as extracted from the British Museum, Tower of London, Herald's College, &c. &c. The Manual of Heraldry, 400 Engravings, 3s. 6d. post free, by T. CULLETON, Genealogist, Lecturer on Heraldry at the Mechanical Institute, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C. The Heraldic Colours for Servants' Liveries, 5s.

STAMP YOUR OWN PAPER—With Arms,

Crest, Initials, or Name and Address, by means of CULLETON'S PATENT EMBOSSEING PRESS, 15s. Best Make 21s. Any person can use them.—T. CULLETON, Die Sinker to the Board of Trade, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

WEDDING CARDS—For Lady & Gentle-

man—5s. each. 50 Embossed Envelopes, with Maiden Name printed inside, 13s. Visiting Cards—A Copper Plate engraved in any style, with name and 50 Cards, printed for 2s., post free. N.B.—All orders executed by return of post, for stamps or cash. T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

FAMILY ARMS, &c., Embazoned for Paint-

ing on Carriages or Needlework, 6s.; Best Style, 12s., Gothic and Modern Monograms Designed, 6s. Arms Quartered, Impaled, and Painted on Vellum, according to the laws of Heraldry. By T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

ARMS, CRESTS, &c., Engraved in the Best

Style. Crest on Seals or Rings, 7s. On Steel Die, 6s. Initials, 1s. 6d. per Letter. Book Plate, Engraved with Arms, 10s.; or Crest, 5s. Postage and Registered Letters 1s. extra.—T. CULLETON, Heraldic Engraver by Appointment to the Queen, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

SOLID GOLD RING (18 Carat, Hall

Marked). Engraved with Crest, 42s.; Large Size, for Arms, 75s. On receipt of P. O. order the size will be sent to select from.—T. CULLETON, Seal Engraver, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

THE PEN SUPERSEDED.—Mark your

Linen. The best and only method of Marking Linen, Silk, Stockings, Coarse Towels, or Books, so as to prevent the Ink washing out, is with CULLETON'S PATENT ELECTRO-SILVER PLATES. By means of this novel invention a thousand pieces of linen can be marked in a few hours. Initials, 1s. each; Name, 2s. 6d. Set of Moveable Numbers, 2s. 6d.; Crest Plate, 5s., with the necessary directions for use. Post free Certificate from the eminent Dr. Sheridan Muspratt, F.R.S., Professor of Chemistry, &c.

"Several trials with Mr. Culleton's Patent Electro-Silver Plates, for marking linen, induce me to pronounce them excellent; the letters are beautifully marked in a deep black colour, without blotting, and after a long boiling, with either potash or soda, they remain unaltered. Other plates which I tried decomposed the ink, and in many cases burned holes in the linen. I can testify Mr. Culleton's Plates are incorrodible, and will not hurt the finest fabric.—(Signed) "SHERIDAN MUSPRATT."

"College of Chemistry, Liverpool.

"May, 15, 1854."

All orders to be sent to the Patentee and Sole Maker. T. CULLETON, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

All Orders executed by Return of Post.

HOLLOWAY'S PILLS.—DISORDERS

OF THE HEAD.—During winter head complaints are apt to afflict the old, unhealthy, and debilitated. Giddiness, dimness of sight, or a fixed pain in the head demands immediate attention, or serious consequences will soon follow. For this class of diseases Holloway's Pills are unrivalled, both for warding off the premonitory symptoms, and likewise relieving the graver diseases—apoplexy, paralysis—which often comes on after repeated warnings have been neglected, or when the early symptoms have not been removed. They improve digestion, and purify the blood. Many testimonials daily bear witness to the curative properties of these Pills, which cannot do harm, but must invariably produce beneficial results, by expelling all impurities from the entire system.

SUGAR MAKING MACHINERYTO SUGAR PLANTERS, MERCHANTS, & OTHERS
CONNECTED WITH THE
SUGAR COLONIES.**G. BUCHANAN & CO.,**

Engineers and Manufacturers of

Sugar Machinery and Apparatus,
COFFEE, COCOA NUT, AND RICE MACHINERY,

NOTICE TO PASSENGERS BY THE OVERLAND ROUTE via EGYPT.

PHILIP ZECH, Proprietor of the two well-known Hotels in Alexandria, the Hotel d'Europe, and the Peninsular and Oriental Hotel, begs to inform his friends, and Travellers in Egypt in general, that he has purchased SHEPHEARD'S HOTEL in CAIRO, which will still continue to bear the same name; and in returning thanks for the extensive patronage enjoyed by his two houses in Alexandria, hopes that the preference may likewise be extended to his house in Cairo, which will be managed in first-rate style, and in a manner intended to give every satisfaction to its frequenters, both as far as table, wines, internal and external service are concerned. Many alterations and ameliorations are being carried out at the present moment.

Curtis on Manhood.—New Edition.—A Medical Essay on Nervous Diseases.

Just published, the 120th thousand, with numerous plates in a sealed envelope, price half-a-dollar,

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE, with plain directions for perfect restoration to health and vigour. By J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

CONTENTS:

INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatorrhoea and Impotence; Early Vicious Indulgences; Dangers of Neglect.

CHAPTER III.—A Review of the various Disqualifications of Marriage—whether resulting from the Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection.

CHAPTER IV.—The Author's plan of Treatment Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhoea and other Urethral discharges by microscopic examination.

CHAPTER V. and VI. on the modern Treatment of Gonorrhoea and Syphilis.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

"We feel no hesitation in saying, there is no member of society by whom the book will not be found useful—whether such person hold the relation of Parent, Preceptor, or Clergyman."—Sun.

Mr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by letter, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Mr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty Years; nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINNAM, QUEEN'S ROAD, HONG KONG.

FIRE.—DESTRUCTION OF THE
PLANT STOCK, AND PROPERTY OF THE Largest
 Ropery and Ship Chandyery in the Country, Messrs. Frost,
 Brothers, of Shadwell, London. PRESERVATION OF
 Books, Papers, and Cash, in MILNER'S SAFE, standing
 by the side of two other safes, (not Milner's) the contents
 of which were consumed.—See "Times," Sept. 7, 1860.

TO MESSRS. THOMAS MILNER AND SON,
 Liverpool, and 47A, Moorgate-street, City, London.
 Gentlemen,—We have very great pleasure in bearing
 testimony to the efficiency of your "Patent" Fire-resisting
 Safe. In the destructive fire which destroyed the whole
 of our premises on Sunday morning last, our books, papers,
 and cash, which were in the safe we purchased from you
 in March last, were all preserved; and this is the more
 remarkable because the contents of two other safes, not of
 your manufacture, standing in the same office within two
 feet of your safe, were consumed. Our most sanguine
 hopes have been realised in this severe test, and we leave
 you at liberty to make use of this letter in any way you
 may wish.—We are, Gentlemen, yours, &c.

FROST, BROTHERS.
 Shadwell, London, Sept. 8, 1860.

LEA AND PERRINS
 CELEBRATED
WORCESTERSHIRE SAUCE.
 PRONOUNCED BY
 CONNOISSEURS
 TO BE THE
 ONLY GOOD SAUCE,
 AND APPLICABLE TO
 EVERY VARIETY OF
 DISH.

EXTENSIVE FRAUDS.—Lea and Perrins having dis-
 covered that several of the Foreign Markets have been
 supplied with spurious imitations of their "Worcestershire
 Sauce," the labels of which closely resemble those of the
 genuine Sauce, and in one or more instances with the
 name of L. and P. forged, they have deemed it their duty
 to caution the public, and request purchasers to see that
 the names of Lea and Perrins are upon the Wrapper,
 Label, Stopper, and Bottle.

L. and P. further give notice that they will proceed
 against any one who may infringe upon their right, either
 by manufacturing or vending such imitations, and have
 instructed their correspondents in the various parts of the
 world to advise them of such infringements.

Wholesale and for Exportation by the Proprietors, Lea
 and Perrins, Worcester; Grocers and Blackwell, and other
 Oilmen and Merchants, London.

Agents will be found in every city
 where English is spoken.

o prevent disappointment, be sure to
 get for Piesse and Lubin's Perfumery.

MILE, and RHUBARB PILLS, an effectual cure of
 indigestion, all stomach complaints and liver affections.
 In cases of constipation these pills never fail in producing
 a healthy and permanent action of the bowels, so that in
 a short time aperients will not be required, and being
 quite as innocent as castor oil, they may be given to chil-
 dren.

From Dr. Dick, Lansdown-terrace, Kensington.
 "Sir,—Send me another bottle of your Dandelion,
 Camomile, and Rhubarb Pills for my own use. I lose no
 occasion of recommending these Pills, as I can consci-
 entiously do so."

Prepared by **TWINBERROW**, Operating and Dis-
 pensing Chemist, 2, Edwards-street, Portman-square,
 London; and may be had of all Patent Medicine Ven-
 dors.

KALOS GEUSIS SAUCE, as Improved by
 Mons. A. SOYER, and so highly valued in our East
 and West Indian Colonies as a stomachic, is prepared by
 I. M. ROBSON, 32, Lawrence-lane, Cheapside, London.

PATRONISED BY THEIR MAJESTIES

QUEEN VICTORIA,

NAPOLEON III.,

AND THE PRINCIPAL CROWNED HEADS OF EUROPE.

DEBAIN'S HARMONIUMS AND PIANOS-MECANIKES.

WAREHOUSE, 43, WATLING-STREET, CHEAPSIDE, LONDON, E.C.

REPRESENTED BY C. GENTILE.

{ DEBAIN'S PIANO-MECANIQUE

PERSONS without the least knowledge of MUSIC can, on this Piano execute any and the most difficult compositions in the style of a finished Pianist, producing the varied kinds of expression, &c., as indicated by the Composer, with a truthfulness not attained by any other mechanical means. It is also provided with a Full Grand Key-Board (7 Octaves), which can be played on in the ordinary manner. These Instruments have three strings to each note and check action, and are well adapted for Exportation, being strongly made, to resist the action of extreme climates. Price from 80 Guineas to 200 Guineas.

DEBAIN'S ANTIPHONEL, OR SUBSTITUTE FOR AN ORGANIST.

This Instrument can be placed on the Key-Board of any Organ or Harmonium, and is admirably adapted for Churches that have not an efficient organist, as by it a person without the slightest knowledge of music can, with equal facility, play the common chant or hymn tune and the mass or oratorio chorus. Price from 12 Guineas.

DEBAIN'S HARMONIUMS.

These celebrated Harmoniums, for Power, Sweetness of Tone, and Superior Construction, stand unrivalled. Price from 6 Guineas.

DEBAIN'S HARMONICORDE.

(TESTIMONIAL FROM THE GREAT MAESTRO ROSSINI.)

MR. DEBAIN,—I have heard with extreme pleasure your new instrument, the Harmonicorde. It is a beautiful invention, and cannot fail to be well received in the musical world.—G. ROSSINI.

PRICE FROM SEVENTY GUINEAS.

PRICE LISTS FORWARDED ON APPLICATION.

CAN BE HEARD DAILY AT

DEBAIN'S WAREHOUSE, 43, WATLING-STREET. CHEAPSIDE, LONDON, E.C.**OVERLAND ROUTE.**

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., via EGYPT.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY book Passengers and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers, leaving Southampton on the 4th and 20th of every month. For Gibraltar, Malta, Egypt, Aden, and Bombay by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne, and Sydney, by the steamers leaving Southampton on the 20th of every month.

For further particulars apply at the Company's Offices, 122, Leadenhall-street, London, E.C.; or Oriental-place, Southampton.

WITH IMMEDIATE DESPATCH.

Having the greater part of her cargo engaged.

FOR BATAVIA and SOURABAYA, with liberty to discharge cargo at an intermediate port on the coast, after leaving Batavia, the fine clipper barque ETHA, 3-3rds.—A 1. 394 tons register—coppered. C. H. BUSCHMANN, Commander. Loading in St. Katharine's Dock.

For terms of freight apply to Cloyd and Routledge, 124, Bishopsgate-street Within, E.C.; or E. and W. Arnold, 3, Clement's-lane, Lombard-street, E.C.

WITH QUICK DISPATCH—HAS A LARGE PORTION OF HER CARGO ENGAGED.

FOR SHANGHAI, the British Clipper ship EMPRESS OF INDIA, A 1 13 years, 589 tons register. W. BROWN, Commander. Loading in St. Katharine's Docks. For freight or passage apply to Ellis, Son, and Pickling, 132, Leadenhall-street.

FOR HONG KONG and WHAMPOA, the celebrated clipper ship NAPOLEON THE THIRD, A 1 13 years, 780 tons register, coppered and copper-fastened, R. DOBBIE, Commander; to load in the West India Docks. This splendid vessel is well known for her fast-sailing qualities, and having a large portion of her cargo engaged, offers a very desirable opportunity to shippers. Has magnificent accommodation for chief cabin passengers. For freight or passage apply to J. I. Bennett and Wake, 77, Cornhill; or to Adamson and Ronaldson, 1, Leadenhall-street, E.C.

FOR HONG-KONG and CANTON, to sail 26th November, the celebrated Aberdeen-built clipper CHRYSLITE, 471 tons, A 1 14 years, ALEXANDER M'CLELLAND, Commander; loading in St. Katharine's Docks. Has excellent accommodation for passengers. For freight or passage apply to W. O. Young, Newman's-court, 74, Cornhill, E.C.

TO SAIL EARLY IN JANUARY.

FOR HONG KONG. The celebrated River-built Clipper Ship NORTHFLEET, A 1 14 years, BENJAMIN FREEMAN, Commander; 951 tons register; loading in the East India Docks. This favourite vessel, well known in the trade, has superior accommodation for passengers.

For freight or passage apply to Mr. Edward Gellatly, with Messrs. Duncan Dunbar and Sons, 95, Fore-street, Limehouse, E.; or to W. O. Young, Newman's-court, 74, Cornhill, E.C.

FOR HONG KONG and WHAMPOA, with very quick despatch, the celebrated British-built clipper ship ETHEREAL, A 1 10 years, 796 tons register, STEPHEN JARMAN, Commander; loading in the West India Docks. This splendid clipper, built by Messrs. John Pile and Co., the builders of the Mirage, Spirit of the Age, &c., has first-rate accommodation for passengers.

Holmes, Knevit, and Holmes, 41, Princes-street, Manchester; Sun-court, Cornhill, E.C. A few midshipmen required.

ROBERTSON and CO. will despatch the following first-class VESSELS to their respective destinations. They are well adapted for their several trades, and are confidently recommended to their friends:—

Des'tination.	Ships.	To Sail.
Algoa Bay	Diadem	With des. Dec. 10.
Shanghai	Glen Clune	With des.
Shanghai	Jubilee	With des.
Hong K'g., Whampoa, and Foo chow-Foo	Robin Hood	Dec. 10.
Bombay	Moskwa	With des.
Calcutta	Cumbelani	Nov. 30.

London, St. Michael's House, St. Michael's-alley, Cornhill, or York-chambers, 55, King-street, Manchester.

CHINA AND JAPAN.—A New Series of very beautiful Stereoscopic Pictures, Groups, Views, Street Scenes, &c.—To be had of all Dealers. Wholesale only, of G. R. and Co., 24, Lawrence-lane, Cheapside.

THE TELEGRAM FROM PEKING.

The following telegram was received on the 8th, at 3 P.M., from her Majesty's agent and Consul-General at Alexandria, dated Nov. 30:—

"Two of the gates of Peking are in our hands. Parkes and Loch have been returned to us. Captain Anderson and Mr. De Norman have died from the effects of ill treatment. Brabazon and Bowlby unaccounted for. The Emperor's summer palace taken and sacked, affording immense spoil. Emperor fled into Tartary. Forces to winter at Peking and Tien-tsin. The two Ambassadors at Military Head-quarters."

It will be observed that according to the date of this despatch from Alexandria it was an unusually long time reaching its destination; nine days being the average time of postal transit from London to Alexandria via Marseilles.

List of Passengers.

PASSENGERS INWARD.

By this mail from Hong Kong.—For Southampton: Lieuts. Papillon, R.E., Hozier, and servant, C. H. Wilkinson, R.N., Capt. Green, Messrs. John Davy, W. Lemesurier Dely, V. T. Johnsin Marty, J. G. Les, W. J. Rogier, Mackenzie, Geo. Bagwick, Staff-Surg. Menzies and servant. For Marseilles, Messrs. C. D. Williams, Battiste Joannine and son. For Alexandria: Messrs. Nicolas Rothloff, C. M. Shenbery.

PASSENGERS ARRIVED OUTWARD.

Per mail steamer from England for Hong Kong.—Rev. Mr. and Mrs. Wyde, Rev. S. Jaria, Messrs. Hudson, Girardot, Dence, Weise, and Lieut. Pauli; Vet.-Surgeon Wilson, Marshall, and Hartford, and 165 French troops. For Shanghai: Mr. W. H. Harvey.

PASSENGERS OUTWARD.

Per P. and O. str. Ceylon, 4th Dec.—From Southampton to Singapore: Mr. and Miss Allen, Mr. H. J. Silverlock. To Shanghai: Mrs. A. Evans, and infant. To Hong Kong: Mr. Gray, Capt. Archer, Rev. T. Molesworth, Mr. F. H. Barker, Mr. J. Noble, Lieut. Trimmer, Mr. Downie. From Marseilles, 12th Dec., to Singapore: Mr. F. David, Mr. De Guiceste. To Penang: Mr. G. F. Lyman. To Hong Kong: Mr. Wehner, General Lemery and two aides-de-camp. Messrs. Freeman, Babot, and J. Rickett. From Gibraltar to Hong Kong: Governor of Mindanao and lady.

Per P. and O. str. 20th Dec.—From Marseilles to Shanghai via Bombay: Mr. Gordon. To Hong Kong via Bombay: Mr. Hudson.

Per P. and O. str. Indus, 20th Dec.—From Southampton to Hong Kong: Mr. H. G. Howlett, Dr. Childs, Rev. Mr. and Mrs. Moule. To Shanghai: Mr. L. C. Dupontes. To Singapore: Mr. J. Purvis, Mr. and Mrs. C. Hill, and infant, three children, Miss Symons, and governess. To Penang: Miss Letten.—From Marseilles, 23rd Dec., to Singapore: Mr. W. Van Lennep, Mr. R. Santilagano. To Hong Kong: Mr. A. J. Campbell, Mr. J. D. Baldwin.

Per P. and O. str. Pera, 27th Dec.—From Southampton to Hong Kong via Bombay: Mr. Livingstone. To Singapore via Bombay: Rev. Mr. and Mrs. Chambers, Miss Rook. From Marseilles, 4th Jan., 1861, to Hong Kong via Bombay: Mr. A. Ellsden.

Per P. and O. str. 4th Jan. 1861.—From Southampton to Singapore: Lady and Miss McCausland, Miss Cowper. To Shanghai: Mr. F. R. Gannuvel. From Marseilles, 12th Jan., to Hong Kong: Lt. G. Van Pol-nen. Messrs. J. Cock, W. Lent and E. Waller, Gen. and Mrs. Valero, Col. and Mrs. Ranico, Mr. N. Campo-y-Puigmarco, Mr. Ashton. To Singapore: Mr. H. F. Morbotter.

Per P. and O. str. 20th Jan., 1861.—From Southampton to Hong Kong: Mr. Croom, Paymaster Potter, Mr. Holloway. To Shanghai: C. P. Marsden, W. H. Fittock. From Marseilles, 20th Jan., to Hong Kong: Don Jose Castellanos. To Shanghai: Mr. E. A. Duglere. From Gibraltar to Hong Kong: Mr. Hernandez and friend.

PROGRESS OF THE THIRD CHINA WAR.

(FROM OUR OWN CORRESPONDENT.)

CAMP OFF PEKING, Oct. 13.

My last communication to you was dated from Tang-Chow on the 23rd Sept., and announced the capture of Messrs. Parkes and others. Energetic demands and threats having failed to procure the return of the prisoners, Sir Hope Grant, with the consent of Lord Elgin, determined on making a sally at Peking. Accordingly, after securing our heavy baggage and materiel at Tang-Chow, and leaving a sufficient force at that place to keep open communications with Tien-tsin, our troops advanced, encamped on the North side of the city, and gained easy possession of the strong positions on the 5th Oct. The Emperor's summer residence was next attacked and looted, affording valuable spoil of silks, furs, bullion, &c., variously estimated at \$200,000, or say £50,000. After this Messrs. Parkes and Loch, with a few troopers were given up, and arrived safely at head-quarters; of the other prisoners, nothing definite is known.* Although there are stories current that Messrs. de Norman and Lieut. Anderson died from cruel treatment, we still hope to see them with Capt. Brabazon and Mr. Bowlby returned to us. The report is from one of the Sikh troopers who states he suffered the same injuries, but I have been unsuccessful in confronting these statements, and I hesitate to endorse them. From this point resistance may be considered to have ended, and the two principal gates of the city, in fact

* Some extraordinary reports have been current in the city as to the cruelties inflicted on the prisoners by the Chinese, too barbarous and disgusting to commit to print, but which have been happily denied at the Foreign-office.

the city itself was surrendered, and we cannot settle matters in time to reach our ships in the Gulf of Pechili before the winter sets in we are engaged in preparations for wintering here and at Tien-tsin, and I do not despair of having a good time of it. It is reported that the Emperor has taken his departure to Zehol in Moukden, or Tartary; this step is, no doubt, worthy of the manner he performs his duty to his subjects. Mr. Bruce is, we hear, on his way from Shanghai, no doubt Lord Elgin intends introducing him to the authorities at the signing of the treaty. The cold is settling in the thermometer in the early morning, being at 38; but from all I can learn, it seldom falls below 10 or 15 Fahrenheit.

The following General Order was issued by Sir Hope Grant, which will, no doubt, be perused with interest by your readers.

Head-Quarters before Peking,
12th Oct., 1860.

GENERAL ORDER.

One regiment to be detailed by the first division will proceed to the Temple of Earth this afternoon and be there quartered. The Deputy Quartermaster-General will make the necessary arrangement. All the live cattle belonging to the Commissariat will be driven to the same place to-morrow morning early, and kept there until further orders. The whole of the troops will be furnished to-morrow with two days' rations, cooked, and be held in readiness to turn out at a moment's notice. The Cavalry Brigade will detail one squadron to patrol in the neighbourhood of the camp to-morrow: they will move off at 9 A.M., and act according to instructions, which they will receive later in the day. The whole of the artillery will be placed at the disposal of Brigadier General Crofton until further orders. In the event of an attack upon Peking being ordered, the following directions will be observed:—

As soon as the officer commanding the Royal Engineers reports that a practicable breach has been effected in the city wall, it will be stormed by the 2nd Division. Major-General Sir R. Napier, K.C.B., will be pleased to make the necessary dispositions. As soon as the wall has been gained the storming party will turn to the right, keeping along the ramparts, and seize the An-ting gate: this post being gained, the Engineers and Sappers, who should follow the supporting column, will proceed at once to open the gate below.

This post will then be placed in a state of defence with the least possible delay, and be held by a garrison of such strength as may be necessary.

H.E. most positively forbids any officer or soldier under any pretext whatever to quit the gate or ramparts, or enter any street or house without his express permission conveyed through the D. A. General or that of Major-General commanding the division, and he cannot too strongly impress upon the troops the necessity of their restraining from straggling, and of keeping in as compact order as possible, not only for their own individual safety, but for the more complete efficiency of the whole force.

H.E. takes this opportunity of expressing to the soldiers the satisfaction he felt at their conduct on a late occasion, when a large amount of plunder was at the mercy of the troops. No crime has been brought to H.E.'s notice, and the discipline of the army remains intact.

H.E. has ordered all property collected by officers on this occasion to be sold for the just benefit of all ranks, and he wishes them to bear in mind that he has taken upon himself a serious responsibility in appropriating to their benefit the treasure which was found in the Emperor's palace, and which by right belongs to the Crown.

The troops are now about to occupy the Imperial city of Peking, where they will be exposed to many and more serious temptations, and his Excellency trusts that the boon just conferred upon them will act as an additional inducement to them to preserve their uniform good conduct, and prove to them that they best consult their own interest in maintaining it.

By order, (signed) F. STEPHENSON,
Deputy-Adjutant-General.

I am just ordered down to Tien-tsin, and must, I regret to say, close this. The river is gradually drying up, and the *Carthage*, *Granada*, *Beagle*, and *Reynard* are I hear all hard aground for want of their necessary element."

ANOTHER ACCOUNT.

Peking, 9th Oct., 1860.

We arrived here to-day, exactly a month from the day we left Tien-tsin. In another letter I have told you all that I know of what has transpired since last mail. As we arrived here only an hour before dark, and as the mail closes to-night, I cannot get sufficient information to give you an account of what the troops did after leaving the depot on the 3rd. I believe, however, that no opposition was offered, although the enemy had begun to make preparations at one part of the road. The country all round is quite flat, but near Peking (on the side we have come, at least,) it is covered with tombs and topes of trees. Many of the groups of tombs are enclosed by large mounds of earth, and in some parts these and the topes of trees are so thick that the most admirable breastworks and cover are formed, and well-armed troops could have made the approach on this side to the capital impassable. I have omitted to mention that we are on the north side of the city, within about a mile of the walls.

The country is so flat, and covered to such an extent with trees and tumuli, that the troops had great difficulty in keeping together. The Summer Palace, four miles off, was found by our cavalry two hours before the French came up, but the main body of our forces having halted to look out for the enemy, the French passed across our rear, and on to the Summer Palace, which our cavalry had been guarding, but had not entered, as they could not leave their horses. The stories told of the loot got in this place are very wonderful. The general has ordered officers to give up what they have looted, which, together with the rest of the contents of the place, is to be sold, and the proceeds given over to the prize agent. The Chinese have returned Mr. Parkes, Mr. Loch and three Sikh horsemen. The civil authorities in the city are reported to say that they do not know what has become of the other prisoners. They are perhaps in Sang ko-lin-sin's hands. A gate of the city was to be given up this evening. The weather is now delightfully cool. Two blankets are frequently necessary at night, but the sun is still strong in the day time. We have had very jolly times, and are now in splendid quarters in the suburbs.

13TH OCTOBER.

On the 12th everything was prepared for the first great event of the war—the assault or the occupation of Peking, the unviolated capital of China. The siege guns and other artillery were in a position to bombard the town, unless it should be surrendered by noon of the 13th.

Just immediately before the period given for surrender would expire, Hang-chu came out and said that our demands were acceded to, no resistance would be made, and the gate was at our disposal. Thereon the outer and inner gates were immediately taken possession of; and a portion of the Allied Force was quartered on the wall of Peking, which is 60 feet wide and paved, and the troops inside have their tents pitched on it. The only thing the Chinese asked was, that the Chinese Coolies should not be allowed to enter the city; this was conceded.

Diplomacy will now again take the place of war, and we shall watch with great anxiety and doubt the successful result. It is reported, that the General intends to return to Tien-tsin in about a fortnight under any circumstances, desiring not to be overtaken by winter; if he does we have no security for the fulfilment of any stipulations, and the war will have to be renewed after the season.

We might winter in Peking as well as at Tien-tsin, as our numbers would be but a small per centage on its population, said to be two millions. It is said we shall not treat until the remainder of the prisoners are accounted for.

They were, whilst with San-ko-lin-sin's army, treated in a most cruel manner, forced to kneel before every mandarin, however petty, their faces rubbed in the dust, they were bound with their hands behind them and carried on horses to Tung-chow, and thence, in the same state, in one of the carts of the country to Peking, where they were placed in dungeons, and remained so until ten days ago. Mr. Parkes was beaten when he did instantly reply to a question, and Mr. Loch because he could not speak Chinese. Within the last week these atrocities have been discontinued, and they have met with some consideration. It appears that when the party was returning from Tung-chow, where you will remember Mr. Parkes went to remonstrate against the Tartars encamping on the ground appropriated to the British army, they arrived at Chang-kia-wan, where the battle of the 18th was fought, and, seeing preparations for an attack, they consulted together whe-

ther to charge through them, or to apply to Sang-ko-lin-sin, who was a short distance behind, for a pass. They resolved on the latter course. He received them with insult and abuse, and made prisoners of them. They do not know where the rest of the captives are, but suppose them to be with Sang-ko-lin-sin's army, but whether in or out of Peking is not known."

Nine Sowars of the Sikh Cavalry were released, and came into camp. They bring the distressing news that Captain Anderson and Mr. De Normann died from the effects of the brutal treatment received from the Tartars, the former on the 8th, the latter on the 11th day after they were captured. The wounds caused by the cords binding their wrists, insufficient food, and other inhuman tortures, had caused their death. One of these Sikhs, a serjeant, was bound with them. He survived, and has made a deposition of the facts. They are all suffering much, and it will be long before they can return to duty. They were brought from a town some thirty or forty miles off, to which they were conveyed soon after their capture. No information has been obtained about the two other Europeans, Captain Brabazon and Mr. Bowlby, *Times* special correspondent.

The pressure of the people is said to have had great weight in inducing the authorities to yield. I believe that their yielding now under pressure is the same as at Tien-tsin in 1858, and that if we retire from hence they will again break their engagements. There is no other guarantee for us than keeping the ground we have gained, having beaten the army out of the field.

Letters^s were found in the palace from San-ko-lin-sin to the Emperor, assuring him of his confidence in being able to annihilate us, by the arrangements he had made on the road at Chang-kia-wan where the battle of the 18th ult was fought. He begged the Emperor to have no apprehensions as to the results, that having ascertained how few our numbers were, he was confident he could surround and destroy us. The garrison of Peking is reported to be 60,000 to 70,000 men, or eight standards of 8,000 each, but probably not three-fourths of that number exist. There were a few guns on the wall opposite to our battery, and our works for riflemen were extended to within 190 yards of the wall.

A General Order from the British Commander-in-Chief desired that all articles taken by officers and men were to be sent in for sale by public auction for the benefit of the army, which was done. All were permitted to have the articles they had brought away for themselves valued, and have the option of taking or rejecting them. Many beautiful *curios* and *souvenirs* were thus obtained at a nominal price. The sale realised \$32,000, which, with the value of the treasure estimated at \$61,000, is to be divided as prize-money on the spot.

Much dissatisfaction has been expressed at the decision of the Commander-in-Chief that only those of the troops who marched from the last halting place on the 6th, are to participate in the prize money, all the rest, those at the depot at Tung-chow, and elsewhere being excluded.

The Commander-in-Chief and general officers have waived their right to share. A gold jug of great value was presented to the Commander-in-Chief by the army. Nearly all the articles were sold at very high prices. Large enamelled and inlaid vases and ornaments realising full Shanghai prices for such articles, the fact of their having been the property of Heen Fung adding an imaginary value to anything. The scene where the sale was held, in the temple Lamarsiri, occupied by headquarters, was worthy of the pencil of an artist. Had His Imperial Majesty handed over the whole of the contents of that palace uninjured, it would have sold for an enormous amount, more than three-fourths having been destroyed or taken by the French.

THE SACKING OF THE PALACE.

The following is the best description of the sacking of the Emperor's Summer Palace:—

"The French column, together with Colonel Pattle's brigade of cavalry, advanced on Yuen-min-yuen, the English column rather nearer Peking, a large body of the enemy having been observed near the village now occupied by us. The French entered with only two casualties, two officers being wounded by the eunuchs of the palace. The following day no signs of the French being visible, the English fired twenty-one guns to attract attention, and later in the morning the Commander-in-Chief learned where they were. Lord Elgin, Mr. Wade, Sir H. Grant, Sir R. Napier, and their respective staffs, proceeded to the palace, and found the French had been comfortably established there, and that a great portion of the principal valuables had been already taken away, leaving the heavy but less valuable articles for the English, or at least what things the French could not carry they left for us. No description can give an idea of the splendour of this resi-

dence. The entrance or reception hall is paved with marble, and painted with gold, azure, and scarlet in the most gorgeous style. The throne of the Emperor is of beautiful carved dark wood, and the cushions, embroidered with gold dragons, attracted general admiration; every inner chamber and saloon was very handsomely fitted up and the rolls of silk, satin, and crape, all of splendid workmanship, furnished, cummerbunds and puggarees for the French soldiers, who appear to have adopted our custom in this respect. The jade stone and china were of great value, and some Sevres china of Louis Quatorze would have delighted the eyes of many a *curio fancier*; presentation sword with the English coat of arms, studded with gems, and evidently of antiquity, gave rise to some speculation. The last treaty of Tien-tsin was also found, and the immense quantity of loot of all kinds made it almost impossible to know what to take away. Some idea of the quantity of silk may be given by the fact that fowls, old pots, &c., were wrapped in the most costly silks and satins. All the ladies had disappeared, but their little Japanese dogs, something resembling a King Charles spaniel, were running about in a distracted state. Mr. Wade secured some valuable books and papers, some we believe for the British Museum. The Emperor had left the day before, but his destination is, I believe, unknown. It is said that a panic took place amongst the French, and that they evacuated the palace, returning, however, when the alarm subsided. One thing is certain—our Allies took care of themselves, and it is said that one French soldier sold his share for 30,000 francs.

The park of Yung Ming-quen (i. e., round and splendid gardens), so celebrated in the history of the foreign embassies to Peking, is about eight miles north-west of the city, and is estimated to contain twelve square miles. The country in this direction rises into gentle hills, and advantage has been taken of the natural surface in the arrangement of the different parts of the ground, so that the whole presents every variety of hill and dale, woodland, and lawns, interspersed with canals, pools, rivulets, and lakes, the banks of which have been thrown up or diversified in imitation of the free hand of nature. Some parts are tiled; groves and tangled thickets occur here and there, and places are purposely left wild in order to contrast the better with the highly-cultivated precincts of a palace, or to form a rural pathway to a retired summer house. There are no less than thirty distinct places of residence for the Emperor or his ministers within this park, around which are many houses occupied by eunuchs and servants, each constituting a little village. The principal hall of audience stands upon a granite platform, and is surrounded by a peristyle of wooden columns, upon which the roof rests; the length is one hundred and ten feet, the breadth forty-two, and the height twenty. Within the outer colonnade is another, serving for the walls of the rooms, having inter-columniations of brickwork about four feet high, and lattice-work covered with oiled paper, so contrived as to be thrown open in pleasant weather. Above the lattices, but between the top of the columns and going around the hall, is an elaborately-carved frieze, gaily decorated. The ceiling above is whimsically painted, and corresponds to the inclination of the roof. The throne stands in a recess at the head of the hall, and is made of wood beautifully carved. The general appearance of this and other buildings in this enclosure is shabby, and neglect in so changeable a climate soon destroys all the varnish and wood-work, upon which the Chinese bestow their chief pains. It was at a place called Hai-tien, in the immediate vicinity of these gardens, that the strange scene occurred which terminated in the dismissal of the embassy of 1816.

SAN-KO-LIN-SIN A CHINESE HERO.

There is no one in China at present about whom we hear so much, and really know so little, as Sann-ko-lin-sin, the Commander of the Chinese forces in the North. Some people take refuge in flatly disbelieving that such a man exists; and we have more than once been gravely asked if there was any truth in the camp "shave" that he is an Irishman, originally called Sam Collinson, who deserted to the Chinese from our army, some time ago, and has obtained high power amongst them.

Among the Chinese, both North and South, he is a popular idol—the Wallace or William Tell of China. The hawkier in the streets of Canton is delighted with the rumour that "Chung Wang" has become Emperor; and the peasants on the banks of the Peiho speak of him in terms of the highest praise. Even the merchants of Tien-tsin, whose trade he has ruined, speak of him with admiration, and make only the qualifying remark that he is ignorant of the power of foreign arms.

Summary of News from the Far East.

JAPAN.

A letter from Kanagawa, dated 26th Sept., in the *China Overland Trade Report*, says:—

Mr. Consul Alcock and party returned from their visit to the holy mountain Fusi-Yama, to which place they were escorted by Japanese officials. A heavy gale passed over here, and fears are entertained for H.M.S. *Camilla* and a Prussian gunboat. The *Nankin* drove on shore, and a fine English clipper called the *Helen Ewing* is missing; a life buoy with her name painted on it is said to have been picked up. A large number of ships of different kinds, transports, &c., have suffered more or less.

The godowns at Yokuhama were flooded and swept down. The Japanese attribute this tornado to the visit of the foreigners to the holy mountains. The Prussian Embassy arrived at Yedo in the *Arcona*. The currency question is as bad as ever.

CHINA.

SHANGHAI.

The Chinese War correspondent of the *North China Herald*, reports, that at Tien-tsin, the Prefect was imprisoned by

General Napier until he found some carts for the conveyance of the baggage of the army, and that his Excellency not liking the confinement, sent for some samshew and a knife. General Napier sent him a bottle of sherry, intimating it would not suit his purpose to supply the latter.

From a statement published, it appears that the foreign merchants have contributed the sum of taels 7,325 (£2,400) towards the fund for the relief of refugees from Soochow and other places visited by the rebels.

At the third annual meeting of the North China Branch of the Royal Asiatic Society held at Shanghai on the 25th Sept., a paper by Mr. R. Alcock was read on the grammatical structure of the Japanese language, which, it is intended, we understand, to be published as an introduction to a work on the Japanese language by Mr. Alcock.

A letter, signed J. J. R.—which we take to be the Reverend Mr. Roberts, the American Missionary of Canton—gives an account of his visit to Soochow, where he found three other Americans who were engaged in several capacities in the rebel army. This is sufficient proof of the sympathy of some foreigners, although we cannot but think that personal aggrandisement is the main incentive.

There is no new movement to record of the rebels, and it is not at all probable that they will again trouble us. Their head quarters at Nanking and Soochow appear to be safe from attack by the Imperialists; but they cannot now organise any great move until the spring. They do not appear to be interrupting produce in its transit to this.

NINGPO.

The foreign trade of this place is likely to be much increased in tea and silk should the stoppage to produce near Shanghai continue.

AMOY AND FOO-CHOW-FOO.

These places are quiet, and business in no way interfered with by the operations at the North.

HONG KONG.

The emigration to the British West Indies has commenced. The agents at home have chartered several vessels, which will, no doubt be promptly despatched. The rate agreed on by them is, however, far higher than that at which tonnage could have been secured in this market. Pending the arrival of these vessels, the *Sebastopol* has been chartered at £8 per head, to Demerara, vessel finding water and fuel.

Mr. Ward, the American Minister, arrived at this place from the North, and it is reported is on his way home, on account of the election for President.

The new steamer *Ly-ee-moom*, Captain Hill, for Messrs. Dent and Co., arrived from London on the 21st October—110 days out,—having called at the Cape, Singapore, and other places. She is pronounced by the folks here to be the handsomest craft ever in this port. She steams very fast, but burns a large quantity of coal.

The U.S. frigate *Niagara* has arrived from New York with the Japanese Ambassadors, who have been much gratified with their visit. They have seen everything in the place.

The *China Mail*, on the war, says:—A million a month, or twelve million pounds sterling a year, is the lowest figure at which the expenses of this China expedition can be truly calculated, and that sum is equal to the entire taxation of the United States for Navy, Army, Government, and all other purposes. Passing that little item and the visionaries who imagine it will ever be paid by the Chinese, the war is involving still more serious consequences of another kind. After years of effort the Chinese government, in 1859, had all but crushed the Tai-ping rebellion, and restored order to the Empire. But as the government is now paralysed by this new attack of foreigners upon it, the rebels have again appeared in force, devastated provinces, and brought ruin on millions of peaceful people. The whole structure of the Empire is endangered, and a third of the human race may be thrown into anarchy and disorder, destructive to the production of tea and silk. Another consequence of this war is, that France has obtained a position in China almost equal to our own. At Canton, Chusan, Shanghai, and in the North, French occupation or co-operation has had a tendency to slide into French domination, and at last France finds herself in an important position, and wielding great power in the East. It may be also added that, so far from increasing our military force, these wars with an unequal enemy only serve to demoralise our own troops and unfit them for meeting with any formidable foe. The falsity of our position towards China does not lie so much in particular acts of injustice—such as the opium war, and the lorcha affair, which are admitted crimes. It rests in a thorough misunderstanding of the Chinese, and a consequent conviction that the attitude in which we should stand before them is that of superiors dictating our own terms. Even if an arrangement is now made by the Chinese, it will be found only to involve future difficulties, and such will always be the case so long as we persist in upholding wars fostered by misunderstanding, inaugurated with fraud, and aiming at injustice. Should the flag of England be now floating on the walls of Peking it will only serve to mark a period in the national history when the giant strength which has been

given to us is no longer employed to serve our true interest, or at all under the influence of our best intelligence, but only under the direction of those whose selfish and unworthy aims are blind to both.

CANTON.

The troops are healthy, and everything is in *statu quo* at this place. Buildings are proceeding, and the Shameen site is nearly filled in ready for building.

Mr. D. B. Robertson has relieved Dr. Winchester, the acting Consul, who proceeds home on leave of absence.

The *Friend of China* has now attained its fourth number, time only allows us to say it is a most satisfactory little sheet. The proprietor, Mr. Tarrant, has sent us several copies, which we will supply to any applicants.

SWATOW.

The English prisoners taken in the late attack of H.M.'s gun-bout *Weasel*, mentioned in our last, have been ordered to be released by the Governor of Canton.

This, we presume, is a sample of the powers of the Boy Consul, G. W. Caine, on whose appointment and other persons to the onerous office of Consul, we commented last year, and it now appears we were more than just, and our convictions have been realised.

PHILIPPINES.

MANILA.

Great complaints are current as to the inefficiency of the Spanish Mail-service from Manila to Hong Kong, connecting the mail route to England, and few there are who would not be glad to see the much abused P. & O. Co.'s boats on the line again.

MALACCA STRAITS.

SINGAPORE.

A new daily paper has been commenced, called the *Singapore Daily Press*. The idea, no doubt, is taken from the Hong Kong Daily Press, which has been most successful, but the *Singapore Daily Times* will of course frown on the new aspirant. Nothing like new and vigorous competition. The electric cable to Batavia may now be considered as quite defunct, and almost a dead loss. From Cochín China, Java, Siam, and Borneo, we have no intelligence of any importance. The military troubles in Java have been somewhat exaggerated.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

- COPLAND—On the 15th ult., at Maisonette, Claygate, near Esher, Surrey, the wife Patrick Copland, Esq., of a son.
 DE CARVALHO—On the 26th of October, the wife of Juanario A. de Carvalho of a daughter.
 DENT—On the 25th ult., at 14, Leinster-terrace, Hyde-park, the residence of her father, the wife of Capt. Thomas Wilkinson Dent, Madras Army, of a son.
 HOGG—On the 2nd inst., at 40, St. James's-street, Piccadilly, Mrs. Joseph Hogg, of a daughter.
 RIENACKER—On the 27th ult., at De Beauvoir Town, the wife of Mr. R. Rienacker, of a daughter.
 SINCLAIR—At Ningpo, on the 4th of October, Mrs. Sinclair, the wife of H.B.M.'s Consul, of a daughter.
 VANSITTART—On the 1st inst., at Paris, Mrs. George N. Vansittart, of a son.

MARRIAGE.

- LANG—CONNOR—On the 4th inst., at St. Giles's, Camberwell, by the Rev. Bury Capel, George Lang, Esq., of 3, Davidge-terrace, Kensington-road to Leonora Lavinia, widow of the late William Connor, Esq., one of her Majesty's Vice-Consuls in China.

DEATHS.

- SMITH—At Hong Kong, on the 15th of October, Captain Smith, late of the *Eena*, aged 33 years, a native of Holland.
 STEWART—At sea, on the 9th Oct., Capt. Stewart, of the ship *Tropic*.

COMMERCIAL REPORT.

CHINA—EXPORTS.

TEA.—At Shanghai business has been more active and stocks are small. Settlements on the market are, of Hoochow, 1,819 chests, at 21 to 24 taels; of souchong, 601 chests, at 23 taels; of common congou, 1,741 chests, at 15½ to 17½ taels; of flowery pekoe, 50 chests, at 40 taels. In greens settlements amount to 7,329 packages, making for the season 32,754 packages, against 154,337 packages last season. At Foo-Chow the arrivals are still large, and the export is much in excess of last year. At Canton the supply is on a fair scale, and considering that large quantities are coming forward from Japan, the export will be probably in excess of last season on the whole.

RAW SILK.—At Shanghai settlements announced of 9,000 bales, the dealers being ready sellers. Quotations: Tsattees Nos. 1 and 2, none; No. 3, 375 to 385 taels per picul; No. 4, 350 to 360 taels; No. 5, 320 to 330 taels. Taysaam Kahing, No. 1, 335 to 345 taels; No. 2, 315 to

325 taels; No. 3, 295 to 305 taels; No. 4, 265 to 285 taels. Lacyong, 250 to 260 taels.

DRUGS, ETC.—Canton: Cassia lignea, at Canton the quotation is \$17.50. At Macao, \$16.50 to \$17, no stock. Cassia buds, no stock, wanted at \$32 to \$33. Cassia oil can be had at Macao at \$295 to \$300. Star aniseed, 100 piculs of good quality is on offer at Macao at \$15.25 to \$15.50, and a considerable stock of aniseed oil, which can be had at \$165. Fire crackers at Canton are quoted at 83 cents per box of 40 packs of the best quality. Vermillion at Canton \$38 per box of Sunshing chop. Matting at Canton, cargo 10 cents per yard of four quarter white, and one cent more for checked.

CHINA.—IMPORTS.

At SHANGHAI.—The late obstructions caused by the rebels have nearly disappeared. Sales of cotton and other goods have been made to a fair extent. Sales have been made of shirtings: grey, 5½ to 6-catty, taels 1. 5. 2. to 1. 5. 5; 6½ to 7-catty, taels 1. 7. 3. to 1. 9.; 7½-catty, taels 2. 2. to 2. 2. 5. Deliveries, 35,400 pieces: white, commonest to finest, taels 1. 6. 5. to 2. 4. Deliveries, 3,550 pieces. T-cloths: 4½ to 5½-catty, taels 1. 0. 2. to 1. 3. Deliveries, 12,675 pieces. American: Drills, 40 yards, taels 2. 4. to 2. 5. 5. Deliveries, 32,560 pieces. Sheetings, 10 and 11-catty, taels 2. 3. to 2. 6. Jeans, 30-yards, taels 2. 2. 5. Spanish stripes, mace, 7. 5. to 9. Deliveries, 745 pieces. Long ells: H.H. scarlet, taels 7. 1. to 7. 2.; assorted, taels 6. 8. to 6. 9.; other marks, scarlet, taels 6. 5. to 6. 6.; assorted, taels 6. 4. to 6. 5. Deliveries, 1,320 pieces. Camlets: Best goods S., taels 15 to 15½; middling and inferior, S.S., taels 14 to 14½; B.B.B., taels 18 to 19. Lead: Very little demand, taels 5. 8. to 6 per picul. Iron is being re-exported to Ningpo, where also a heavy stock has already accumulated; nominal quotations are, taels 2. 5. to 2. 6. for best quality nail rod. Stock estimated at 150,000 piculs. Coal: English and Sydney, taels 11 to 11. 5.; Japan, taels 5. 5 per ton.

At HONG KONG and CANTON.—The sales of nearly all import goods have been very limited, although prices are fairly maintained. Coals:—English steam are worth \$10 afloat. Sydney \$7½. The stock is small, but there is a difficulty of getting storage. The stock of provisions, ship-chandlery, &c., is most excessive. They have been pouring in from all quarters in such quantities in anticipation of the requirements of the Allied force, that all the godowns of the colony are full of them. Flour:—Gallego and Haxall are selling at \$8.50. California at \$5.50. Beef and Pork are quoted \$21 to \$22, a good demand being expected during the emigration season. Other goods nominal.

SINGAPORE.—EXPORTS.—Prices of all descriptions continue steady a former quotations. Tin, gambier, sago flour and pearl sago, as before. Black pepper is still very scarce; white pepper has been more plentiful. Rice is again lower. Coffee is coming in freely. India-rubber without change, but gutta percha is less inquired for. Rattans continue in good inquiry, at about last quotations. IMPORTS.—The partial demand for goods still continues, and generally speaking a moderate amount of business has been done; but as importers are anxious to realise, prices of staples continue to give way. MANILA.—The usual mails have not reached, which is some proof of the inefficiency of the Spanish service.

The picul is 133½ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents. and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

At Shanghai (per Tael.)	6 months sight.	Bank. 6s. 5½d.	Private. 6s. 6d. to 6s. 6½d.
Ditto	3 ditto	...	...
At Foo-Chow-Foo (per dol.)	6 ditto	...	...
At Canton	...	...	...

At SINGAPORE.—For London: Beatrice, Eliza Thornton. For Liverpool: Aden, Elizabeth, J. N. Cushing. For Glasgow: Anna Maria. For Hamburg: Loopuyt. For Bordeaux: Bouganville. For Boston: Edward. For New York: Lucky Star.

CASUALTIES.

HONG KONG.

The Tropic sprung a leak on the 10th October, and nine feet water was soon found in the well. 2,000 bags of peas were hove overboard to lighten her, she being very deep.

The Star Queen was totally lost on the 20th August, having struck on a reef off the Pescadores in 7 feet water. The captain was nearly murdered by the coolies of the ship, but arrived at Hong Kong on the 17th October.

SHANGHAI.

The Branscombe encountered a typhoon on the 13th August, which swung the ship round first on one rock and then another, and finally capsized her on her beam ends, and dashed her to pieces, sweeping 10 men to destruction. The survivors reached the shore by the mainmast having been cut away.

FREIGHTS AND CHARTERS.

At SHANGHAI.—For London: Tea, £3; silk, £5. For New York: Tea, £12; silk, £20. There is very little demand for large vessels; small and medium class find ready employment at good rates. The charters reported are—Mary Russell, Mitford, at Mexican \$2,000 monthly, and several others at the same proportion.

At Foo-chow-Foo.—To London, £3 to £3.10. To New York, \$12. Shipping plentiful, and but little coast work doing.

At AMOY.—Small craft are scarce and wanted for coast work. There are a few disengaged vessels in harbour, but they are not suitable to the demand.

At HONG KONG, MACAO, and CANTON.—For London: £3 to £3. s. For New York: \$8 to \$10. A fair business has been done during the past fortnight, considering that the rice trade has not yet commenced. Much depends upon the state of the market in Europe for this article as to future prospects, and the number of transports discharged, which are being paid off as they continue to arrive. The Weymouth has been taken up by the Government. The Australian and Californian business has commenced, three vessels having sailed to the latter ports, with very fair cargoes, but comparatively few passengers, it being rather early for this branch of the trade. The Emigration to the British West Indies has also begun, several vessels having been chartered from home, but pending their arrival; the Sebastopol has been chartered at £8 per head to Demerara, vessel finding water and fuel, and the Alice Thornadyke to Havana, at \$60. For Australia: The Ashmore has been taken up at £1,750 for one port, and £103 extra, if to two. The George Warren has been sold for \$15,000.

At SINGAPORE.—For London £2. 10s. to £3; many vessels holding out for higher rates, and are most likely to be taken up very shortly, as there is some demand for tonnage. The Aden and Elizabeth have been laid on for Liverpool at the above rates. The Loopuyt to Hamburg at £2. 15s. all round. The Reijeward from Akyab at £3. 5s. to United Kingdom, £3. 10s. to Holland, or £3. 15s. to a port between Havre and Hamburg, with 5s. per ton extra if loaded at Rangoon.

PASSED STRAITS OF SUNDA.

From England and Continent to China: Oct. 12, Theodor Dill; 14, Scawfell; 15, Argo. From China to England and Continent: 17, Celestial, Westminster, Roska. To New York: 15, Winged Racer; 17, Ann. From England and Continent to Singapore: 11, Amalia Augusta; 12, Bengalen; 13, Richard Cobden; 14, Minister Thorbecke, Sec Park; 15, Cecilia; 18, Harvest Home, Loopuyt. From Singapore to England and Continent: 11, Oryx; 17, Johannes Kepler. From Manila to Havre: 15, Coligny. From England and Continent to Batavia: 12, J. C. Schotel; 11, Constantia, Kosmopoliet; 17, Leven, Bezoekie, Ortelius; 18, Susanne. From Melbourne: 15, Canoe. From Batavia to Amsterdam: 13, Allegonda Jacoba. From Boston to order: 14, Philomela.

Continental Intelligence.

RUSSIA.

St. Petersburg, Dec 3.

(FROM OUR OWN CORRESPONDENT.)

Official despatches received from the staff of the Governor-General of Eastern Siberia state that, on the 21st of August last, the Cossack officer, Captain Zaboroffsky, arrived at Irkutsk as courier from Blagowessensk, on his return from Nicolayeffsky, whither he had conducted a transport of eight barges, freighted with 12,000 poods of provisions. He started from Tschila on the 29th of April, as soon as the river Ingota was free of ice, arriving with his charge safely at Nicolayeffsky on the 29th July. After delivering his cargo, he was sent by the head of the Imperial Commissariat Department with despatches to the Governor-General at Irkutsk. According to Captain Zaboroffsky's statement, the transports of the Government, as well as those of the civil and military colonies, together with cattle and other articles of food, were carried on with perfect security and without interruption the whole length of the Amoor. From the official report of the Military Governor of the Province of the Amoor, it appears that from the 16th of May to the 24th of July (old style), the navigation of the Amoor was greatly on the increase, for during that period the number of vessels that passed Blagowessensk was as follows:—194 barges, each containing 1,500 poods, or 30 tons, 22 large boats of 1,000 poods or 20 tons each, and 424 bacs, carrying from 250 to 500 poods (5 to 10 tons) each. On the whole line of route the greatest activity is everywhere perceptible, timber is being cut, houses are "springing up," and farming operations carried on with vigour. The steamer Amoor, left Nicolayeffsky on the 1st July, conveying a number of passengers, a mail, some cargo, and towing a large loaded barge, with which she arrived on the 5th, at Mariinsk. On the following day, having taken on board some more passengers, she continued her voyage up the river, arriving on the 12th at Kharaboffka. On the 13th, she started again, taking in tow an additional barge carrying 50 men of the 2nd Battalion of the line, and arriving on the 22nd of July at Blagowessensk with the mail, 160 passengers, and 1,500 poods of cargo.

As far back as the reign of the Czar Alexis Michaelowitz, the cultivation of tobacco was introduced into Siberia, and numerous imperial ukases granted to the Woiwodes of Nertschink and Tobolsk in 1696 and 1697, abundantly prove that the plant was extensively grown there at that time. From some unexplained cause or other, the cultivation has, however, been greatly neglected of late years, and in many districts even completely abandoned. Preparations are now being made on a grand scale to increase and improve the production of this valuable plant, the consumption of which has so greatly increased in every country on the face of the globe as to render it a very valuable article of commerce. It may here be mentioned as an important fact that, the soil of Siberia is peculiarly adapted for the growth of tobacco, and that the quality of the produce is very similar to that of Turkey. The Irkutsk Gazette stated, not long ago, that 200,000 poods or eight millions of pounds of tobacco are annually conveyed to that capital from the Ukraine, by the expensive process of land-carriage, and consequently, command most exorbitant prices. In the producing country, the wholesale figure for the best quality is one rouble (about 3s.) per pood of 40lbs., or less than a penny per lb. When brought to Nischny-Nowgorod, it sells for 3 roubles, at Irbit from 4 to 5 r. As it is carried further East it increases in value, so that at Irkutsk it commands the enormous price of 8 and even 10 roubles. At Berezoff, Jakutsk, and Okhotsk, the common description of tobacco, called *makhorka*, is usually bartered for an equal weight of skirrel's skins and other valuable furs. The rich, black loamy soil in the neighbourhood of Irkutsk, the country surrounding the Lake Baikal, the sources of the Yenessi, and may parts of the banks of the Amoor and its tributaries, are all singularly adapted for the cultivation of tobacco, and as the labour is light and the profits enormous, with a certainty of easy sale, which would be greatly enhanced by a reduction in the price, to which the growers could very well afford to submit, there is no reason why the cultivation should not be carried on very extensively, favoured by the advantages derived from a congenial soil and climate.

The *Gazette of the Senate*, No. 92, contains the following official announcement:—"On the recommendation of the Minister for Public Instruction, and a similar report from the Committee of the Department for the affairs of Siberia, H.M. the Emperor, has been pleased, by Ukase, dated 3.15, October last, to authorise the corporation of merchants at Kiachta, to educate at their expense, for fifteen years, at the Chino-Mandschurian section of the Faculty of Oriental Languages, at the University of St. Petersburg, two Bursars selected from among the most diligent and meritorious students of the Gymnasium at Irkutsk, who shall be known and designated by the style and title of "*The Bursars of Count Mura-wieff-Amoorsky*," in memory of the treaty of Aigoon, concluded by that statesman between Russia and China. The travelling expenses of the Bursars, both in coming and going, to be defrayed by the said merchants of Kiachta."

UNITED STATES.

(FROM OUR OWN CORRESPONDENT.)

New York, November 28, 1860.

The people here are urging the policy of establishing a line of steamers between California, China, and Japan, and one between Panama and Australia, which has been long mooted. In the absence of a Pacific steam line to Australia, there is little doubt such an extension as that proposed would greatly promote commerce, although I doubt whether it would centralise trade, and exchange operations in New York, as so fondly anticipated. Some of the arguments urged in support of the proposed line are these:—

"With first-class steamers from San Francisco, the passage may be made over to Shanghai in from twenty to twenty-five days. The commerce of the Pacific is one of the greatest in interest to a nation. Australia and Japan have but begun to be open to our enterprise. China is increasing her intercourse with Australia and America. That intercourse is now large with San Francisco, and would be much increased with steam communication. At the present moment, flour, provisions, &c., are being sent from San Francisco to China, and that port is the natural one to supply such things to China, Australia, Peru, Japan, &c., in the future. Australia formerly looked to Chili for flour, now they only look to San Francisco. With a line of steamers from Panama to Australia, and this line of steamers from San Francisco to China, we could make the commerce of this country take such strides ahead as would astonish those who have not thought upon the subject."

MONETARY AND COMMERCIAL.

The derangement and embarrassment in money and business negotiations have told with more or less severity in our market for East India staple goods. Sales have been checked, and in many cases have been extremely difficult, except at a decided decline in prices. Freight to Hong Kong may be quoted at \$10 for dead weight up to \$14 for measurement.

TEA.—The market is quiet, and the business doing has been on a reduced scale. Greens are firmly held, and prices sustained, while Blacks are dull. A public sale announced last week was postponed until to-day. Sales privately during the impending sale have been light. Greens were taken to a moderate extent at full prices.

INDIGO.—The market is dull, while prices are without change of moment. The sales since our last report have embraced 3 chests Madras, at 80c. to 85c., 6 months, and 25 chests Bengal, at \$1 50c., and 5 chests Manila, at 30c.

HEMP.—The market has been dull. The sales have embraced 500 bales Manila, in Boston, at 5½c. 8 months; and 75 bales extra quality jute at \$115 6 months.

FIRE CRACKERS.—Sales of 500 boxes of Canton. 40 packages have been made on private terms.

COFFEE rules very dull, and quotations are in a measure nominal. The last sales embraced 50 bags Ceylon at 14½c., and 75 mats Java a 16½c. at 4 months; 250 do. Ceylon at 14½c. to 15c. The stocks continue to be light, comprising 300 mats Java, and 9,970 bags Government ditto.

SPICES.—The market has been dull since our last. An invoice of 1,887 bags Pimento afloat for export, and a cargo to arrive, with 10 barrels nutmegs on private terms, 500 mats cassia at 21c., and 20 cassia vera at 14½c. at 6 months, small lots No. 1 nutmegs at 40c., 20 cases at 41c. to 42c., and 50 bags pepper at 8½c. 6 months.

TIN.—The market rules dull, and we have no sales of Straits or Banc of moment to report, though prices are more firm.

SUGARS are extremely dull, and prices for many grades are nominal.

ARRIVALS.—At New York: From Penang, Nov. 7, Rocket, Saunders. From Singapore, 20, Keystone, Varind. From Manila, 19, Reliance, Bang. From Hong Kong, 21 and 22, Judge Shaw and Benefactor.

SAILED.—From Boston, Nov. 14, Nautilus, Elwell, for Hong Kong.

LOADING.—At New York for Hong Kong: Eureka, Cutler, Dayght, Sanger.

PENINSULAR AND ORIENTAL STEAM NAVIGATION.

POSITION OF THE COMPANY.

The twentieth annual meeting of this company was held on the 5th inst., at the offices, Leadenhall-street, Mr. Wilcox, M.P., in the chair.

The report of the directors stated, that on the 30th of September last the company stood possessed of stock in ships, less the amount set apart for depreciation, amounting to £2,228,100; also freehold and leasehold property in England, and docks and premises at Calcutta, Bombay, and other stations, to £110,916; stock of coals, naval and victualling stores, to £559,633; also cash, investments, bills receivable, balances in agents' hands, and debts due to the company, to £240,007; making the total assets £3,138,656. The capital received from the proprietors amounted to £2,000,000, and on debentures to £458,000—total capital £2,458,000. The liabilities of the company, on bills payable and otherwise, amounted to £386,471, making the total capital and liabilities £2,844,471, and showing a surplus of £294,185. To this was added a balance of £34,100, from the proprietors' underwriting account set apart that day, making the total surplus £328,285. The gross revenue or income of the company from all sources amounted for the twelve months ending the 30th September last to £2,350,361. The expenditure and charges on revenue, including interest on debentures, with the reserves made for insurance, wear and tear, and depreciation for the same period, amounted to £2,247,329, leaving a net profit of £103,032. From this was deducted £63,000 for the dividend of 3½ per cent. paid for the half year ending March 31, and £39,000 for the dividend of 2 per cent., recommended for the half year ending the 30th of September, leaving a balance of £1,032. The proprietors' underwriting account showed a balance of £53,600, out of which it was proposed to pay them £19,500, or 1 per cent., leaving £34,100 to be carried out to the guarantee insurance fund, which would then amount to £328,285.

CASUALTIES.

Accidents had lately deprived the company of the services of the *Jeddo*, *Northam*, and *Ottawa*, and the *Simla*, *Candia*, and *Massilia*, were at present laid up from similar causes. Although no human foresight could prevent those misfortunes, they were frequently treated by the public and passengers as evidence of defective management, and were made the subject of indiscriminating complaint. Three of the company's steamers—the *Chusan*, the *Azof*, and the *Granada*—were still under charter to the Government in China, and one, the *Shanghai*, was in the service of the Imperial Government of France. The company's fleet now consists of fifty-two vessels, of 70,753 tons, exclusive of eight transport, store, and coal ships.

THE INDIA AND CHINA POSTAL SERVICE.

The contract entered into between the Government and the company, in 1853, for the fortnightly conveyance of the Mails between this country and Calcutta and China, is now being carried on subject to termination on twelve months' notice from either party. Since the date on which this contract was commenced, circumstances have rendered several modifications and extensions necessary; and the company have also come under engagements, by contract and correspondence with the Government, for extensive postal services between this country and Bombay. The introduction of the latter was gradual: but by the combined working of the different lines, a weekly communication with India has been kept up since 1857. The service, which now works harmoniously as a whole, is thus carried on under many separate contracts and agreements—a system which is productive of much inconvenience to the company, and, it may be presumed, also to the Government.

The directors might not, however, have been led to move from this cause alone, but they found it imperatively necessary to submit a proposal for a new arrangement to the Government, on the more important grounds that were alluded to in the last half-yearly report, namely, that "the extra expenses, the strain upon the vessels, and the other disadvantages which attend the constant and punctual performance of the obligations of the Mail Service, are not adequately compensated by the present rate of subsidy," and also by reason of the continuance of the high cost of coals and stores prominently referred to in the same report. This proposal was sent in July last, and embraced the consolidation of the different contracts and agreements into one, the whole service to be paid for at a rate per mile calculated to afford the company a fair remuneration. The official vacations and other causes having led to delay, the directors have recently taken active measures to obtain a decision on the subject, and have at the same time signified that it was no part of their object to bind the Government to the consolidated contract for a term of years, but that they were quite content that it should remain at the option of either party to close it on twelve months' notice, as at present.

RISE IN RATES.

With regard to the rates of freight and passage-money, the directors had deferred taking any steps in this matter as long as possible, in the hope that the cost of coals and the prices of naval stores would undergo some abatement. The cost of fuel, which, during the last twelve months had amounted to the enormous sum of £850,000, had, however, rendered it imperative on them to resume from the 1st of January next the rates that were payable from December, 1853, to August, 1856; for at the latter date the directors made a reduction, which gave the public the full advantage which the company then derived from a diminished cost of coals and other items of expenditure.

DIVIDEND.

The amount of dividend payable under the present report would be—dividend 2 per cent., underwriting account 1 per cent., and from the commissions relinquished by the managing directors 2 per cent., in all 5 per cent., which would be paid free of Income-tax in one warrant on the 28th inst. The Chairman, in moving the adoption of the report, regretted that the rate of dividend was less than they had been accustomed to receive for some years past. The cause of that was notorious, for during the last twelve months the extra expenditure arising from the increased cost of coals was about £150,000, while the trade with India and China had not yielded corresponding increase in the receipts.

Naval and Military.

We believe that the Canton prize-money will shortly be distributed to those who took part in the capture. The amount realised is, we understand, £69,293 13s. 11d., subject to the following deductions:—The French share, £13,286 10s. 4d.; freight, £462 4s. 10d.; expenses of realising, £600; leaving a balance of £54,944 18s. 9d. Of this sum the naval force, 4,271 men, take £30,453 15s.; the army and marines, 3,412 men, £24,401 3s. 9d. Major-General Van Straubenzie, who commanded, receives one-twentieth of the amount appropriated to the British. The following notification has been made in the *London Gazette*:—

"With reference to the advertisements which appeared in the *London Gazette* of the 23rd and 27th November, 1860, giving notice of preparation for the intended distribution of the sum of £33,000 voted by parliament for the naval force employed on the China station between the 1st October, 1856, and the 26th June, 1858. Notice is hereby given that, as only those ships which were present on that station for not less than three months within the above-named period, are to receive one month's additional pay of thirty days, the whole of the crew of her Majesty's ship *Spartan* will not be entitled to participate, but only such portion of it as were drafted from her to other ships, and who have completed the three months' service eastward of Singapore."

It is intended to despatch by the next and following Overland Mails such stores and medical necessaries as may be required by the army at Peking.

The officers of the screw steam-sloop *Miranda*, (15), Com. H. C. Glynn, at Plymouth, are ordered to go on board the gunnery ship *Cambridge*, Capt. Arthur W. Jerningham, in Hamoaze, to receive instructions for using the Armstrong gun. The *Miranda* is going on the East India and China station or the Pacific.

The *Times* announces the resignation of Sir Baldwin Walker, as Controller of the Navy. Sir Baldwin has now for a period of nearly thirteen years satisfactorily discharged the duties of Surveyor and Controller of the Navy. He succeeded the late Admiral Sir William Symonds in 1848, having been sent for by the Government of the day from the Pacific, where he was in command of the *Constance* frigate, to take the post vacated by that gallant and able officer. As an acknowledgment of his valuable services, Sir Baldwin Walker was created a baronet in 1856. Sir Baldwin has, for some time past, been desirous of a more stirring employment than that afforded by a seat at a desk at Whitehall, and has accepted the command at the Cape of Good Hope, rendered vacant by the removal of Rear-Admiral the Hon. Sir Henry Keppel, K.C.B., to the Brazil station. Sir Baldwin will probably hoist his flag on board the *Euryalus*, (51), now fitting at Portsmouth with a poop for the reception of an officer of his rank.

We understand, says the *Army and Navy Gazette*, that the lists of recommendations for promotion which have been received from China have come in a very confused shape, so much so, that in some instances the identity of the individuals is not a matter of certainty. Nevertheless, we expect that the recognition of the services of those who have distinguished themselves will not prove unduly tardy. The promotion of Captains Rogers and Burslem and Lieutenant Chaplin was not only a rapid piece of officialism, but an unheard-of violation of red tape,—three officers having been promoted for gallantry in the field, in anticipation of the recommendation of the General commanding.

LIEUTENANT-COLONEL CREALOCK has sent home some sketches taken in China at the Taku Forts, which have been published by Mr. Hogarth, of the Haymarket.

SEVERAL officers have been named as likely to succeed Sir Baldwin Walker at the Admiralty. Among others, Rear-Admiral George Elliot has been mentioned as the probable future Comptroller of the Navy.

THE *Retribution*, 28, paddle, Commodore Harry E. Edgell, C.B., arrived at Spithead from China and the East Indies. The ship and her machinery are in a very disabled state, and at one part of her voyage it was doubtful whether she would ever reach England.

Her Majesty's sailing sloop *Amethyst* (26), Captain Sidney Grenfell, from China and the Pacific stations, arrived in the Plymouth Sound on the 6th inst. She left St. Blas, Mexico, June 20, arrived at Panama July 16, sailed therefrom on the 23rd, reached Valparaiso August 28, sailed September 15, arrived at Rio Janeiro October 14, and left on the 20th.

Correspondence.

"INTERPRETERS FOR CHINA."

(To the Editor of *The London and China Telegraph*.)

SIR,—It seems incumbent on me to pen a few lines in relation to a communication with the above heading, signed "Linguist," published in your last issue. It is not my purpose to question the vaunted scholarship of the Messrs. Major. I am willing to suppose that paternal partiality has had nothing to do in the estimate there given of the precocious sinologues, who, we are informed, have such a "thorough mastery" of the Mandarin dialect, as to be able to speak it "fluently," and also to read and "write," and far be it from me to question their fitness for the positions indicated, though attained at my cost, and in such a questionable manner. As, however, it is well known that the "learned Chinese pundit" referred to by "Linguist" was my teacher, whom at great expense I brought to this country, and as he is seeking to impose on the public, or is made a tool of for that purpose by others, justice demands I should say that your correspondent has made several mis-statements respecting him. 1st. He does not "speak Mandarin." 2nd. He is not "learned." 3rd. He has never been near Peking. 4th. He never carried off a prize—nor was he ever at any examination in China, much less a competitor among "80,000!" But for the conspiracy by which I was deprived of my teacher, and menaced with extortion, the mendacity displayed on this last occasion would have surprised me.—Your obedient servant,

12, Regent-square, W.C., Dec. 1st, 1860.

D. J. MACGOWAN.

Legal.

THE RANGOON AND SINGAPORE CABLE.

VICE CHANCELLOR'S COURT.—NEWALL v. ELLIOTT.—This suit was instituted by the plaintiff, who is a wire-rope and submarine telegraph manufacturer at Gateshead, for the purpose of having the defendants, who carry on the same sort of business in Cannon-street, in the city, restrained from infringing the plaintiff's patent for improvements in the apparatus employed for laying down submarine telegraph wires, and to restrain the sailing of three ships fitted up by the defendants with an apparatus for laying down a submarine cable between Rangoon and Singapore. It appeared that in 1854 the plaintiff contracted with the British Government to lay down a telegraphic submarine cable between Varna, Balaklava, and Eupatoria, and in the course of so doing invented certain improvements which were patented on the 14th November, 1855. The defendants subsequently fitted out a vessel, called the *Propontis*, with an apparatus somewhat similar to that invented by the plaintiff, and the latter brought an action in the Court of Common Pleas, which was subsequently referred to arbitration, with liberty for the arbitrator to state a special case for the opinion of the full Court. Both the award of the arbitrator, and the decision on the special case were in favour of the plaintiff. It was now alleged that the defendants had fitted up three vessels in a similar manner to the *Propontis*, the variations in the apparatus introduced by the defendants being of a very unimportant character. It appeared that in paying out cables there were two essentials in order to prevent kinking; first, it was necessary to have a large radius for the coil, and next to prevent the rope from becoming slack. This was formerly prevented by men who kept the rope taut. The plaintiff's invention had for its object to do away with the necessity for these men, and for this purpose he introduced the cone into the cylinder. The defendants had also introduced an internal stay into their cylinder, and this was the matter of which complaint was now made. In reply to the complaint, it was argued that the defendant's plan simply amounted to packing the cable; that it was a matter of that simplicity that it could not be subject of a patent. But it appeared in fact that this packing was not to be taken away before paying out commenced, but that it was to be used in the course of paying out. And, although it appeared from the evidence that the packing was put in for the purpose of paying out, yet in no place was it said that paying out would not, in point of fact, be made easy by it. Sir Hugh M. Cairns and Mr. Speed appeared in support of the motion; Mr. Rolt, Q.C., Mr. G. L. Russell, and Mr. Cleasby (of the common law bar) opposed the motion on the part of the defendants. His Honour said that he had inspected the specifications of the plaintiff's patent, and was of opinion that the apparatus proposed to be used by the defendants was substantially similar to that patented by the plaintiff, and that he was therefore bound to grant the injunction asked for. An appeal was heard in the Equity Court on the 13th inst., but was not decided.

SIR JOHN BOWRING.—The *Illustrated London News*, of the 1st inst. gave a portrait of Sir John Bowring, with an accompanying biography, in which it was positively asserted that Sir John had been re-appointed Superintendent of Trade in China, and Governor of Hong Kong. We thought the statement at the time highly improbable, and intimated the same in our last issue. We are now enabled to give a positive contradiction to the statement. Another paragraph, copied from *Galignani's Messenger*, which is also in circulation, states that Sir John "has accepted a diplomatic appointment from the Government of the Sandwich Islands, to act as their Commissioner for placing the commercial relations of that country with other communities on a satisfactory footing." The simple fact is, that Sir John Bowring, before leaving for Paris, offered to use his good offices with the Emperor of the French, to obtain some alterations in the commercial treaty which was wrung from the Sandwich Isles by the compulsion of a strong Power demanding from a weak State privileges and concessions for which little was given in return.

PROWESS OF THE CHINESE.—The *New York Herald* says:—John Chinaman has learned some useful lessons from the frequent whippings which he has had from the English. When he defeated the attack on the Taku Forts last spring less credit was given him for pluck than for the judgment which he displayed in fortifying his positions. The last advices from the Peiho announce that he attacked and beat the Allies in the open field on the march from Pehatang to the forts, the Chinese gingalls taking a longer range than the great Armstrong guns, ten of which were brought into requisition on this occasion. If every time he fights he improves in the science of warfare, and gains in pluck, John Chinaman will not prove such a despicable enemy after all. We are not sure that, much as it has been ridiculed by the English, Mr. Ward's way of getting to Peking will not be the one which they will be finally compelled to adopt.

The Queen has been graciously pleased to give orders for the appointment of Rutherford Alcock, Esq., her Majesty's Envoy Extraordinary and Minister Plenipotentiary to the Tycoon of Japan, and Charles Alison, Esq., her Majesty's Envoy Extraordinary and Minister Plenipotentiary to the Shah of Persia, to be Ordinary Members of the Civil Division of the third class, or Companions of the Most Honourable Order of the Bath.

The French Government, we understand, is about to send additional forces by the Overland route to China. The *Eldorado* and *Ulloa*, at Toulon, have received orders to prepare to proceed to Alexandria with the same. Stores and bullion are arriving daily at Toulon to be sent in these vessels.

A pamphlet has been published by Messrs. Smith, Elder, and Co., entitled "Italy for the Italians and China for the Chinese," being a copy of a letter addressed to Lord John Russell, by John Scarth, Esq., author of "Twelve Years in China."

At the conclusion of the first act at her Majesty's Theatre, on Saturday night, the telegram from China was read to the audience by a gentleman connected with the theatre.

A pair of China vases, the property of Messrs. Ellis and Everington, sold for 450 guineas.

THE WAR IN CHINA.

A series of despatches have been published by Government, which we give, to the exclusion of some of our usual headings of not so much present importance. They necessarily contain the secrets by which our ambassadors and military commanders were influenced, and which, of course, cannot be derived from any private source.

LORD ELGIN TO LORD JOHN RUSSELL.

Ho-see-woo, Sept. 16, 1860.

My Lord,—On the early morning of the day succeeding that on which I addressed to your lordship my despatch of the 11th inst. from Yang-tsun, and when I was already on horseback, two white-buttoned Mandarins arrived in hot haste from the north, bearing with them a letter to me from Prince Tsai and his colleague, the translation of which is the first of the documents herewith enclosed. This communication, as your lordship will observe, was somewhat defiant in its tone. The writers expressed surprise at my having started with a force from Tien-tsin in spite of their letter of the previous day, which letter had not, however, reached me until two days after my departure from that place, and required me to return thither in terms slightly imperious. It appeared to me that the proper way of dealing with such a communication was to take no notice of it whatever, and accordingly, without making any reply to it, I accompanied the advancing column of the army to Nan-tsai-tsun, a village which had been already fixed upon as the limit of that day's march, and which was about eight miles beyond Yang-tsun.

At about 7 o'clock in the evening a further communication from the same personages reached me at our new halting place. Its translation forms the second enclosure of this despatch. It purports to be a reply to my communication to them, of which the copy was sent to your lordship in my despatch referred to above. Both in letter and in spirit it is more modest than that which I had received from them only twelve hours before. It concedes unconditionally almost all the points in controversy between us. A strong desire is expressed that the British army may not be permitted to go beyond Ho-see-woo, a village one day's march in advance of Nan-tsai-tsun, and this request is accompanied by the somewhat ingenuous remark that, if halted there, it will still be sufficiently near to be called into play, should any hitch occur in the conduct of negotiations.

Before replying to this communication, which could not manifestly be treated with the same disregard as its predecessors, I addressed to Lieutenant-General Sir Hope Grant a letter, the copy of which, together with a copy of his reply, forms enclosure three of this despatch, with the view of ascertaining whether or not we were in a position to continue without interruption our hostile advance on Tungchow. If the answer to this inquiry had been in the affirmative I might perhaps have deemed it expedient to decline to listen to any overtures from the Chinese Plenipotentiaries until I should have been either under or within the walls of that city. When I learnt, however, that in the judgment of the Commander-in-Chief it would be necessary, before undertaking a march which might end in the assault of Tungchow to create a large depot of stores at Ho-see-woo and to bring up heavy guns—operations which would occupy from eight to ten days at the least, and which might, perhaps, involve a much more considerable expenditure of time—I resolved, with his entire consent and concurrence, to make a communication to the Chinese Plenipotentiaries, which might perhaps have the effect of bringing matters to a speedier issue, and enable us to avoid delays which at this season of the year and in the present low state of the river are not unattended with hazard. I may add that I do not think I could possibly, for the space of ten days or a fortnight, during which the general would have been engaged in concentrating a large army at Ho-see-woo, have turned a deaf ear to such overtures as Prince Tsai and his colleague were making, without justifying the belief that the avowed object of our march on Peking was not the real one, and that while we professed to be enforcing the stipulations of a treaty we were, in point of fact, bent on the conquest of the empire. A desperate attempt to resist, involving probably an appeal to the patriotism of the populations in our rear, or a speedy flight into Tartary, would have been the only alternative open to the Emperor and his advisers if this conviction had obtained possession of their minds.

The communication which, under these circumstances, I determined to address to the Chinese Plenipotentiaries, was in substance to the effect that the British Army would continue its advance on Tungchow, crushing all opposition which it might encounter; but that if the Chinese authorities gave me the securities for their good conduct which I required I would cause it to halt at a point within an easy stage of that city, and proceed from there with an escort of 1,000 men to Tungchow, for the signature of the Convention, and to Peking for the exchange of the ratifications of the treaty of Tien-tsin. I embodied these conditions in a letter which I entrusted to Messrs. Wade and Parkes for delivery, recommending them at the same time to endeavour, if possible, to obtain a personal interview with the Prince and his colleague, as I thought that what they might say verbally, in explanation of our real views and objects in China on such an occasion, when for the first time a functionary of the highest authority was about to come into contact with us, would be likely to produce a much more salutary effect than anything which I could write. For reasons which they explained on their return, and which were perfectly satisfactory to me, these gentlemen eventually decided not to deliver my letter. But they obtained access to the Prince and his colleague, and conducted all the other duties of their important and somewhat hazardous mission with a courage and ability which does them the greatest honour.

A letter to me from Mr. Wade, narrating briefly the principal incidents of this mission, the translation of a communication from Prince Tsai and his colleague, which crossed them on their way, and of a further communication from the same persons which Messrs. Wade and Parkes brought back with them from Tungchow, form enclosures 4, 5, 6 of this despatch. On their return, I put Baron Gros and Lieutenant-General Sir Hope Grant in possession of the information which they had gathered during their mission, and the following plan of proceeding was, after deliberation,

agreed on. The Commanders-in-Chief resolved to proceed on Monday, the 17th inst., from Ho-see-woo to the point at which it had been arranged that the bulk of the allied army should halt, and which it was understood would be reached in two days' march; at the same time, or rather before the departure of the army, Mr. Parkes undertook to start from Tungchow, accompanied by some of the gentlemen of my suite, who were to proceed thither for the purpose of making preparations for the reception of the embassy at that place, and to procure for us the means of transport, in which we were sadly deficient. Sir Hope Grant also determined to take advantage of Mr. Parkes's return to Tungchow, to send with him officers of the Quartermaster-General's Department, and of the Commissariat, and to furnish an escort for the protection of the whole party. The French Ambassador and Commander-in-Chief resolved, on their side, to adopt somewhat similar measures.

The last enclosure of this despatch is the copy of a letter which I requested Mr. Parkes to deliver to the Prince Tsai and his colleague on his arrival at Tungchow. It informs them that I agree substantially to the terms for effecting a pacific settlement of our pending differences with China which they had been induced by Messrs. Wade and Parkes to offer. I required, however, that a proclamation should immediately be issued to apprise the people that it was at the request of the Chinese Commissioners themselves that the British army halted at the place fixed upon, and I added that I would come under no obligation to withdraw it from this advanced position until I should have been satisfied that the Chinese Government had resolved to keep its treaty engagements. I also adverted in this communication to the fact that I was the bearer of a letter from her Majesty to the Emperor of China, which I should desire to deliver on my arrival at Peking.

I have, &c.,

ELGIN and KINCARDINE.

THE CHINESE COMMISSIONERS TO LORD ELGIN.

Received Sept. 12, 1860, 6 A.M.

Tsai, Prince of S., &c., and Muh, President of the Board of War, &c., Imperial Commissioners, make a communication:—

"The Prince and his colleague, having had the great honour to receive his Majesty the Emperor's gracious commands to proceed as Ministers Plenipotentiary* to Tien-tsin, and there in conference with his Excellency the British Minister definitively settle the form in which the stipulations accorded were to be arranged, addressed a despatch to that effect to his Excellency the British Minister, upon the 25th inst. (10th Sept.) Presuming that his Excellency cannot fail to have informed himself of these facts, they are indeed astonished to learn that his Excellency has, notwithstanding, again arrayed his troops and is moving forward from Tien-tsin.

"The purposes of his Excellency's Government being relations of friendship to endure for ever with the Government of China, is his hostile movement (literally array of troops) reasonable? If a hostile movement be necessary, then friendly relations do not exist. In view of these circumstances, it appears to the Prince and his colleague that it would be inexpedient on their part to hurry forward, without further deliberation, and it becomes their duty to request his Excellency the British Minister to send back to their quarters in Tien-tsin the whole force he has brought thence with him, thereby to show that he has no feeling of animosity, and to put it in some degree in the power of the Prince and his colleague to proceed to Tien-tsin, and in conference with him dispose of whatever there is to be deliberated about; such being the course consistent with professions of eternal friendship. They would add that if what is required is the execution of the treaty now concluded, without any additions extraordinary, they are not like the Chief Minister Kweiliang,†—they will assuredly not eat their words. But if the British Minister insists on advancing with a force, if he will not send back his troops, it is plain that he is not earnest in his desire for friendly relations. The troops of Government hold positions throughout the neighbourhood of Ho-see-woo, and if there should be any misunderstanding between them and the others, the negotiations of peace will be seriously prejudiced by it; nor is it possible for the Prince and his colleague to interfere. They can only hope that his Excellency will think over what has been stated. They are already at Matan‡ where they will wait until his Excellency write a reply to say that his troops are returned to Tien-tsin, that thereupon they may proceed to Tien-tsin.

"A necessary communication addressed to his Excellency the Earl of Elgin. Heifung, 10th year, 7th moon, 20th day (Sept. 11, 1860).

"Translated by THOMAS WADE, Chinese Secretary."

SECOND COMMUNICATION

Received at Nan-tsai-tsun, Sept. 13, 1860, 7 P.M.

Tsai, Prince of S., &c., and Muh, President of the Board of War, &c., Imperial Commissioners, make a communication in reply.

"On the morning of the 7th day of the present moon (12th of Sept.), the Prince and the Minister his colleague received a despatch from his Excellency the British Minister, in which he states that 'he had never desired any other than a pacific solution of the present question.' These words, which prove his Excellency is sincere in his desire for friendly relations, are most gratifying to the Imperial Commissioners. His Excellency proceeds to say, 'that it was only because Kweiliang showed himself unable to sign the convention immediately that his Excellency had felt it his duty, in order to prevent further loss of time, to move to some place nearer [the capital], and had accordingly resolved to proceed to Tungchow.'

"The Prince and his colleague have had the honour to be appointed, by the gracious commands of his Majesty the Emperor, Special Plenipotentiaries for the negotiations of peace. They have reached Matan, where it had been their intention to wait until until the forces of the British Minister should be withdrawn to Tien-tsin, and then to proceed to Tien-tsin and there sign the treaty (the convention?) as originally considered, and so to bring the question to a pacific termination, that no further time might be lost. His Excellency, fearing a further loss of time, adheres to

* Our term not the usual Chinese equivalent.

† Kweiliang's name is mentioned without any respect. He is not impossibly degraded.
‡ "Matan," ordinarily a landing-place or port, here specially of a place some miles from Peking.

his intention to proceed to Tungchow; and seeing that, if the Prince and his colleague were to return thither now that they have reached Matan, this moving back and forward would occasion a further postponement of the day [of signature], it would be best [they think] that there should be a conference between the parties. If, therefore, the British Minister will retire his forces to Tien-tsin, the Prince and his colleague will have it in their power to repair at once to Tien-tsin for a conference for the consideration and despatch of business. But if his Excellency be apprehensive that time will be wasted by these movements to and fro, there would be no objection whatever to his halting his force at Yung-tsun, and selecting some place midway [between that town and Matan], near enough to suit his convenience, at which business might be discussed and disposed of. Let his Excellency decide whether it shall be Ho-see-woo or Ngan Ping, and inform the Prince and his colleague which he chooses; and then, on receipt of his reply, will name a day for a conference, and having then, at whatever spot within reach [he shall name], or without travelling further, concluded a treaty [containing] the propositions originally brought forward, seal it and sign it. Thus, assuredly, there will be no delay; if negotiations should not run smoothly, what difficulty would his Excellency have in recommencing his march upon Tungchow? It would never be too late.

"His Excellency is requested to reply with all speed. The Prince and his colleague will make a point of awaiting his reply to shape their course. They have to add that on receiving their special commission to come forward and negotiate peace, they set out in such haste that it is impossible that there should be perfect uniformity in the paper, seals, &c., which they use; but let this occasion no doubt or apprehension to his Excellency.

"A necessary communication addressed to his Excellency the Earl of Elgin. Hienfung, 10th year, 7th moon, 27th day (Sept. 12, 1860).

"Translated by THOMAS WADE, Chinese Secretary."

LORD ELGIN TO SIR HOPE GRANT.

Nan-tsai-tsun, Sept. 12, 1860.

Sir,—In my despatch of the 8th inst., I informed your Excellency that I considered it to be my duty, in consequence of the want of good faith shown by the Imperial Commissioner, Kweiliang, to intimate to him that I should call on your Excellency to convey me to Tungchow, and that I should not conclude any treaty with the Chinese Government until I had reached that place. Since I left Tien-tsin I have been apprised of the nomination of new Imperial Commissioners, of very high rank and official standing. These Commissioners assure me that they hold powers from the Emperor of the most certain character, and invite me to confer with them at some point near to this place. Before I answer this I should be glad to learn from your Excellency whether there are any military difficulties in the way of an immediate advance on Tungchow. That there are none which would not be superable by your Excellency and the force under your command I confidently believe; but if there be any which would, in your judgment, occasion delay, it would be my duty to consider them in dealing with these overtures of the Chinese Plenipotentiaries.

I have, &c., ELGIN and KINCARDINE.

SIR HOPE GRANT TO LORD ELGIN.

Head-Quarters' Camp, Ho-see-woo, Sept. 13, 1860.

My Lord,—In answer to your Excellency's letter of the 12th inst., I have the honour to state that it will be inexpedient for the army under my command to move from Ho-see-woo for seven or eight days at least. The force I have with me at present is small, and must be reinforced. The heavy guns now on their way up by water cannot arrive for several days, and it will be necessary for me to form a depot at this place for supplies to make me independent of the country, from which it is very uncertain whether I shall be able to get a sufficiency. Supplies are expected up by the river, but it will take several days before they arrive.

I have, &c., J. HOPE GRANT, Major-General.

THE INTERPRETER'S REPORT TO LORD ELGIN.

Pa-li-Chiao, Sept. 23, 1860.

My Lord,—It had been, of course, the intention of Mr. Parkes and myself to report formally to your Excellency the result of our expedition to Tungchow, and the evening before Mr. Parkes left Ho-si-cou we carefully went over the whole ground together. From our joint recollection of what took place, aided by some rough notes made during our interview with the Commissioners by Mr. Parkes, I prepared a memorandum of considerable dimensions. This was to have been put into shape and signed by us both; but my own movements, as your Excellency is aware, have been such as to render its reduction impossible, and I must, therefore, limit myself to a précis of the paper, trusting that before the departure of next mail I shall be able to present it to you with Mr. Parkes's signature.

We reached Tungchow about noon on the 14th, not having spent the night at Matan, the village at which your Excellency had expected we should find the Imperial Commissioners Tsai and Muh. Matan is a most wretched place, and the Commissioners had left it, I presume, on hearing of our advance to Ho-si-cou. Along the road to Tungchow we saw sufficient evidence of the neighbourhood of a large force, but none of the works or batteries found by the Allied force on the 18th inst. We reached the city about noon, and took up our abode in the *yamun* of the chief civilian, and about four o'clock proceeded to the temple outside the east gate, in which the Commissioners were waiting our arrival. Our approach had been announced the evening before from Matan. We were shown into a side room, and the Commissioners almost immediately followed. The Prince Tsai (I tsin-wang) is a tall, dignified man, with an intelligent countenance, though a somewhat unpleasant eye; Muh-yin, the President of the Board of War, softer and more wily in his manner, but also intelligent. Both were extremely polite, the Prince especially, and without condescension or affectation. The Commissioners relieved us of the necessity of producing our letter of credence, by requesting to be informed what had dissatisfied your Excellency, to whom they had written once and again. We said that your Excellency found difficulty in deciding whom to trust as representative of the Chinese Government, or by what forms it would consider itself bound, and, in explanation we reviewed

briefly the history of our intercourse for the last three years. The Prince deprecated allusion to the past, defended Kweiliang as very old and infirm, and insisted on the guarantee afforded by his own high rank for the validity of any engagements he might accept for his Government. We contended that reference to the past was unhappily inevitable, and closing with what he advanced in support of his own superiority as Imperial Representative, we endeavoured to draw from him what authority he would be able to produce to your Excellency for his exercise of the plenipotentiary powers assumed by Kweiliang.

He denied that the formula employed by Kweiliang was Chinese. We cited the decrees of 1842 and 1858, and after much discussion on the nature and object of powers, and in particular upon the national obligations arising out of contracts signed by Plenipotentiary Ministers, the Prince, having first declared that what he signed would be as though the Emperor signed it, agreed to procure such a decree as would correspond to our definition of the powers required.

This obtained, he wished to know what would he be required to sign? We assumed that he knew what had passed at Tien-tsin. He ignored the Convention altogether, although in two of his despatches already written, he had promised to sign it. I reminded him of this, and produced a copy of the Convention, which I had in my pocket. He read it rapidly, remarking at first that, if he could promise all the rest, he could not promise the payment demanded within two months at Tien-tsin; if the money were not forthcoming, we should be charging China with another breach of faith; could we not promise to make the terms five months? Of course we could promise nothing. Then he could not promise anything till he had conferred with your Excellency. I think he here rose and left the room. Muh-yin meanwhile perused the draught, and although he had professed difficulty in understanding our Chinese, and had even affected a little deafness, he showed himself well up in all that had just passed, and indeed, in all the questions at issue. Presently, the Prince returning, Mr. Parkes asked him whether he would point out any other articles to which he took exception, and he then objected to the disposition of the troops, the residence of her Majesty's Minister at Peking, the payment of indemnity, the opening of Tien-tsin to trade, and lastly, though this was not in the Convention, to the escort which he had heard was to accompany your Excellency. All this, however, with little show of earnestness; the old arguments against our coming north at all, the climate, the disposition of the people, &c., were urged, but not as if it was expected they would influence us. After a *vas* deal of desultory debate, however, we arrived at the following position:—

"We explained that your Excellency, having declared your intention not to sign the Convention elsewhere than at Tungchow, would infallibly come to that city for that purpose; that it would make no difference to your Excellency, whether you came with the large force now on its way from Tien-tsin or the escort originally mentioned to Kweiliang; but that your Excellency assuming that it would make every difference to the Chinese Government, had sent us to wait on the Prince and his colleague for the purpose of impressing upon them the conditions upon which the advance of the force upon Tungchow might be stayed. We were come simply as witnesses to your Excellency's desire for a pacific termination of the present misunderstanding should it be possible; but we were not authorized to promise any abatement of the demands already known to the Chinese Government; indeed, it was rather to be assumed from what had passed since our arrival at Peh-tang that further postponement of the satisfaction of these would but lead to the addition of others; the most we could undertake to say was that, if we were enabled to report to your Excellency that the Commissioners were ready to sign the Convention, to produce the necessary powers, and to furnish some adequate guarantee for the adherence of the Chinese Government to the engagements he was to contract for it, the British force would not advance beyond a camping ground to be selected to the south of Chang-kia-wan, an old town of some substance, about four miles south of Tungchow. We had already had a long conversation upon the character of the escort which was to be sent with your Excellency, and the readiness with which we admitted the perfect right of the Chinese Commissioners to be attended by an escort of equal strength, or if they wished it of greater strength, had disposed of that difficulty. The greatest opposition was now offered by the Prince to our proposal to encamp near Chang-kia-wan. Indeed, more than once he seemed determined to run all risks rather than concede this point. A distance of five li—say a mile and a half—he at last admitted would suffice, and I withdrew to another room to prepare a draught of the letter to be written by the Commissioners to your Excellency.

"The difficulty in this was the guarantee for the future. The Prince again appealed to his position in the Empire, repeating that what he signed was as though the Emperor signed it, &c.; and, after a little discussion as to how he should state this, the declaration as it now stands was agreed to. During my absence the Prince had been in conversation with Mr. Parkes, who, in answer to one of the general expressions of a hope that henceforth friendly relations would continue uninterrupted, had remarked that an increase of intercourse would doubtless make us better friends, and that he rejoiced in the prospect of an acquaintance between the representatives of foreign Governments and the three Princes. Your Excellency will bear in mind that from all we have ever been given to understand the actual government of the country is in the hands of Prince Hwui, the Prince of Ching, and the Prince of I, to whom Mr. Parkes was speaking. He started at the words 'the three Princes'; 'by whom,' added Mr. Parkes, 'we have been much misunderstood;' and he immediately rejoined, 'Not by them alone, but also by (writing the character with his forefinger in the air, *a la Chinoise*) the Han' (Chinese). He then rose, went round the table, and again whispered the word Han. They then became very friendly, and in answer to Mr. Parkes's assurance that our real wish had ever been to do the country service, the Prince at once suggested that we might help them much in supplying the capital with grain; hinting at the same time that we should not, he hoped, attempt to make too great a profit upon it. He then tried to sound Mr. Parkes upon the question of co-operation against rebels, but finding him avoid this question, returned to the grain supply. My return with the draught put an end to the conversation, and as soon as it had received its final correction, it was sent to be copied. We did not wait for it, as the Commissioners' seal was at their residence in the city; and as it was now well past midnight, we took our leave, very

weary of an interview which had lasted upwards of eight hours. The earnestness and even vehemence with which the Prince had discussed, first the question of powers, and lastly, the position of the force, induced us both to believe that his surrender at last was *bona fide* for the purpose of preventing further hostilities. I think so still; the deep sighs with which Muh-yin perused the despatch we were to carry away may have had other causes, but they appeared to me at the time not unfavourable symptoms.

"The expected letter arrived shortly after us, at our lodgings, and at five o'clock we started for Ho-see-woo. South of Chang-kia-wan we observed numerous cavalry vedettes, but no large body, and none of the works upon which our force came two days later. In the neighbourhood of Maian, long lines of a very wretched cavalry presented themselves in parade order. The officer to whom we spoke inquired eagerly if there was a prospect of peace, and the following day they were withdrawn throughout the country in question. Mr. Parkes, who had occasion to accompany a civil Mandarin, who had been waiting our return beyond our lines, is my authority for this statement. I think it worth mention that a prisoner, taken on the 21st, in the course of conversation volunteered the remark that the fighting was all the doing of San-ko-lin-sin, who was as anxious for it as the Prince Tsai was opposed to it. This accords with other reports. In the absence of Mr. Parkes, I may be permitted to state that, as on all similar occasions, the greater part of the work of discussion and persuasion fell to his share. His name was evidently well known to the Commissioners, and they treated what fell from him with particular attention,—I have, &c.,

"THOMAS WADE, Chinese Secretary."

THE CHINESE COMMISSIONERS TO LORD ELGIN.

Received Sept. 14, 1860.

Tsai, Prince of S., and Muh-yin, President of the Board of War, Imperial Commissioners, make a communication:—

"The Prince and his colleague addressed a communication to his Excellency, the British Minister, on the 26th inst. (12th of September), and a reply to a communication received from his Excellency on the 27th inst. (13th of September), and being aware that both despatches have been received by his Excellency, they are really at a loss to understand why he has not replied to them. The Prince and his colleague having been sent from the capital, by his Majesty's commands, for the purpose of negotiating peace with the British, their sole desire was to meet his Excellency, and in person effect with him a restoration of friendly relations; but the garrisons stationed north of Ho-see-woo are under the command of the high officers in charge of the force, the Prince and his colleague have nothing to say to them, and were the troops accompanying his Excellency, which they understand have reached Ho-see-woo, to advance so far as to come in contact with these garrisons, the inevitable consequence would be a misunderstanding between the two bodies, which would disappoint the hope, strong as it is, entertained by the Prince and his colleague, that friendly relations may be firmly established—a consequence seriously to be deplored.

"In the British Minister's reply of the 26th inst. he stated that his only object was to proceed to Tungchow; the Prince and his colleague have really no object to baulk his Excellency's worthy purpose, and they now engage that if he will station his force at Yang-tsun-tsai-tsun and Ho-see-woo, without making further movement onward, and will then meet the Prince and his colleague according to the article proposed by him at Tien-tsin, on the subject of his admission into Peking, with a small suite unarmed, the convention, they promise, shall be concluded, sealed, and signed; and, this done, a day chosen for his Excellency's entry into Peking for the purpose of exchanging the ratifications, that no further time may be lost.

"The carriages and other vehicles required by his Excellency shall be provided by the local authorities, and shall be sent forward as soon as the number of his suite shall have been stated. Orders shall at the same time be given to the military authorities to furnish an escort; and the Prince and his colleague will write to the high officer commanding the forces to explain to the troops in peremptory terms that there is to be no alarm or unruly conduct. Thus will his Excellency be enabled to advance with all speed. The Prince and his colleague can further desire that the local authorities supply the British force with everything it may require at the points at which it is stationed. If matters can be arranged in this sense, the Prince and his colleague may be more or less spared the disappointment of their desire for the establishment of friendly relations. They assume that his Excellency entertains a corresponding desire, and they trust that he will have the goodness to reply to them as soon as possible.

"A necessary communication addressed to his Excellency the Earl of Elgin, &c. Hienfung, 18th year, 7th moon, 28th day (13th of Sept., 1860), about 10 P.M.

"Translated by THOMAS WADE, Chinese Secretary."

ANOTHER DESPATCH FROM THE COMMISSIONERS.

The Imperial Commissioners Tsai, Prince of S., and Muh, President of the Board of War, make the following communication:—

"His Excellency the Ambassador having sent his secretaries, Messrs. Wade and Parkes, to Tungchow, the Prince and his colleague were informed by them on their arrival here to-day of all those points upon which the Ambassador insists, and there is no one of those which is not now thoroughly understood by the Prince and his colleague. On the subject of the powers which are to be produced by the Plenipotentiaries on both sides when they met at Tungchow for the discussion of business the Prince and his colleague have no difficulty in engaging that the necessary Imperial edict shall be forthcoming on their part. To the inquiry made on behalf of the Ambassador as to what security can be given for the faithful execution of the engagements now entered into, the Prince and his colleague have to reply, that no comparison can be drawn between the authority vested in them and that held by other Ministers who may have been charged with negotiations, and that this fact affords a positive assurance of the future observance of good faith on the part of their government. The Prince and his colleague having further been called upon to state whether they can engage to conclude and sign a convention identical in every respect with that recently

communicated to the minister Kweliang, and, this effected, that the Treaty of 1858 shall be exchanged in Peking, they willingly, undertake the performance of both these stipulations.

"The Prince and his colleague, having thus accepted the above conditions without exception, have now to express an urgent wish that his Excellency the Ambassador will not bring up the main body of the British forces to Tungchow, but will limit his escort to about 1,000 men; also, that the former shall not occupy any position nearer than five li from the town of Chang-ke-wan.* They have further to urge that the English forces shall make no onward movement after the convention shall have been sealed and signed, and that, this being done, they shall be withdrawn at an early date.

"A necessary communication to his Excellency the Earl of Elgin, &c. Dated Hienfung, 18th year, 7th month, 29th day (14th of September, 1860).

"Translated by HARRY S. PARKES."

LORD ELGIN TO THE COMMISSIONERS.

Ho-see-woo, Sept. 16, 1860.

The undersigned, &c., has received a despatch from their Excellencies the Imperial Commissioners, Prince of Tsai, and Muh, President of the Board of War, under date the 13th inst.; the despatch of their Excellencies of the 14th inst., brought back by his Secretaries from Tungchow, has also reached me.

In reply the undersigned has the honour to state that he is willing, if all the conditions specified below be faithfully carried out, to stipulate that the main body of the British force shall not advance beyond five li on this side of Chang-ke-wan. It will commence its march towards that place tomorrow, and it will commit no hostile act upon the route, unless it encounters opposition. In order, however, to prevent misunderstanding, it will be well that their Excellencies should cause a proclamation to be forthwith issued to the effect that as peace negotiations are on foot, and as the British Ambassador and Commander-in-Chief have agreed, in compliance with the request of their Excellencies, that the main body of the British force shall halt at the point in question, the people should at once return to their homes, unclothe their shops, and re-open their markets. This is essential for the protection of the people themselves. All supplies required by the troops will be punctually paid for, if they be offered for sale, but the country will infallibly be scourged to obtain them if no markets be opened.

When the proclamation above referred to shall have been issued, and all necessary preparations shall have been made at Tungchow for his reception, the undersigned will proceed to Tungchow with an escort of about one thousand men, and having there signed the convention will go on accompanied by the same escort to the capital, there to exchange the ratifications of the treaty of Tien-tsin, and to present to his Majesty the Emperor the autograph letter with which he has had the honour to be charged by her Majesty the Queen of England. After these several acts shall have been performed, it is the intention of the undersigned to take steps without delay for withdrawing the British troops from the vicinity of the capital, and placing them in the positions specified in article 7 of the convention. But he must remind their Excellencies that, by their own admission, he has been twice deceived by functionaries professing to hold from the Emperor of China full powers to enter into treaty engagements with him. Whether, therefore, he can be able to give effect to that intention sooner or later will depend mainly on the evidence which the Chinese Government shall furnish of its determination to carry out faithfully all the articles of the Treaty of 1858, and of the convention about to be concluded at Tungchow.

ELGIN and KINCARDINE.

Want of space compels us to omit a portion of these Despatches, which will be completed in our next.

HAKODADI, JAPAN.—A letter from this place, written by Mr. J. T. Stephenson to his brother, Mr. W. S. Stephenson, of Roby, near Prescott, has been published, in which the writer describes the vexatious interference of the officials in all matters, and goes on to describe many of the domestic institutions of the country. Among other instances, he says, of the Japanese breaking the treaty, is with the exchange and currency, and in refusing to sell horses to foreigners. If the consul speaks to the officials about it, they assure him that such is not the case; and, as I said before, the Japanese will not go before the consul and say that it is so, but they tell us so privately. The value of a horse here is about \$12 (for a No. 1), and I have seen a foreigner offer \$5,333, and be refused. There are a certain lot of men appointed to work for foreigners, and the same with lighters for cargo. I have known the Custom-house, or at least the Government officers, for they are all as one, send off on board of a ship word to the Japanese labourers to stop work at two o'clock in the day, "beautiful weather;" and money could not persuade them to stop a minute after they received the order.

ASCENT OF FUSI-YAMA IN JAPAN.—A very interesting account of this beloved and venerated mountain of the Japanese, appeared in *The Times* of the 29th ult., from the pen of Mr. Fonblanque, A.C.G., who was invited by Mr. Alcock, our envoy in Yedo, to join his party, which was further composed of Mr. Eusden, Vice-consul at Yedo, Messrs. Gower and Macdonald, attachés; Lieutenant Robinson, Indian Navy; Mr. S. Gower, and Mr. Veitch, a botanist. One of the Vice-Governors of Yedo, Matabé, the interpreter to the Legation, and several Yacomins formed the escort, and norriman-bearers, bettos, coolies, servants and followers, together with a troop of packhorses, swelled the *cortege* to the dimensions of a small invading army. The holy mountain is under the sole jurisdiction of the priesthood. The crater of Fusi-Yama, to which the party ascended, is between two and three miles in circumference, and about 600 yards in depth, and from observations made, the highest point is something more than 14,000 feet above the sea. The Japanese have generally allowed 17,000. There has been no eruption for three centuries.

* Chan-ke-wan is twelve li (or rather less than four miles) from the south face of Tungchow; the distance alluded to will therefore be about five miles from the latter city.

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

Suggestions for the insertion of information required by our subscribers will have due attention and acknowledgment.

A REGISTER is kept of the addresses of all persons connected with the FAR EAST, and reference can be made to the same by personal application at the office or by letter. Passengers arriving by either Overland route or sailing vessels, in England or on the Continent, will oblige by forwarding their address for the information of inquiring friends.

Post-office orders should be made payable at the Lombard-street Office, to MORTIMER WRIGHT.

Our OFFICES in this city have been REMOVED from 337, Strand, to 7 George-yard, Lombard street, E.C. Newspapers and literary communications should be addressed to the Editor. Correspondence relative to Advertisements, Subscriptions, and the general business of the Paper should be addressed to the Manager, and not to the Editor.

Correspondents and Newspaper Publishers in INDIA, CHINA, JAPAN and the EASTERN ARCHIPELAGO are requested to address all communications, newspapers, &c., via Marseilles, to the Editor, Box No. 70, General Post-office, London, E.C., which has been opened specially for the same.

Any information required by Subscribers, in reference to Commercial or General matters in CHINA, JAPAN, SINGAPORE, and other parts of the FAR EAST, will be supplied on application at the Office, where files may be seen of the Journals published in those countries.

As announced in our last, we give in a SUPPLEMENT the Export Cargoes of Vessels cleared for China and all parts of the Far East. We regret to state, however, that we have, quite unexpectedly, been disappointed in obtaining returns from all the Continental ports. Our correspondents write that the Custom Houses do not furnish them, and no other source is reliable. We shall not relinquish our efforts to overcome this difficulty, and trust in a short time to gain our point. From the American ports our correspondent at New York advises us that he will have difficulties which will require some little time to overcome. In the meantime the exports from Great Britain will no doubt be found of sufficient importance and general interest to all our mercantile supporters.

The London & China Telegraph.

LONDON, SATURDAY, DEC., 15, 1860.

THE THIRD CHINA WAR.

THE very important news detailed in our present issue announces the occupation of Peking by the Allies, a climax which has been desired by most of our countrymen in China. We shall see the good or bad results anon. As to their ability to hold it, we have no doubt, nor have we any on the score of their being well fed, clothed, and in every way keeping themselves healthy and comfortable. There is plenty of food and nicely wadded coats, and of course they will have both. The fleet in the Gulf of Pecheli, however, we are not so sure of. It will be next to impossible to find any harbour which will afford sufficient comforts for the severity of the season there. Vessels which cannot get up the Peiho river to Taku or Tientsin must quit the gulf, but a great many of the craft can be lightened to 12 feet draft, which will carry them to Tientsin, where there are already several vessels connected with the expedition. The Chinese, however, will not harass us now anywhere on the line from Peking to Taku, if we can maintain a sufficient force at Tientsin. We hear that Sir Hope Grant has applied for immediate re-inforcements, but they cannot reach in time for any service, for certain are we that the next mail will bring us accounts that the Imperial Government has come to terms and given every accommodation to the Allied troops. We do not consider that the flight of the Emperor will be subversive of the government; it was merely a precautionary step, not knowing but what the "Barbarians" would inflict summary punishment on his devoted head, which, of course, would be the highest sacrilege, and must be prevented at any cost. His own debauched life would dictate the step, and King Francis II. is certainly more worthy than he.

We have that confidence in Lord Elgin that—hard as the demands he may deem it necessary to make may appear to the Chinese—he will exact no more than can reason-

ably be expected they are able to meet, and thus prevent for the future, as far as it is in his power, any future costly expeditions to enforce his treaty. Lord Palmerston, a few months since, in his speech on the Fortification Vote, said, "The stronger Power naturally exacts conditions which the weaker may not be disposed to grant." Of course the noble Lord meant this in reference to some other Power, since his Government has never shown a like tendency, and even if it had. Lord Elgin holds a *carte blanche*, and is well aware that he will best promote the interests of all by being moderate and firm. We cannot, however, but think that had a more vigorous policy been adopted by our advisers in China in stopping the large supplies flowing through the various Custom-houses into the Imperial Treasury, the Chinese Government would have been crippled in their preparations for resistance, they would have sued forgiveness for past errors, and ratified the treaty. We must, however, admit that this was against all precedent in our relations with China, and as it might have jeopardised our trade, and consequently the revenue derivable here from that source our Government would have been short-sighted enough to have condemned the measure, forgetting that it might have saved the enormous outlay in equipping the present expedition. So, notwithstanding—as we observed last year—that the Imperial Government had made all efforts to resist the progress of our Ambassador to Peking, matters were allowed to go on as usual.

The Honourable Mr. Bruce, our Ambassador in China, no doubt sees the matter in this light, and also that he acted unwisely in refusing, in the first place, to see the commissioners at Shanghai. He had everything to gain by such an interview, and it could not, with proper management, in any way have interfered with his determination to proceed to Peking for the ratification of the treaty. Rumour has it that Mr. Lay, the interpreter, advised him to see the Commissioners. We should like to know the truth of this. We do believe that Mr. Lay, in common with others who have any experience of the Chinese, most truly regrets that we should be so severely punishing this nation, with whom we desire nought else but to trade. It must arise from bad management that small evils should have become expanded into the proportions they have assumed. Not the least of the evils arising out of this state of things is the alliance with the French, who have certainly no sympathy with our connections in China. When the French historian chronicles this war, we may judge of the part we shall be assigned by the narrative of the Crimean war by M. de Basancourt. But this we can afford to laugh at, if our gallant allies do not hereafter give us trouble in the Far East, about which they certainly knew little until we initiated them. Their present operation in Cochin China augurs badly for the undisturbed progress of trade.

OUR TRADE WITH JAPAN.

MORE than eighteen months ago we directed the special attention of our merchants to the trade prospects opened up to us in Japan, and the anticipations then held out have been more than confirmed by the influx of articles of a useful character from Japanese ports direct, as well as indirectly through Shanghai and other Chinese ports. Not that the course and amount of our trade is yet so smooth and satisfactory as we could wish it—as evidenced in our correspondent's letter which appeared in a late number—although much has been done and is doing by Mr. Rutherford Alcock, the able British Plenipotentiary, to soften down difficulties, and to facilitate trade. The valuable services of this gentleman have, we are glad to notice, just been rewarded by her Majesty with the order of the Companionship of the Bath.

The intelligent people of this populous country are all active in trade, in fisheries, in agriculture, or the mechanical arts, and are but too glad to find foreign outlets for their goods and wares, if the authorities will but let them have free liberty of action. The imports of Japan products into London have been of late much more extensive and varied. Among others recently received, besides the large staples of copper, wax, tea, and silk, are soy, beeswax, fish-oil, rapeseed, hemp, galls, saltpetre, camphor, cinnamon-root, and cassia-bark, seaweed-isinglass, mother of pearl and ear-shells, bronze and fancy articles, &c. The fish-oil, which can be obtained in large quantities, is, like the vegetable wax, valuable to the candle-makers, and readily saleable. The trade already carried on between Shanghai and Nagasaki is very extensive; the distance between these ports being under 500 miles, and steam communication is kept up between them by private vessels, and when the Government give up the ves-

sels now under charter from the Peninsular and Oriental Company a regular mail line will, no doubt, be established, which, we may add, is very much required. The Japanese seem very desirous of adding to their steam fleet, an evident instance of their shrewdness and intelligence. A steamer was recently given to the Japanese Ambassadors by the United States Government, and they have lately navigated another across the Pacific from San Francisco. The recent visit of the Japanese functionaries to the United States cannot fail to have given them a more favourable impression of the skill, activity, progress, and extensive commerce of the nations of the West, and will be the means, we trust, of removing their prejudice to foreign intercourse, and causing them to appreciate the advantages of extended trade, based upon reciprocal good faith and honesty. That they are not slow to carry on an active trade with China, is evident from the extent of the transactions they pursue with the northern ports of that empire.

From the official returns of the import and export trade carried on under foreign flags at the port of Shanghai, for the half year ending 30th June, 1860, published by the Foreign Inspectors of Customs—to whom the public are indebted for much valuable data, which could not be obtained under the old Chinese system of customs—we have made an abstract of the articles imported from Japan, which we shall publish shortly, and these will convey a fair impression of the extent of the staples, very many of which are of great importance to our merchants, and are transshipped largely to Great Britain. For instance, about 6,084 piculs of Japan tea were sent from Shanghai in the six months, half to England, and half to America, besides the direct arrivals. Of Japan silk 5,000 bales were re-shipped in the year ending 30th June last from Shanghai, principally to Great Britain. That the silk production of Japan may be largely extended is evident, since the climate is favourable for the growth of the mulberry, and the habits of the people are peculiarly adapted to the manipulation of the thread. The richest silks, satins, and crapes to be found in the world are to be met with in Japan. Among other fibrous substances are cotton, coir, flax, and hemp. The cotton examined under the microscope is not so fine as the average American samples, and the fibre is shorter and more easily broken. It is of a good colour, however, and has a greater number of serrations, so that it will draw, with proper handling, into a very fine thread. It has, apparently, a great many natural crooks in each fibre (this appearance may be given to it in dressing) which renders it easier to spin, and makes a bat of it very elastic. From this cause and a natural harshness, owing to the number of barbs in the fibre, it feels to the touch very much like wool. Some specimens of Japan hemp we have seen, imported into London, are of a very fine quality. Other kinds, again, are entirely destitute of any linty appearance, and possess a long woody fibre, about five feet in length. The whole resembles the thin bark of a tree until separated into fibres, and is quite stiff with a resinous sap. Both articles, the cotton especially, could be made available, and, if to be had in large quantities, would furnish the basis of a valuable commerce.

Increased attention would seem to be now given to the metallic industries. Copper, which is so abundant, is beginning to be shipped largely; 1,628 cwt. of Japan copper in various forms was received at Shanghai in the six months, most of it intended for Europe, and an importation of 730 packages of copper wire and plate has just arrived in London per *Fairy*, chiefly, we believe, from Japan. Copper was to be had in the early part of last year in Japan as low as 1½d. per pound, but no doubt it will soon find its true market value. Many solid bronze castings have been received in London. The iron mines of Japan are being reworked with energy; 655 tons of manufactured and unmanufactured iron are among the imports at Shanghai, and about 170 cwt. of iron sand. We propose at an early date giving a detailed abstract of the extent and value of our direct trade with Japan since the arrival of the first ship, the *Florence*, in April last year.

THE REBELLION IN CHINA.

WHETHER it be the warm climate of Shanghai, or its limited sphere of social intercourse, that affects the judgments of some of our fellow-countrymen in that quarter, we are at a loss to decide, but certain it is that their conclusions on the rebel movement are far from correct. Perhaps the very proximity to the scene may prevent some minds from taking a large and comprehensive view of the whole of the phenomena. With the

abundant material which we now possess, and the numerous facts brought to this country by every mail, together with our personal experience of the national character of the Chinese, we ought to be in a position to see the true character of these insurgents, and to foresee in some degree the effect which their acts will undoubtedly have upon our commercial and missionary prospects in that country. It seems, however, that when peace has been concluded between China and the Allies, the internal disorders—and particularly the rebellion of the Taiping, will present obstacles to the progress of civilisation and trade as yet little appreciated by the public. A high literary authority (*Athenæum*) says, "hundreds of thousands have fallen in the cause, but thousands and myriads have stepped forward to supply their place; and it may be that, in spite of foreign opposition and the diabolical cruelties of the Mandarins, the cause of freedom will triumph, the Tartars will be driven from the land they have scourged so long." It should be well known to this authority that in fact most of the high officials (according to the Red Book, the official register of China, out of 20,327 officials, only 3,295 were Tartars, and of those many were employed in their own country) in China are Chinese, and not Tartars—and, as far as we know, the Tartar Mandarins, whom our authorities have come in contact with, have shown better feeling than the real Chinese. Yeh belonged to the latter. It has been stated by competent authority that the Tartar officials have been in general less oppressive towards the people than the China Mandarins. Whether the cause of freedom will be advanced by the Taipings is very questionable, and as to "thousands and myriads having stepped forward to supply the place of the fallen," this authority does not say whether they came forward voluntary or on being forced. That the latter is the case we know.

It seems, however, that every journal and periodical is determined to say something on the subject, whether it has anything to say or not. Letters are received from the East with the views of private individuals on the spot; these are taken as faithful representations of the true state of the case. It is the duty of the public journalist to weigh carefully conflicting evidence, and to guide the public mind to a reasonable judgment. The glory of the free press of this country is that it represents the judgment of the many-headed public, not, indeed, in the innumerable diversities of mere opinion, but in the one true and impartial conclusion to which these numerous opinions lead. What we want is independence of thought in these matters. Let us divest ourselves of the idols of our imaginations, and proceed to analyse the history and religious sentiments of these Chinese revolutionists. It should be understood in the first place that we only need a few leading facts concerning them, by way of premiss, to render our conclusion sufficiently correct. We may ask in passing, are the motives of the rebel chief of a political or a religious character? Does he make a handle of his religious profession to overthrow the Tartar monarchy? or is his object first to upset their present regime, in order to establish Christianity and a constitutional Government on its ruins? The answers to these questions are abundantly manifest in his very acts; the acts which he sanctions—the proclamations which are issued under his name, and, above all, by the devastations which mark his course. We may perceive from these, that his professed motives are both political and religious—political without any form of polity, and religious while he ignores some of the first elements of social economy and order. The movement does, indeed, tend to weaken the Government, which is in an imbecile condition, but no effort is made to consolidate the power gained, or to conciliate the already oppressed people over whom he has placed himself. As for setting up a constitutional Government, or any rule better than the present form, or establishing evangelical truth in the country, we do not for a moment believe that such results would follow the overthrow of the Tartar dynasty and the success of the rebellion.

By a late mail we have an account of a visit to the rebels' head-quarters at Nanking, by a clergyman connected with the American Episcopal Mission at Shanghai, the Rev. J. L. Holmes. In his narrative, which was printed in the *North China Herald*, we have a few important facts relative to the Tai-ping party. Mr. Holmes proceeded to Nanking with the intention of making the best of the rebel cause, disposed to strengthen his own good opinion of them, and, if possible, to do them some good, by directing them in their search after truth. Alas! he found they were no better than the rest of their countrymen! He found, indeed, in one man,

a Mr. Pung, to whom he was first introduced, and who seemed to be acting the part of a chaplain,—“some appearance of real religious character, which,” as he goes on to say, “was more than I can say of any other man I met.” The burden of their conversation in all his intercourse with the leading men among them for several days was that, “all men are brethren,” and that the foreigners who worship God (Shang-ti) and Jesus are especially worthy of their regard. As for any experience of the vital truths of Christianity, they appeared to be utterly destitute of it. Many of the scriptural expressions relating to sin and the Saviour are found in their books, but every attempt to eluce an explanation of any important dogma was fruitless. The one idea of exterminating the “imps” or “demons” (as they call the ruling powers) and their partisans was ever uppermost. And when we look to the additions in their creed, we find polygamy and priestcraft, kidnapping and the destruction of humanity in general, coupled with the direst blasphemy of God, and fantastic accounts of his interference with human affairs. Superstitious attention to the appearance of falling snow, dreams, and all the productions of a diseased imagination are found among them. The *Tien-wang* (Celestial King) requires the worship of his followers. Smoking offerings and the blaze of lamps form part of his ceremonial. Certain mystic rites were performed, which remind one of the “mysteries and moralities” of the middle ages in Europe. The new revelation with which they profess to supplement the Bible, and on the authority of which they pretend to act, was unsupported when Mr. Holmes proposed to test the new by a comparison with the old. As God was always the same, it seemed to him impossible that the later revelation should contradict the former. Here we have Mahomedanism again; the last revelation is the guide according to their creed. The Chang-wang suggested that it was like a Chinese jacket, which is buttoned across the chest; although the parts are unlike they form an appropriate whole. Mr. Holmes objected to comparing man’s work and God’s acts, but proposed to compare the works of God with each other. “The sun does not rise in the east to-day and in the west to-morrow.” His Majesty was here disconcerted, and asked him to call another day. The servant boys who attended on the missionary during his stay at Nanking were stolen from their parents, and were (as they signified by gesticulations) liable to decapitation if they ventured to attempt an escape. As Mr. Holmes says:—“To rob and murder an adherent of the Man-chou dynasty, is a virtuous deed. To carry away his wife or daughter for infamous purposes, or his son to train up for their army, are all legitimate acts.” The blasphemous assertions of the *Tien-wang*, that he is the elder brother of Christ and that the Western King had contracted a marriage in the next world, were well met by Mr. Holmes by referring them to a few passages of Holy Writ. These he wrote down, hoping that the *Tien-wang* might see them; but at first no one was found who would dare to present them, until, on taking his departure, Mr. Pung clutched the paper eagerly and asked permission to keep it, with a view to showing it to the *Tien-wang*. Mr. Holmes concludes his narrative with some very pointed remarks on the doctrines, practice, and prospects of the insurgents. He found as he says, “Nothing of Christianity but its name, falsely applied—applied to a system of revolting idolatry.” “Their idea of God is distorted, until it is inferior, if possible, to that entertained by other Chinese idolaters; the idea they entertain of a Saviour is likewise low and sensual, and his honours are shared by another (i.e. the Eastern King—Saviour from disease). The Holy Spirit they make a non-entity,” and he sums up in the words of St. Paul writing of the heathen in his day, “They have changed the truth of God into a lie, and they worship the creature more than the Creator.”

Their system, if system it may be called, is a strange mixture of Christian truths perverted into Pagan errors. The ancient heathens of Greece and Rome would have been well satisfied with much taught by these Chinese mormons. Illustrious men and even women, by the special favour of the gods, are exalted by apotheosis to a place in heaven, and intermarriage with the divinities. Polygamy, the dark plague spot of heathendom, is practised to a fearful extent. Thus, social order and good government are wanting, and the success of the Chinese revolution would be no advantage to the world, or to China itself, but would rather tend to the complete disruption of the Empire. Even now a distinct party of rebels, under a popular general with a large army, has established itself in the capital of Sz-Chuen.*

* This leader is said to be a good man. His motto is:—“He is a good man, who acts the good man.”

The Kan-wang (Shield King) is now the main stay of the Nanking portion of the Tai-pings, but he is a man of so little vigour of mind or energy of action, that no decisive course can be looked for on his part. His having been a Catechuman among the missionaries at Hong Kong and Shanghai invests him with a kind of interest, and has led some to hope for much good through his agency. It cannot, however, be expected that truth should spring forth complete and unincumbered from the indurated corruption of three thousand years; but it becomes a serious question whether the glimpses of truth exhibited in the books of these revolutionists are the dawns of their minds which bespeak the coming day of full light. It is our conviction that the leaders of this movement are in a position less favourable to the reception of the real truth than are their purely Pagan fellow-countrymen, and it will be more difficult to deal with the arrogance of the one than with the apathy of the other.

THE SARAWAK TROUBLES.

THE detailed account of recent proceedings in Sarawak, which we publish in our present issue from the *Singapore Free Press*, describes a state of affairs exceedingly detrimental to the best interests of that Settlement, and the general peaceful progress and extension of trade and commerce in Borneo. In March, 1859, we drew attention prominently in these columns to the necessity of renewing the British protectorate to Sarawak. We stated then that “England was bound, by treaty with Holland, to take her share in the repression of piracy in those seas, and by treaty with the Sultan of Bruni to repress piracy in the seas and rivers of Borneo.” Instead of doing this, we find her now throwing the shield of protection over these very pirates and murderers, and obstructing the pursuit of that peaceful commerce which was doing much to improve the condition of the people, and to withdraw them from criminal and barbarian practices of plunder and murder, while their hand was raised against every man.

We will endeavour to summarise, for the information of our readers, the narrative given elsewhere in detail. Among the rivers and districts in Borneo, placed under the rule of Sir James Brooke some six years ago by the Sultan of Bruni was the Rejang river. The Sultan had for many years previously found himself powerless to maintain order on these rivers, or check the piratical propensities of the Dyak population, who through them found an outlet to the sea to pursue their marauding operations. Sir James caused a fort to be erected on the Rejang river, which served as the head-quarters of Mr. Fox, appointed resident of this district. Sheriff Massahore, a native chief of Serekei, a town on this river, found his power and importance much circumscribed by this step, and was not long before he got Mr. Fox, the resident, and Mr. Steele, another Englishman, assassinated. He afterwards joined in the conspiracies of Datu Gapore and Bandar Kassim to murder all the English residents at Sarawak. On his entering the Sarawak territory and causing disturbances, the administrator of the Government, Mr. Johnson, pursued him with a hastily collected force, and drove him out of Serekei, which was destroyed. Sheriff Massahore, with his family and followers, thereupon fled to Muka, in the Sultan’s territory, the chief of which was a relative of his. Here fortifications were thrown up and a stop forthwith put to trade, it being intimated by the chief of the place that in future no Sarawak men would be allowed to enter that river or the Oya. The injurious effect of this step may be judged of by the following statement:—

“Muka and Oya are two rivers immediately to the east of Tanjong Sirik, which furnish large supplies of raw sago. Of late years a very brisk trade has existed between these two rivers and Sarawak, giving employment to some thirty or forty large trading prahus belonging to the latter place. Previous to 1850 the people of Oya and Muka were so harassed and cut up by head-hunting Dyaks from Kanowit, on the upper part of the Rejang river, (that they dared not work the sago in their own forests. The establishment of a fort at Kanowit in 1850 by the Sarawak Government gave security to the sago rivers, and their trade rapidly increased. About 300 tons of sago a month were manufactured at Sarawak from the raw material imported from these places, which received in exchange supplies of piece goods and other articles.”

Appeals were made to the Government at Bruni, and endeavours were made by Mr. Johnson to arrange for the continuance and protection of the trade. After a lapse of four months an answer was received from Bruni, denying that there was any truth in the state of affairs at Muka, and expressing the Sultan’s desire that the sago trade with Sarawak should continue without interruption. Capt. Brooke, on his return from Europe in April last, found this the existing state of affairs. Sheriff Massahore had gone to Bruni, to strengthen his position with the

Sultan. Muka was strongly fortified, and booms placed across the river, and threats were held out that any Sarawak people daring to go there would be killed. The trading boats were lying idle, and all communication between Muka and Sarawak being prohibited, Capt. Brooke fitted out three gunboats, and with Mr. Johnson proceeded to Muka, intending to send up Mr. Johnson to Bruni to try and effect some arrangement with the Sultan for the better government of the sago rivers, and to demand the surrender of Seriff Massahore, on the ground of his implication in the murder of Messrs. Fox and Steele. On the 24th June the gunboats anchored off the bar, and copies of letters were sent in requesting a resumption of trade, and referring to the Sultan's wishes. No answer was returned. Large parties of men were observed throwing up breastworks, and a large warboat came out and fired upon the sampans. Captain Brooke considered, therefore, there was no other course left but to force an entrance and exact reparation for this insult to the Sarawak flag. Trading prahus were ordered up from Bruit, and hostilities commenced.

On entering the river it was found that strong stockades had been formed, with guns mounted, commanding the approaches. The river was boomed and staked, and the most complete preparations for defence adopted. The siege was, however, proceeding favourably,—large reinforcements were arriving, the enemy were pressed for provisions, and their posts surrounded,—when on the 28th July the Governor of Labuan made his appearance in the steamer *Victoria*, towing a large Bruni boat, in which was one of the Sultan's ministers. The Governor landed and stated that he was commissioned by the Sultan to direct that hostilities should immediately cease; and he called upon the English, in the Queen's name, to desist. Sarawak is governed by a council of Englishmen and natives; and this council, upon deliberation, questioned the right of Mr. Edwardes, in his capacity of Acting British Consul General, or as Governor of Labuan, to interfere between two native States, whatever control he might have over the Europeans. They explained their reasons for the hostilities, viz., that Muka had been made the refuge for all the murderers, conspirators and bad characters from Sarawak; that Sariff Masahore had assumed the government, had fortified the river and stopped the trade, in spite of the Sultan's orders, and finally, had without provocation fired on the Sarawak boats. That they were aware that the Sultan of Bruni was utterly impotent to afford them redress, as he had known for months previous the state of affairs at Muka, but had taken no active measures to restore order. The settlers and natives were necessitated to yield to the threats and compulsion of the Governor of Labuan, but they did so under a strong protest, and with expressions of extreme surprise that the English Consul in Borneo should take upon himself to interfere in such cases, and employ her Majesty's vessels to back his acts as the delegate of the Sultan. The consequence of all this is, that the trade between Sarawak and Muka for the greater part of the present year is destroyed, that many of the persons engaged in it are heavy sufferers or entirely ruined. One of the forts was destroyed before the *Victoria* left, but the materials were used in repairing and strengthening those still remaining.

This is the position of affairs up to the visit and excessive course of proceeding on the part of the British official. That the results will be lamentably disastrous to the permanency of British rule and the peace and security of the Settlement at Sarawak is evident from the course of events subsequently narrated. Sariff Masahore made his re-appearance at Muka simultaneously with the government steamer, giving out that she was sent to support him. His agent, Talip (the actual murderer of Mr. Steele), collected a large force on the Rejang, attacked and destroyed fourteen villages of Dyaks, killing many of their men, women, and children, because they had been favourably disposed to the whites. The famous piratical chief, Rentab, supplied with arms and ammunition by agents of Sariff Masahore, organised a large force in the interior of Serebas to attack the Sarawak fort, and had made a stockade about twenty miles above it, entirely stopping the trade. Si Tawan, one of Sariff Masahore's principal followers, with a fleet of eight or ten boats, had been amusing themselves with burning down the empty houses of the people who had fled for safety, and a letter from Sarawak reports that "the whole population of Bruit and Rejang, &c., are flying hither and to Sebuyow from fear of Masahore. The Malays of Serikei, Matu, and Kanowit are running hither also, and Kanowit fort is to be pulled down, for no one will hold it; so that there will

henceforth be no check on the head-hunting Dyaks getting out to sea, and piracy and murder will again reign on this part of the coast, just as before Kanowit fort was built. In a few months the coast about Rejang, Oya, Bruit, and Muka will, no doubt, swarm with Dyak pirates from Upper Sakarran, Seribas, Kanowit, Katibas, &c., excited to madness by their deliverance from the long restraint which our Government has hitherto been able to put upon them, but which has now been quite removed by Governor Edwardes' acts." Later advices from Singapore report that on the application of the Chamber of Commerce of that Settlement, Captain Adams, the senior naval officer of the Straits, had sent Lieut. Wood in the *Victoria* to assist in settling affairs with Muka, which had been satisfactorily arranged. Calling at Sarawak, Mr. Cruickshank, an officer of the Government, and Mr. Helms, the manager of the Borneo Company, had gone up in Sarawak vessels with the *Victoria*. The Pangeran expressed his willingness to reopen the trade and continue on friendly terms with the Sarawak Government, and informed the native merchants that they might bring their vessels to Muka with perfect safety. With the exception of the piracy which had broken out in the river, and which had been suppressed by the Sarawak Government, all was quiet in Borneo.

The personal experience and influence of Sir James Brooke will, we trust, ere this have done much to remedy the great evil which Mr. Edwardes' unwise policy has led to.

NON-TREATY RESIDENTS IN JAPAN AND CHINA.

We called attention in our issue of the 13th ult. to the notification of the British Consul at Kanagawa, announcing that the Japanese Government prohibited the landing of foreigners whose country had no treaty with Japan. Our last Chinese papers announce that it is expected that the Earl of Elgin will move the Chinese Government to adopt measures of a similar tendency. And it is urged that this may be placed by the Chinese on the broad and plain grounds that all foreigners who have no treaty rights shall be subject to the laws of China, and cannot claim the right of ex-territoriality. The Chinese have, unasked, extended this right to all foreigners visiting their country. This extension may lead to difficulties and disturbances from the absence of any functionary on the spot with authority to control and restrain its subjects, and to compel them to observe all Chinese laws and customs. Excesses or riots committed by foreigners who are not bound or recognised by treaty regulations may act prejudicially to the security and interests of those who have treaty rights to fulfil and comply with. We have already urged the importance of every nation concluding treaties with Eastern countries appointing resident consuls or agents. It is remarked upon in the Hong Kong *Daily Press* as a singular fact that, considering the large employment which the China trade gives to Scandinavian vessels, and the legitimacy of the commerce carried on under those flags, that the Continental States have not to a greater extent opened up communications with the Peking Cabinet. They are now shut out from Japan, and may be shortly from China; and yet the opening up of the north of China would find them lucrative employment. The inclemency of the northern seas would be to them no obstacle, and as small craft would be much required, the vessels of Denmark, Sweden, and Norway, are especially adapted to the trade.

THE SARAWAK GOVERNMENT AND THE GOVERNOR OF LABUAN.

(FROM THE "SINGAPORE FREE PRESS.")

For some years past Sarawak has been as much neglected by the British Government as in former times it was aided and supported. In her time of peril it was not a British but a Dutch war steamer which offered succour to Sarawak. Indifference and neglect, depressing and discouraging as they were to the infant settlement, have at last given place to open hostility, and if the Governor of Labuan is long allowed to have his own way in dealing with Sarawak, its ruin will very speedily be consummated. In our issue of the 23rd ult. we inserted a letter briefly alluding to the recent visit paid by the Governor of Labuan to the trading port of Muka, and the disastrous results to Sarawak likely to arise from the proceedings of Mr. Edwardes on this occasion. We are now enabled to give more extended details of what occurred at Muka, and the causes which led to this high-handed interference on the part of the Governor of Labuan with the Sarawak authorities.

In 1854 a number of rivers and districts on the coast of Borneo, between Sarawak and Bruni, were made over by the Sultan of Bruni to Sir James Brooke, the former for many years previously having been utterly powerless to maintain order in them, or check the piratical propensities of the Dyak population, who found an outlet to the sea through these rivers. The Rejang River was one of those placed under Sir James Brooke's rule, and to bring the population more completely under control a fort was erected, which served as the head-quarters of Mr. Fox,

who was appointed resident of this part of the country. Serib or Seriff Masahore was the chief of Serekei, a town on the Rejang, and he found his power and importance very much diminished by the new state of things. It has been ascertained that he was the principal instigator of the assassination of Messrs. Fox and Steele, but at the time of its occurrence he managed to throw the guilt entirely on other parties, and for a time he was not at all suspected of having in any way participated in this atrocious murder. He afterwards joined in the conspiracies of Datu Gapore and Bandar Kassim to murder all the English residents at Sarawak. He had the audacity to visit the Sarawak territory, and disturbances ensued on his presence; but Mr. Johnson, who was then administering the Government of Sarawak, having collected a force of Malays and Dyaks, followed him into his own country, and drove him out of Serekei, which was destroyed. On this Serib Masahore, with his family and followers, fled to Muka, in the Sultan's territory, the chief of the place, Pangeran Diepah, being a relative of his. Muka and Oya are two rivers immediately to the east of Tanjong Sirik, which furnish large supplies of raw sago. Of late years a very brisk trade has existed between these two rivers and Sarawak, giving employment to some thirty or forty large trading prahus belonging to the latter place. Previous to 1850 the people of Oya and Muka were so harassed and cut up by head-hunting Dyaks from Kanowit, on the upper part of the Rejang river, that they dared not work the sago in their own forests. The establishment of a fort at Kanowit, in 1850, by the Sarawak Government, gave security to the sago rivers, and their trade rapidly increased. About 300 tons of sago a month were manufactured at Sarawak from the raw material imported from these places, which received in exchange supplies of piece goods and other articles.

On Serib Masahore taking refuge at Muka, the chief of that place intimated that in future no Sarawak men would be allowed to enter that river, or Oya, and to give effect to this fortifications were immediately thrown up. This threatened stoppage of trade induced Mr. Johnson to write to the Pangeran Tumongong of Bruni, informing him of what was going on, and earnestly requesting him to visit Oya and Muka before the trading season commenced, for the purpose of arranging matters. Mr. Johnson added, that should the Government not interfere, he would be obliged to go himself for the protection of the trade. After a lapse of four months an answer was received from Bruni, denying that there was any truth in the reports about Muka, and stating that it was the Sultan's desire that the sago trade with Sarawak should go on without any interruption. Things were in this state on Captain Brooke's return to Sarawak from Europe in April last. It was reported to him that Serib Masahore, after establishing his family and followers at Muka, had gone to Bruni, that Muka was strongly fortified and a boom placed across the river, and that threats were held out that any Sarawak people daring to go there would be killed. The Sarawak Nakodas were then fitting out their boats for their usual visit to Muka, and in view of the sinister reports prevailing of their probable reception there applied to Captain Brooke for advice. He recommended them to rendezvous at Bruit, in the neighbourhood of Muka, and from thence to send to Pangeran Diepah a letter with which he would furnish them. In this letter, which was written in a friendly tone, Captain Brooke reminded the Pangeran that the people of Sarawak and Muka were necessary to each other and were friends, not enemies, that he trusted the reports he had heard were not true, and that the trade would be allowed to go on as usual, &c. This letter, however, was not sent to Muka, as it was found that all communication between that country and Sarawak was prohibited. While the trading boats remained idle at Bruit, Captain Brooke fitted out three gunboats, in which it was intended Mr. Johnson should proceed to Bruni, and Captain Brooke resolved to accompany him as far as Muka, for the purpose of showing the Tumongong's letter and demanding that in terms of it the trade should be allowed to go on as usual. Having done this, Captain Brooke intended to return to Sarawak, while Mr. Johnson went on to Bruni to try and effect some arrangement with the Sultan for the better government of the sago rivers, and to demand the surrender of Serib Masahore on the ground of his implication in the murder of Messrs. Fox and Steele.

On the 24th June the three Sarawak gunboats anchored off the bar of Muka, and Captain Brooke immediately sent a letter to Pangeran Diepah, through the Nakoda of a Sambas boat which was lying there, to the same purport as that given to the Sarawak traders, and also mentioning the contents of the Tumongong's letter. On the following day the Sambas Nakoda went ashore, according to appointment, to receive an answer. After waiting for some hours no letter was forthcoming, and the Nakoda returned to his boat. During this interval large parties of men were observed to be busy throwing up breastworks on the shore to cover the entrance of the river, and on two small sampans being sent from the Sarawak boats to sound on the bar, a large war boat came out and fired upon them, driving them back. After his unmistakable declaration of hostility, Captain Brooke considered there was no other course left but to force an entrance and exact reparation for the insult which had been offered to the Sarawak flag. The trading prahus were ordered up from Bruit, and hostilities then commenced. On entering the river it was found that the followers of Serib Masahore had thrown up very strong stockades, having guns mounted on them, commanding the long reach by which the town is approached, that the river was boomed and staked, and the most complete preparations for defence adopted. Notwithstanding this, the siege was begun and was progressing favourably, large reinforcements were arriving, the enemy were pressed for provisions and their posts completely surrounded, when on the 28th July last the Governor of Labuan made his appearance in her Majesty's steamer *Victoria*, towing a large Bruni boat, in which was the Orangkaya di Gadong, one of the Bruni ministers. The Governor and the party landed at once, and stating that he had received powers from the Sultan to interfere, ordered that hostilities between the native States of Sarawak and Muka should immediately cease, and calling on the English in the Queen's name to desist. Captain Brooke explained to Mr. Edwardes that Sarawak was governed by a council composed of Englishmen and natives, and that he would call the council together to consult. On the following morning Captain Brooke acquainted Governor Edwardes with the result of the council's deliberations. They questioned the right of Mr. Edwardes, as Acting British Consul General or as Governor of Labuan, to interfere between two na-

tive States. They explained their reasons for the hostilities, namely, that Muka had been made the refuge for all the murderers, conspirators, and bad characters from Sarawak, had assumed the government, had fortified the river and stopped the trade, in spite of the Sultan's orders; and finally had, without provocation, fired on the Sarawak boats. That they were aware that the Sultan of Bruni was utterly impotent to afford them redress, as he had known for months previous the state of affairs at Muka, but had taken no active measures to restore order. The council further stated that they did not question the consular authority over British subjects in Borneo, and that, therefore, the Europeans would withdraw, but that the natives themselves had determined to continue the operations against Muka. On receiving this reply, Mr. Edwardes turned to Mr. Low, Colonial Secretary at Labuan, who accompanied him as interpreter, and said—"Then, Mr. Low, you will tell the chiefs of Sarawak that although I am unable to bring her Majesty's steamer into the river, such portions of her as will cross the bar I will bring in and use them against them if hostilities do not at once cease." This threat of course left the Sarawak chiefs no course save to yield, but they did so under strong protest and with expressions of extreme surprise that the English Consul in Borneo should take on himself to interfere in such a case, and employ her Majesty's vessel to back his acts as the delegate of the Sultan. Mr. Edwardes then engaged that the forts of Muka should be destroyed and the trade reopened, but he must have known that unless he remained to see this done, the engagement was of very little value, and, in fact, when on the point of leaving, he sent a message, recommending the Sarawak traders not to come to Muka for two or three months. The consequence of all this is, that the trade between Sarawak and Muka for the present year is destroyed, that many of the persons engaged in it are heavy sufferers or entirely ruined, and that there is very little prospect of the trade being again re-established. One of the forts was destroyed before the *Victoria* left, but the materials were used in repairing and strengthening those still remaining. There is no chance of the trade with Muka being diverted to Labuan, as, perhaps, it was hoped or anticipated, but there is every likelihood of its falling into the hands of native traders from the Dutch settlement of Sambas, who were arriving in large numbers to take advantage of the opening.

We may now revert to Serib Masahore and his doings. As we have seen, having stirred up all the mischief he could at Muka, he proceeded to Bruni. Some months ago, Mr. St. John, her Majesty's Consul-general in Borneo, visited Sarawak, and having inquired into the charges against Serib Masahore, he was satisfied that the Serib was the instigator of the murder of Messrs. Fox and Steele, and a conspirator of a most dangerous character. He therefore addressed a letter to the Sultan of Bruni in his official capacity, recommending the surrender of Serib Masahore, that he might take his trial before the courts of Sarawak. This letter was forwarded through Mr. Edwardes, and, it is asserted, was withheld by him. In June last the Sarawak Government sent to Mr. Edwardes, in his capacity of Acting Consul-general, what was considered ample *prima facie* evidence of the guilt of the Serib, and requested him to obtain his arrest and surrender. Mr. Edwardes having heard the statement of this man and his followers, told the Sultan that he believed him to be innocent, and recommended that he be not given up. The Serib thus white-washed, returned to Muka, where he made his appearance just about the same time with the steamer *Victoria*, and gave out that she had come down to support him.

Simultaneously with Serib Masahore's return to Muka, news was received that his agent Talip (the actual murderer of Mr. Steele) had collected a large force of Kyans at the head of the Rejang, and had attacked and destroyed fourteen villages of Datibas Dyaks, killing many of their men, women, and children. The Katibas Dyaks have always been well disposed towards the white men, and for this reason, it is supposed, they have been singled out for attack and destruction. Subsequent reports have been received, that the old Serebas chief Rentab is again in arms in the interior of Serebas, and is collecting a large force to attack the fort on that river, and that he has been supplied with firearms and powder by agents of Serib Masahore.

The prestige of the Sarawak Government has been so much shaken by the manner in which Mr. Edwardes conducted his interference at Muka, that it is very doubtful whether it will be able to keep in order the wild and piratical tribe under its flag. He has, by securing the safety of Muka, constituted it an asylum for all the conspirators and offenders against the peace of Sarawak and the neighbouring rivers. So alarmed, indeed, are the peaceable and well disposed inhabitants at Muka and other places along the coast likely to suffer from an outbreak of the piratical Dyaks, that they are already flocking in large numbers to Sarawak, where they will prove a source of further inconvenience to the Government.

An appeal has been made by the Sarawak Government to her Majesty's ministers, against the ill-judged measures of Mr. Edwardes, and we trust it will result in such steps being speedily taken as will re-establish the authority of the former, and thus secure the peace and well-being of Sarawak and the neighbouring countries, which at present are menaced with such grave disasters as would attend an outbreak of the piratical and head-hunting Dyaks.

Later advices from Sarawak fully confirm the evil effects of Governor Edwardes' ill-judged proceedings at Muka. The whole of the disturbed Dyak districts are said to be in a blaze—a spear from Seriff Masahore was sent throughout them, and the Seribas Dyaks supplied with powder and firearms. They are stated to be now out in force. While the Sarawak force was lying at Muka, Talib, a follower of Seriff Masahore, and the murderer of Mr. Steele, with Sa Kalai and Sawing, who were also implicated in the murder, attacked the Katibas Fort with a party of Kyans, and took it, killing more than thirty of the defenders. A letter from Sarawak, with the perusal of which we have been favoured, says, "The whole population of Bruit and Rejang, &c., are flying hither and to Sebuyow from fear of Masahore. The Malays of Serikei, Matu, and Kanowit, are running hither also, and Kanowit Fort is to be pulled down, for no one will hold it; so that there will henceforth be no check on the head-hunting Dyaks getting out to sea, and piracy and murder will again reign on this part of the coast, just as before Kanowit Fort was built. In

a few months the coast about Rejang, Oya, Buit, and Muka will, no doubt, swarm with Dyak pirates from Upper Sakarran, Scribas, Kanowit, Katibas, &c., excited to madness by their deliverance from the long restraint which our Government has hitherto been able to put upon them, but which has now been quite removed by Governor Edwards' acts."

We are glad to find, however, that Captain Brooke has resolved not to abandon the Kanowit Fort for the present. On the contrary, he has sent Mr. Johnson there with a small force, to endeavour to restore confidence. Serebas is said to be up in arms, and the famous piratical chief Rentab, with a large party, has come down and made a stockade about twenty miles above the fort, entirely stopping the trade.

A Nakoda who arrived at Sarawak in the middle of last month reported having fallen in with Si Tawan, one of Sheriff Masahore's principal followers, with eight boats, in the Rejang, where they had been amusing themselves with burning down the empty houses of the people, who fled to Sarawak on hearing of Sheriff Masahore's return to Muka, and his apparent triumph over the Sarawak Government. Si Tawan told this Nakoda he was waiting for the Tuan Muda (Mr. Johnson) and the pinnace. The Sarawak sago trade is at an end for the present year, and the manufactories will close as soon as they have worked off their stocks. The Nakodahs have laid up their large sago boats in the mud, and are betaking themselves to other sources for earning a livelihood. Thus upwards of 3,000 tons of native shipping are thrown out of employment; and the many persons, shopkeepers, labourers, &c., who are more or less dependent on the manufactories are reduced to distress. A Sambas Nakoda who recently arrived at Sarawak direct from Muka, stated that one fort had been pulled down, but the largest and most formidable one was still kept up. He describes the Muka people as much distressed for food, and as being obliged to live on sago, as there was no rice in the place. In his eagerness to side with his friend and relative Sheriff Masahore, the chief of Muka, Pangeran Deipah, overlooked two very material points, which ought to have made him hesitate before setting the Sarawak Government at defiance. The one is, that without the Sarawak Fort at Kenowit his people would be cut to pieces by the Dyaks—the other is, that without Sarawak trade his people will starve, for they draw all their supplies of rice from the Sarawak rivers.

OPENING OF WESTERN CHINA.—We lately printed a portion of the memorial which was presented by the Salt Chamber of Commerce to Government. An answer has been received, in which Lord Palmerston informs the Chamber that he had forwarded it to the Secretary of State for Foreign Affairs, adding as follows:—"Lord Palmerston wishes me to add, that her Majesty's Government have stated to several bodies who have made representations in favour of overland communication between India and China, that insurmountable objections exist to such a scheme." What these "insurmountable objections" may be we are left to conjecture, as no clue whatever is afforded by his lordship. The advocates for a prosecution of this inquiry will hardly rest satisfied with a mere vague assertion, unsupported by explanation or evidence such as the public is entitled to; and when Parliament opens something more tangible will be elicited, if members will only do their duty towards their constituents.

CHINESE EMIGRATION TO THE WEST INDIES.—We learn that about 3,000 Chinese emigrants are expected to be obtained for the West Indies in the ensuing year. Some delay has arisen in the arrangements owing to the absence in the north of Mr. H. Parkes, whose influence with the Chinese had been found very useful in removing objections. Mr. Austin, the Colonial Selecting Agent at Hong Kong, appointed by the Demerara Government, was very active in his exertions—and advices as to the progress he had made was looked for by the next mail. One great advantage gained already, is the beginning made in inducing the emigration of Chinese females, of whom 300 have already been despatched. The Chinese seem well satisfied with their treatment and prospects, and great benefits are anticipated for the West India colonies from the more extensive supply of Chinese labour. Our only surprise is that the Americans have not looked to this more legitimate field for the supply of labour for their Southern plantations, instead of resorting to the illegal slave trade. Under British management the Chinese emigration offers a marked contrast to the mode in which the Cuba coolie trade is conducted.

TRADE WITH JAPAN.—The Secretary of the Bradford Chamber of Commerce read, at the last meeting, the following communication received at the Board of Trade, dated Hakodadi, July 11, 1860:—"With regard to British merchandise saleable in Hakodadi, of which we spoke a few days ago, we beg to mention the following articles, namely:—camlets, shirtings, drills, printed ginghams, flannels, canvas, and window-glass. We are of opinion that very large quantities of the latter-mentioned article would sell to a good advantage, as the Japanese merchants here informed us that they have calculated and considered over the matter, and have come to the conclusion that window-glass would be almost as economical, and certainly preferable, for their windows. We have made strict inquiry with regard to the sale of English canvas for the use of the Japanese junks, and find that it could be supplied to them at reasonable prices; it would be generally adopted size Nos. 1, 2, 3. Printed Cottons:—Small patterns and gaudy colours are in general demand. Flannel Goods:—A small yearly supply, say eighty to one hundred bales, would sell for the use of the natives of Yedo. It would be requisite to supply something durable, and not too expensive, blue preferred. Drills are at present sold in large quantities; colours blue and white. Camlets are in great and general demand; dark green and blue preferred. Shirtings, bleached and unbleached; ginghams in all patterns, colour immaterial. In conclusion, we beg to add that the Japanese (who since their intercourse with foreigners have received such enormous prices for their exports) have, in a great measure, neglected their home manufacture, and devoted their time to the production of articles for exportation; and, as a matter of course, the at present large amount of exports will, in time, cause the demand of an equal amount of imports in return.—(Signed) STEPHENSON, WILKIE, and Co."

The first paper read at the meeting of the Royal Geographical Society on the 10th inst. was by Captain Sprye, on the new route to China. Sir Roderick Murchison took the chair. Sir J. F. Davis, Captain Sherard Osborne, Mr. Lockhart, and Mr. Crawford took part in the discussion. We regret that want of space compels us to postpone the discussion.

IMPORTS FROM CHINA, JAPAN, AND ALL PARTS EAST OF INDIA.

From Foo-chow-Foo to LONDON, per Glenclune, entered Nov. 15:—4,549 chests, 3,296 half-chests, 952 boxes tea—order; 2 boxes tea, 4 cases China ware, 2 half-chests ginger, 23,500 canes—Master.

From SINGAPORE to LIVERPOOL, per TIGRIS, entered Nov. 14:—2,034 bales gambier, 3,546 bags sago flour, 2,977 pieces sapan wood, 2,022 bundles rattans—Brooklebanks; 195 bags pepper—order; 1,677 buffalo hides, 787 boxes pearl sago—Fielden, Brothers.

From CANTON to LONDON, per NORTHFLEET, entered Nov. 17:—9,590 chests, 4,185 boxes, 737 packages tea; 34 packages merchandise—order; 134 boxes tea—B. Freeman.

From Foo-chow-Foo to LONDON, per CYCLONE, entered Nov. 17:—4,400 chests, 1,770 half-chests, 3,271 packages, 8 cases tea—order; 921 packages tea—F. Huth and Co.; 788 chests tea—H. Wilkinson and Co.; 10 boxes tea, and 7 cases ginger—Master.

From Foo-chow-Foo to LONDON, per Robin Hood, entered Nov. 20:—4,820 chests, 4,792 half-chests, 6,820 packages, 850 boxes tea—order; 1 case cheroots, 3 packages curiosities—order. A quantity of cargo thrown overboard when the vessel grounded.

From SHANGHAI to LONDON, per Jubilee, entered Nov. 20:—5,770 chests, 2,149 half-chests, 13 boxes, 3,290 packages, 56 chests tea, 54 bales silk, 25 bales waste silk, 53 boxes, 40 cases, 116 bales, 27 packages merchandise, 2 cases silk piece goods, 241 bales cocoons, 108 boxes wax, 279 chests, 169 packages rhubarb, 2 packages furs, 4 cases japan ware, &c., 4 cases, 6 packages lac ware, 1 case japan ware, 2 cases gongs, 1 case cigars, 212 boxes arrowroot, 26 cases, 11 boxes copper, 2 cases china, &c., 18 bales straw braid, 14 boxes isinglass, 40 boxes gall nuts—order; 336 chests tea—Elias and Co.; 24 packages tea—E. J. and H. Marsh; 3 packages tea, &c.—D. Hanbury; 3 packages japan ware—Hickie and Co.; 2 cases japan ware—Webb; 3 cases japan ware—Stone and Co.; 1 case japan ware—Borman and Co.; 1 case merchandise—L. W. Tear; 6 packages merchandise—J. Hartley and Co.; 8 cases bronzes—A. Joseph and Co.; 6 packages tea, 10 packages lac ware, &c.—Master.

From WHAMPOA to LONDON, per Southern Cross, entered Nov. 21:—45 chests, 1,726 half-chests, 8,229 boxes, 122 packages, 423 cases tea, 8 cases shawls, 62 casks soy, 76 chests rhubarb, 56 cases lac. ware, 36 cases, 17 boxes silks, 20 bales, 235 packages canes, 56 cases, 162 boxes, 24 packages merchandise, 10 boxes china ware, 306 cases, 60 casks, 203 boxes preserves, 4 cases china ink, 55 bundles canes, 4 boxes lychees 500 rolls matting—order; 639 chests, 1,050 half-chests, 2,652 boxes, 1,512 packages, 217 cases tea, 15 packages, 31 cases merchandise, 2 cases china ware, 500 rolls matting, 30 casks soy, 200 cases ginger, 271 packages canes—L. Reiss Brothers and Co.; 1 half-chest, 10 boxes tea, 6 boxes china ware, 51 chests rhubarb, 7 packages merchandise, 165 bundles, 80 packages canes, 30 casks soy, 2 boxes silks—Hew and Co.; 100 cases preserves—F. and A. Bovet; 5 cases preserves, 1 case silks—F. Gere and Co.; 5 boxes merchandise—Grindlay and Co.; 1 box merchandise—G. J. H. Siemens and Co.; 2 cases china ink, 42 bales canes; 8 cases china ink, 12 packages tea, 6 packages merchandise—Master.

From WHAMPOA to LONDON, per Asia, entered Nov. 21:—19 cases merchandise, 2,000 cases cassia, 1 case merchandise in transit—order; 541 pkgs. canes, 1,550 rolls matting, 37 bales tobacco, 70 boxes galls, 3 cases earthenware, 150 cases dried ginger, 5 boxes fans, 1 box silks, 21 boxes merchandise, 25 boxes, 50 casks soy, 156 pkgs. bamboo canes, 3 boxes china ink, 10 cases essential oil, 53 boxes preserves—order; 60 cases rhubarb—Vander Hoeven. From Hong Kong: 1 case silks, 1 case crape shawl in transit—order; 12 cases essential oil—Just and Co.; 1 box merchandise—F. and A. Bovet; 20 boxes oil—Reiss and Co.; 68 pkgs. jute—Moore and Co.; 1 box tea—Donner and Co.; 1 chest tea, 1 chest toys—W. Stockton; 1 case merchandise, 1 package tea—J. Bell; 280 packages merchandise, 208 cases essential oil, 10 boxes vermilion, 100 boxes ginger preserves, 429 cases star aniseed, 170 cases cassia lignea, 142 boxes essential oil, 204 boxes aniseed, 289 bags shells, 5 boxes tea, 1 chest books, &c., 1 bundle brooms, 38 boxes oil—order.

From CANTON to LONDON, per Veronica, entered Nov. 22:—2,968 chests, 800 boxes tea—order; 346 chests tea—Cama and Co.; 620 chests tea—Fearon and Co.

From Foo-chow-Foo to LONDON, per Leichardt, entered Nov. 22:—1,441 chests, 7,873 packages tea, 6 packages merchandise, 2,000 bundles canes—order; 640 packages merchandise—Pickersgill and Son.

From PENANG to LONDON, per William Gillics, entered Nov. 23:—6 cases nutmegs—G. Assantes and Co.; 123 cases—order; 2 cases—Forbes and Co.; 2 cases mace—G. Assantes and Co.; 41 cases—order; 1 case—Forbes and Co.; 2 cases nutmeg oil—Gledstanes and Co.; 7,127 bags sugar, 189 puncheons rum—Finlay and Co.; 10 cases essential oil, 3 cases patchante leaf—Forbes and Co.; 69 baskets India rubber—Arbuthnot; 3 pieces silk, &c.—Master; 3 puncheons rum, 3,471 bundles rattans, 6 cases isinglass, 3 cases nutmeg oil, 6 cases essential oil, 786 slabs tin, 745 bags sugar, 945 bags tapioca, 4 bags fish maws, 424 baskets 192 packages India rubber, 6 cases merchandise—order.

From BATAVIA to LONDON, per Prince Alfred, entered Nov. 23:—639 bags black pepper, 1,820 bundles Malacca canes, 72 bags, 74 baskets Indian corn, 800 buffalo hides, 2 cases mace, 26 casks, 1 case nutmegs, a quantity of sapanwood—Thornton and Wests. From Singapore: 1,066 slabs tin, 411 bales gambier, 4,425 bags sago flour, 1,864 bags, 1,856 boxes pearl sago, 174 bags white, 5,004 bags black pepper, 4,698 pieces sapanwood, 3,000 bundles rattans—Thornton and Wests; 1 case china ware, 2 cases tea—order.

From PENANG to LONDON, per Sir Robert Peel, entered Nov. 23:—1,328 slabs tin, 2,808 bags sugar, 671 bags black, 1,747 bags white pepper, 92 cases fish maws, 2 bags elephants' teeth, 607 baskets India-rubber, 1,051 buffalo hides, 2,060 bags cutch, 38 cases merchandise, 110 hides, 37 bags gutta percha, 18 bags India-rubber, 9 cases nutmegs, 17 cases mace, 10 puncheons rum, 9 cases isinglass, 2,760 bundles rattans, 112 cases spices, &c., 2 half barrels sugar, 1 case tapioca—order; 7 cases patch leaf—Gledstanes and Co.; 1,461 mats, 134 bags sugar, 13 puncheons rum—Finlay and Co.

From MANILA to LIVERPOOL, per Cervantes, entered Nov. 17:—23,712 bags sugar, 2,070 bales hemp—order.

(Contd. & cd in the Supplement.)

Monetary and Commercial.

The French Government have conceded to the Submarine Telegraph the privilege of having telegrams from India, China, and Australia despatched immediately on the arrival of the steamer at Marseilles instead of passing as heretofore through the Post-office. They must in future be addressed to the Director of the Telegraph, Marseilles, receiver's name and address to be the first words of the message, and transmitters must furnish the names of their agents or correspondents at Marseilles to whom application can be made for the cost of the telegram.

The bar silver brought by the last Mexican packet has been sold at 61½d. per ounce, showing no alteration in the rate. The dollars have not yet been disposed of.

A new Joint Stock Bank is projected for Liverpool, under the name of the Mercantile Bank of Liverpool. It is alleged that there is a great want of banking facilities and accommodation, as a charge is at present made on all deposits and drawings and the London plan of banking is sought to be introduced. This would lead to a more general payment of cheques instead of cash, which is now held in large amounts in their tills, and drawn by the merchants. That there is good room for a well-managed bank on this principle in Liverpool, with its immense commerce and shipping trade, we fully believe.

The Peninsular and Oriental Steam Company only divides 5 per cent., free of Income-tax, a much smaller dividend than usual. The reasons for this reduction are fully stated in the abstract of the reports and proceedings given in our other columns.

THE RANGOON AND SINGAPORE CABLE.

We announced in our last that the *Queen Victoria* had completed the lading of about 400 miles of this cable. She sailed from Gravesend on the 3rd inst., and put into Plymouth on the 6th, by orders of Government. At that port very accurate final tests of the state of the cable before she definitively sails, and every extra precaution will be adopted to prevent heating, of which there are serious indications. In consequence of this the lading of the *Rangoon* has been suspended. The *Malacca* is not yet out of the builders' hands. In another column it will be seen that an injunction has been obtained against the despatch of these vessels, in consequence of an alleged infringement of the patent of Messrs. Newall and Co., so at present they seem involved in difficulties.

THE RED SEA CABLE.

Very satisfactory accounts have been received from the Red Sea. There is no doubt but that two of the Red Sea sections are interrupted from breaks caused by anchors close to the shore. These portions of the cable have been actually picked up and examined, though not repaired, from want of cable, all the spare cable having been used in the repair of the Aden Suakin section, which latter, we have also reason to believe, is broken close to Suakin, in shallow water, probably from an anchor. If this is really the case, the line between Suez and Aden might speedily be repaired when the Government arrive at a decision on the subject. In consequence of the lawsuit with the contractor neither he nor the company can undertake these repairs until its termination, the point in dispute being, who is liable for them. This has given rise to the circulation of a great many reports about the failure of this line, which neither side could contradict, on account of the law proceedings.

From the tests taken up to the present time, it would appear that the faults on the Aden Kurrachee section are of a simple nature, so that we may hope that the existing cable from Egypt to India may be placed in working order at no distant day.

The *Ceylon*, which left Southampton on the 4th instant, took out £95,641, of which £20,210 was in gold, and £75,431 in silver. There was for Alexandria £15,500 in gold. For Madras £4,210. For Calcutta £10,800 in silver. For Penang £1,020. For Singapore £500 in gold, and £49,400 in silver. For Hong Kong £1,066 in silver. For Foo-chow-Foo £1,600, and Shanghai £11,545.

COMMERCIAL POSTSCRIPT.

CITY, SATURDAY AFTERNOON.

ARRIVALS NOT INCLUDED IN TABLE.—Dec. 7, at Falmouth, from Akyab, Golden Horn. At Cadiz, from Manila, Voladora; 8, at Deal, from Whampoa, Langdale; 6, at Brouwershaven, from Batavia, Johanna; 8, at London, from Batavia, W. Simpson; 9, at Deal, from Shanghai, Challenger; 8, at London, from Canton, Mauritius. At Deal, from Whampoa, Dewa Gungadhru. At Falmouth, from Batavia, General Jacobi, Christian Louis; Dec. 8, at Liverpool, from Bassein, Gerda; 9,

Peking; Nov. 30, at Gibraltar, from Sumatra, Arthur, and cleared for Trieste; Dec. 8, at Cuxhaven, from Canton, Richard; 9, off the Lizard, from Batavia, Phillip von Marnix; 10, at Liverpool, from Akyab, Cornwallis, Robina; at Queenstown, from Manila, Beatrice; 7, at Texel, from Batavia, Hercules; at Helvoet, from Batavia, Juliet Trundy; 8, at Brouwershaven, from Batavia, Zes Geuzsters, Vyf-Vrienden; 7, at St. Nazaire, from Akyab, Tarragone; 9, off Dover, from Batavia, Prinses Amalia; 10, from Singapore, Gala; 11, at Falmouth, from Maulmain, Masaniello; from Singapore, Ceres; at Liverpool, from Akyab, Robina; from Rangoon, Orix; 10, at St. Nazaire, from Manila, Albert Cezard. Nov. 27, at New York, from Manila, Home; 13, at Deal, from Singapore, Commodore Wm. Stewart; at Queenstown, from Bankok, Gwalior; from Manila, Casas. Dec. 14, at London, from Akyab, Earl of Mar and Kellie; 13, at Deal, from Batavia, Kinderdyk; 10, at Hambro, from Batavia, Oscar I.; at Brouwershaven, from Batavia, Bantam; 14, at Deal, from Batavia, General Jacobi.

DEPARTURES.—Dec. 7, from Falmouth, for Singapore, Celle; Dec. 8, from Liverpool, for Hong Kong, Invincible; 11, for Manila, Pepita. Dec. 13, from London, for Shanghai, Empress of India; 14, from London, for Batavia, Tagal and Sourabaya, Etha; 11, from off Dover, for Batavia, Canton; 13, from Pill, for Manila, Jesusa. Oct. 29, from Calleo, for Macao, Augustina. Nov. 6, Maria Clotilde.

SPOKEN.—Sultana, London to Hong Kong, 49 N., 9 W.; Vyf-Vrienden, Batavia to Rotterdam, Nov. 13, 26 N., 29 W.; Maggie, Whampoa to London, Sept. 18, lat. 6.45 N., long. 110.56 E.; George Washington, London to Shanghai, 12th Nov., 8 N., 24 W.; Portena, Whampoa to London, 26th Sept., off the Cape of Good Hope; Seraphine, Foo-chow-Foo to London, 4th Nov., 7 N., 21 W.; William Stewart, Singapore to London, 30th Nov., 41 N., 27 W.

ARTICLES OF IMPORT.

TEA.—The wholesale tea trade have been agitating for the abolition of the long established charge of "lot-money," made at the sales by the brokers. A large number of the trade have pledged themselves to purchase no tea bearing this charge. A meeting of the trade is convened for the 28th inst., at the London Tavern. Low and good common Congous have been but little inquired for in the absence of export orders, and prices are fully ½d. to 1d. per lb. lower; fair to good flavory kinds of old season have been difficult of sale, at a decline of about 1d. per lb. Transactions in Ho Hows, Ning Chows, second class Monings, and Wopaks, of old season, have been very limited, and they show a reduction of ½d. to 1d. per lb. Kaisows, from recent arrivals, have met with a fair demand, but, from the quantity on the market at one time being large, prices gave way about 1d. per lb. for grades ruling from 1s. 6d. to 1s. 10d., but they are now firm at the decline, fine to finest commanding full prices, owing to their scarcity. Old season's fine Monings are difficult of sale at lower prices. For the new season's we refer to our remarks above. Tayshans have not been much in demand. Fair to good Oolongs, of old import, show a decline of 1d. to 2d. per lb.; good to fine of this season have also sold 1d. per lb. lower; good and fine Sou. chongs have been difficult of sale at reduced prices, the extreme rates obtained for few of the first arrivals having prevented business. Flowery Pekoes remain difficult of sale at irregular prices. Common Scented Capers, being in over supply, have sold 1d. per lb. lower; good and fine, of new import, have been in request at full prices. Common to good Scented Orange Pekoes met with but little inquiry, and prices are 1d. per lb. lower; fine remain much as before, but with limited demand. In green teas there has been a fair amount of business, the probable falling off in supplies having given confidence to buyers, and fully previous prices have been paid for fair to good Gunpowders and Young Hysons. Common to fair Hysons have been in request, but good and fine very difficult of sale, except at very low prices. Canton-made greens remain much as before. The stock on the 1st of Dec. on all descriptions of black was, in London, 43,033,188 lbs., and 6,183,806 of green. The total delivery in London for the present year has been—64,005,367 of black, and 9,680,887 of green. The stock at Liverpool was 1,916,062 of black, and 31,490 of green. The total delivery in Liverpool for the present year has been 6,488,791 of black, and 639,930 of green. The imports in London from the 1st of January to the 1st December have been, 68,287,764 of black, and 9,947,790 of green; and at Liverpool, 4,989,320 of black, and 32,673 of green.

SILK.—Business has continued to be unsatisfactory, a natural result of continued bad trade and general want of confidence in the maintenance of our present high scale of prices; still consumption goes on, both home and foreign, causing together tolerable deliveries, and the season of the year would warrant the expectation that they will increase. In China Silk the supply of Tsatlee and the better classes of Taysaam has been so small, and the stock is so reduced, that with all the pressure resulting from the movement in the money market, and the near approach of the larger arrivals by sailing vessels, all that has come forward of these qualities was eagerly taken upon landing, first at a reduction of 1s., but subsequently only 6d. per lb. Of Chinese Thrown Silk the stock continues to diminish, without any general change of position or prospects. Japan Silk is generally sold as it comes forward, but prices have not been maintained. Hitherto, however, we have had comparatively none of the better classes.

STATE OF THE WAREHOUSES IN LONDON, ending Nov. 30, 1859 and 1860.

	Sold Stock—		Unsold Stock.		Delivered in November.	
	1859.	1860.	1859.	1860.	1859.	1860.
Bales.	Bales.	Bales.	Bales.	Bales.	Bales.	Bales.

Canton	873	940	1,318	1,116	204	174
Chinese Thrown	787	1,877	1,100	2,139	298	635
Japan	—	788	—	1,074	—	518

SUGAR.—The market having relapsed into a state of heaviness soon after our last, Clayed Manila became neglected, and as holders have refrained from forcing sales, transactions are of trifling amount; in Un-clayed also little of consequence has taken place; 7,490 bags China, at public sale early in the month, met few bids, and only the white portion was taken, for which fair prices were obtained; the yellow and brown,

finding a languid demand, was withdrawn, but the latter has recently been disposed of. There has been a tolerably good supply of Java, but being mostly held with firmness, only a small proportion has been realised. Sales consist of 2,000 bags Clayed Manila at 39s. 6d. to 40s.; 2,000 bags Unclayed at 33s. 6d.; 1,000 bags Siam, ord. brown, 33s., grey to good white, 43s. 6d. to 47s.; and 5,200 bags China, low middling to good white at 45s. to 47s., ord. brown, 33s. 6d.; 1,000 baskets Java, brown and low grey, 40s. to 43s.

COFFEE.—A fair business has been done, sales of Colonial, 2,200 casks, 3,400 barrels and bags Plantation Ceylon, fine ord. to low middling, 66s. to 70s., middling to good middling, 71s. to 74s. 6d.; 50 casks, 3,000 bags Native, good to fine ord., 63s. to 64s. 6d., pickings, 35s. to 47s. 6d.

RICE.—The market has continued quiet. About 3,000 tons of Necranzie have been placed at 12s. to 12s. 3d., and 600 tons of Bassein at 12s.

PEPPER.—The market has had a more heavy appearance since our last report, and though holders have contributed some support by not pressing the late abundant supplies, the limited business done has been at barely previous rates, viz., about 3,000 bags Singapore, at 34d. to 4d., and 1,100 bags Penang (Trang kind) at the latter price. White also has been less in request, only small quantities having been taken at rather easier rates; middling to good Singapore, 6d. to 6½d.

SAGO.—The demand is small; of 178 boxes at auction, one half sold at 18s. 6d. to 19s. for good small; 220 bags of sago flour at 17s.

SPICES.—Cinnamon: trifling sales at previous quotations. Cassia Ligna: Of 719 boxes offered at auction, nearly all were retired; small sales of first quality at 94s., and seconds at 93s. Cassia Buds: Scarce quotations, 185s. to 195s. Market firm. Cloves: Small sales of Penang, at 1s. 5½d. Mace in large supply, and prices lower. Sales of 239 cases of Penang, and six of Singapore, at 1s. 4d. to 2s. Nutmegs: prices are fluctuated. Sales at auction of Penang and Singapore have been made at 3s. 6d. to 3s. 10d. for fine bold, and 1s. 10d. to 2s. ordinary.

HEMP.—Of 324 bales of Manila offered at auction, only a few sold at £24. 10s. for fair roving.

COTTON.—Market has continued dull, at a reduction of 1s. 8d. per pound for Surat.

JAPAN WAX.—Market is very inactive. 126 cases fair block have been sold at 60s. to 66s. 6d.; 50 boxes, saucer shape, were bought in at 65s. 6d.

TOBACCO.—Importations of Japan have been made, but sales have not yet been reported. Java is quoted at 7d. to 9d. Manila Cheroots, 7s., and leaf, 6d. to 1s. 6d. The stock on the 1st of December, of Manila and Java sorts, was 10,798 bales.

TIN.—Steady market and fair business done in Straits at 180s. 6d. to 181s. Banca is nominal, at 134s. to 135s.

COPPER.—Importations of 730 packages of Japan sorts, but no sales are yet announced.

GAMBIER.—Sales of a portion of 2,700 bales, at auction, at 17s. to 17s. 6d. CATCH: Small sales out of 1,890 bags were made at 25s.

MISCELLANEOUS.—India-rubber: market lower, and sales very difficult. 800 bags offered at auction was all retired. Camphor: no transactions; quotations for China and Japan, 160s. to 175s. Sapanwood: market quiet, and no sales reported. Soy: sales of China, at auction, at 3s. 6d. per gallon. Rhubarb: sales of 169 chests Shanghai, at 2s. 4d. to 2s. 5d. per lb. for good flat; and 2s. 1d. to 2s. 3d. round; and 51 chests Whampoa, at 1s. to 1s. 1d. for ordinary wormy. Mother-o'-pearl shells: market firm, but quiet. Star aniseed: sales of about 200 cases at auction, at 70s. to 80s. for middling to very good. Sticlac: supply small, quotation 70s. to 90s. Gum Benjamin: sales of 17 cases of Siam, at £10 2s. 6d. to £11 2s. 6d. for middling; and 12 cases of Sumatra, at £6 7s. 6d. for ordinary third quality. Damar: sales at auction at 39s. to 43s. 6d. for fair to good. Gamboge: of 90 cases offered at auction, a few sold at 70s. per cwt. Rattans: sales of 9,000 bundles of Singapore and 600 Penang, at 2s. 9d. to 5s. 8d. per cwt. Elephants' teeth: sales are advertised for the 12th inst. Vermilion: sales at auction, at 3s. Galangal root: quotation, 25s. to 25s., 100 bags at auction retired. Cubebs: sales at £10 10s. to £10 12s. 6d. for fair quality. Dragon's blood: no transactions. Galls: 175 cases of Japan sold at 45s. to 45s. 6d. for good. Rum; no sales of Penang are reported.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from England during the present year by the P. and O. Company's mail steamers:—

	Gold.	Silver.
Shanghai	—	£1,416,553

MANCHESTER MARKETS.

Printing cloths, especially 26-inch, and 27-inch widths, are in fair demand, but for India shirtings, long-cloths, and T cloths there has been but a moderate business, and nothing but the contracts in hand could support prices. In some few instances sellers have taken a shade less for the latter. In yarns, 50's and 60's mule for India are scarcely steady, but in most other descriptions contracts keep up prices.

From PENANG.—At London: Jalawar, Germania, Three Bells, Toronto.

From BATAVIA.—At London: William Simpson. At outports: Chili, Eberhard, Epsom, Heuss. At Falmouth: General Jacobi, Koning Willem III.

FREIGHTS AND CHARTERS.

The important news which we have lately received from the North of China, coupled with the ordering of transports to be paid off, leads to the impression that a treaty of peace may be concluded speedily. In this uncertainty, however, it appears that the small coal contract just taken for Shanghai at 69s. 3d. is low; for if peace is made, homeward freights in China will fall, and at the same time a great stimulus will be given to the shipment of manufactured goods.

Rates of freight current for vessels on berth to Shanghai, 50s. to 60s. per ton, weight and measurement. To Hong Kong 50s. weight and measurement. To Singapore, 35s., and Penang, 45s. weight or measurement (nominal). To Manila, 35s. and 40s. To Japan, 45 weight, 90s. measurement. To Batavia, 50s. weight, 40s. measurement.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Nominal quotation for Yedo, 70s. to 80s.

At Hamburg, for Batavia and Singapore, 40s. to 50s. China and Manila, 50s. to 60s.

CASUALTIES.

The Hermance and Jenny, Tattevin, which arrived at St. Nazaire, Nov. 25, had on board the cargo of the Alma. Pellicen, from Java to Nantes, condemned at Cayenne. The General Wyndham, Harrison, from Singapore to London, put into Table Bay, Oct. 22, leaky. The America, Krause, from Newcastle to Hong Kong, which put into Portsmouth, Nov. 21, leaky, &c., has discharged her cargo and been hauled on the patent slip. The Succes (French ship), Blanchard, from Batavia to Bordeaux, put into the Mauritius Oct. 10, leaky, making at sea from 10 to 12 inches water per hour—she had experienced very bad weather from the 20th Aug. to the 17th Sept. She had discharged her cargo previous to the 3rd Nov. The Celeste (French ship), Irasque, from Samarang to St. Nazaire, put into the Mauritius, Oct. 20, leaky; and the Ida Willemina, (Dutch barque), Wyland, from Batavia to Dordt, on the 23rd Oct., also leaky.

The Christiaan Louis, vd. Brink, which arrived at Falmouth, Dec. 8, from Batavia for Amsterdam, was leaky, had thrown part of cargo overboard, lost sails, bulwarks, &c., had boats damaged, and five feet water in her hold.

The Ida Willemina, Van Weyland, from Batavia to Dordt, which put into Mauritius Oct. 23, leaky, had thrown part of cargo overboard.

At St. HELENA.—Oct. —, Gwalior, from Siam, and sailed 25 for London; Wellington, from Canton, and sailed 29 for London; 13, Staatsraad v. Ewyck, Winter, from Batavia, and sailed 14 for Amsterdam; Hercules, Detering, from Batavia, and sailed 14 for Amsterdam; Griffin, Stewart, from Macao, and Wm. Simpson, Splatt, for Batavia, and both sailed for London; Voladora, Arana, from Manila, and sailed for Cadiz; 14, Wm. Stewart, Bramwell, from Singapore, and sailed 15 for London; 15, Carmen, Demora, from Singapore, and sailed for Gibraltar; Olivier, Trillott, from Penang, and sailed 17 for Nantes; 16, Prinses Amalia, v. Ryn v. Alkemade, from Batavia, and sailed for Rotterdam; Casas, Prado, from Manila, and sailed 20 for Queenstown or Falmouth; 17, Chile, Grell, from Batavia; 21, Pauline, Post, from Batavia, and sailed 23 for Rotterdam; 23, John and Isabella, Robinson, from Singapore, and sailed for London; Dou Quixote, Nott, from Manila, and sailed for New York; Langdale, Browne, from Whampoa, and sailed for London; St. Jan, Lommerse, from Batavia, and sailed 24 for Schiedam; 24, Albert Cezard, Dolu, from Batavia, and sailed for Nantes; 29, Gleam, from Foo-chow-Foo; Jupiter, Folkes, from Batavia, and sailed for Queenstown and Falmouth.

At TABLE BAY, Oct. 18, Prince Regent, Fisher, from Hong Kong. Sept. 23, Trio, Tregarth, for Batavia; Oct. 6, Mary Silverspan, for Batavia.

At SIMON'S BAY, Sept. 26, General Jacobi, Wieland, from Batavia, and sailed 28th for Falmouth.

At ALGOA BAY, Oct. 3, Gala, Fisher, from Singapore, and sailed 6th for London, after repairing. Off Algoa Bay, Sept. 25, Mercator, from Batavia for Rotterdam.

BOARD OF TRADE RETURNS.

The monthly returns of the Board of Trade just issued for the ten months show a satisfactory general progress in our export trade, although this has been one of the duller business years known for some time past. Looking to the records of trade with the far East we notice in the few leading specified articles to which the Government affixes the countries of shipment, that in cotton goods the exports to China, Java, and the Philippines, amount in value to £3,650,799, as compared with £3,165,279 and £2,218,104 respectively for the corresponding period of the two previous years. The value of cotton yarn is rather less than last year, although £103,000 excess of 1858. Woollen goods show an enormous advance, having trebled in the past three years. According to the Returns, the exports of Cotton goods for October have been, to China and Hong Kong £158,531, against £274,166 in 1859, and £175,894 in 1858; and for the ten months of 1860 £2,488,335, against £2,199,373 in 1859, and £1,437,159 in 1858. To Java, for October, £78,194, against £57,785 in 1859, and £46,724 in 1858; and for the ten months of 1860 £832,334, against £45,532 in 1859, and £427,659 in 1858. To the Philippine Islands, for October, £52,675, against £46,895 in 1859, and £39,317 in 1858; and for the ten months of 1860 £330,130, against £320,374 in 1859, and £353,286 in 1858. The exports of Cotton Yarn, for October, to China and Hong Kong, were £12,387, against £120 in 1859, and £21,829 in 1858; and for the ten months of 1860 £296,281, against £337,112 in 1859, and £193,487 in 1858. No exports to other parts. The exports of Woollen Cloths to China and Hong Kong, for October, were £8,064, against £30,603 in 1859, and £29,670 in 1858; and for the ten months of 1860 £368,742, against £317,076 in 1859, and £204,917 in 1858. No exports to other parts. The exports of Woollens and Worsted Stuffs for the month of October, to China and Hong Kong, were £15,187, against £25,605 in 1859, and £7,477 in 1858; and for the ten months of 1860 £377,329, against £231,582 in 1859, and £22,932 in 1858. No exports to other parts mentioned.

The computed real value of the imports in the nine months of this year have been as follows:—From Singapore, £686,247; from Siam, £39,252; from Sumatra, £8,985; Java, £292,314; Philippine Islands, £434,715; other Indian Islands, £7,802; China and Hong Kong, £6,803,128. As compared with last year this shows an increase of about £300,000 for China and £131,000 from Singapore; but from the other countries generally a slight decrease. The value of the exports in the three quarters of the present year has been—to Siam, £13,202; Java, £985,054; Philippines, £377,258; Indian Islands, £13,742; China, £2,215,755; Singapore, £1,305,893; Hong Kong, £1,839,902. Taking the aggregate value of the imports from the East this year, as compared with the corresponding period of the two previous years, they stand as follows:—1860, £6,736,604; 1859, £5,489,519; 1858, £3,800,121; an increase of nearly 100 per cent. in our trade.

GALVANIZED IRON.

FREDERICK BRABY AND CO.
MANUFACTURE GALVANIZED IRON

find it most profitable to order their goods to be so packed
in future.

SEYMER & CO., 37, Eastcheap, E.C.

**NOTICE TO PASSENGERS BY THE OVER-
LAND ROUTE via EGYPT.**

PHILIP ZECH, Proprietor of the two well-
known Hotels in Alexandria, the Hotel d'Europe, and
the Peninsular and Oriental Hotel, begs to inform his
friends and Travellers in Egypt in general, that he has
purchased SHEPHEARD'S HOTEL in CAIRO, which
will still continue to bear the same name; and in
returning thanks for the extensive patronage enjoyed by
his two houses in Alexandria, hopes that the preference
may likewise be extended to his house in Cairo, which will
be managed in first-rate style, and in a manner intended
to give every satisfaction to its frequenters, both as far as
table, wines, internal and external service are concerned.
Many alterations and ameliorations are being carried out
at the present moment.

Curtis on Manhood—New Edition.—A Medical Essay on
Nervous Diseases.

Just published, the 120th thousand, with numerous plates
in a sealed envelope, price half-a-dollar.

**MANHOOD: the CAUSE and CURE of
PREMATURE DECLINE**, with plain directions for
perfect restoration to health and vigour. By J. L.
CURTIS, 15, Albemarle-street, Piccadilly, London.

CONTENTS:

INTRODUCTORY CHAPTER on the Physiological
Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatorrhoea and Impotency.
Early Vicious Indulgences; Dangers of Neglect.

CHAPTER III.—A Review of the various Disqualifica-
tions of Marriage—whether resulting from the youthful
Abuse, the Follies of Maturity, the Effects of Climate or
Infection.

CHAPTER IV.—The Author's plan of Treatment.
Medical and Moral, with observations on a new and suc-
cessful mode of detecting Spermatorrhoea and other
Uteral discharges by microscopic examination.

CHAPTER V. and VI. on the modern Treatment of
Gonorrhoea and Syphilis.

The Book concludes with numerous varied and interest-
ing cases, to which is added the Author's Receipt of a
Preventive Lotion.

"We feel no hesitation in saying, there is no member
of society by whom the book will not be found useful—
whether such person hold the relation of Parent, Preceptor,
or Clergyman."—Sun.

Mr. CURTIS may be consulted, as usual, either by letter
or personally, at his residence, as above. Patients in
INDIA, CHINA, and the COLONIES can be cured by letter,
and have their medicines sent with secrecy and despatch.
The efficacy and harmless nature of the remedies employed
by Mr. CURTIS, having been demonstrated by the most
complete success during a practice extending over a period
of Twenty Years; nervous sufferers of every class have a
perfect guarantee that the utmost skill and experience
will be made available in the treatment of their cases.
THE WORK SOLD BY HINNAM, QUEEN'S ROAD,
HONG KONG.

TWINBERROW'S DANDELION, CAMOMILE, and RHUBARB PILLS, an effectual cure of indigestion, all stomach complaints and liver affections. In cases of constipation these pills never fail in producing a healthy and permanent action of the bowels, so that in a short time aperients will not be required, and, being quite as innocent as castor oil, they may be given to children.

From Dr. Dick, Lansdown-terrace, Kensington.
"Sir,—Send me another bottle of your Dandelion, Camomile, and Rhubarb Pills for my own use. I lose no occasion of recommending these Pills, as I can conscientiously do so."
Prepared by **TWINBERROW**, Operating and Dispensing Chemist, 2, Edwards-street, Portman-square, London; and may be had of all Patent Medicine Vendors.

BROWN & POLSON'S PATENT CORN FLOUR.

The LANCET states—

"This is superior to anything of the kind known."

The most wholesome part of Indian Corn: it is prepared by a process Patented for the three kingdoms and France and wherever it becomes known obtains great favour for PUDDINGS, CUSTARDS, BLANCMANGE. All the USES of the FINEST ARROWROOT, and especially suited to the delicacy of CHILDREN and INVALIDS.

Sold by Grocers, Chemists, &c.; and Wholesale by Drysalters and Provision Merchants. Packed in 16 oz. Packets, with Recipes, and 14 lb. Tins. The Packets in Tin-lined Cases are safe to keep in any Climate.

BROWN AND POLSON,

Manufacturers to Her Majesty the Queen
PAISLEY, and 23, IRONMONGER-LANE, LONDON

HOLLOWAY'S PILLS.—The constant changes of temperature are causing daily derangements in chest, stomach, and liver. For rectifying the slightest or most serious disorders of these organs, nothing has been found so constantly successful as Holloway's Pills, which may be taken by any one without fear of injury. These Pills excite so salutary an influence on digestion, that almost any ordinary food may be eaten with impunity, and they strengthen the weakest stomach against acidity, flatulency, and heartburn. They speedily relieve both nausea and biliousness. They remove all obstructions in the system, and healthfully restore its proper functions to every organ. They strengthen the nervous system, and renew confidence and energy in shattered and feeble constitutions. Sold at Professor Holloway's Establishment, 244, Strand, and by all Medicine Vendors throughout the civilised world.

Plain Sketch, 3s.; in Heraldic Colours with written description, 6s.; Large Size, 12s. Family Pedigrees, with original grant of Arms, to whom and when granted, the origin of the name, all traced from authentic records, fee Two Guineas. An Index, containing the Names of nearly all persons entitled to use Arms, as extracted from the British Museum, Tower of London, Herald's College, &c. &c. The Manual of Heraldry, 400 Engravings, 3s. 6d., post free, by T. CULLETON, Genealogist, Lecturer on Heraldry at the Mechanics' Institute, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C. The Heraldic Colours for Servants' Liveries, 5s.

STAMP YOUR OWN PAPER—with Arms,

Crest, Initials, or Name and Address, by means of CULLETON'S PATENT EMBOSSEING PRESS. 15s. Best Make 21s. Any person can use them.—T. CULLETON, Die Sinker to the Board of Trade, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

WEDDING CARDS—For Lady & Gentle-

man—5s. each. 50 Embossed Envelopes, with Maiden Name printed inside, 13s. Visiting Cards—A Copper Plate engraved in any style, with name and 50 Cards, printed for 2s., post free. N.B.—All orders executed by return of post, for stamps or cash. T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

FAMILY ARMS, &c., Emblazoned for Paint-

ing on Carriages or Needlework, 6s.; Best Style, 12s., Gothic and Modern Monograms Designed, 5s. Arms Quartered, Impaled, and Painted on Vellum, according to the laws of Heraldry. By T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

ARMS, CRESTS, &c., Engraved in the Best

Style. Crest on Seals or Rings, 7s. On Steel Die, 6s. Initials, 1s. 6d. per Letter. Book Plate, Engraved with Arms, 10s.; or Crest, 5s. Postage and Registered Letters 1s. extra.—T. CULLETON, Heraldic Engraver by Appointment to the Queen, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

SOLID GOLD RING (18 Carat, Hall

Marked), Engraved with Crest, 42s.; Large Size, for Arms, 75s. On receipt of P. O. order the size will be sent to select from.—T. CULLETON, Seal Engraver, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

THE PEN SUPERSEDED.—Mark your

Linen. The best and only method of Marking Linen, Silk, Stockings, Course Towels, or Books, so as to prevent the Ink washing out, is with CULLETON'S PATENT ELECTRO-SILVER PLATES. By means of this novel invention a thousand pieces of linen can be marked in a few hours. Initials, 1s. each; Name, 2s. 6d. Set of Moveable Numbers, 2s. 6d.; Crest Plate, 5s., with the necessary directions for use. Post free Certificate from the eminent Dr. Sheridan Muspratt, F.R.S., Professor of Chemistry, &c.

"Several trials with Mr. Cullen's Patent Electro-Silver Plates, for marking linen, induce me to pronounce them excellent; the letters are beautifully marked in a deep black colour, without blotting, and after a long boiling, with either potash or soda, they remain unaltered. Other plates which I tried decomposed the ink, and in many cases burned holes in the linen. I can testify Mr. Cullen's Plates are incorrodible, and will not hurt the finest fabric.—(Signed) "SHERIDAN MUSPRATT, College of Chemistry, Liverpool."

"May, 15, 1854."

All orders to be sent to the Patentee and Sole Maker, T. CULLETON, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

All Orders executed by Return of Post.

CARSON'S **ORIGINAL ANTI-CORROSION PAINT,**

PATRONIZED BY

The British Government,
The French Government,
The Russian Government,

H. R. H. The Prince Consort.
Hon. East India Company,
Most of the Nobility and Gentry,

Railway and Canal Companies,
The Principal Collieries
Mill Owners, Iron Master &c., &c

The Anti-Corrosion Paint is now used extensively

FOR ALL KINDS OF OUT-DOOR WORK,

Such as WOOD, STONE, BRICK, COMPO, CEMENT, &c. Also IRON STEAM VESSELS, BRIDGES, PIERS, or any description of Iron, and from its being expressly manufactured for exterior purposes, is peculiarly adapted for tropical climates, resisting the rays of the sun more effectually than any other Paint. It can be easily applied by any Labourer, being sent in various Colours, requiring simply to be mixed (no grinding is nec. (d). Merchants and Shippers' attention is particularly drawn to it as a most serviceable article for exportation.

A List of Colours, Prices, &c., also Copy of Testimonials, will be sent.

WALTER CARSON AND SONS,

(Successors to the Inventors). 9, GREAT WINCHESTER-STREET, LONDON, E.C.

FIRE.—DESTRUCTION OF THE

PLANT, STOCK, and PROPERTY of the Largest Ropery and Ship Chandlery in the Country, Messrs. Frost, Brothers, of Shadwell, London. PRESERVATION of Books, Papers, and Cash, in MILNER'S SAFE, standing by the side of two other safes, (not Milner's) the contents of which were consumed.—See "Times," Sept. 7, 1860.

TO MESSRS. THOMAS MILNER AND SON, Liverpool, and 47A, Moorgate-street, City, London.

Gentlemen.—We have very great pleasure in bearing testimony to the efficiency of your "Patent" Fire-resisting Safe. In the destructive fire which destroyed the whole of our premises on Sunday morning last, our books, papers, and cash, which were in the safe we purchased from you in March last, were all preserved; and this is the more remarkable because the contents of two other safes, not of your manufacture, standing in the same office within two feet of your safe, were consumed. Our most sanguine hopes have been realised in this severe test, and we leave you at liberty to make use of this letter in any way you may wish.—We are, Gentlemen, yours, &c.

FROST, BROTHERS.

Shadwell, London, Sept. 8, 1860.

PREPARATORY EDUCATION, BRIGHTON.

PROGRESS OF THE THIRD CHINA WAR.

FROM A SPECIAL CORRESPONDENT.

The Camp at Tien-tsin, 28th Oct., 1860.

In my last I advised you of being suddenly ordered to Tien-tsin. I, of course, regret having missed the entrance into Peking, signing of Treaty, &c., and can only hope you will have some other pen to describe these scenes. You must have heard, I think, by last mail, that the Chinese had given up Mr. Parkes and Loch, both of whom had been shamefully ill-treated; the former had been made to kneel down, and submit to have his nose rub in human excrement, and had it thrust into his mouth before San-go-lin-sin, with many other cruelties; he was twice taken out for execution, but something occurred to prevent it; the second time it was a salute fired by ours and the French batteries to announce the capture of the Emperor's summer palace, which prevented it, as the Chinese thought we were going to assault, and so sent him back to his den. The bodies of the whole of the others taken, for they are all dead from ill usage, tortured in various ways, have been given over to us since, and were buried on the 18th in the Russian cemetery at Peking, but it was a French Colonel, instead of Colonel Walker that was taken, he is also dead. Brabazon's body has not been found, it is supposed that as he made a desperate resistance, and was badly wounded at the time, that they must have cut his head off at once. Poor de Norman was horribly tortured, suspended by his wrists for fourteen days, until he died, and his body covered all over with sores where he had been beaten with small sticks over all the fleshy parts. Anderson died raving mad from his tortures. Bowly was also tortured, I believe, and the French colonel, until they died. The plunder that was taken at the Emperor's Palace outside the city was enormous and most valuable. Amongst other things were the presents brought out by Lord Macartney's Embassy for the Emperor. I saw a most valuable watch, studded with precious stones, which was part of it. The spoil was afterwards ordered to be collected, thrown into a common stock, and sold by auction; the sale lasted three days, and large sums were paid in for things; our Allies, as usual, though they got the lion's portion of boot, threw in the smallest quantity, but claim a full share of the proceeds of the sale.

One morning, just as we were going to attack, we found there was no one to oppose us, and learnt that the Emperor and all his army had bolted into Tartary, leaving his brother and others with full powers to treat with Lord Elgin, and agree to all our demands. The N.W. gate of the city was given over to us and so it ended. The Treaty has been signed since, they pay two millions and a-half to us, and have to pay £100,000 more now for their infernal cruelty to our poor fellows, a small enough fine, I think. If we do have any war pigeon with them again they will have but little quarter given to them on account of this last job. The *Furious* has been sent down to Shanghai for Mr. Bruce, who is daily expected here, and comes up immediately to this place. The troops leave Peking on the 8th November, and come down here, 3,000 are to garrison

at Tien-tsin forts and 500 at the Taku forts, besides the French. All those transports not absolutely necessary are being paid off as quickly as possible and sent away. The Admiral remains at Tien-tsin, where he has taken a house for the winter, and the *Coromandel*, his steam tender, remains with him. All the gunboats, and several of the dispatch vessels, are also to winter in the river. Lady Hope Grant came up in her Majesty's ship *Urgent* last Monday, to join her husband. Lord John Hay, in the *Odin*, goes to Hope Bay as senior officer. *Sampson*, Captain Hand leaves immediately for England, having been in commission since Oct. 1855. People are pretty healthy; supplies of all kinds are most abundant, and at reasonable prices. It blows very hard here sometimes, and is frightfully cold; the other night we had it down to 18 deg. below freezing point, but the sun gets up very strong, and gives us most grateful warmth, the difference between the thermometer in the sun and shade in the middle of day, is frequently as much as 40 deg. I have seen it 102 deg. in the sun within these last two weeks, and 60 deg. in the shade middle of day. The blue jackets, and with reason, are very much disgusted at not being allowed anything for cleaning all these transports and coaling-vessels which wears out all their clothing; at any other time and place, and under any other Admiral, they would be allowed check money, according to the custom of the service, but Admiral Hope has too much of his own to think others may want such a thing as money for any expenses they may be put to. I think that is his only failing.

(FROM ANOTHER CORRESPONDENT.)

TIENTSIN, Nov. 3, 1866.

By the *Aracan* steamer, which leaves the anchorage off the Peiho to-day after to-morrow, with despatches to go home by the mail of the 12th inst., an opportunity has been afforded of writing one week later than by the regular mail via Shanghai.

Nothing of importance has occurred since my communication of the 28th ult.* Preparations are going on here for the housing of the troops during the winter in the various temples and Yams in the town. The troops, it was originally intended, should leave Peking on the 1st and 2nd inst., but it has been determined since to delay their departure until the 7th and 8th, the reason for which delay, report states, is that the Treaty of peace and commerce has not yet been promulgated in the columns of the *Peking Gazette*, and that until that is done the Treaty is not believed to be of any value, and therefore the troops have been detained until its official publication takes place.

The following is the distribution of the Expeditionary Army which has been determined on should nothing occur to render alterations necessary:—

Troops to remain for the present in China.

At Tien-tsin.—The 31st, 60th, and 67th Regiments Govan and Desborough batteries; 8th and 10th Companies of Royal Engineers; Fanes Horse (300 strong). The Military Train.—Commissariat Staff and Army Hospital Corps.

At Taku.—One half of Pennycuik's Battery, and one wing of a regiment in garrison at Tien-tsin.

At Shanghai.—One Native regiment, and Pennycuik's battery; Native regiment not yet detailed.

At Hong Kong and Kowloon.—The 44th Regiment, and Bedding's field battery, with detachment of Engineers, Army Hospital, and Commissariat Staff Corps, probably the eighth company, also, of Royal Engineers.

At Canton.—The 99th Regiment, Twiss's battery.

To leave China for England.—The 1st, 2nd, 3rd, and 87th Regiments. As regards the disposition of the general body of the Indian troops nothing positive is yet known, but it is believed that the most of them will be sent back immediately to India. The 23rd company of Royal Engineers returns to England, as does Barry's, Millward's, and Rottou's batteries. Sterling's battery returns to India. The Armstrong guns of Millward's battery are to be handed over to Govan's battery, which in future will be an Armstrong one. The troops are reported to have suffered a good deal from diarrhoea, and sick in considerable numbers have been received at Tien-tsin for transmission to the hospital ships off the Peiho, on board of which, at present there are over 500 sick. There is an extensive hospital establishment at Tien-tsin, where there are now about 100 sick, and about the same number at our other hospital establishment on the Tien-tsin forts, three miles from the town. The mortality, however, in the army has not been great;

* This letter has miscarried.—E.D.

the form of disease which has prevailed not being of a malignant type. Dysentery has been one of the most common ailments, and a low form of fever also has been rather prevalent.

Peking is represented by all who have seen it as not repaying the trouble and inconveniences of the journey, it is nothing more than Tien-tsin on a large scale, and by no means equal in general claims to architectural superiority to Canton, which it seems now to be pretty generally admitted is the finest city in China.

The wall of Peking is the most remarkable feature about it, being 40 feet thick and 50 high. The city viewed from its top presents nothing to the eye but a mass of trees, in the centre of which a large pagoda raises its fantastic head—a tall monument also is seen, and those are the only things which break the monotony of the silvan vista—which obscures the houses of the town. The streets are wider than those at Tien-tsin, but in other respects similar.

The signing of the Treaty is described as having been a very cold and unimposing affair—no cordiality on either side. The signing took place at a Hall of Audience situated some three miles inside the Chinese city. The Tartar city was not entered. The Emperor was represented by a younger brother. Lord Elgin entered the town in his chair, carried by some of our Chinese Coolie Corps, dressed in scarlet liveries made after the Chinese fashion. He was attended by a guard of honour of 100 men from each regiment present before Peking—namely, the 1st, 2nd, 60th, 67th, and 99th, with (in addition) twenty-five men from each of the Cavalry Corps. The officers of the staff and others who witnessed the signing of the Treaty were in full uniform, and rode on horseback. The prize-money taken in the Emperor's Summer Palace, situated some miles out of Peking, amounts (for the troops engaged there) to about £23,000, and is made up by a sum of £14,000 in sycee silver, which the French handed over (in accordance with the terms of the Treaty) as the British share of what they had found in the Imperial Treasury, and by one of £9,000, realised by the sale by auction in the camp of articles which English officers had looted, and which Sir Hope Grant made them give up, declaring on their words of honour that they had done so; the articles brought large prices, and as Sir Hope Grant and his two Generals of Divisions, Napier and Michel, gave up their shares, it allowed for the army the following scale:—

First-Class Field Officers, £60; Second-Class Field Officers, £50; Chaplains, £40; Lieutenants, £30; Ensigns, £20; Sergeants, &c. £7. 10s.; Privates, £5.

The prize money would have been very considerable had the French not had possession of the palace for two days prior to our troops coming up to it. The French, it is supposed, had some private information. General Montauban is said to have realised £50,000 as his personal share.

The *Melbourne* and *Mauritius* hospital ships proceed immediately to the Cape. Sir William Peel and *Lancashire Witch* go to Hong Kong.

The Rev. Mr. Halpin, Staff-Surgeons Reine, and Burdon, and D. A. C. G. Ross have arrived, from Hong Kong.

ANOTHER ACCOUNT.

PEKING, 31st Oct., 1866.

Two days after the Treaty was signed (on the 24th) Lord Elgin took up his residence within the city, for the purpose, no doubt, of making our presence felt, and of initiating those relations intended to be established with the high officials in Peking. The Treaty having been signed, Lord Elgin is said now to be waiting for its proclamation, to which the consent of the Emperor, who is at Jeh-ho, is to be obtained. In the event of the business being concluded satisfactorily, the army will commence the downward march by the 8th November. The General, it is understood, will not in any case winter at Peking. If we leave here by the 8th, two-thirds of the army will be shipped either for Hong Kong or away from China altogether, leaving about 3,000 men to garrison Tien-tsin, besides French. Tien-tsin will be held until next spring, and probably longer, if the indemnity be not paid up by that time.

The weather has been getting gradually colder since the 1st of this month. Since the 19th inst. there has been ice every night about a quarter of an inch thick, and the hills around were beautifully covered with snow yesterday. The range of mountains extends from the west of Peking round to the north-east, forming a magnificent amphitheatre. At Tien-tsin we saw nothing of them, and the country is otherwise painfully flat. Chili is generally said to be a sterile province, but though it does not contain ground enough for

the wants of its inhabitants, it can scarcely be called sterile. That part of the province we have marched through contains scarcely half an acre of uncultivated ground, and I think that is the case throughout; but water is scarce, and the staple crops are Indian corn and millet, which do not yield such a good return, in proportion to the ground covered, as rice and wheat do. The country through which we have marched is all cultivated, and (in the neighbourhood of Peking especially) well wooded. The family cemeteries round the capital are beautiful. A family grave generally consists of tumuli over each grave, with a horse-shoe-shaped earthen mound inclosing the graves, and between the sides of the horse-shoe two marble monuments resting on tortoises. Trees are planted round in the most tasteful manner, and in perfect harmony with the sacredness of the spot.

I was present at the signing of the Treaty, and although most of our people were disappointed by the want of show, it was interesting to look on such a magnificent collection of Mandarins. Prince Kung sat sulky-looking, but self-possessed,—the *beau idéal* of a Chinese aristocrat. Round him flitted several red buttons, and below these on the left were a number of blue buttons, and further down a crowd of young crystal and white ones, many of them with happy inexperienced-looking faces. The old statesmen of the Empire were here, and as one looked at their astute faces, it was difficult to suppose it possible that the childish measures lately used towards us could have emanated from them.

The most striking piece of architecture about Peking is the wall, which is a magnificent one. The streets are very wide and well laid out, but the houses are poor looking, though many of the shop fronts are beautifully carved. The people are exceedingly civil and well-behaved towards foreigners.

Of the unfortunate party that were captured by San-ko-lin-sin's army on the 18th ult. at Chan-kia-wan, Captain Brabazon, Quarter-Master-General, R.A.; the Abbé Luc, and some French belonging to the Scientific Society, are still unaccounted for. The two former are believed to have been decapitated by order of a Tartar general who had them prisoners with him. He was wounded in the battle of the 21st, and in exasperation ordered their execution. The account is given by Chinese Catholics, and the Russians say two Europeans were decapitated at the Stone Bridge, Pah-li-chao, near Tung-chow, where the Tartar camp was. The authorities pretend ignorance on the subject, but the circumstance of the bodies not being produced gives colour to the truth of the report. The number of French who were of the party is not correctly ascertained, but there appear to be four or five still unaccounted for. Those who providentially escaped, after much torture, are Messrs. H. S. Parkes, C.B., and H. Loch; Capt. Escayracke, a French officer; five French privates, and eleven Sowars, together nineteen. Those who unhappily sunk under the inhuman treatment of the barbarous cruel foe, and whose remains were sent into the camp are, W. de Normann, Attaché to the British Legation at Shanghai; M. T. W. Bowlby, special correspondent of the *Times*; Lieut. and Adjutant Anderson, Fane's Horse; private Phipps, King's Dragoon Guards, four Sowars, and three French, together eleven. The bodies could only be recognised by the dresses in which in some instances they appear to have been wrapt after having been stripped. A description of the state of these poor victims is too horrifying to be related. The tightness of the cord with which they were bound ate into the flesh, and caused a lingering and painful death by mortification. The bodies of the Sowars were given to the Sikh Cavalry, who, as is the custom, burnt them. The French were delivered to our Allies, and the four British were buried in the Russian cemetery, outside the An-tin gate of Peking, on the 17th.

At noon the procession formed at the Llama Temple, and marched in the following order to the Russian cemetery, half-a-mile from the city, the band of the Rifles playing a slow march:—

One Troop Dragoon Guards.

One Troop Fane's Horse.

An Officer and twenty men of each European corps (armed).

The Commander-in-Chief, } Chief mourners.
The Earl of Elgin

The corpses on gun-waggons, each drawn by six horses. Mourners: Nearly all the Officers of the English, and a large number of the French Army, including General Montauban, Commander-in-Chief.

PALL BEARERS TO MR. BOWLEY.

Major A. Anson
Mr. C. S. Compton
Capt. Farquharson

Hon. T. Thurlow
Col. Biddulph
Hon. — Wortley

PALL BEARERS TO MR. DE NORMANN.

Mr. H. Loch
Mr. T. F. Wade
Mr. H. S. Parkes

Capt. Grant, A.D.C.
Capt. Lane, A.D.C.
Lieut.-Col. Crealock

PALL BEARERS TO LIEUT. ANDERSON.

2 Officers Fane's Horse

2 Officers Fane's Horse

PALL BEARERS TO PRIVATE PHIPPS.

2 Privates King's Dragoon Guards | 2 Privates King's Dragoon Guards

The burial service was read by the Rev. Mr. McGhee, chaplain to the British forces. The priest of the Greek Church attended by request, in his pontifical robes, holding on high the emblem of our faith. Father Makee, the Roman Catholic priest attached to the British army, was present. Three volleys were fired by the infantry. It was a mournful and affecting ceremony to witness these poor Christian victims of heathen barbarism laid in their untimely graves. The cemetery is about a quarter of a mile outside the northern wall of the city. The grave is on high ground, just within the inner gate. The coffins were laid side by side from the north to the south; Private Phipps, then Lieutenant Anderson, then Mr. de Normann, and then Mr. Bowlby. The Royal Engineers are to place a tomb over the poor fellows, and if the British Government does not erect a monument to their memory, it is to be hoped that it will be done by private subscription.

The Chinese authorities have been made to pay the sum of 300,000 taels of silver (say £100,000) for the families and friends of the deceased. The exact amount for each will be decided by H.M.'s Government; the maximum, it is said, will be £10,000, and the survivors who escaped will participate, in consideration of their sufferings. One Sowar has died since he came into camp from the effect of his injuries.

PROCLAMATION BY SIR HOPE GRANT, K.C.B.

"Whereas certain officers sent to Tung-chow with the knowledge and consent of the Imperial Commissioners, Tsay, Prince of I, and Muh-yin, for the purpose of arranging the conditions of a pacific reception of the Allied Ministers at Tung-chow, were, on the 18th September last, in defiance of the flag of truce, under protection of which they were travelling, treacherously seized by the Prince Sang-ko-lin-sin and his colleagues, the army which they commanded has been defeated and dispersed by the Allied Forces. These are now encamped outside the north wall of Peking, and are in occupation of a gate of the city. It has since come to light that the officers and men treacherously seized have been subjected to usage so barbarous that several of them have died. This atrocity, for which the Chinese authorities alone are responsible, they must be made to expiate, and as it appears that the persons before mentioned, who were captured in violation of the usage which protects those who pass between hostile armies, were first maltreated at the Palace of Yuen-min-yuen, the Commander-in-Chief has decided upon the complete destruction of the buildings thereto belonging; and further, upon the exaction of a sum of money, to be paid in compensation for what they have endured, to the survivors of the parties seized, or to the families of those who have lost their lives in captivity. If this sum be at once paid, the authorities and people of the capital will be treated as those of Tien-tsin and Tung-chow have been; let them remain peaceably where they are; but if the sum be not paid within the time appointed, or if peace be not immediately made by the signature of the required Convention, the Commander-in-Chief will not be answerable for the consequences."

SIGNING OF THE TREATY.

The ceremony of signing the Treaty took place in the Hall of Ceremonies in Peking. At 3 P.M. the procession entered the An-tin gate in the following order:—100 cavalry (detachment of King's Dragoon Guards, Probyn's and Fane's Horse,) 400 infantry (detachments of the various regiments of foot), officers and others mounted; the General and staff; Lord Elgin in his green sedan chair, carried by sixteen Chinese coolies in scarlet livery, attended by a detachment of cavalry and infantry. The street from the gate was lined by detachments of infantry, amounting to 2,000 men, who followed up the procession as it passed, forming altogether an armed force of about 3,000 men marching through the capital.

On reaching the Hall of Ceremonies the party passed through a gateway into a court-yard, when the horsemen dismounted, and the whole filed off on either side, leaving an avenue through which H.M.'s Envoy was conveyed to the steps of the raised floor of the Hall, whilst a flourish of trumpets and the national

air saluted him, as the soldiers presented arms. On descending from his sedan chair his Lordship was met by Prince Kung, the Emperor's brother who saluted in the usual manner of the Chinese, by extending the two arms forward with hands together, the Earl raising his hat. His Lordship then walked towards the further end of the Hall, and took the seat of honour, placed there for him, at the same time motioning the Prince to take the lower seat, about fifteen feet on his right. Sir Hope Grant occupied a chair on Lord Elgin's left. A table covered with tawdry embroidered cloth stood before each. At, and behind, a row of similar tables running from the back to the front, staff and other officers and visitors sat or stood to witness the ceremony, and on the opposite side, the Princes of the Council and Mandarins of various buttons and feathers took up a similar position.

Between the two stood the Attachés of the Embassy, interpreters, and others, engaged in the ceremony, at a table whereon papers, despatch boxes, &c., were placed.

The examination of credentials and other papers occupied about half an hour, and at a quarter to five o'clock the signatures of the high contracting parties were attached to the documents. Kung produced the Emperor's signature in vermilion, with the seal of the Empire attached on yellow paper, authorising him to sign the Convention. Lord Elgin then sent a message through the interpreters to Kung expressing his hope that the Treaty now concluded would be lasting, to which the Tartar replied in true Asiatic words, he "hoped it would last a thousand years, that affairs had been badly managed hitherto, but that now he had undertaken the control of them he believed no misunderstanding would arise."

On retiring, as Lord Elgin walked towards his sedan chair, Kung should have been at his side, but he lagged behind a little, and his Lordship had to wait until he stepped forward. Throughout the ceremony the Prince's expression was one of undisturbed sulkiness—he appeared to reply with churlishness to all that was said to him. He had on a purple damask silk long coat. The button on his hat was covered with red silk like the tassel which hung from it. Lord Elgin was in ambassador's uniform. He assumed a cold and distant air, and doubtless felt the utmost disgust at having to treat with the minister of a falsehearted and perfidious master.

A salute of 21 guns, from a battery of Royal Artillery on the wall of the An tin gate, announced that peace was established. It had been intimated that the usual refreshments on such occasions would not be partaken of, therefore none were offered, except the cup of tea which is customary at all times.

Reports of intended treachery at the last moment were communicated through Catholic priests. They were not believed, but precautions were taken against them, by having a large force within the city, instead of an escort merely, as was first intended.

This Hall of Ceremonies is a common-looking chamber, entirely open in front, with large closed doors at the back, on which the usual picture of warriors, &c., are pasted. From the ceiling in front there was some tawdry silk hangings, the floor was partly covered with mats and pieces of carpet, and the whole scene was considerably inferior to the stage of a second-rate sing-song in the south.

An attempt on the part of M. Beato to take a photograph of the scene at the moment of signing, failed in consequence of the light being unfavourable. It was amusing, however, to look on and see the quiescent attitude of the party for about thirty seconds, whilst the camera was supposed to be receiving the impression.

On returning, the troops were formed in bodies at short intervals from the Balace to the gate.

The following heads of the Treaty have been made public:—

In Article 1 the Emperor expresses his regret at the misunderstanding occasioned by the affair of Taku.

Article 2 revokes the consent given by the Queen to the conditional suspension of her Treaty right to place a Minister in permanent residence at Peking. Her Majesty resumes the exercise of her full right to keep a Minister there, or when it suits her.

Article 3 provides the payment of an indemnity of 8,000,000 taels in all; that is 4,000,000 more than the sum already granted by the Treaty of Tien-tsin. Tien-tsin is to pay half a million by the 30th November. Canton, 333,333 taels, less the advances towards the Shameen site, by the same day. The rest is to be paid out of the Customs, one-fifth of the revenue of which will be taken quarterly till the whole is paid.

Article 4 opens Tien-tsin to trade.

Article 5 removes the interdict on emigration to the British Colonies or elsewhere, and provides that regulations shall be fixed for the protection of the emigrant.

Article 6 cedes to the British Crown the portion of Cowloon now held under lease, and makes it part and parcel of the Colony of Hong Kong.

Article 7 provides for the immediate operation of the Treaty of Tien-tsin, and this Convention of Peking.

Article 8 provides for the promulgation of both the above instruments throughout the Empire.

Article 9 provides for the immediate evacuation of Chusan by the British force now garrisoning it. The rest of our army in China will remain at Tien-tsin, or Taku, or Tung-chow, or Canton, or at all these places, as the British Government shall decide.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

COEVORDEN—At Hong Kong, on the 6th Nov., the wife of Dr. E. J. van Coevorden, of a daughter.

GUTIERREZ—At Victoria, Hong Kong, on the 8th Nov., the wife of Mr. R. F. Gutierrez, of a son.

JARMAN—At the Central Police Station, Hong Kong, on the 28th Oct., the wife of Mr. J. Jarman, of a daughter.

KENNEDY—On the 9th inst., at 14, Prince's-gardens, Prince's-gate, the wife of Colonel Clark Kennedy, C.B., of a daughter.

JONES—At Buffalo Village, Singapore, on the 18th Nov., Mrs. J. Jones, of a son.

LANE—At Hong Kong, on the 11th Nov., the wife of Mr. W. Lane, of twin sons, one surviving only a few hours.

NEWBURY—At Singapore, on the 12th Nov., Mrs. M. Newbury, of a son.

MARRIAGES.

ARMSTRONG - CALDWELL—At St. John's Cathedral, Hong Kong, on the 15th Nov., by the Rev. J. H. Gray, Mr. John Martin Armstrong, to Emily, second daughter of Mr. Henry C. Caldwell.

BOAVENTURA DOS REMEDIOS—SAVARD—At Macao, on the 27th Oct., Mr. Boaventura dos Remedios, to Miss Filomena F. Savard.

BOWMAN—THORPE—On the 17th Nov., at St. Andrew's Church, Singapore, by the Rev. A. D. Nicholson, M.A., Thomas, second son of the late J. Bowman, Esq., M.D., F.R.M.C.S., of Liverpool, to Elizabeth Sarah, youngest daughter of J. J. Thorpe, Esq., of London.

MORRIS—CURNOW—At St. John's Cathedral, Hong Kong, on the 13th Nov., by the Rev. J. J. Irwin, Mr. John Morris, fourth son of the late Mr. Henry Morris, of Edinburgh, to Isabella Francis Curnow, fifth daughter of Capt. Wm. Curnow, of Penzance, Cornwall.

RICHARDS—CALDWELL—At St. John's Cathedral, Hong Kong, on the 15th Nov., by the Rev. J. H. Gray, Mr. William Morrison Richards, H.M. Naval Storekeeper at Hong Kong, to Louisa, eldest daughter of Mr. Henry C. Caldwell.

DEATHS.

APPELL—At Hong Kong, on 31st Oct., Capt. S. Appell, of the Hanoverian barque *Johanna Hermann*.

BAPTISTA—At Macao, on 3rd Nov., the wife of Mr. Jacob Baptista, of the *Singapore Free Press*.

CARNEIRO—At Macao, on 30th Oct., Mr. F. E. Carneiro.

FULLER—At Shanghai, on the 16th Oct., John Henry Fuller, aged 28 years, of Brooklyn, New York.

LINCOLN—At Shanghai, on 4th Nov., Nathan W. Lincoln, of U.S.A.

MOORE—On the 23rd inst., at Woodlands, Cheshunt, Herts, the residence of Robert Diggles, Esq., in her 92nd year, Mrs. Eliza Moore, relict of the late George Moore, Esq., and sister of the late Right Hon. Sir Edward Thornton.

REMEDIOS—At Hong Kong, on 4th Nov., Mrs. Guihermina dos Remedios.

REYES—At Macao, on 11th Nov., Dr. Joze Reyes.

SCHERDER—At Singapore, on the 16th inst., Louisa Cecelia, wife of Mr. L. J. Scheerder.

THIMS—At Hong Kong, on 10th Nov., John Thims, of the ship *G. B. Carr*.

WORTHINGTON—On the 8th inst., in his 46th year, John Arthur Worthington, Esq., of Altrincham.

COMMERCIAL REPORT.

CHINA—EXPORTS.

TEA.—CANTON.—Supplies have arrived freely, and a large business has been done. The settlements of the fortnight are reported thus:—Congou, 58 chops Oonan and Oopack at 23 to 27½ taels for the former, and 26 to 30½ taels for the latter, and 2,000 half chests Taysam at 18 to 23 taels. Black teas—At Shanghai the only supplies reported are a few chops of Ningchows, by no means first quality; these are held above the market. The settlements of the fortnight are reported as under:—Congou, 2 chops common Ningchow, at 27½ to 29 taels; 1,750 chests Shanghai made, and common Hoochow, at 21 to 23 taels; Oulongs, 1,250 packages Shanghai made, Japan leaf, price not reported; Flowery Pekoes, 500 chests at 40 taels. At Foo-chow-Foo there is less doing, and prices of Congou are somewhat easier, the export tables and the advices from England tending to make buyers more cautious. The settlements since last mail are reported as under:—Congou, 10,500 chests and 7,000

half chests, at 10 to 24 taels (5,000 chests and 500 half chests being Ningchow, at 21 to 24 taels); Souchong, 250 chests, at 25 taels; Oolong, 4,500 half chests, at 14 to 23 taels; Flowery Pekoe, 1,500 chests, at 25 to 50 taels; Scented teas, 1,750 boxes, at 23 to 25 taels. The unsold stock on the market is reported at 120,000 packages Congou (including 17,000 chests Ningchow and Hohow), 3,000 chests Souchong, 7,000 half chests Oolong, 1,000 chests Flowery Pekoe, and 5,000 boxes Scented Tea. At Amoy supplies have come forward unexpectedly, and the teamen being anxious to realise, are much easier in their terms, and rates have fallen \$3 per picul. The *Maury* was loading for New York and would sail immediately; the *Kathay* would follow, and another vessel is wanted. The settlements for the month are as follow:—Oolong, 9,500 half chests, at \$10 to \$23, and 650 ten catty boxes, at \$27; Anko, 10,000 half chests, at \$14 50c. to \$19 50c.; Orange Pekoe, 1,650 half chests, at \$14 50c. to \$19 25c.; Congou, 1,000 half chests at \$15 to \$23.

RAW SILK.—SHANGHAI.—There has been again a very large business done during the fortnight. There can hardly be a question that the insecurity of property consequent on the anarchy produced by the rebellion, has induced shipments of the silk which is usually consumed for native manufactures; hence the amount exported is no guide to the season's yield. In fact, considering the paucity of desirable kinds for export which have appeared as yet, it may be argued that the yield is short. The settlements of the fortnight are estimated at 6,000 bales. The silkmen are firm on the ground of intelligence of a rise in price in the interior, and foreigners are more disposed to meet them owing to the rates of exchange becoming easier. The finer kinds continue very scarce, especially those suitable for shipment to the United States, and command an advance of five to ten taels. The stock on the market unsold is estimated at 7,500 bales, nearly all being common Tsalee and Taysaam. The total settlements of the season are 40,000 bales against 27,000 bales at same time last year. The quotations are:—Tsalee, No. 3, 390 to 395 piculs. Taysaam.—No. 1, 340 to 350 piculs; No. 2, 320 to 325 piculs.

AT CANTON.—Musters of new silk continue to be shown, but the article is scarce, and excessive rates are demanded. A contract is reported of fifty piculs re-reeled Cunchong for the United States, at 480 dols. Loong-kong is quoted 450 dols. for No. 1; Kowkong, 425.

CHINA—IMPORTS.

SHANGHAI.—The continued occupation by the rebels of Soochow naturally paralyses the trade of the port. Stocks have been reduced by exports to Japan and Ningpo; prices, however, have manifested very little improvement, although there is certainly a better feeling. The following are the clearances of the fortnight:—Grey shirtings, 30,000 pieces; white shirtings, 2,500 pieces; T.-cloths, 11,500 pieces; American goods: drills, 11,500 pieces (stock 280,000 pieces); sheetings, 400 pieces (stock 18,000 pieces); jeans, 2,500 pieces (stock 45,000 pieces); long ells, 360 pieces; Spanish stripes, 342 pieces; lastings, 50 pieces; iron, no demand, and stock excessive; lead, no sales, stock small; tin, no stock, and no inquiry; window glass dull, with a large stock. Straits produce stocks generally are very small, but no sales are reported.

CANTON.—The transactions of the fortnight are limited, but still holders are firm and anticipate an early improvement. The sales reported since last mail have been as under:—Yarn, 50 bales; grey longcloths, 9,300 pieces; white ditto, 7,350 pieces; white spot shirtings, 2,000 pieces (at \$2 50c. to \$3 60c.); coloured ditto, 750 pieces (at \$3 15c. to \$3 50c.); coloured broads, 240 pieces (at \$3 25c. to \$3 80c.); damasks, 600 pieces (at \$5 47c. to \$6 45c.); chintz, 2,500 pieces (at \$1 50c. to \$2 10c.); American drills, 6,000 pieces; do. Jeans, 1,000 pieces. T.-cloths, 8,800 pieces; Spanish stripes, 570 pieces; long ells, 480 pieces; camlets, 100 pieces; lastings, 450 pieces; lead, 850 piculs; quicksilver, 400 flasks; iron 2,000 pls. nail rod, and 320 pls. hoop (the latter at \$3 to \$3 45c.); tin plates, 350 boxes.

HONG KONG.—There has been a steady business done, the following being the sales reported since the dispatch of last mail:—Yarn, 320 bales; grey longcloths, 2,500 pieces; white ditto, 2,000 pieces; T.-cloths, 20,000 pieces; white figured shirtings, 2,000 pieces at \$2 45c.; dyed ditto, 500 pieces; long ells, 500 pieces; Spanish stripes, 1,000 pieces; camlets, 360 pieces; lead, 600 piculs; nail rod iron, 2,000 bundles; quicksilver, 200 bottles.

AMOY.—The following is the report of the month:—Yarn, no sales, and holders firm; stock, 600 bales; grey shirtings, wanted; sales, 1,000 pieces; stock, 1,500 pieces; white ditto, sales, 1,500 pieces; stock, 3,000 pieces; T.-cloths, sales, 500 pieces; stock, 3,000 pieces; Amer. drills, sales, 2,000 pieces; lastings, 100 pieces; Straits produce, scarce, and saleable at quotations.

The picul is 133½ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

	Bank.	Private.
At Shanghai (per Tael) . . . 6 months sight.	6s. 5d.	6s. 5½d.

THE RATIFICATION OF PEACE WITH CHINA.

THE first announcement of this event received in this country was at the Foreign-office on the 15th inst., while the Ministers were assembled at a Cabinet Council to determine the question of sending reinforcements to Peking. Of course the news was very acceptable, relieving them from a very serious responsibility. The intelligence was conveyed by our Ambassador, Sir John Crampton, at St. Petersburg, who had been informed of the event by the Russian Government. This is the second time that the Russian Government has been the "HERALD OF PEACE." The conclusion of peace in 1858, by the Treaty of Tien-tsin, it will be remembered, was announced through that channel days in advance of our own overland advices, and—notwithstanding that it has been announced to the contrary—since that time, to the present occasion, no similar message has been conveyed from St. Petersburg, not even the defeat at Taku. It is strange that the Russian Government should have pointedly omitted to give us any other tidings during the two campaigns, as, of course, they would be in possession always of much later advices than we, as their overland route occupies only thirty-six days from Peking, while ours extends over sixty. At a future time we may see their policy; but, in the meantime, it will be well to keep the fact in mind. The following is the precise notice issued:—

FOREIGN-OFFICE, Dec. 15, 1860.

Intelligence has been received at the Foreign-office this afternoon through St. Petersburg, from Peking, up to the 9th of November, stating that peace was concluded on the 29th of October, and the ratifications exchanged. On the 5th of November the Allied forces evacuated Peking, and the Emperor was expected immediately to return to his capital.

In reply to an inquiry made by Government, our Ambassador at St. Petersburg transmitted the following message:—

FOREIGN-OFFICE, Dec. 18.

A telegram has been received from her Majesty's Minister at St. Petersburg, dated this afternoon, and stating that the Russian Government have received no news of the fate of Messrs. Bowly and Brabazon.

Two days after the following announcements were made:—

FOREIGN-OFFICE, Dec. 20.

Sir John Crampton reports yesterday that Lord Elgin, in a letter of the 8th of November, informs him of the ratification and publication of the Treaty with China, and of the march of the army to Tien-tsin. His lordship makes no mention of the prisoners, but states that he is indebted to Gen. Ignatieff for the manner in which that Minister had promoted the object of his negotiations.

Prince Gortschakoff has communicated to me the following report from General Ignatieff, of the European massacre by the Chinese:—English: De Norman, Mr. Bruce's Attaché; Anderson, chief of Lord Elgin's escort; the correspondent of the *Times*. French: Debut, intendant of the French expedition, one of his aides-de-camp, and a colonel of Artillery. These are the only names cited by General Ignatieff, but the total number of victims is nineteen.

PARIS, Dec. 20.

The *Moniteur* publishes a despatch from Baron Gros, dated Peking, 7th November, received via St. Petersburg, confirming the signature of peace. The Shanghai ultimatum had been accepted by the Chinese. The ratifications of the Treaty of Tien-tsin had been exchanged. Sixty millions of francs would be paid to France as an indemnity. The emigration of coolies had been authorised by the Chinese Government. Churches, cemeteries, and the dependencies which formerly belonged to the Christians in the whole empire, would be restored. A *Te Deum* and *Domine Salvum* were to be sung in the cathedral of Peking, after the replacing of the cross on its summit.

The *Moniteur* also publishes the following:—

Certain organs of the English press persist with the most inexplicable obstinacy in entertaining their readers with accounts of fabulous spoil with which every French soldier will return after the pretended sack of the Imperial Palace of Peking. The only reply we can give is to publish textually a letter written by General de Montauban to his Excellency the Marshal, Minister of War, dated the 8th of October. It will be remembered that the Ambassadors of France and of England entered Peking on the 22nd of October, and that peace was signed on the 26th:—

HEAD-QUARTERS BEFORE PEKING, Oct. 8.

"Monsieur le Maréchal,—It was agreed between General Grant and myself to proceed to Yuen-ming-Yuen, the summer residence which the Emperor always occupies, four leagues north of Peking. This country is so cut up by roads, thickets, &c., that General Grant and his army lost their way, and I arrived alone in the evening in front of the Palace, which was in charge of a Tartar guard.

"Despite a long and fatiguing march, I ordered the Palace to be occupied at seven o'clock in the evening, and forcing an entrance I had two officers and some soldiers wounded. The Tartars evacuated the Palace entrusted to their care and lost some men, one inferior mandarin being killed in the courtyard. I ordered the Palace to be occupied, and went there myself early next morning. It is impossible, M. le Maréchal, for me to describe to you now the wonders of this Imperial habitation. Nothing in Europe can convey an idea of such luxury. I shall not attempt to describe its splendours in these hasty lines. I shall have the honour to write to your Excellency at greater length by next mail to give you a full description.

"I placed strong posts at all the outlets of the Palace, so that nothing

might be disturbed until our allies arrived, to whom I immediately sent information. A few hours afterwards they arrived, and a portion of their cavalry having joined my column, I appointed two English and two French officers to see that nothing was touched, and that the two armies should conjointly exercise a strict control.

"General Grant and Lord Elgin having arrived, we appointed three commissioners of each nation to make a division of the most precious objects. In this division I recommended our commissioners to select only objects of value for the sake of art or antiquity. I hope to send to your Excellency, for his Majesty the Emperor, and for the great collections of the Government, or for the Museum of Artillery, some rare curiosities for France. I am at present awaiting the arrival of Baron Gros, who is to join me here, Lord Elgin being here already. A sort of convention has taken place between Prince Hung, regent of the empire, and the English general, in the name of the two generals-in-chief. I had consented to an armistice, that Prince Hung might come to Peking to treat; he has gone some eight leagues off, and the Emperor is in Tartary.—I remain, &c., MONTAUBAN."

THE WAR IN CHINA.

(Continued from our last.)

LORD ELGIN TO LORD JOHN RUSSELL.

Pa-li-Chiao, Sept. 23, 1860.

My Lord,—In my despatch of the 16th inst. I did myself the honour to submit for your Lordship's information a statement of the incidents which had occurred here between the 11th inst., when the first communication from Prince Tsai and his colleague reached me at that date. I now proceed to narrate what has taken place subsequently.

The arrangements detailed at the close of my despatch above-mentioned as having been determined on after the return of Messrs. Wade and Parko, from Tungchow, were exactly carried out. Mr. Parkes started for that place at a very early hour on Monday, the 17th inst., accompanied by Col. Walker, Quartermaster-General of the cavalry brigade, Mr. Thompson, of the Commissariat Department, Mr. Loch, my Private Secretary, Mr. De Norman, one of Mr. Bruce's attaches, who volunteered to go with him to assist him, and Mr. Bowly, and escorted by five men of the King's Dragoon Guards, and twenty of Fane's Horse, under the command of Lieutenant Anderson. The Allied force and the Commanders-in-Chief commenced their march somewhat later. I received no communication from either during the course of that day. On the following morning, however, at about 10 A.M., the sound of artillery was heard in the distance, and at noon a Sikh trooper arrived from Sir Hope Grant's camp. He brought me a letter from Mr. Parkes, but no news from the camp, except the verbal report that a brisk cannonade had commenced half an hour after he left it. Mr. Parkes, in his letter, informed me that the Commissioners had raised the three following objections to my despatch to them, of which he had been the bearer:—

"1st. To the indefinite date assigned for the withdrawal of our troops, which they contended should take place immediately after the signature of the convention. 2nd. To my proceeding to Peking with an escort, or at least with an escort equal to that which I had stated would accompany me to Tungchow. And, thirdly. To the delivery of her Majesty's letter to the Emperor at an audience. It was on this last objection that they chiefly insisted. I do not enclose the copy of Mr. Parkes's letter, as it was marked private, but the closing sentences are so characteristic that I beg leave to quote them. He dates it at 4.30 A.M., from Tungchow, which is six miles from the proposed place of encampment of the army, four miles from Chang-ke-wan, and twenty-four miles from Ho-see-woo, where I was residing, and he writes:—'I am now starting with Colonel Walker and a Chinese officer to attempt the arrangement of the first of these points, the camping ground for the army. I then go to Chan-kai-wan to start supply work (also for the army), then come back to Tungchow to get out the proclamation, upon which blockcutters have been at work during the night, and, if time and physical strength will then admit, I shall ride back in the evening to Ho-see-woo, that I may know your lordship's views on the question of audience, which the Chinese authorities will, I am sure, again recur to the moment they see me.'

"At about half an hour after midnight I received a letter from Sir Hope Grant describing the circumstances which led to the engagement of the 18th, its successful issue, and inquiring how I considered the negotiations in which I was engaged for the re-establishment of peace to be affected by this incident. The General's letter was in pencil, and I cannot now furnish a copy of it. But I enclose a copy of my reply, which I despatched at 4 A.M. of the 19th inst., to the head-quarters of the Commander-in-Chief by the hands of my military secretary, Lieutenant-Colonel Crealock. I followed myself at 5 A.M., as I thought that the detention of Mr. Parkes and the others who were with him might give rise to questions in the determination of which I should take my share of responsibility. I found that Sir Hope Grant had established his head-quarters at Chan-kia-wan, and soon after my arrival there we proceeded together to the residence of the French Commander-in-Chief, in order that we might confer with his Excellency as to the best means of recovering the subjects of her Majesty and of the Emperor of the French who were missing.

"It was agreed that a reconnaissance of British cavalry should proceed forthwith to Tungchow, and that Mr. Wade should accompany it with a notification to the chief Mandarin of that city to the effect that the Commanders-in-Chief of the Allied Armies required all English and French subjects to return to the head-quarters of their respective armies, and that if any impediment was put in the way of their return, the city of Peking would forthwith be attacked and taken. It was added that Tungchow would not be molested if the inhabitants kept aloof from all resistance to the Allies. Mr. Wade, in the execution of this mission, endeavoured, in the first place, to communicate with a Tartar camp, situated on the Peking side of the city of Tungchow; but he could get no one to acknowledge his flag of truce, and was fired at more than once. He succeeded, however, at length in obtaining access to the chief Mandarin of Tungchow, who spoke of our countrymen who had been in the city with great calmness, saying that he believed a

party of upwards of twenty had left it some time before the firing on the 18th had commenced. This conversation left on my mind the painful impression that on their way back to the camp they had been cut down by the Tartar army in its retreat, an impression which the fact that we had received no communication from the Chinese authorities after the defeat of their army on that day tended to confirm. In a further reconnaissance, however, which was made by Major Probyn on the day following, an intelligent native was captured, who afforded us some relief by assuring us he had seen some of our countrymen proceeding in a cart to Peking. No communication was, however, received from any Chinese authority respecting the fate of these persons, and the Commanders-in-Chief, with great propriety, as it appears to me, resolved to prosecute their movement in advance. On the 21st inst., accordingly, a large body of Tartar troops on the road from Tungechow to Peking was attacked and dispersed, and their camps, which covered a space of several miles, were taken and destroyed.

"On the morning of the day following I received a communication from the brother of the Emperor, informing me that, in consequence of the mismanagement of affairs by the Prince Tsai and Muh, he had been appointed Imperial Commissioner to treat with me, and proposing an armistice with a view to the re-establishment of peace. I answered by referring them to the notification which had been already delivered to the chief Mandarin of Tungechow in the name of the Commanders-in-Chief, and informing them that, until the British subjects detained in Peking were re-tored, I could not take any steps to stay military operations. I enclose herewith the copy of this correspondence.

"I may be expected to say something respecting the origin and cause of the renewal of hostilities which took place on the 18th inst. To hazard conjectures as to the motives by which Chinese functionaries are actuated is not a very safe undertaking, and it is very possible that further information may modify the views which I now entertain on this point. I am, however, disposed at present to doubt there having been a deliberate intention of treachery on the part of Prince Tsai and his colleague; but I apprehend that the General-in-Chief, San-ko-lin-sin, thought that they had compromised his military position by allowing our army to establish itself so near his lines at Chan-kia-wan. He sought to counteract the evil effect of this by making a great swagger of parade and preparation to resist when the allied armies approached the camping-ground allotted to them. Several of our people—Colonel Walker, with his escort, my private secretary, Mr. Loch, Baron Gros, Secretary of Embassy, Comte de Bastard, and others—passed through the Tartar army during the course of the morning on their way from Tungechow without encountering any rudeness or ill-treatment whatsoever. At about a quarter to ten, however, a French commissariat officer was assaulted by some Tartar soldiers under circumstances which are not very clearly ascertained, and this incident gave rise to an engagement, which soon became general. On the whole, I come to the conclusion that in the proceedings of the Chinese Plenipotentiaries and Commander-in-Chief in this instance there was that mixture of stupidity, want of straightforwardness, suspicion, and bluster which characterises so generally the conduct of affairs in this country, but I cannot believe that after the experience which San-ko-lin-sin had already had of our superiority in the field, either he or his civil colleagues could have intended to bring on a conflict in which, as the event has proved, he was so sure to be worsted. At the same time, the facts that he covered by his guns and with a portion of his troops the ground assigned to us, and that a French officer returning from Tungechow with the knowledge and consent of the Chinese Plenipotentiaries was assaulted and killed on his lines, entirely justify both the charge of bad faith which has been brought against the Chinese authorities for their conduct in this instance, and the proceedings of the allied Commanders-in-Chief which have ensued therefrom. I have, &c., "ELGIN and KINCARDINE."

LORD ELGIN TO SIR HOPE GRANT.

Ho-see-woo, Sept. 19, 1860, 3½ A.M.

My dear General,—I received your letter at midnight. The bad faith of the Chinese releases us, in my opinion, from any obligation to restrict our advance, and leaves us free to move forward, if we deem it expedient to do so. I think, moreover, that the safety of Mr. Parkes and of those who are with him, will be best consulted by a forward movement on your part; but you may probably have received information ere this reaches you, which will enable you to arrive at a sounder judgment than I can on that point. As far as I am concerned, therefore, you are perfectly free to go on. Indeed, I shall be glad to hear that you have done so.

If there be no troops at Tungechow, it would be a pity to drive the respectable inhabitants out of the place. You might probably send a message to say that, in consequence of the bad faith of the Chinese authorities, you had resolved to advance; but that, if not resisted, you will treat it as you treated Tien-tsin. Dew is pretty confident that he can carry on his boats to Tungechow. At any rate, up to this point there is no difficulty whatsoever. I have, &c.,

ELGIN and KINCARDINE.

THE COMMISSIONERS TO LORD ELGIN.

Received Sept. 22, 1860.

The Prince Kung, Imperial Commissioner, with full powers, &c., makes a communication.

Tsai, Prince of I, and Muh, President of the Board of War, not having managed matters satisfactorily, his Majesty's decree has been received depriving them of their imperial commission. The Prince Kung, having had the honour to be named Commissioner with plenipotentiary powers, will at once despatch Hangki and San-wei-wan to have an interview for the discussion of the question of peace. Let his Excellency the British minister temporarily suspend hostilities, in order to the establishment of friendly relations. A communication addressed to his Excellency the Earl of Elgin, &c. Hienfung, 10th year, 8th moon, 7th day (Sept. 21), 1860. Translated by THOMAS WADE, Chinese Secretary.

LORD ELGIN TO THE COMMISSIONERS.

Pa-li-Chiaw, Sept. 22, 1860.

The undersigned, the Earl of Elgin and Kincardine, her Britannic Majesty's Ambassador Extraordinary and Plenipotentiary in China, has

the honour to acknowledge the despatch of his Imperial Highness the Prince of Kung, Minister Plenipotentiary, &c., under date the 21st of September.

The Prince must be aware, that on the 19th inst. the chief authority at Tun chow was called on by the Allied Commanders-in-Chief to intimate to the various officers and gentlemen, subjects of England and France, who had not yet returned, to repair without delay to the headquarters of the forces of their respective Governments. It was further intimated, through the same channel, that if any hindrance were offered to the safe and speedy return of any of the persons missing, the consequences would be most serious to the Imperial Government.

The undersigned has the honour to enclose a written order to all subjects of her Majesty now in Peking at once to comply with the above requisition.

He has only to add that when they reappear he shall not feel at liberty to call on the Commanders-in-Chief to suspend hostilities, or to recommence negotiations upon the subject of peace.

ELGIN and KINCARDINE.

LORD ELGIN ON THE ENGLISH PRISONERS.

Pa-li-Chiaw, Sept. 22, 1860.

I, the Earl of Elgin and Kincardine, her Britannic Majesty's Ambassador and High Commissioner in China, hereby require all the subjects of her Majesty that may be at present in Peking to return forthwith to the headquarters of the British army; and should any attempt be made on the part of the Chinese authorities to detain them, I authorise them individually or collectively to protest against this proceeding of those authorities, and to warn them of the consequences. ELGIN and KINCARDINE.

SIR HOPE GRANT TO THE SECRETARY OF WAR.

Head-quarters, Chang-tsa-wan, Sept. 20, 1860.

Sir,—I have the honour to report that I left Tien-tsin on the 9th inst., with 700 infantry, 600 cavalry, and two batteries of artillery; 3,000 French troops followed, one march behind me; and two days later Sir John Michel marched, with a regiment of cavalry, a 9-pounder battery, and the 2nd Infantry Brigade.

On the 13th instant I reached Hooseiwoo, forty miles from Tien-tsin, and as several letters had been received by Lord Elgin from some fresh Commissioners of high rank, I halted whilst Messrs. Parkes and Wade went on to meet them at Tang-chow, twenty-five miles distant. On the 15th these gentlemen returned, having made satisfactory arrangements with the Chinese Commissioners, by which it was agreed that the Allied forces should halt at Chang-tsa-wan, five miles short of Tang-chow, to which place the Ambassadors should advance with an escort, and sign the convention. On the 16th Sir J. Michel's force arrived, and on the 17th we encamped at Matow, five miles short of Chang-tsa-wan. The forces consisted of Lieut.-Colonel Barry's Armstrong Battery, Captain Desborough's 9-pounders, Captain Stirling's 6-pounder battery, the cavalry brigade, and the 2nd and 4th infantry brigades; and 1,200 French, with a light battery. From the above, however, three 6-pounders and the 60th Rifles had been left at Hooseiwoo, to hold that place, where I have a depot.

Mr. Parkes rode on to Tang-chow to arrange matters for Lord Elgin's reception, and to make sure of the agreement as to our advance, that a collision might not take place by inadvertence; it having been settled that the Chinese army should fall back from Chang-tsa-wan. Mr. Parkes was accompanied by an escort of Fane's Horse, under Lieut. Anderson, and by Mr. Loch, Private Secretary to Lord Elgin. On my part, I sent Lieut.-Colonel Walker, A.Q.M.G., to fix the site of our camp with the Chinese authorities, and D. A. C. General Thompson, to receive the promised supplies for the force.

At daybreak on the 18th I marched, and, after going about four miles, I came in sight of a very large force of Chinese, both cavalry and infantry. Whilst halting to form up my force, Mr. Loch galloped in with three sowars, and informed me that on going into Tang-chow, the previous day, they had found everything quiet on the road; the Commissioners had agreed to all Mr. Parkes's arrangements; and that, accordingly, leaving Lieutenant Anderson and his sowars at Tang-chow, Messrs. Parkes, Loch, Thompson, and Lieut.-Col. Walker, with five men of the King's Dragoon Guards, had come out to meet us, and show us our camping ground, which was a mile and a-half south of Chang-tsa-wan.

On the arrival at that spot, however, they found it occupied by a large Chinese army, whilst batteries had been hastily thrown up and armed, so as to flank the proposed site of our camp. From the commanding officer Mr. Parkes could obtain no satisfaction, so he started back to Tang chow with an orderly of the King's Dragoon Guards, to see the High Commissioner and ask the reason of this move. Mr. Loch came on to tell me of this, and Colonel Walker and Deputy-Assistant-Commissary General Thompson remained on the ground with four men of the King's Dragoon Guards and one sowar, where they were to await Mr. Parkes's return.

It was only now that I learnt that Mr. de Norman, attaché to her Majesty's legation, and Mr. Bowlby, correspondent of *The Times* newspaper, had gone to Tang chow with Mr. Parkes, and remained there with Lieutenant Anderson.

Mr. Loch volunteered to return with any orders, and Captain Brabazon, Deputy-Assistant Quartermaster General, R.A., volunteered to accompany him.

They accordingly started, under a flag of truce, for Tungechow, with my orders for Mr. Parkes and the whole party to return at once to headquarters.

Meanwhile the Chinese cavalry advanced in great numbers, on both flanks, and their infantry poured down on our right front, which was enclosed ground and carefully entrenched. I was extremely anxious not to engage, for fear of compromising our officers, who were in their lines. I therefore covered both my flanks with cavalry, and ordered the baggage to be hastened on, and massed on a village in our rear, where it could be defended by a small force. This latter operation occupied nearly two hours, during which time the enemy's cavalry had almost entirely surrounded our forces. Sufficient time had elapsed for all of our party to return from Tungechow, and I became anxious for their safety, when suddenly a commotion appeared in the enemy's line. The guns and match-

lock men in their centre opened fire, and Colonel Walker's party dashed out of the midst of their ranks. Colonel Walker reported that, whilst waiting for Mr. Parkes, a French officer joined him, who was suddenly set upon and cut down by a Chinese soldier, and, on his rising up to prevent his being murdered, his own sword was snatched from his scabbard, and some men tried to throw him off his horse. Seeing that it was a deliberate attempt to assassinate the whole of them, Colonel Walker set spurs to his horse and galloped out with his party, under the fire of the Chinese line. One of his men was wounded and one horse, Mr. Thompson receiving a spear-thrust in his back; but they fortunately managed to reach our lines, their wounds not being severe. It was now useless to wait longer, and the attack was immediately formed. General de Montauban advanced to turn their left, and with him I sent a squadron of Fane's Horse, under Lieutenant Catley. On the centre the 9-pounder battery opened, supported by a squadron of King's Dragoon Guards, and part of the 99th Regiment advanced up the road.

The Armstrong battery, with the 15th Punjab Infantry, took ground to the left, whilst Sir John Michel, with the 1st Sikh Cavalry, three 6-pounder guns, and the 2nd (Queen's), made a wide flank movement on the extreme left, so as to turn the right of the enemy.

The action commenced simultaneously on all points, and it was now apparent that the Chinese had carefully prepared a very treacherous reception for our forces. An entrenchment, skilfully concealed by natural obstacles, extended on our right and left for several miles, and was armed with numerous guns.

Their cavalry hovered in large masses on our entire left flank, so that Sir J. Michel was unable to perform the flank movement that had been intended, until the 1st Sikh Cavalry had, by a brilliant charge, discomfited the Tartar horse, and his force advancing, had driven them back for some miles. Finding his position to be such, I caused the Armstrong battery and the 15th Punjab Infantry to take ground still more to the left, and with them I turned the right of the enemy's entrenchments, who thereupon fled with considerable precipitancy. I then sent the Armstrong guns and the reserve cavalry to join Sir J. Michel, who, after making a circuit of six or seven miles, joined me in front of Chang-tsia-wan at a later hour. Meanwhile the French had turned the left by a very extended sweep, and were advancing steadily up, capturing many guns, whilst the 99th, with the 9-pound battery, joined me in the centre of the enemy's position. The 15th Punjab Infantry pushing on with much spirit, captured several guns in the act of retiring, and eventually advanced through Chang-tsia-wan, taking several large camps on the outside. Here my force halted. The French, being much exhausted by their extensive movement, had halted on the Chinese position.

The enormous extent of country covered by the enemy who showed more than 20,000 men, did not permit me to use my force with as good effect as I might have done, as it was too small to allow of its being scattered. The loss of the enemy is estimated at 600 killed, whilst 75 guns fell into our hands.

The French force encountered chiefly infantry, who, on being driven back, were charged most gallantly by Lieutenant Catley's squadron, of whose conduct General de Montauban has written to me in the very highest terms.

The conduct of the rest of the troops was also most excellent; and I would more particularly mention the 15th Punjab Infantry, commanded by Lieutenant Randall, who, under my personal observation, advanced with great steadiness, and kept their position to the front throughout the day.

Mr. Wade went yesterday to Tang-chow to try and gather tidings of Mr. Parkes's party, but the prefect denied all knowledge concerning them. A Chinaman, however, was brought in to-day, who states that he heard that upwards of twenty foreigners went after the fight to Peking. If this is true, we have every reason to hope for their ultimate safety.

I was compelled to leave a good force at Tien-tsin, lest the sudden withdrawal of so many troops should allow a disturbance to arise there. This in effect took place, but being judiciously met by Sir R. Napier, everything is again quiet there, and I have directed that officer to join me with two regiments of infantry, leaving two and a half regiments, with two batteries of artillery under Brigadier Staveley, at Tien-tsin. I have, &c.,

J. HOPE GRANT, Lieutenant-General,
Commander of the Forces.

The Right Hon. the Secretary of State for War, &c.

SECOND DESPATCH.

Head-quarters, Camp near Tang-chow, Sept. 22, 1860.

Sir,—I have the honour to report, that after the action of the 18th instant, I remained in Chang-tai-wan for two days, during which time the 1,500 French troops left at Hoo-sce-woo joined us, and some convoys arrived in camp, together with intelligence of a flotilla of junks coming up the Peiho with further supplies. From reconnaissances on the 19th and 20th we had ascertained that the Chinese army was encamped in very large numbers about four miles off, on the road between Tang-chow and Peking, and on both sides of the canal which runs from the Peiho to the latter city.

At daybreak on the 21st I marched from Chang-tai-wan, and parking the baggage in a village two miles in front, I was there joined by the French, who advanced on the right. Soon after passing Tang-chow, the French troops got under fire of the Chinese works thrown up to protect a fine bridge crossing the canal, and on the imperial high road to Peking. At this point the enemy's infantry appeared in considerable force. On the left, the Tartar cavalry showed in large masses, and advanced rapidly until within 200 yards of our guns, which, hastily unlimbering, drove them off with a fire of canister, assisted by skirmishers thrown forward from the 2nd (Queen's). The cavalry brigade, which I had kept echeloned away on the left to guard that flank, was now moving up, and the enemy's cavalry, driven away from the right by our fire, hung in large masses on our left front, affording an excellent opportunity for our cavalry to charge, which they promptly seized, the King's Dragoon guards, under Lieut.-Colonel Sayers, in particular, inflicting a very heavy loss on the enemy. On their left, Fane's Horse charged a similar body with great gallantry, while the 1st Sikh Cavalry, under Major Probyn, supporting Fane's Horse, effectually turned the right of the Chinese army.

The enemy, though defeated on the spot, yet still remained in front, in clouds of horsemen, who, though constantly retiring from the advance of any party of our cavalry, however small, never allowed more than 1,000 yards to intervene between us, and showed a steady and threatening front. At this time I had with me the cavalry, the 4th infantry brigade, and three Armstrong guns; the rest of the artillery, with the 2nd brigade, having been left in the centre, with directions to feel the French left. With the three Armstrong guns under Captain Rowley, we fired occasional single shots on their thickest masses. These shots fired singly, at slow intervals, served admirably to illustrate the good qualities of the Armstrong gun; not one failed to strike the thick masses of the enemy, at once dispersing them from the spot.

Thus advancing, the cavalry was brought to a check by the fire of a camp, which was taken by the 99th Regiment, under Major Dowbiggin, and which proved to be the head quarters of some of the imperial princes. This, with several others in the neighbourhood, was buried by our troops, and the Chinese army retired upon Peking.

We then rejoined our right, which had kept in line with the French, who had carried the bridge, inflicting much loss on the enemy.

Forty-three guns were taken during the action, and the loss of the Chinese was very severe. On the right and left were their heaviest losses, but all along the centre small groups of dead showed the effect of the artillery fire, which had followed their movements till they finally retreated. Our loss is 2 killed, and 29 wounded—chiefly slightly.

I should wish most particularly to bring to notice the very excellent service of the King's Dragoon Guards. The country is extremely unfavourable for cavalry at present, partly from the number of ditches, and partly on account of the crops of maize and millet having been recently cut, leaving sharp-pointed stubble, most injurious to horses, and rendering their rapid movement very difficult; their charge was, however, most effective, and they surmounted these obstacles in a most creditable manner.—I have, &c.,

(signed)

J. HOPE GRANT, Commander of the Forces.

The Right Hon. the Secretary of State for War, &c.

CASUALTIES.

The following casualties among the officers and sergeants are reported in the despatch:—

1st King's Dragoon Guards.—Captain R. Bradbury, severely.

1st Battalion Military Train.—Captain W. R. Goodall, contusion of right shoulder by large gingall ball, severely.

Fane's Horse.—Lieutenant Luard, slightly.

2nd Queen's.—Colour-Sergeant John Roberts, severely.

15th Punjab Infantry.—Lieutenant G. A. A. Baker, slightly.

The following despatches and enclosures are from the Supplement to the *London Gazette* of the 15th inst.:—

LORD ELGIN TO LORD JOHN RUSSELL.

Camp before Peking, Oct. 8.

My Lord,—At the close of my despatch of the 23rd of September, sent by the last mail, I informed your lordship that a brother of the Emperor of China, by name Kung, had written to apprise me that he had been appointed to treat with me in the room of Prince Tsai and President Muh, who had been superseded because of their mismanagement of affairs, and that I had referred him, in reply, to the notification which the Commanders-in-Chief had issued some days previously, and which was to the effect that if the British and French subjects illegally detained in captivity by the Chinese authorities, were not at once set at liberty Peking would be assaulted.

On the following day I received a further letter from Prince Kung, which stated that the persons in question had been captured after the fight had commenced on the 18th ult., and that they could only be restored after her Majesty's fleets and armies should have left Taku. The Prince added that there had been a dispute between Mr. Parkes and the Imperial Commissioners Tsai and Muh on the subject of the presentation of the Queen's letter to the Emperor of China.

As I had the good fortune to be within reach of Lieutenant-General Sir Hope Grant at the time when this letter reached me, I thought it proper to confer with him before answering it. I found that he inclined to the opinion, that it would be advisable to take advantage of the opportunity afforded by it to re-state to the Prince, not only the serious consequences which would ensue if he refused to deliver up the British subjects whom he had illegally captured, but also the conditions on which, if they were accepted within a period of three days, peace between Great Britain and China might still be concluded. I was, moreover, desirous to inform the Prince that the Queen's letter to the Emperor had not been, as he insinuated, mentioned by me, for the first time in the despatch to Prince Tsai and the President Muh, of which Mr. Parkes had been the bearer, but that I had referred to it in the very same terms in a letter written to Kweliang, at Tien-tsin; and, further, that I had always treated the question of its presentation as one of courtesy, not of war. I enclose a copy of this communication of Prince Kung, and of my answer; also of my correspondence with Sir Hope Grant, and of a letter from me to Baron Gros in reference thereto. Further letters between Prince Kung and me, the copies of which are likewise enclosed, followed on this correspondence. Notwithstanding, however, various endeavours on his part to raise discussions which might, as he hoped, enable him to escape from the necessity of categorically accepting or refusing the conditions offered, I deemed it to be my duty to adhere to them, and to require that her Majesty's subjects detained at Peking should be restored before any steps for arresting hostile operations were taken. I could not admit the principle that they should be dealt with as prisoners legitimately made during war. At the same time, as their lives might have been put in jeopardy if the Chinese authorities had been driven to despair, I thought it proper to intimate that their unconditional surrender would cause the prospects of peace to improve.

On the 5th instant, the Commanders-in-Chief, having received from the fleets and from Tien-tsin the supplies and munitions of war which they required, advanced on Peking. On the afternoon of the 6th, the main

body of the English force was encamped on the north face of the Tartar city, and the French army, with the British cavalry, at the Summer Palace of the Emperor, having encountered on their march to these points no enemy except a few straggling Tartars, who fled on their approach.

On the morning of the 7th instant, I received a despatch from Prince Kung, of which I enclose the translation, in which he goes a great way towards the acceptance of the conditions prescribed by me in the communications which I had previously addressed to him. I may mention, that he refers in it to a letter written to me on the day preceding, which, however, has not yet reached me. It was agreed that the authorities in Peking should be informed, that the city might still be spared the calamities of an assault, if her Majesty's subjects, therein detained, were immediately restored, and one of its gates given up to the Allies, and that Mr. Wade should require a mandarin of proper rank to meet him at some point between it and our camp, in whose hands he might place, with suitable explanations, a paper stating these conditions, in the names of the Commanders-in-Chief.

I enclose a copy of the document which, in pursuance of this arrangement, was delivered by Mr. Wade to the mandarin sent to confer with him. Mr. Wade leads me to hope that Mr. Parkes and others who are with him, may be restored this evening. But as Prince Kung has left the city, and is now at a considerable distance from it, some time must elapse before we learn what view he takes of the demands preferred in the final summons of the Commander-in-Chief.—I have, &c.,

ELGIN and KINCARDINE.

PRINCE OF KUNG TO LORD ELGIN.

Received Sept. 24.

The Prince of Kung, Imperial Commissioner, makes a communication in reply:—

The Prince has just received the despatch of the British Minister, requiring that the officers of his Excellency's Government, who are still absent, should be desired to return to the army without delay. The officers of his Excellency's Government had, on an earlier occasion, in person, discussed at Tungechow, with the late Imperial Commissioners, the Prince I, and his colleague, right propositions, to the whole of which assent was given, it is to be presumed, to the satisfaction of his Excellency the British Minister. The discussion of the question of personal presentation of the national letter* had not yet been satisfactorily terminated, when the British officers in question, going off in anger, fell in with the troops by the way; an encounter ensued, and they were seized in the *melee*. It is not, therefore, the Chinese Government that has been at all wanting towards the maintenance of friendly relations.

The officers in question are now in the capital; none of them have suffered harm;† but with peace still uncompleted it is scarcely possible that they should be sent back again. The city of Tien-tsin and the Forts of Taku have both been taken, and are still in possession of the British Government. What occasion is there, then, for alarm about a few British subjects who may be missing? If the two Governments are indeed to be friends, if (the British Government), desiring a cessation of hostilities, will take its men of war out of the Fort of Taku, the Chinese Government, so soon as the different concessions it is asked to make shall have been discussed and disposed of, will send back the officers in question, such as they shall find them to be,‡ in order to the perfecting of friendly relations.

The letter addressed by his Excellency to his officers could hardly be delivered while the present state of hostility continues. It shall be delivered as the force has been withdrawn.

A necessary reply, addressed to the Earl of Elgin, &c., &c.

Hienfung, 10th year, 8th moon, 9th day (23rd Sept., 1860).

Translated by THOMAS WADE, Chinese Secretary.

LORD ELGIN TO PRINCE OF KUNG.

The undersigned has received a despatch under date the 23rd inst. from his Imperial Highness the Prince of Kung, and makes this communication in reply:—

The subjects of her Majesty the Queen of England now detained at Peking, were at Tungechow, or on their return from Tungechow to the British camp, under the protection of a flag of truce, and with the knowledge and consent of the Imperial Commissioners, the Prince Tsai, and the President Muh, when the bad faith and imprudence of the General-in-Chief Sang-ko-lin-sin brought on a conflict between the armies of England and France, and that of China, on the 18th inst. Their arrestation under these circumstances was a violation of the law of nations, and their subsequent detention an act of perfidy which expose the Chinese Government and its officers who have taken part in these proceedings, to the just vengeance of the British army, which is now quartered at a distance of 30 li from the gates of Peking.

The Prince states that a dispute had arisen with respect to the mode in which the letter from her Majesty the Queen of Great Britain to his Majesty the Emperor of China, of which the undersigned is the bearer, should be presented, and gives it to be understood that this letter was alluded to for the first time in the communication of the undersigned to Prince Tsai and his colleague, which Mr. Parkes took with him to Tungechow on the 17th inst. This is an error, and if the case has been represented in this light to the Imperial Prince, his Imperial Highness has been deceived. In his communication to Kweiliang of the 3rd inst. the undersigned referred to the letter in question in the same terms in which he referred to it in his communication to the Prince Tsai and the President Muh, of which Mr. Parkes was the bearer. Neither at Tien-tsin nor at Tungechow did he propose to make the delivery of her Majesty's letter to the Emperor the subject of a treaty stipulation. The presentation of letters from Sovereign to Sovereign, and the reception by Sovereigns of ambassadors from other Sovereigns with whom they seek to cultivate relations of friendship, are matters of courtesy understood and practised in all civilised States. A State affecting to be civilised, which refuses to reciprocate such acts of courtesy, necessarily exposes its professions of amity to suspicion.

* The autograph letter of Her Majesty.

† Mortal injury.

‡ This is a mere formula, which it might be almost as well untranslated. It might be rendered "all in good order."

In order, however, to give further proof of his sincere desire for the re-establishment of peace between Great Britain and China, and to afford the Imperial Prince a last opportunity of averting a blow which will entail the destruction of Peking, and the probable fall of the dynasty now ruling in China, the undersigned makes the following proposals:—

If within the space of three days from the date of this letter, the British (and French) subjects detained at Peking be sent back to the head quarters (of their respective nations), and if the Imperial Prince intimates his readiness to sign the Convention placed in the hands of Kweiliang, at Tien-tsin, the bulk of the British army will not advance beyond its present halting place. The Convention will be signed at Tungechow, and after it shall have been signed, the undersigned will proceed with a sufficient escort to Peking for the exchange of the ratifications of the treaty of Tien-tsin. When these acts shall have been accomplished, the British army will commence its movement towards Tien-tsin, at which point it will remain until the spring, as the bad faith, evasions, and delays of the Chinese Government and its agents have made it inexpedient to proceed further before the winter.

Should these conditions be accepted deputies can be named on either side for the completion of such preliminaries as may be necessary. If they be not accepted the British army will advance on Peking, and in common with that of France take measures to prove that the laws of nations cannot be violated in the persons of British and French subjects with impunity.

LORD ELGIN TO BARON GROS.

Pa-li-chiau, Sept. 25.

Monsieur le Baron,—I have the honour to enclose for your Excellency's perusal a draught of my proposed reply to the letter of the Imperial Prince Kung received by me yesterday. I think that, as regards the subjects of our respective nations detained in defiance of the law of nations at Peking, we should adopt the principle of entire *solidarité*. I have, therefore, as your Excellency will observe, put the restoration of the subjects of his Majesty the Emperor of the French on the same footing as the restoration of the subjects of her Majesty the Queen in the draught letter herewith transmitted.—I have, &c.,

ELGIN and KINCARDINE.

LORD ELGIN TO SIR HOPE GRANT.

Pa-li-chiau, Sept. 25.

Sir,—I enclose a draught of a letter which I propose to address to the Imperial Prince Kung, in reply to his communication to me, the translation of which I have the honour to transmit herewith. I believe that it is your Excellency's opinion that the Chinese authorities, before the extreme measure of an assault of Peking be resorted to, should be distinctly apprised that they have it in their power to make peace if they surrender her Majesty's subjects, now illegally detained by them, and concede all the other points which have been demanded.

I propose to stipulate that a portion of the army under your Excellency's command shall remain at Tien-tsin until the spring, because I think that it would be inconvenient to have to move it from Tien-tsin to Taku and Tungku during the winter, which might be the case if the Article respecting the disposition of our troops in China, which was inserted in the Convention draughted at Tien-tsin, were to remain unaltered.—I have, &c.,

ELGIN and KINCARDINE.

SIR HOPE GRANT TO LORD ELGIN.

Head-quarters, Camp, Pa-li-chiau, Sept. 25.

My Lord,—In reply to your Excellency's letter of this date, forwarding draught of a letter addressed to the Imperial Prince Kung, I have the honour to state that I fully concur in the terms of your Excellency's communication.

As regards the occupation of Tien-tsin during the winter, I shall be quite ready to do so if your Lordship considers it to be necessary.—I have, &c.,

HOPE GRANT.

PRINCE OF KUNG TO LORD ELGIN.

Received Sept. 27, Midnight.

The Prince of Kung, Imperial Commissioner, makes a communication in reply.

He has received and thoroughly acquainted himself with the despatch of the British Minister. To the wrong doing of former Commissioners in the transactions conducted by them to which it alludes the Prince was no party. He is himself an immediate relation of the Emperor's, and in the weighty office he has had the honour to be especially appointed by his Majesty to fill he has full authority for every step he takes, nor will his acts assuredly be the same as those of the former Commissioners. In his conduct towards men the Prince is sincere, and he assumes that the British Minister is, beyond doubt, of like mind.

Every condition of the Treaty (or treaties) negotiated at Tien-tsin being conceded, if while, on the one hand, the Prince departs not from this promise, no change whatever is, on the other hand, introduced by the British Government, peace, evermore to endure, is doubtless attainable.

With reference to the presentation of the Government letter, when his Excellency shall have arrived in the capital, some place suited to the solemnity shall be chosen, and an incense table (or altar) having been there set up, the Prince will receive the letter (1) of the British Government, and will place it on the table, that due honour may be shown to it.

The words in the despatch under acknowledgment regarding the attack on and destruction of the capital, and the downfall of the dynasty, are words which indeed it is not fitting that a subject should use. Can it be right for the British Minister, when declaring that he still entertains a desire for peace, to employ them? If a war to no purpose is to be carried on so long as troops are left, a struggle which is not to cease, then, though the British Government have the troops it has in the field, China has yet, besides the stout hands in her forces, here at present, her troops from beyond the frontier, and those which it will behove her to move up from the different provinces. It would seem, then, better that neither side should do injury to friendly relations by further talk of the struggle between them.

As regards the capture by our army in the confusion of the fight of the British officers returning from Tungechow, it is true that the former Commissioners (2) did seize them, bind them, and confine them; but the Prince, when this came to his knowledge, which was but recently, gave

orders to the officer in charge to release them from confinement, to lodge them comfortably, to attend to the hurts of those who were wounded, and to treat them with every courtesy. In evidence of the Prince's sincerity towards man he is bound, before he does anything else, to oblige the British Government to put away utterly its suspicions, and he now encloses the card sent by the British Consul Parkes to his Excellency Hang (Hang-ki) to engage him to come and speak with him this day, that it may be known that this person is safe and well, and has come to no harm. The letter under acknowledgment proposes, that deputies should be sent on either side to confer respecting all matters that have been discussed and disposed of. These shall proceed as soon as an answer has been received, naming a time (for a conference).

A necessary communication, &c.

Hienfung, 10th year, 8th moon, 13th day (September 27).

Translated by THOMAS WADE, Chinese Secretary.

(1.) The word "letter" is here raised in the column, not as it has been usually written, but with more honour.

(2.) The term "Commissioner" is, on the other hand, not accorded here the honour commonly paid it.

LORD ELGIN TO PRINCE OF KUNG.

The undersigned has received the despatch of his Imperial Highness the Prince of Kung, under date the 27th inst.

Notwithstanding the protestations of good faith and desire for peace with which it abounds, his Highness has not returned the prisoners unlawfully detained in Peking, nor has he stated positively when and where he will sign the Convention negotiated at Tien-tsin.

The undersigned regrets to observe, on the other hand, allusions to the military resources of China which argue a strange forgetfulness of the reverses sustained by the Imperial arms in the last few weeks at Sinho, Taku, Chang-kia-wang, and Pa-li-chiau.

Let no more time be wasted in words so unmeaning. The term of three days allowed for the satisfaction of the demands of the undersigned, he would remind his Highness, will expire to-morrow night. The prisoners must be sent in in the course of to-morrow, and the Imperial Prince must write to say when and where the Convention shall be signed. The single modification which will be needed in it has been intimated to his Highness in the undersigned despatch of the 25th, and has been rendered necessary by the bad faith, evasions, and delays of the Chinese Government and its agents. The letter of her Majesty the Queen can be presented to the Emperor only in one way; if not so presented, it cannot be presented at all; but, as the undersigned has already explained, he has throughout considered this to be a question of courtesy, and not a *casus belli*.

There is, consequently, no ground whatever for the apprehensions apparently entertained by his Highness that other changes than those known to him are in contemplation. Let his Highness, then, at once appoint his deputies and name a place at which these may meet the deputies of the undersigned, in order to the form of preparation of the Convention for signature. The meeting may take place to-morrow if his Highness sees fit, and at the same time as the prisoners are restored.

The undersigned will not repeat the words of warning which he addressed to his Highness in his last despatch. He will only add that if the subjects of her Majesty the Queen now illegally detained in captivity at Peking be not returned in the course of to-morrow the British force will forthwith resume its march in advance, and that all responsibility for the serious consequences that may ensue will rest upon his Imperial Highness.

Camp, Pa-li-chiau, Sept. 28.

ELGIN and KINCARDINE.

LORD ELGIN TO BARON GROS AND SIR HOPE GRANT.

Camp, Pa-li-chiau, Sept. 20.

Monsieur le Baron,—I enclose herewith the translation of a communication which I received yesterday from Prince Kung, and a copy of my reply which I have already had the honour of submitting to your Excellency in draught.—I have, &c.,

ELGIN and KINCARDINE.

PRINCE OF KUNG TO LORD ELGIN.

The Prince of Kung, Imperial Commissioner, makes a communication in reply.

The Prince is in receipt of his Excellency the British Minister's reply of the 15th inst. (29th September), and has acquainted himself with its contents. The British officers captured by the army outside Tungchow were seized* because an engagement was going on at the time. This was, moreover, an act of the late Commissioners, to which the Prince was no party. It was but recently that he ascertained the facts, and he then immediately gave orders to the officers in charge to lodge them comfortably, according to their degree, (intending) of course that, as soon as peace was concluded, they should be sent back with all proper attention. As regards the presentation of the letter of Government, his Majesty the Emperor is obliged by law to hunt in the autumn, and has a ready set out on his journey. It is for this reason that the Prince will, with all solemnity, receive it for him, and place it on the incense table. Ample honour will thus be done it. The Prince explicitly stated this in his last reply, and he now re-states it in answer to the despatch under acknowledgment. As concerns the British officers (detained), he must wait until the British and French forces have fallen back some distance; they shall then be sent back with all proper attention. The two armies are at this moment so near the city that a good deal of alarm (defensive feeling) is felt, and were they hurried out of it it might not be quite possible to ensure their safety, some further harm might befall them. It were best, therefore, that the British force should fall back, and as soon as the Treaty is concluded it will, of course, be the Prince's part to have them sent back with all proper attention, which will be much more *comme il faut*.

There is no objection to the appointment of deputies to confer together,

* The combination is, strictly, "seized and bound."

but the British and French armies must, under any circumstances, fall back to the neighbourhood of Chang-kia-wan; this effected, within three days of their so doing it can be arranged to send deputies from either side to some point between this and that, to settle in conference the time and place at which the Tien-tsin Convention is to be sealed and signed.

The Prince is in his dealings with man most sincere; whatever he says is the truth. The British officers (in his hands) are being treated with courtesy, and shall be sent back with all proper attention as soon as peace shall have been concluded. But he cannot refrain from stating beforehand that if the British force advances to attack the city it will, he fears be difficult in that case to answer for their safety.

He therefore replies.

A necessary communication addressed to the Earl of Elgin, &c.

Hien-fung, 10th year, 8th moon, 15th day. (29th of September).

Translated by THOMAS WADE, Chinese Secretary.

LORD ELGIN TO PRINCE OF KUNG.

Pa-li-chiau, Sept. 30.

The undersigned, &c., is in receipt of the despatch of the Prince of Kung, under date the 29th inst.

His Serene Highness declines to name time or place for the signature of the Convention negotiated at Tien-tsin until her Britannic Majesty's forces retire to a greater distance from Peking, nor until the Convention shall have been signed will he release the officers and subjects of her Britannic Majesty treacherously seized when under the protection of a flag of truce by the Prince Sang-ko-lin-sin, and now illegally detained by his Serene Highness.

The undersigned can regard this answer in no other light than as a rejection of the terms plainly set forth in his previous letters to his Serene Highness, and the delay of three days accorded to the Chinese Government having expired he has no option but to acquaint his Excellency the Commander-in-Chief of her Majesty's forces of the unsatisfactory result of this correspondence.

ELGIN and KINCARDINE.

LORD ELGIN TO BARON GROS AND SIR HOPE GRANT.

Camp Pa-li-chiau, Oct. 1.

Monsieur le Baron,—I have the honour to enclose the translation of a despatch from Prince Kung, which I received yesterday morning, and a copy of my reply, which is drawn up in pursuance of the resolution adopted at the conference of the Allied Ambassadors and Commander-in-Chief, held at the head-quarters of his Excellency General de Montauban, on that day.—I have, &c.,

ELGIN and KINCARDINE.

PRINCE OF KUNG TO LORD ELGIN.

The Prince of Kung, Imperial Commissioner, makes a communication in reply.

The Prince received the letter of the British Minister this morning about 8 o'clock, and has acquainted himself with its contents. As regards the rendition of the British subjects detained, the Prince has already made it plain that while peace negotiations were still unconcluded, it would not be treating them with proper attention were they to be hurried back. The treaty of the year wuwu (1858), and the Convention of Tien-tsin having both been agreed to, why does the letter under acknowledgment allege that no proposition (or measure) has been assented to? His Excellency the British Minister cannot have carefully studied the replies of the Prince; the interpreter he suspects has misapprehended the text of these. Were the British Government to attempt constraint by an exhibition of force, not only would this have a deplorable effect upon the question of peace as already settled, but the safety of the British subjects in Peking would also probably be compromised. The British Consul Parkes is well versed in the Chinese language, written and spoken, and the Prince is now in the act of sending an officer to settle with him all matters necessary for the sealing and signing (of the treaties) at a conference. Why, then, do the British still thus abound in doubts?

A day can be named for the despatch of deputies from either side to confer together. The Prince accordingly replies.

A necessary communication addressed to the Earl of Elgin, &c.

Hienfung, 10th year, 8th moon, 17th day (1st of October).

Translated by THOMAS WADE, Chinese Secretary.

LORD ELGIN TO PRINCE OF KUNG.

Pa-li-chiau, Oct. 2.

The undersigned, &c., has the honour to acknowledge the receipt of his Serene Highness the Prince of Kung's despatch of the 1st inst.

In his despatch of the 30th ult. the undersigned acquainted his Serene Highness that he had informed his Excellency the Commander-in-Chief of her Majesty's land forces of the unsatisfactory result of his correspondence on the subject of the convention and the rendition of her Britannic Majesty's subjects unlawfully detained in Peking.

Her Majesty's troops have in consequence already advanced some distance along the road to the capital. The Government of China has already been so fully apprised, in various despatches, of the exact nature of the demands of the undersigned that it is impossible it can entertain any doubt as to what is required of it. If, therefore, it be indeed sincerely anxious for peace, let an officer, qualified to arrange all necessary preliminaries, be sent immediately to the advanced posts of the army, and let the prisoners accompany this officer.

ELGIN and KINCARDINE.

LORD ELGIN TO BARON GROS AND SIR HOPE GRANT.

Pa-li-chiau, Oct. 2.

Monsieur le Baron,—I have the honour to enclose the translation of a further letter which I have received from the Imperial Prince Kung, and a copy of my reply, the substance of which I have already had the honour to communicate to your Excellency.

I think it right to observe that, in my opinion, the correspondence furnishes no reason for any relaxation in the immediate and energetic prosecution of the measures for the attacking of Sang-ko-lin-sin's force we were agreed upon at the conference held at the head-quarters of the French army on the 30th inst.

ELGIN and KINCARDINE.

PRINCE OF KUNG TO LORD ELGIN.

The Prince of Kung, Imperial Commissioner, makes a communication. He has received, and has acquainted himself, with the contents of a despatch he has received (from the British Minister). The Treaty of the eighth year (1858) and the Tien tsin Convention of this year having been already agreed to, and the promise given regarding them will assuredly, not be retracted, while, on the other hand, in the late (or former) despatch of the British Government, it is stated, that nothing is required in excess of the eight articles now negotiated at Tien-tsin, and the treaty concluded there in the year Wu Wu (1858), there is nothing to be added; both parties are, in fact, perfectly in accord. The Prince, however bearing in mind that the insecurity of peace as negotiated during many years past, has been entirely owing to the fact, that peace has always been negotiated in presence of an armed force, and that it has been impossible to have explanation of the different conditions of the Treaty article by article, the consequence of which has been doubt and suspicion on both sides (the Prince bearing these facts in mind), and having here present the British Consul Parkes, who is well acquainted with Chinese, written and spoken, and the French officer, surnamed I, who also speaks Chinese, has before going farther, sent officers to confer with the officers Parkes and I (Abbé de Lue?) to discuss and satisfactorily dispose of the Treaty (of 1858) already agreed to, and the Convention of Tien-tsin of this year, and as soon as this discussion shall have been brought to a satisfactory issue, a letter will be written to his Excellency the British Minister. It is assumed that there is nothing therefore that cannot be arranged, or that to this arrangement there cannot be any objection. As this discussion is still in process, it is impossible to send back the British subjects here.

As regards the Chinese army, this has been desired by the Prince to fall back for a while, which being so, there can be no doubt that the British force ought similarly, for the time, to retire. If troops continue to be brought forward then peace negotiations will be as before conducted in presence of a force; there will be every difficulty in the way of sending officers from either side to the other; peace negotiations will, too, probably fail, and injury befall the British subjects in the city. Let his Excellency, however, think over this. The Prince in his despatch has spoken plainly, and it is his hope that his Excellency the British Minister will cause the interpreter in his camp to translate very carefully for him what the Prince has said. The two bags and the note for Consul Parkes have been received, and handed to Consul Parkes.

A necessary communication, addressed to his Excellency the Earl of Elgin.

Hienfung, 10th year, 8th moon, 19th day (Oct. 3, 1860).

Translated by THOMAS WADE, Chinese Secretary.

SECOND COMMUNICATION.

Received October 4, 11 A.M.

The Prince of Kung, Imperial Commissioner, makes a communication.

The two British officers, Messrs. Parkes and Loch, having sent in four notes to the Prince, it becomes his duty to send a special messenger with them to his Excellency the British Minister, whom he will thank to receive them and acquaint himself with their contents.

The Prince hopes to receive without delay a reply from the British Minister to the effect that, as he proposed in his earlier reply to his Excellency, the propriety of retiring the armies on either side, so as to admit of a conference between deputies from both at some spot midway between them, shall be taken into consideration, and that, in accordance with what has passed, the understanding entered into between the British Consul and the deputy of the Prince, peace shall be established on a permanent basis.

A necessary communication, addressed to his Excellency the Earl of Elgin.

Hienfung, 10th year, 8th moon, 19th day (3rd of October), 1860.

LORD ELGIN TO PRINCE OF KUNG.

The undersigned has received two despatches from his Imperial Highness the Prince Kung, under date the 3rd inst.

In that which reached the undersigned this morning was a letter from Mr. Parkes to the effect that the Chinese Government desires some neutral spot where to arrange the preliminaries of a permanent peace.

Mr. Parkes's efforts in the cause of peace have the entire approbation of the undersigned; neither Mr. Parkes's letter, however, nor the despatches under acknowledgment, contain any satisfactory reply to the demand so frequently made by the undersigned for the immediate liberation of the subjects of her Britannic Majesty unlawfully detained in Peking. The conditions upon which alone peace can be negotiated remain as the Imperial Prince will find them stated in the despatch of the undersigned, and to these he must beg once more to refer his Imperial Highness.

The undersigned will be obliged to the Imperial Prince to forward the enclosed to Mr. Parkes and Mr. Loch, together with the accompanying articles, for which they have applied. ELGIN and KINCARDINE.

Chang-kia-ying, Oct. 4, 1860.

PRINCE OF KUNG TO LORD ELGIN.

Received Oct. 7, 1860.

The Prince of Kung, Imperial Commissioner, makes a communication.

The Prince addressed a communication yesterday, the 21st inst. (6th of October), to his Excellency the British Minister; his Excellency has not replied to it, and the British troops have resumed their movement forwards. How is this? It does not look like peace. (Enclosed) is a note from the British Secretary Parkes. If the intentions of the British Minister be really pacific, it is the hope of the Prince that his Excellency will immediately cause the British force to fall back for the present to a distance of some li, in order that an officer may be sent out for a conference, on the 24th inst. (8th of October), when the opportunity will be taken to return the British subjects now in the capital with due honour. If the troops do not fall back and hostilities continue, there can be no real friendliness in the relations between the two countries (or no sincerity in the professed desire for friendly relations), and how, under such circumstances, is either the conclusion of the Treaty or the rendition of the British subjects to be effected? It is for his Excellency alone to consider this.

A necessary communication, addressed to his Excellency the Earl of Elgin.

Hienfung, 10th year, 8th moon, 22nd day (7th Oct., 1860.)

Translated by THOMAS WADE, Chinese Secretary.

[Enclosed is a note in Chinese from Mr. Parkes, as follows.]

PA-HIA-LI (HARRY PARKES) TO WEI-TO-MA (THOMAS WADE).

I beg to state that Chinese officers have this day come to say that the 24th inst. (8th Oct.) has been named as the day on which the French and English detained are to be sent back to the head-quarters of their respective forces, with all honour; also that the Chinese commanders have been this day written to to fall back some li from the positions now occupied by their forces, in order to the conclusion of a *bona fide* peace. If they do so fall back, I may be allowed to assume that the Allied forces will in fairness make no further advance. 8th moon, 22nd day.

(Signed in English) HARRY S. PARKES.

Kaou-Mean (Temple), Oct. 6, 1860., 3 P.M.

MR. WADE TO HANGKI.

Note addressed to Hangki, a deputy of the Imperial Commissioner the Prince of Kung, and handed to that officer on the evening of the 7th of Oct., 1860:—

Palichian, Sept. 25, 1860.

The undersigned has the honour to state that he has been sent here (to the Hwa-zing-sze, by the Commanders-in-Chief of the Allied forces).

Their Excellencies have been given to understand by their Excellencies the Ambassadors of their respective nations, that his Serene Highness the Prince of Kung, Imperial Commissioner, has officially informed their Excellencies that there is nothing to which he does not assent, either in the Treaties concluded the year before last or in the Conventions negotiated this year at Tien-tsin.

The Commanders-in-Chief have consequently no remark to offer regarding the treaties, but unless the Chinese Government immediately send in to their respective camps the officers and subjects of the two Powers still in its hands, their Excellencies will cause the capital city of Peking to be stormed, in order to show to those who break faith and do injury to others, that sooner or later their offence will be punished. If, on the other hand, the Chinese Government send back those now in its hands without delay, and at the same time depute a competent officer to prepare the conventions and other documents, their Excellencies, the Allied Ambassadors, will name a day for the signature of the conventions, the exchange of ratifications, and similar formalities. Late events, however, considered, it will not be proper that faith should be placed at random in the Chinese Government or its people. It becomes expedient to take measures of precaution beforehand against evil that may be done. Before, therefore, their Excellencies enter Peking, a gate of the capital will have to be occupied by an escort detached from both armies. The Commanders-in-Chief will decide which of the gates, and the Chinese troops will be then required to fall back for the time being from the gate their Excellencies choose to hold.

This effected, if the officers and people of the capital remain quiet, without giving trouble, as in the case of Tien-tsin and Tung-chow, the Allied forces will conduct themselves towards them as they have done towards the officers and people of those two cities.

THOMAS WADE, Chinese Secretary.

LORD ELGIN TO LORD J. RUSSELL.

Camp before Peking, Oct. 9.

My Lord,—I have much satisfaction in informing your Lordship that the anticipations in which I ventured to indulge at the close of my despatch No. 57, of yesterday's date, have been realised, and that the English and French prisoners detained in Peking, numbering eight in all, were sent to this camp in the afternoon. The subjects of her Majesty thus restored are Mr. Parkes, my private secretary (Mr. Loch), and a trooper of Probyn's Horse; the French subjects are M. l'Escayrae de Lanture, who is at the head of a scientific mission, and four soldiers.

To no one of their numerous friends is the return of these gentlemen a matter of more heartfelt gratification than it is to me. Since the period of their arrest I have been compelled by a sense of duty to turn a deaf ear to every overture for their restoration which has involved the slightest retrograde movement of our army, or the abandonment of any demands previously preferred by me against the Chinese Government. I have felt that any such concession on my part would have established a most fatal precedent, because it would have led the Chinese to suppose that by kidnapping Englishmen they might effect objects which they are unable to achieve by fair fighting or diplomacy. I confess that I have been, moreover, throughout of opinion that, in adopting this uncompromising tone, and boldly setting the national above the personal interest, I was, in point of fact, best consulting the welfare of our friends who were in danger; but it was not to be expected that all persons would view in the same light a question of policy so obscure; and, apart from the warm personal interest which I feel in their safety, your Lordship can well understand that it relieves me from a great load of anxiety to learn from the result that the course which I have followed was not ill-calculated to promote it.

The account which they give of what they have gone through since their capture on the 18th ult., is most interesting. I have requested each of them to put down his recollections on paper, as I can submit them to your Lordship most accurately in this form. A copy of Mr. Loch's narrative I enclose herewith, but Mr. Parkes has been so much engaged on public duty to-day that he has not been able to complete his. Enough has already transpired to convince me that these gentlemen have exhibited, under circumstances of great trial, constancy and courage of the highest order—an example nobly followed by the fine old Sikh trooper who was in attendance upon them.

The Chinese officials treated them at first with much brutality, obviously with the intention of working on their fears, and, through their fears, influencing in some degree the counsels of the Ambassadors. When this plan failed, they resorted to gentle methods and endeavoured to establish a claim on their gratitude. Such was the conduct of persons whose demeanour towards them was described by authority. It is, however, re-

(Continued on page 62.)

LONDON, FRIDAY, DEC. 28, 1860.

THE THIRD CHINA WAR—PEACE ANNOUNCED.

THE official despatches, which will be found in another part of our paper, have been perused with the greatest interest by the public, and the indignation at the treatment of the English prisoners is universal, extending even to those who consider the onus of the present war to rest with us. Regrets are naturally expressed that San-go-lin-sin and all the Mandarin who had a hand in the diabolical treatment of our countrymen were not confronted with them, and put to similar degradation. Anything more wanton than the brutal usage the unfortunate prisoners received cannot well be conceived; but reports were current that a greater atrocity had been committed on each of their persons too revolting to commit to print, and rendered now happily unnecessary, as no confirmation of the statement has been received. We quite concur in the regrets that San-go-lin-sin was not captured and confronted with Mr. Parkes and the Allied Commanders. Any attempt, however, to inflict on him the punishment which he allowed to be dealt out to our countrymen would reduce us at once to his brute level, and cannot be thought of for a moment; but it would, we think, has been possible to give this renowned despot a moral lesson which he and his Government would not forget; and we trust yet to see some marked article in the Treaty arising out of this. We trust, also, to find that the gaol in which Messrs. Parkes and Loch were confined has been visited by our Ambassador and Commander-in-Chief, and every satisfaction obtained for the suffering of these heroic and noble specimens of the English race, whose deeds, coupled with those of the other sufferers, will now be handed down to posterity. Right sure may we be that all the survivors will receive some special recognition at the hands of our Government, most probably at the special request of our Most Gracious Queen. For the dead a suitable recognition can be bestowed on their sorrowing friends and relatives, and Mr. Bowlby we may with equal certainty rely on the liberality of the proprietors of *The Times*, in whose service he will have met his death. The comments of this journal on the conduct of Mr. Parkes will be found in another column. They will, we think, be deemed by the public as just, and will not be confirmed by the actors in this scene.

On the receipt of the first intelligence of the capture of our countrymen, the speculations as to the course which would be pursued by Lord Elgin in order to obtain their restoration were numerous. Would he make it a *sine qua non* that they should be restored before the progress of the Allied troops would be arrested? Would he offer to at once conclude peace and stay the progress of the armies if they were surrendered? Or would he propose to surrender the objectionable point in the Treaty as to the resident Minister at

Peking? Happily these speculations are set at rest by the firm demand as laid down in the first of these propositions. The Chinese diplomats were completely thwarted, it being quite apparent that had all the prisoners been so fortunate as to have been confined in Peking they would have all been released with Messrs. Parkes and Loch. It is most unaccountable how the wily Chinese, holding the trump cards, played such a miserable game. Nothing but the steady stern front assumed by Lord Elgin, backed by the march on Peking, carried him victorious through this, to him, most arduous part of all his duties; and however much we have differed with his lordship's policy when last in China, we must accord him unqualified praise for his policy from Taku to Peking. He has exhausted on every occasion all chances of coming to peace on his road, in spite of the constant din, "nothing short of Peking will do." May we hope that this time he will not hurry away, leaving his work half finished, as before?

THE NEW REGIME IN CHINA.

AN old anonymous Greek epigram says:—"I was once the field of Achæmenides, I now belong to Menippus, and anon, I shall pass to another and another. That person thought 'once that he possessed me, and this one thinks so now; but I am entirely the property of no one but Fortune.'" Surely there is a moral in this, which may find an example in the present state of the Empire of China. We have generally looked upon that vast territory as a mighty whole, and that vessel of state we have seemed to see gallantly sailing onward on the stream of time, in unity with itself, and unperplexed by storms and evil weather. But in truth, China has experienced the most terrible revolutions, and the most desolating civil wars. Its internal organization, in respect both of land and of government, has undergone numerous changes. The field of its exclusive world was owned two centuries ago by the Ming race, for two centuries the Manchus have had it, and to whomsoever Fortune now presents it, the fact is undoubted, that it is at present in a state of transition. Every step taken by the Allied army increases its responsibility, while it seems to assert with increased evidence the character of that army, as an invader of China. And there is no doubt that we are invading China, two mighty civilized Powers are invading a populous kingdom of barbarians.

For what is there among the Chinese but the name of civilisation? The term barbarian is a relative one. They were a highly civilised nation in ancient things, when the bulk of humanity was utterly barbarous; but the scale is turned; these European barbarians have profited by the sublime teachings of philosophy or religion, and brought forth practical fruit, while the Chinese, isolated and reflexive, have retained indeed the maxims of ancient wisdom, but in works have denied them *in toto*.

But it remains for this country now to consider aright the position in which she is placed in respect of China by the recent movements and operations of our army, together with that of the French in that quarter. The possession of the great emporium of trade in the South—Canton; and the occupation of the centre of the Imperial Government in the North—Peking; besides Hong Kong, Swatow, Amoy, Ningpo, Chusan, Shanghai, gives us the complete control of the destinies of this Empire. It is true that this position has been forced upon us, although it is not easy to say how far this country is to blame for its vacillating mode of treating with the Chinese, and by giving way to the notions of the Chinese themselves on their relations to those whom they have been allowed to call "Western barbarians," and to insult in various ways with impunity. The indefeasible right of trading with any nations is founded on the eternal law of the mutual dependence of all human beings on each other. It is an act of presumption in a Government to lay on its people restrictions which are detrimental to its well-being and prosperity. It is an offence against the laws of the economy of the universe, and, while we are following an honest course in wishing to open the resources of China to foreigners in the regular way of trade, we are acting in accordance with their principles. Lord Elgin is now in the position which Lord Gough should have occupied in the war of 1840. The cunning of the Imperial counsellors in retreating before our troops, probably with the hope that we might be led on to perish in the wilds of Tartary, is only what we have been led to expect. The wisdom of the Western nations is measured by their own scant rule, and the meagre knowledge of Chinese attained by foreigners there is not calculated,

we think, to enlarge their ideas of European shrewdness and skill.

With the Emperor in full flight from Peking, and the only other Power in the kingdom divided, there was nothing to prevent Lord Elgin and Baron Gros from proclaiming a Protectorate, and issuing edicts under such authority to the most distant provinces. In this case, if any real patriotism had remained in the native Chinese, they would have united as one man against the foreign invader, and either have fought or have pleaded with him. By the declaration of the new regime, the fanatics of the South, from whom neither foreigners nor natives can expect advantage, would have been declared our enemies, and we should then very properly have put an end to their interference in the rich provinces, where our trade lies. This would have driven them inland, but even then an army of a few thousands belonging to the Allies would speedily have broken their power and have dispersed them to their homes. Under careful generalship, the prestige of the foreign arms would soon have gained the approval of the population whose property had been appropriated by the rebels, and the common voice would have favoured our cause, which would be indeed like the cause of a people oppressed by a cruel tyrant and a corrupt magistracy.

But such a proposal as this, from which we might expect much good for China, though not unmixed good, is not likely to be carried into execution, for the most recent news informs us that the Emperor has had enough of the "outer barbarians" for the present, and that peace is declared. We must wait for fuller intelligence. Past experience bids us receive with caution the first rumour, even the first telegram. It is beyond a doubt, however, that peace had been declared, but that this may turn out so hopeful as our contemporaries think, we will not guarantee. With the people of China we sympathise; with the Government, or rather political clique in Peking or out of it, we profess no degree of sympathy. The Mandarins are wilfully blind to the interests of their country, and they cover the foreigner with insult and ignominy, conducting themselves in the character of the lowest class everywhere. It is well, therefore, that the Presidents of the Six Boards should know *vi et armis* the quality of their antagonist, and when all has been promised that can be, a secure guarantee should be held for the faithful fulfilment of the same.

We shall be anxious to know how the Ambassador and his suite will be received; whether there will be any more *kan-téu*, or *head-knocking* to the Emperor, and what security there will be for the safety of the British Minister in the Capital. Mr. Bruce may think himself lucky that he never did reach Peking, for it would have been unpleasant to have found his departure impeded, and himself thrown into a dungeon, where he might have expired before succour reached him. In the present state of our relations with China, it will be a dangerous risk to run among such unscrupulous people, to place an Ambassador and suite at their mercy. Tien-tsin would, perhaps, be the best place as a permanent residence for the Ambassador, where he might be under the protection of British guns. This would not prevent his attending at Court in Peking to perform any diplomatic business of importance, as occasion might require. Whatever the future steps of our Government may be in respect of this country, we cannot but join in congratulating our countrymen on the termination of the war, which was frightfully expensive; and also the Chinese people, because we anticipate very much that is beneficial to China from the decisive course of action that has been taken.

THE TRADE OF SHANGHAI.

THE Chinese trade returns indicate that the war has had but little effect upon our commerce on the sea-board. The Chinese traders and merchants generally are more intent upon turning an honest penny, and converting their goods into sycee or barter, than regardful of the progress of hostilities in the vicinity of the Court and Capital. Even Shanghai, the port nearest to the seat of war, has been as busy and bustling in commerce this year as if no bombardment or invasion were on foot in the Celestial Empire. We are enabled, from our private advices, to give an abstract of the trade of that principal port for the first half of 1860, as carried on under foreign flags, and from a report prepared with great care by the Foreign Inspectors of Customs at Shanghai.

From this we learn that the entries of foreign vessels in that period comprised, 449 vessels of 128,996 tons, of which 170 vessels and 58,723 tons were under the British flag, and

109 vessels and 37,200 tons American. The small average tonnage of the whole number of vessels is accounted for by the fact that there are among them certain China-built boats trading between Shanghai and Ningpo. These boats are really only but thirty in number: but as their voyages are frequent, and as each is entered as a separate vessel every time she arrives, they represent 177 vessels out of the whole, with an aggregate tonnage of 8,369. Thirty-nine of them, whose aggregate tonnage is 2,046, fly the British flag; forty-seven, tonnage 2,280, fly the American flag; ninety-one, tonnage 4,403, fly various other flags. Excluding these, we have 272, foreign-built vessels, whose aggregate tonnage is 120,627. The aggregate value of the imports in the six months was £3,476,242, fully three-fourths being European goods and manufactures, chiefly cottons and woollens. Among the imports are 24,445 tons of coal, apparently from Japan, with which empire a considerable trade in various articles is carried on. Oils, especially, of various kinds, form an important article of import from thence.

The export trade for the half-year was carried on in 267 vessels of 73,290 tons, of which 111 were Ningpo boats, registering 5,174 tons, leaving, therefore, 156 foreign-built vessels of 68,115 aggregate tonnage. Of the vessels cleared, 84 were under the British flag, measuring 35,966 tons, 3 being Ningpo boats; 70 were American vessels, of 19,182 tons in the aggregate, but including 70 Ningpo boats of 3,183 tons. The total value of the exports in the half-year was £4,172,363. The local articles are some of them curious, such as 439,004 bran cakes, intended, we should suppose, for food; 124,880 preserved eggs, salted, we assume; 18,040 ground nut cakes, after the oil has been expressed, fitted only for manure or for feeding cattle; 8,902 piculs of manure cakes; 103 piculs of pigs' blood; 40 piculs of sinews of the cow, deer, &c., used for food. Agar agar, or sea weed, for soup, is imported to the extent of 1,453 piculs, and biche de mer, black and white, to 2,196 piculs; birds' nests, of three qualities, 259 piculs, of the value of upwards of £1,000. Cow bezoar is a medicinal luxury, only obtained in small quantities. Dried fish, 9,000 piculs; salt fish, 2,209 piculs; and fish maws and Japan fish roes are other food delicacies. Japan isinglass, made from sea-weed, may suit the Chinese, but has been found unsaleable here—where its import was tried unsuccessfully. Mushrooms and various species of fungi are imported to the extent of about 2,000 piculs; mussels and other dried shell fish and dried prawns come in to a considerable extent for food. Japan sea-weed, also a food delicacy, is received to the amount of 40,468 piculs, and a few hundred weight of white and black sharks' fins. What is done with crocodile scales, of which 27 piculs are recorded, we are at a loss to conceive, and whether shark skins are boiled down as fish gelatine or used for polishing purposes is open to doubt. A trade is carried on in dried and salted vegetables. 11,462 chests of Malwa opium, and 2,064 chests of Patna were imported in the half-year. Passing from these notabilia we return to the more important commercial details. The value of the goods imported in the six months it appears was £595,514; the value of the general imports into Shanghai for the half year ending 30th June, 1860, was £3,476,242; and of treasure, £2,082,993; of opium, £2,115,114, making a total of £7,674,349. The value of the general exports was £4,172,363, and of treasure, £427,403, making an aggregate trade of £12,274,115, or at the rate of £24,500,000 per annum. This shows a very large amount of trade for our Chinese ports, and this only includes the trade carried on in foreign bottoms, irrespective of the private trade in native craft. The treasure imports and exports are also reported to be imperfect, as large sums have been shipped to Japan, none of which have been reported. The tonnage, import and export duties paid in the half year at Shanghai by British vessels amounted to £257,310, and by American vessels, £56,834. The export of tea from Shanghai during the half year amounted to 62,020 piculs black, and 68,744 of green, or, converted into British weight, a total of about 17½ million pounds, which was thus distributed:—

	Black.	Green.	Total.
Great Britain	7,320,194	3,177,601	10,497,795
United States	372,320	5,321,673	5,693,993
Hong Kong and other ports	92,258	280,374	372,627
Russia and her dependencies	435,908	—	435,908
Manila	240	—	240
Montreal	48,533	386,330	434,863
	8,269,448	9,165,978	17,435,426

Taking the whole season or year ending June, the total tea shipments were 53,463,770 lbs., or an increase of 14,031,778 lbs. over the previous year's exports.

The exports of silk during the season 1859-60 were 69,561 bales, or 16,835 bales less than the previous year. The shipments in the six months ending June consisted of 27,557 bales of raw and thrown, and 147 bales of refuse, coarse, and cocoons. The great bulk of the silk was sent to Great Britain; the United States only took direct 587 bales. Nearly 3,000 bales of Japan silk are included in the exports.

It would be highly satisfactory to receive such carefully prepared and early published abstracts of trade from all the consular ports of China. Either our consuls themselves or the Foreign Office are exceedingly slow in placing before the public annual returns and reports on the trade and commerce of foreign countries. If we can receive published abstracts of the trade of Shanghai for the first half of the year, before the current year has expired, surely we ought to be in the receipt, through the slow official channels, of reports from the various Chinese ports for the years 1858 and 1859, none of which have yet appeared. The Government, which has been excessively zealous in pressing on its foreign representatives the importance of full, clear, and early reports of trade and commerce, should look a little farther a-field than Europe. There are many Eastern States with which our trade is large and rapidly increasing, and about which our merchants, shippers and manufacturers desire to be kept well advised. An official consul or secretary of legation should have more leisure and opportunity for acquiring and digesting official information than merchants have, and yet mercantile trade circulars are in most instances published long before official documents, and containing a vast amount, too, of important statistical information.

WAR IN CHINA.

(Continued from page 59.)

markable that they experienced much kindness and respect throughout from prisoners, and some others of the humble classes with whom they came in contact.

It is a matter of great concern to me that we know as yet nothing certain respecting the fate of Mr. Bruce's attaché, Mr. de Norman, Mr. Bowlby, the special correspondent of *The Times*, and the 19 troopers, consisting of 18 Sikhs and one Dragoon, who formed the escort, and were under the command of Lieutenant Anderson, of Fane's Irregular Horse. This portion of the party became separated from Messrs. Parkes and Loch, when the latter, at the commencement of the conflict of the 18th ult., were taken up to Sang-ko-lin-sin, for the ostensible object of obtaining a safe conduct from him. Since that time we have heard nothing authentic about them, but we are assured that, though they are not now in Peking, they will soon be restored to us.

I take this opportunity of mentioning that several valuable papers have been found in the Emperor's Summer Palace, Yuen-min-Yuen, which has been seized by the French. Some are in the Emperor's holograph. The most important, so far as a hurried examination enables us to decide, are some memorials discovered by Mr. Morrison. In one of these Sang-ko-lin-sin ascribes the loss of the Taku Forts to the explosion of a magazine, and strongly urges the Emperor to withdraw from the capital—a proposal strenuously resisted by other memorialists. Many of the papers show a determination to resist the barbarians even after the fall of Taku. Great exertions had been made, and it was supposed, with the reinforcements expected, the force available for the defence of the capital would amount to 300,000 men. The Allies are put at 10,000. I hope, by the next mail, to be able to furnish translations of these very interesting documents.—I have, &c.,

ELGIN and KINCARDINE.

LORD ELGIN TO LORD JOHN RUSSELL.

Camp before Peking, October 12

My Lord,—I have the honour to enclose the translation of a despatch which I received yesterday afternoon from Prince Kung, and purports to be a reply to the summons addressed to him three days ago by the Commanders-in-Chief, also a copy of the letter in which I transmitted a translation of this despatch to Lieutenant-General Sir Hope Grant. The north-eastern gate of the city was handed over to the Allied armies without condition at noon of this day.—I have, &c.,

ELGIN and KINCARDINE.

PRINCE OF KUNG TO LORD ELGIN.

The Prince of Kung, Imperial Commissioner, makes a communication. The Prince having repeatedly written to say that he had deputed officers to treat the British Secretary, Mr. Parkes, with all honour, and that as soon as they and he had satisfactorily settled together all questions relating to the sealing and signature of the Convention (the rest of) the British subjects could be returned (as well),—conduct towards the British Government which was not illiberal,—how comes it that the British troops have carried their outrages into the Garden Palace of the Emperor, and have fired his Majesty's audience-halls and dwellings? Is it reasonable that the nation of the British Minister being one acquainted with the obligations of man to man, with discipline long established in its army, while its troops have wantonly fired and plundered the Garden Palace, the commanders of the two armies and the British Minister should affect ignorance

of this? The British Minister should by right state plainly in his reply what steps are to be taken with regard to these proceedings.* This day, however, to his surprise, the Prince has received a despatch from his Excellency General Grant, the British Commander-in-Chief, to the effect that he is about to take possession of the An-ting Gate, and to preface this by the erection of a battery, and that, in the event of a refusal, he will assault the city on the 29th inst. (October 13).

That the soldiers the British Minister might bring with him when he comes to the capital to exchange the treaties, should be distributed without the walls, and that his escort should accompany him into the city, were indeed conditions inserted in the Convention, and to which, of course, effect will be given, as (the Convention) has been in *toto* assented to both by the former Commissioners and the Prince. The British Minister having also stated in a despatch which the Prince has received, that there should be no alteration whatever in the Treaty, this, too, can be at once exchanged, that a good understanding may be established, to endure for ever. But the words of the Convention had reference to the British Minister's entrance into the capital for the purpose of exchanging the treaties; the city gates have ever been under the surveillance of high officers specially charged to see them opened and closed, and if they be thrown open at this moment before (peace be concluded), and the duty of inspection and search recklessly neglected, the disorderly of the place will probably seize the opportunity to commit all sorts of irregularities. It is indispensable, therefore, that proper precautions should be taken.

The letter received from the British Government (Sir Hope Grant's despatch) says, that the An-ting gate will be occupied by a body of troops, and, the two nations being now at peace, this is an arrangement which can of course be made, but the reply to this despatch should specify certain regulations for the occupation of this gate, and when the British Minister's reply to this effect shall have been received, a day can be named for the signature of the Convention, and the exchange of treaties, in order that, before that day, all necessary arrangements may be duly considered to the establishment of a good understanding.

The British officers (still detained) were seized by the late Commissioners. A certain number were missing after the fight, or have died of their wounds, or of sickness. The Prince gave orders to the officers whose business it was to find out where they were, to make them comfortable, and to put them under medical treatment, and he now returns them, as his former despatch promised that he would return them, keeping his word without any abatement or modification.

The Prince's correspondence during the last few days has been all carried on with the British Minister, and he thinks it proper to continue to address himself to his Excellency, although he has received the despatch of his Excellency the British General, as the good understanding has been restored. He therefore writes this despatch, a necessary communication, addressed to his Excellency the Earl of Elgin, &c.

Hienfung, 10th year, 8th moon, 28th day (12th of Oct., 1860).

Translated by THOMAS WADE, Chinese Secretary.

LORD ELGIN TO SIR HOPE GRANT.

Camp before Peking, Oct. 13.

Sir,—I have the honour to enclose for your Excellency's information the translation of a despatch which I received last night from the Prince Kung. I consider its tone to be by no means satisfactory, and I trust that the Commanders-in-Chief will adhere to their determination to require the unconditional surrender of the gate.

ELGIN and KINCARDINE.

SIR HOPE GRANT TO LORD ELGIN.

Camp before Peking, Oct. 13, 1860.

My Lord,—In reply to your Excellency's letter of this date, I have the honour to state that I sent officers this morning with Mr. Parkes to meet the Chinese deputies with respect to the surrender of the An-ting gate. These latter made various excuses to postpone the surrender, but were informed that, if the gate were not given up by noon to-day, the guns would open fire on the walls. I have just now learned that this has been effected quietly, and the Allied troops are now in possession of the An-ting gate, upon which their respective flags are planted.—I have, &c.,

HOPE GRANT, Commander of the Forces.

LORD ELGIN TO LORD JOHN RUSSELL.

Camp before Peking, Oct. 13.

My Lord,—During the afternoon of yesterday nine prisoners were returned to this camp,—eight troopers of Fane's Irregular Horse and one French soldier. All were suffering more or less severely from the effects of the ligatures with which their wrists had been bound. I grieve to say that the evidence given by them leads us to fear the worst for Lieutenant Anderson, of Fane's Irregulars, and Mr. De Norman, Mr. Bruce's attaché. They seem to have sunk under circumstances of much suffering from the consequences of the maltreatment to which they were subjected. I enclose herewith copies of the depositions of two of the troopers. I was not personally acquainted with Lieutenant Anderson, but he is spoken of by all who knew him as an excellent officer. Mr. De Norman was a young man of remarkable promise. With considerable abilities, great assiduity, singular steadiness of character, and courage of no common order, he had every promise of achieving eminence in his profession. We all mourn most bitterly his untimely end.—I have, &c.,

ELGIN and KINCARDINE.

SIR HOPE GRANT TO MR. SECRETARY HERBERT.

Head-quarters, Bivouac, outside Peking, Oct. 9.

Sir,—In continuation of my letter of the 4th inst., I have the honour to report that, on the 5th of October the Allied forces advanced from Tungchow, leaving the heavy guns, tents, and baggage stored about three miles from that place. We halted for the night about three miles east of the north-east angle of Peking, and the following morning resumed our march in a north-westerly direction, so as to pass along the northern face of the city, but out of gunshot of the walls, and attack Sang-ko-lin-sin's army, which was supposed to be encamped directly in our front.

* What punishment inflicted on the troops, what reparation made for losses, &c.

—The country about here is not good for cavalry, from the great number of trees, villages, and hollow roads. I accordingly despatched the Cavalry Brigade with two 6-pounders with mounted detachments, with orders to advance on the road leading to the Emperor's Palace at Yuen-min-Yuen, with a view of cutting off the retreat of the enemy in that direction. The French were on our left, while the English force moved along the outside of an old rampart which runs parallel to the north face of the city. At this time we received information that the Chinese army were in full retreat, having commenced moving the night before. I therefore sent a message to General de Montauban, that I should advance at once to the Emperor's Palace. On the road, however, we came across the rear-guard apparently of the enemy, with whom a few shots were exchanged before they fled towards the city. As they appeared to be in considerable force in the suburb, I determined on halting on the northern road to prevent their moving out in that direction.

The French, meanwhile, anxious to join us in our advance, struck off to their right, and, crossing the rear of our column without either of us seeing the other, pushed on to the Palace without meeting any opposition, and occupied it about nightfall. The Cavalry Brigade had reached the Palace about two hours before this, and were there waiting for us to join them. On their way they saw a body of the enemy's cavalry, but were unable to come up with them. On the following day Mr. Wade went to meet a Chinese Commissioner, and conveyed to him a memorandum from General de Montauban and myself, a copy of which I send herewith, as also Mr. Wade's report of his interview. The result of this has been that yesterday Messrs. Parkes and Loch, with one Sikh sowar and five Frenchmen (one officer and four soldiers) were brought into the English camp. The Chinese declare that these are all of the prisoners who were in Peking, the rest having been conveyed some distance into the interior; they have, however, been sent for, and will be given up in the course of a few days.

Messrs. Parkes and Loch have given the following account of their capture:—When Captain Brabazon and Mr. Loch left the army on the 18th of September to recall Mr. Parkes' party, they proceeded at once to Lang-chau, where they experienced a short delay in collecting them all together, and then set out to return. On arriving within a few hundred yards of the centre of the Chinese position, where they had left Colonel Walker, they heard firing commence, and immediately their passage was barred by a large body of cavalry and infantry, the commander of whom informed them that as firing had begun, he could not permit them to pass without Sang-ko-lin-sin's orders. Considering that it would be almost impossible to cut their way through the large bodies which surrounded them, they decided on trusting to the flag of truce which they carried. Accordingly Messrs. Parkes and Loch, accompanied by one Sikh orderly with a white flag, quitted the rest of the party to go and speak with Sang-ko-lin-sin; while there they were surrounded and made prisoners, by order of Sang-ko-lin-sin himself, and sent into Peking, where for several days they were treated with great severity. On the 29th of September they were removed from the gaol, and have been since treated in a proper manner. The rest of the party they know nothing of, beyond having heard Sang-ko-lin-sin, at the time of their capture, order the remainder to be seized also and sent back to Tungchow. The five Frenchmen given up were taken prisoners in Tungchow while walking about the street, and ignorant of what was going on. The loss of the Emperor's Palace appears to have had a great effect on the Chinese authorities, who appear to be now willing to accede to our demands, to which we have added only the giving up one of the gates of Peking into our hands while we remain here, in return for which the city will be preserved for them. The heavy guns will arrive from Tungchow to-day, so that the Chinese will see that we are prepared to enforce our demands in the event of their deceiving us.—I have, &c.,

J. HOPE GRANT,
Commander of the Forces.

MR. WADE TO SIR HOPE GRANT.

Camp, outside Teh-Sheng Gate, Oct. 8.

Sir,—I have the honour to state that I went yesterday evening, at five o'clock, to a temple outside the Teh-Sheng Gate, to meet Hang-ki, the deputy of Prince Kung, and that I communicated to him in the enclosed note the decision at which I had been instructed to say your Excellency and General de Montauban had arrived. Beyond the rendition of our prisoners, which, as your Excellency was already aware, the Prince of Kung had signified in correspondence should take place on the 8th, at which hour the "detenus" should be surrendered "with honour." After fully explaining to him the views of the Allied Commanders-in-Chief, as I understood them, I wrote the enclosed note, and, his clerks having copied it in duplicate, I returned to head-quarters.—I have, &c.,

THOMAS WADE, Chinese Secretary.

SIR HOPE GRANT TO MR. SECRETARY HERBERT.

Head-quarters, Oct. 13.

Sir,—In continuation of my despatch of the 9th inst., I have the honour to inform you that, on the 10th, I made a reconnaissance of the walls of Peking with General de Montauban.

Having selected the sites for the breaching batteries, the works were immediately traced and constructed, and the batteries were armed, so as to be ready to open fire at noon to-day, in the event of the gate not being then surrendered to us. This morning I sent some officers with Mr. Parkes to arrange with the Chinese deputies for the surrender of the gate of the city, which we had demanded of them. They endeavoured to make excuses, and delay, if possible, the surrender on various false pretences; but were told in reply that twelve o'clock was the hour that had been fixed, and no extension could be granted. Accordingly the easternmost gate on the north side of the city has been this day occupied by the Allied forces without oppositor, and a letter having been received from the Prince of Kung, announcing the readiness of the Chinese Government to agree to all our terms, I have every reason to hope to be able shortly to announce that the campaign is at an end and peace concluded.

Last night a French soldier and eight sowars of Fane's Horse were surrendered to us, having been brought in from places where they had been confined, about fifty miles off. These men had all been treated with great

severity at first, and they report the death of one French officer and one soldier, also of Lieut. Anderson of Fane's Horse, and Mr. De Norman, First Attaché to her Majesty's Legation, and of two soldiers of Fane's Horse. The remainder of the prisoners are to be brought back to-night or to-morrow morning, having been confined a great distance off.

This letter will be despatched by a special steamer to Hong Kong, to overtake the mail, and I trust to be able to add a postscript, giving the names of those who have survived.—I have, &c.,

J. HOPE GRANT, Lieutenant-General,
Commander of the Forces.

Oct. 14.—The remaining prisoners have not yet been sent in, but the mail can no longer be delayed. J. H. G.

Continental Intelligence.

FRANCE.

The *Charivari* publishes a caricature in which two Chinese Mandarins are represented in the background in great affliction, while in front two French soldiers appear in the utmost delight at beholding a silver piece of 5f. dancing about most joyously. "Ah," cries out one of the soldiers, "that excellent 5f. piece. Here, then, it turns up again. "Who could ever have imagined that it would have found a hiding-place in China?" "Ay," replies the other, "and see how happy it appears to again behold its countrymen."

It has been announced by the *Constitutionnel* that orders have been received at Toulon to embark for China (query Cochin China) a detachment of the first section of the Army Works Corps in garrison at Vincennes.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Dec. 21.

It is no doubt well known to most of your readers that the navigation from the river Y, on which this city is built, passing through the Zuyder-Zee to the North Sea is so obstructed by sandbanks that the channel is now only practicable for small vessels of not more than 20 tons. Large ships are obliged to make use of the so-called canal of North Holland, which leads from the Y opposite Amsterdam, by Purmerend and Alkmaar, to the Helder, where it communicates with the open sea. This canal is thirty-six miles long, and cost eighteen millions of florins. Having been constructed at a period when the dimensions of the East Indiamen were not to be compared with the requirements of the present day, it presents a formidable obstacle to the development of commerce, and is so shallow that the larger descriptions of vessels cannot come up to the city, but are obliged to discharge and load nearly one-half of their cargoes by means of lighters, a course of proceeding accompanied with unavoidable delay, expense, and risk.

These inconveniences, so injurious to trade, and the impossibility of removing them without incurring enormous expenses, as well as the large sums paid annually for repairing the dykes and dredging the canal, which has a singular tendency to choke up, have for a long time past occupied the serious attention of the Dutch Government, and given rise to the idea of cutting a deep navigable ship-canal from Amsterdam to the North Sea, through the long and useless strip of uncultivated sandy soil that runs in a northerly direction up to the Helder.

To accomplish this desirable result various ingenious plans have been devised, and elaborate schemes concocted by the most celebrated engineers of this country, but the Government would not be persuaded that it was desirable, or even practicable, to grant permission to a private company, as some speculators who were willing to undertake the enterprise required permission to reclaim for cultivation a part of the present bed of the Y; others, again, demanded from the State a guarantee for a certain rate of interest, to which conditions it was not likely that the States-General would be induced to give their consent. It was, on the other hand, not deemed prudent to empower the Government to execute the project for account of the nation, as it could not fail to awaken bitter animosity amongst the inhabitants of the provincial towns, and provoke above all the hostility of Rotterdam, the great commercial competitor of this city.

However, in spite of these formidable difficulties, the present Cabinet, to their great credit be it said, are not deterred from taking the matter in hand, and after considering the subject in all its bearings have presented to the Second Chamber of the States General the draft of a bill to enable the Government to execute the works by granting them a credit for the sum of 18,800,000 florins (about a million and a-half sterling). According to the Ministerial plans the canal will commence opposite Amsterdam, and running in the direction of the north bank

of the Y, intersect the narrow peninsula between the bed of that river and the North Sea at its narrowest part, which is ascertained by measurement to be 26,000 metres, or about sixteen English miles.

In order the more effectually to disarm the opposition likely to be raised by Rotterdam and the other large commercial towns on the river Maas, the Government at the same time demand of the Chambers an additional credit of 6,300,000 florins, in order to deepen the navigable channel and the communication with the North Sea, which channel has of late become so choked up by sand as to impede the navigation to such an extent that deep-going vessels on their arrival from the sea are obliged to discharge their cargoes at Brouwershaven, a rising port at the mouth of the river.

I may add that as the execution of these two important works must necessarily occupy a long time in their progress and completion, the Government does not require the whole of the twenty-five millions of florins at once, but proposes to distribute it over the space of eight years in annual instalments of about three millions each year. In introducing the bill to the States-General, the Minister of Public Works laid great stress on the importance of the object to the commerce of Amsterdam, which the corporation of that city had duly appreciated by offering of their own accord to contribute the noble sum of three millions of florins towards defraying the expenses of the undertaking, which sum has been raised without any difficulty by a three per cent. loan at par, subscribed for by a few of the rich, intelligent, and patriotic merchants of this city, although in the present state of the money market the value of Dutch Bonds and other Government Securities, is equal to more than four per cent. per annum.

The Netherlands Trading Company again advertises for tenders for shipping to the East. The vessels to be ready to sail from this country on or before the 10th of January next, and those already on their outward voyage to be placed at the disposal of the company's factory at Batavia by the 10th of May next. Tenders will be received up to the 7th instant.

The King has appointed Mr. A. J. Swart, hitherto Procurator-General of the High Court of Judicature in Netherlands India, and Judge-Advocate of the Land and Naval Forces in that country, to be President of the above-named High Court of Judicature, and President of the Military Court of Justice there.

Mr. H. de Bruyn, recently appointed Chief Engineer of the Hydrographic Department in Netherlands India, has been decorated by the king with the insignia of the Order of the Crown of Oak. This order is, properly speaking, a Luxemburg one, having been created by the late King of the Netherlands in his capacity of Grand-Duke of Luxemburg, though it is not confined to natives of that province, but conferred indifferently on the king's most meritorious subjects, of whatever part of his dominions they happen to be natives.

At the Company's sale of 17,191 kranjans of Java sugar, held in this city, the whole quantity found ready purchasers at the following rates:—

No.	10 estimated value	36 florins, sold at	36½ florins.

PASSENGERS INWARD.

Per *President Plate*, Capt. Harten, at Brouwershaven, from Java; Messrs. Mollier, Hartmans, Gorggryph, van Heerde, Alertz, Kramer, Pluym, Kimpe, Koch, and Westerhoff.

Per *Koning and Vaderland*, Capt. van Bruggen, at Brouwershaven from Batavia; Capt. A. d'Aumurie, of the E.I. infantry.

Per *Juno*, Capt. Nicolai, at Brouwershaven, from Batavia; Mr. Kerkhoff.

Per *Kandanhauer*, Capt. Zeelt, at Amsterdam, from Batavia; Mr. F. Z. W. Grust, E.I. Civil Service.

Per *Vice-Admiral Gobius*, Capt. van Duin, at Amsterdam, from Padang; Capt. L. G. Pauls, of the E.I. infantry.

Per *William Daniel*, Capt. de Meester, at Amsterdam, from Batavia; Mrs. van Brahm and daughter; Capt. van Bylevelt, E.I. infantry.

Per *Estafette*, Capt. Riedveld, at Amsterdam, from Batavia; Messrs. E. A. Deyneuberg, J. van Hall, D. van Duyvenboden, and A. van Ameyden van Duyn.

PASSENGERS OUTWARD.

Per *Nederland and Orange*, Capt. van Ruyven, from Brouwershaven to Batavia; Mr. and Mrs. Meyer, and 4 children; Mr. and Mrs. King; Mr. and Mrs. Lomberg; Mr. and Mrs. van Dahlen; Messrs. Smislaert, Wiersma, Snyders, Engelse, Jaspers, and Koort, Miss Ramondt, Miss Engelse, and Miss Koning.

THE PRESIDENT'S MESSAGE.

The thirty-sixth Congress of the United States commenced on the 3rd inst. The President's Message was delivered to both Houses at noon on the 4th, and occupied nearly two hours in its delivery. We extract the following:—

CHINA.

The friendly and peaceful policy pursued by the Government of the United States towards the empire of China has produced the most satisfactory results. The Treaty of Tien-tsin of the 18th June, 1858, has been faithfully observed by the Chinese authorities. The Convention of the 8th of November, 1858, supplementary to this Treaty, for the adjustment and satisfaction of the claims of our citizens on China, referred to in my last annual Message, has been already carried into effect, so far as this was practicable. Under this Convention the sum of 500,000 taels, equal to about \$700,000, was stipulated to be paid in satisfaction of the claims of American citizens, out of the one-fifth of the receipts for tonnage import and export duties on American vessels at the ports of Canton, Shanghai, and Foochow; and it was "agreed that this amount shall be in full liquidation of all claims of American citizens at the various ports to this date." Debentures for this amount, to wit:—300,000 taels for Canton, 100,000 for Shanghai, and 100,000 for Foochow—were delivered according to the terms of the Convention by the respective Chinese collectors of the Customs of these ports to the agent selected by your Minister to receive the same. Since that time, the claims of our citizens have been adjusted by the Board of Commissioners appointed for that purpose, under the Act of March 3, 1859, and their awards, which proved satisfactory to the claimants, having been approved by our Minister. In the aggregate they amount to the sum of \$498,694.78c. The claimants have already received a large proportion of the sums awarded to them out of the fund provided, and it is confidently expected that the remainder will ere long be entirely paid. After the awards shall have been satisfied, there will remain a surplus of more than \$200,000 at the disposition of Congress. As this will, in equity, belong to the Chinese Government, would not justice require its appropriation to some benevolent object, in which the Chinese may be specially interested? Our Minister to China, in obedience to his instructions, has remained perfectly neutral in the war between Great Britain and France and the Chinese Empire, although, in conjunction with the Russian Minister, he was ever ready and willing, had the opportunity offered, to employ his good offices in restoring peace between the parties. It is but an act of simple justice, both to our present Minister and his predecessor, to state, that they have proved fully equal to the delicate, trying, and responsible positions in which they have, on different occasions, been placed.

JAPAN.

The ratifications of the Treaty with Japan, concluded at Jeddo, on the 29th of July, 1853, were exchanged at Washington on the 22nd of May last, and the Treaty itself was proclaimed on the succeeding day. There is good reason to expect that, under its protection and influence, our trade and intercourse with that distant and interesting people will rapidly increase. The ratifications of the Treaty were exchanged with unusual solemnity. For this purpose the Tycoon had accredited three of his most distinguished subjects as Envoys Extraordinary and Ministers Plenipotentiary, who were received and treated with marked distinction and kindness, both by the Government and people of the United States. There is every reason to believe that they have returned to their native land entirely satisfied with their visit, and inspired by the most friendly feelings for our country. Let us ardently hope, in the language of the Treaty itself, that "there shall henceforward be perpetual peace and friendship between the United States of America and his Majesty the Tycoon of Japan and his successors."

"THE TIMES" OF TO-DAY ON THE NEW TREATY.

But will this Treaty of Peking be worth more than its predecessors? That must depend very much upon how we use it. Properly used it ought to be our last extorted Treaty with China. If we put it in operation at once, and accustom the Chinese to its provisions while our army and navy are still in China, we shall have no more difficulty with them. This Treaty is like a sapling; we must guard it round at first, or the beasts of the field will nibble at its bark and destroy its growth; but let it have time to strike its roots firmly into the earth, and you may take away the rails, for the strong trunk can protect itself, and the same cattle which would have destroyed it will repose in its shadow. Protect it now against these Tartar rulers, and the Tartar rulers will themselves protect it when they see its fruits. Shanghai gives to Peking an annual million of dues. The Northern Ports yet to be opened will give as much, and, if the South should remain subject to the North, quite as much again will arise from the ports on the Yang-tse. But these things are not yet apparent, and as there is no reason now for creating a war, but every reason for preserving the peace, we entreat our professors of paradox to refrain from showing their cleverness by proving how it was that the Chinese did not destroy us all; for, although no one else would believe them, the Chinese may.

HER Majesty has presented £100 for the relief of the Coventry Silk Weavers. The China merchants have mostly given the like sum.

THE *Ballarat*, Capt. Jones, has made the passage from Shanghai to Plymouth in 102 days, having left the former on 10th September, and reaching the latter on the 21st December.

The Queen has been graciously pleased to appoint Francis Howard Vyse, Esq., now British Vice-Consul at Yedo, and Acting Consul at Kanagawa to be her Majesty's Consul at Kanagawa.

Spirit of the Press.**THE DESPATCHES FROM CHINA.**

PEACE ANNOUNCED BY RUSSIA.
TIMES, 18TH DEC.

The impatient public has been allowed to peep into the third volume of the great Chinese romance, and all the absorbing interest is gone. We no longer fear that we shall have to listen to the accounts of another Moscow or Cabul campaign. We no longer dread another Peiho defeat. We have no longer to endure evil prognostications of a Northern winter, with our little army frozen up foodless in a dreary country, and surrounded by all the hordes of Tartary. We have dipped into the last page, and seen the hero and the heroine fairly married. The settlements have been shortly described, and the dowry of the bride has been hinted at as very handsome. We know now that the coy Mongol has yielded to the energetic wooing of her European suitor. The listless reader feels, therefore, a more feeble interest in those strokes of skilful management by which the happy event was brought about, and in those hazardous moments when the whole arrangement was in peril. With the rapidity of these latter days we are inclined to take a new departure from the last event. The merchant will be preparing his ventures for the new ports in the North, and making choice of the assortment most likely to attract the attention of the fashionable customers at Peking. The Chancellor of the Exchequer will be making arrangements as to what he shall do with the indemnity. The populace already expect the waggon of Sycee silver to pass in procession through the City. Everybody has realised the fact that we are at peace with China, and has already discounted half the expected results, from the exposure of the plunder in the curiosity shops of London to the decrease in the price of tea; from the return of absent soldiers and sailors to the mitigation of the future demands of the Income-tax collector. This is the age of short memories and quick apprehensions. We have no time to recall who produced the good we have before us, and who withstood it; by whose advice and energy it was obtained, and in spite of whose blunders it was wrought out. Here it is; let us enjoy it. The door is opened; let the impetuous self-seeking world stream in if you would not be jeered at, or pushed aside, or trampled upon. Yet there is much worth reading in these two uncut volumes which we skip in our jump to the catastrophe; and if we do not recur to them we shall not be able to draw the proper moral from the story. We have learnt and we have taught the lesson how vulnerable Peking is, and we have also learnt how expensive it must always be to abuse our newly acquired experience. We have learnt also that in our dealings with the Chinese the most expensive and the most sanguinary course is the course which manifests any shade of indecision, or which gives hope that we are to be turned aside from the pursuit of our treaty rights by either diplomacy or resistance. This last lesson we have learnt by a lamentable accident. From the moment that Sang ko lin-sin had seized upon the Europeans who came to him under a flag of truce, Lord Elgin, acting under generous impulses, cast aside all that cautious policy by which he had seemed to be covering himself from responsibility, or seeking shelter from the certain abuse of a very despicable party at home; and he at once assumed the prompt and vigorous course of action which alone ever tells with Asiatics. We have not hesitated to express our opinion of the inefficiency of any treaty obtained while the army might be left behind at Taku, and after Lord Elgin with an escort of horse might be led through a city placarded with proclamations of Chinese victories. It would be unfair therefore to withhold our tribute of admiration to the masterly manner in which he played the bolder game. During the last period of his negotiations he was acting under the influence of a powerful and genuine feeling. Every one must sympathise with that position, to which he so forcibly alludes in his despatches, when he was directing operations any one of which might very possibly cost the lives of his friends and followers, and when he was pushing on to attack a city the defenders of which had it in their power to take vengeance upon their prisoners for every shot that was fired. It was, however, to the promptitude of Lord Elgin's advance upon the city, and to that alone, that Mr. Parkes and Mr. Loch, and the other prisoners who have come back to us, owe their lives. The first intention of the Mandarins at Peking evidently was to extort terms from the English by means of their prisoners. Their highest hope had been to obtain possession of Lord Elgin himself. We have seen from our earlier despatches how anxious they were to take him alive, what rewards they offered, and how they stated as a reason for such high rewards that his capture would put an end to the war. If Lord Elgin had been so unfortunate as to fall into the trap set for him, and to rest upon that camping-ground which had been surrounded by Chinese batteries, he would undoubtedly have been subjected to treatment similar to that which Mr. Parkes and Mr. Loch endured. The policy evidently was to break down the physical strength of the prisoners, to make their life unendurable, and then to measure out pang by pang the remission of their torture against some concession from the enemy outside. If Lord Elgin had shown the least hesitation, the slightest symptom of being influenced to concession by any treatment of the prisoners, the sufferings of these men would have been indefinitely protracted. How long this might have lasted no one can tell; but a comparison of the dates will show that so long as any hope for the success of this policy did last Mr. Parkes and Mr. Loch lay in the crowded cells of a public prison, loaded with chains, chained again to a bench, and with iron collars round their necks, which were again chained to the beams above, while at the same time Captain Anderson, Mr. De Norman, Mr. Bowlby, and Captain Brazazon, with their Sikh escort, were exposed to the hot sun and to the cold nights, with sharp thongs eating into their wrists and ankles, kicked and cuffed by Chinese gaulers, while they begged for food or water. When Lord Elgin refused to negotiate and advanced upon the city the Chinese seem to have abandoned their hopes of extorting anything from the agonies of their prisoners. It is even possible that, if we had not waited for that tardy body of French infantry, we might have got up to the city in time to save the lives of Anderson and De Norman. Certain it is, that contemporaneously with the advance of the army upon Peking the ill-treatment of the prisoners ceased, and immediately the Summer Palace of the Emperor had been taken, the prisoners were surrendered. It turns out, that the occupation

of this Palace of Yuen-ming-yuen was rather accidental than deliberate, and that to Lord Elgin can belong neither the credit nor the blame of the transaction. But if the Ambassadors and the Generals had held the longest councils upon it, no expedient could have been adopted so just, so humane, and so effective as the seizure of that Imperial Palace. It does so happen, as our private letters state, that the gardens of this Palace were the theatre of that scene in which the prisoners were cast upon the ground and tied with those thongs which caused the death of some and such misery to all. There was, therefore, an appropriateness in the destruction of the royal habitation which had been used for such a purpose. But the peculiar propriety of this measure was that it was punishment inflicted upon the Imperial Government for an Imperial crime. When the Emperor upon his return shall ask why the Allies have destroyed his Palace, while they spared the habitations of his people, let him be told that it was not the Allies who did this, but that it was those cruel and faithless Mandarins who were torturing the countrymen of the Allies; that if the prisoners had been returned when they were demanded negotiations would have been opened, and neither would his palace have been destroyed nor his capital been occupied; while, on the other hand, if the prisoners had not been restored the Imperial palace in the midst of the city would have shared the fate of that without the walls. If this should be fully impressed upon the Imperial mind we may leave to the Emperor the task of punishing the blunderers who tortured European prisoners. But although Lord Elgin ought not to be charged or credited with this act, his policy in these latter days was worthy of all praise, and we hope the public will pause upon the details of this war at least long enough to reflect that it was by a firm policy at last that Lord Elgin, in three weeks, put an end to wars in China.

TIMES, DEC. 21.

The telegram which we publish to-day from St. Petersburg seems to extinguish what little hope remained of the escape of Mr. Bowlby from the sad fate of Messrs. Anderson and De Norman. Now that Mr. Parkes is returned in safety we cannot in duty refrain from stating, what we had no heart to say while his fate was yet in suspense, that his conduct of the whole affair indicates a degree of rashness and recklessness almost beyond conception. His remaining after he found that the ground was occupied by the Chinese in force; his still further dallying when the prince had given him warning by his insolent manner that he thought himself able now to throw off the mask and drop the tactics of delay; his turning back after all his suspicions had been aroused, and when he and his companions were already half in flight, and had arrived within easy reach of the English lines; his pulling up even at the last moment and leaving his escort, obliged in honour to wait for him without a choice either to run or to fight,—these are facts that throw upon Mr. Parkes a heavy responsibility. Of his courage and constancy in prison, and of his steadfast behaviour to his companion in captivity no one who has any knowledge of Mr. Parkes's career could for a moment doubt; but courage and constancy, when they have a phase of rashness and presumption, are apt to more than balance their good by their evil deeds. There is no doubt that when Mr. Parkes had been first insulted by the prince and found that further conversation was unavailing the whole party might have got away, and even the Tartar General himself only defended his conduct in making them prisoners by saying that they had forfeited the protection of their flag of truce by remaining within the Chinese lines after a shot had been fired. All this, however, in no way excuses the Chinese. The excuse was futile, but, had it been as valid as it was futile, it would only have entitled the Chinese to treat the prisoners as prisoners of war, and no one knows better than Sang-ko-lin-sin how we treat Chinese prisoners of war. There is no one word to be said to check the indignation that is felt in England and France at the story of these cruel ties, and no circumstance to justify the crime or even to mitigate the guilt. Lord Elgin, in the despatch which comes down to the 8th of November, and which has just arrived through St. Petersburg, makes no mention of the prisoners, a silence which is especially ominous when we find that he had space to attribute to the Russian general some of the credit of the Treaty. But even if the Treaty of Peking was really made under the mediation of Russia, we cannot for a moment believe that the honour of England was tarnished by allowing the grievous massacre of her sons to go without due punishment. There was, we may be sure, some castigation inflicted upon the vulgar hands which committed these cruelties; but it must be doubted whether full vengeance has fallen upon the heads that directed them. However, as a supplementary and as an obviously appropriate punishment, we trust that full indemnity, so far as any indemnity in money can be full, has been exacted for every pang endured and for every pecuniary loss sustained. It is not much that money can do to alleviate such distress as has been created by these butcheries, but the want of money can do much to embitter it. It will be some satisfaction, also, to know that, although it might be impossible to find out the authors of these crimes with a view to punish them in their persons, no sooner has the public treasury been made to pay a great tariff, with every act of cruelty duly noted therein, with its special indemnity for money damages, in addition to its punishment as a crime, than the Chinese themselves will quickly find out the individual upon whom this payment should properly fall, and make him reimburse to the Emperor what the Emperor has had to pay for his misdeeds. This is in the habits of the people and of the Government, and will not have been overlooked by the Chinese scholars whom Lord Elgin has about him.

THE FRENCH SHARE OF THE NEW TREATY.

TIMES, DEC. 22.

The "Cathedral of Peking" is a new scene added to the properties of this Chinese drama. The existence of such an edifice comes upon us by surprise. It has had the cross replaced upon its summit. We are curious to know what purpose this cathedral has recently served—whether it has been a Temple of the Five Hundred Gods, or a yamun of some State officer, or an examination-hall. Moreover, it would be interesting to ascertain what "dependencies" it has, and what portion of the city of

[DEC. 23, 1860.]

Peking those "dependencies" may comprise. Some of these temples and yamuns have been large gardens within their walls, large enough to hold a whole army of monks, who might reasonably be provided with means of defence against any sudden outburst of Pagan fury. Roman Catholic bodies are, we know, very tenacious of their title deeds to long-estates, the present proprietors of which can date back to Henry VIII., are still preserved at Rome. Still we should like to hear how the Roman Catholic hierophants who are now consecrating the "Cathedral of Peking" can prove their title and its identity. It must, at any rate, be quite a hundred and fifty years since this building could have been used as a Christian church, and a hundred and fifty years is a very long period in the age of a Chinese building. This consideration strikes us as important, because we observe that "all churches, cemeteries, and their dependencies which formerly belonged to the Christians in the whole empire are to be restored." Now, this is rather a large stipulation. It is scarcely possible to measure the extent of claim which might be set up under such a stipulation as this. What would the Scotch say if a Treaty in precisely the same terms were to be forced upon their part of the kingdom by a Roman Catholic invader? In their case it would apply to at least one-third of the land of Scotland. The Chinese have never been so addicted to "superstitious gifts" as the Scotch before the Reformation were. But still there must be buried in the dust of ages a great many Christian claims upon the land of China. It is now thirteen centuries ago that Christianity flourished in that far-away land, and that the Nestorian monks brought thence to Constantinople the silkworms' eggs which endowed Europe with a new and profitable manufacture. Perhaps the Nestorians may have neglected their advantages. But it is also nearly three centuries since Matteo Ricci, that plausible and politic Jesuit, conquered a position, rather for his order than for Christianity, at the Court of China. We may depend upon it that he, at least, and his successors, did not neglect their opportunities. There are proofs of his presence at Nankin and Soochow and at most of the large cities of the Empire, and we have very authentic details of the manner in which he worked his advantages. Ricci, we know, had a special aptitude for pointing to his habit of co-operating at the worship of idols after sur- reptitiously hiding a cross among the flowers or attached to one of the candles of the Pagan altar, asserts that Ricci "was a faithful servant of the devil, who, far from destroying, established his reign among the heathen, and even extended it to the Christians," yet Ricci did make converts. Ricci moreover made his converts give substantial proof of their sincerity. Sin baptized Paul, and his daughter baptized Candida, who were very important people; and we read in *Du Halde* that the daughter alone built no less than thirty-nine churches in different provinces. The memory of these generous founders has not passed away, for they are even now worshipped at Shanghai as a Pagan god and a Pagan goddess. But it may not be unimportant to know whether the sites of those thirty-nine churches can still be identified, or whether any plausible claim has been set up upon the strength of *Du Halde's* description of them. It seems a very simple thing, that the Roman Catholics in China should have their churches restored to them, with the cemeteries and dependencies upon those churches. But it may chance to happen, that the Chinese have admitted a principle that may be pushed to an extent of which they are not quite aware. Dido was a very sharp young woman, and the cutting up of that skin into thongs was a bit of smartness that might have deserved the admiration of a New Englander. But what is the sharpness of one so renowned as scholars, so excellent as antiquaries, and so industrious in discovering, or in imagining, invaluable proofs of antiquity?

THE LATE CAPTAIN BRABAZON.—It is not too much to say that he was one of the most promising officers of the British army, and one of the most accomplished members of the distinguished corps to which he belonged. Of both the theory and practice of his profession he was a master, and just before his departure for China he brought out a little volume, "Soldiers and their Science," which combined a little of the art of war, with the expression of military views in a vigorous intellect, to be upon the subject. Captain Brabazon was the eldest son of Major Brabazon, late of the 15th Hussars, and of Brabazon-park, county of Mayo, and a near relative of Colonel Ouseley Higgins, who for several years represented that county in Parliament.

Nabal and Military.

In consequence of the announcement of "Peace," no more troops will be despatched to China. It has been announced in the Paris papers that—

"A new expedition of 2,400 men, under the immediate orders of a Brigadier of Marines, and the superior command of Admiral Charner, is ready to proceed to Cochin China."

Assuming that it is intended to reinforce the forces in that country, there can be no doubt that it is intended to supply this "new expedition" from the French forces in China.

The screw steam frigate, *Narcissus*, 51, at Plymouth, has been put in commission, and is to have a crew of 540 men, for Sir Baldwin Walker, the new Commander-in-Chief of the Cape station or vice Admiral Keppel. The screw steam gunvessel *Penguin*, 5, is to be put in commission as tender to the *Narcissus*. Captain Risk has been appointed to command the *Narcissus*.

A court-martial has been held on the loss of H.M.'s troop ship *Perseverance*. The Court deliberated four hours and retired. On re-opening the sentence was read by the Deputy Judge Advocate, awarding a severe reprimand to Commander Power, and the loss of one year's rank. Also severely reprimanding Mr. McFarlane, with the loss of three years' rank, accompanied by the observations, that there was no evidence

of currents to account for the loss of the ship, nor to account for her being sixteen miles out of her course; that precautions were not taken where currents were known to exist in running between the islands; neither were soundings taken with the deep-sea or hand lead-lines. Neither was the master on deck, as he ought to have been, when the watch was left in charge of a warrant officer. The conduct of the remaining officers and crew after the grounding of the vessel was deserving of special mention from the Court Commander Power's conduct also on the vessel stranding, and the coolness and decision of his measures in getting the women and children, with the troops, on shore, and providing for their safety, were deserving all praise.

The screw steamship *Warrior*, intended to be iron clad, will be launched from the stocks at Millwall on the 29th inst. The plates or ribs of iron, 202 in number, which will be employed on her, weigh 960 tons, one tier of which will be affixed before the launch takes place, and the remainder after she has floated.

The following promotions will take place in the Royal Marines consequent on the death of Lieut.-Gen. Willis:—Major-Gen. Delacombe to be lieut.-gen., vice Willis, deceased; Col. Commandant A. B. Stransham to be major-gen., vice Delacombe, promoted; Col. and Second Commandant F. A. Campbell to be col.-commandant, vice Stransham, promoted; Capt. A. D. L. Farrant to be lieut.-col., vice Campbell, promoted; First Lieut. J. R. Lloyd to be capt., vice Farrant, promoted; Second Lieut. Edward Lee Rose to be first lieut., vice Lloyd, promoted. The *Amethyst*, 26, Capt. S. Grenfell, has had nearly the whole of her stores returned into Chatham Dockyard, and is now entirely dismantled. Notwithstanding the length of time she has been in commission—a period of nearly five years, during which time she has been employed in various parts of the globe, and has circumnavigated the earth—the *Amethyst* is reported to be one of the cleanest and best regulated ships ever stripped at Chatham.

In consequence of the depots of the Indian regiments at Chatham having been recruited up to their required strength, orders were yesterday received at that garrison directing that recruiting for all the regiments composing the three battalions is to be discontinued, with the exception of the 77th depot.

The 27th (Capt. A. W. Durnford's) company of Royal Engineers which was placed under orders to embark for Gibraltar several weeks since, has received final orders to be in readiness to embark early after Christmas, when it will relieve one of the companies of Royal Engineers now serving at Gibraltar. The 32nd Company of Royal Engineers has been placed under the command of Capt. W. D. Frazer, and has been medically inspected, and also officially inspected at headquarters by Colonel Harness, C.B. The company is now ready to embark for St. Helena, where it will be employed in the repair of the fortifications and defences of that island. Lieutenant D. C. Walker has been ordered to proceed from head-quarters, Chatham, to Woolwich, there to take the command of the 5th company of Royal Engineers at that station. The appointment of instructor of gunnery at the Chatham division of Royal Marines, vacant by the promotion of Lieutenant-colonel Connolly, has been conferred on Captain D. Blyth, of that division.

COMMERCIAL POSTSCRIPT.

CITY, FRIDAY AFTERNOON.

ARRIVALS NOT INCLUDED IN TABLE.—Off the Start from China: Ballarat, Dec. 21; at Falmouth, from Rangoon, City of Perth; 23, at Deal, from Singapore, Victor; 24, from Siam, Siam (barque); 20, at Helvoet, from Batavia, St. Jan; from Sourabaya, Gerardus Jacobus; 18, at Trieste, from Sumatra, Arthur; 10, at Hampton Roads, from Manila, Annie Cheesboro; 11, at Boston, from Penang, Dolphin; 24, at Liverpool, from Manila, Casas; 20, at Trieste, from Singapore, Atuanance (?); 26, at Plymouth, from Batavia, "Batavia"; 23, at Bremen, from Batavia, General Jacobi; at Texel, Chile.

DEPARTURES.—Dec. 24, from London for Hong Kong and Whampoa, Ethereal, Chrysolite; 23, from Deal for Batavia, Sourabaya packet; 22, from Liverpool, for Shanghai, Clara Novello; 24, from off Dover, for Batavia, Staatsraad, van der Hoeven; Nov. 22, from Rio Janeiro, for Hong Kong, Nizam.

SPOKEN.—Constance, Liverpool to Shanghai, Nov. 16, 15 S.; 29 W.; St. Helena, Rotterdam to Macassar, 1st Nov., 21 S., 25 W.; Britannia, Manila to Queenstown, 22nd Sept.; Alfred Hill (American ship), from Manila, 23rd Sept.; Loevesteyn, Batavia to Rotterdam, 26th Oct., 34 S., 25 E.; Everhard, Batavia to Bremen, 1st Nov., 30 S., 11 E.; Argonaut, Foo-chow-Foo to New York, 8th Nov., off the Cape of Good Hope.

LAID-ON.—At London, for Shanghai, Challenger, for Singapore and Penang. Victor: At Liverpool, for Batavia and Singapore, Cadovius. **CASUALTIES.**—The Seaforth, Marshall, from Liverpool to Batavia, arrived at Milford Dec. 19 leaky, and with loss of boats, bulwarks, &c., having experienced severe gales. She bore up on the 9th of December from Cape Finisterre. The *Primera de Santander*, from Manila to Queenstown, has been totally lost.

Monetary and Commercial.

THE SINGAPORE AND RANGOON CABLE.

It was announced in our last that the steamer *Queen Victoria*, with the first section of this cable, had put into Plymouth in consequence of the heated condition of the cable. This is the first cable of any length which has been kept under water after the core has been covered with hemp and iron wire. This was done because the electrical tests through a dry cable are almost valueless for the discovery of faults. The result has

been, that when coiled into the hold of the vessel the mass of iron, 14 feet in height, being saturated with water, has oxidised, heat has been generated, and if allowed to proceed in that state the gutta percha would have become softened and injured. The electrical tests, however, now show that the cable is at present uninjured. To avoid any risk of damage it has been unanimously determined by the engineers and electricians to have the ships fitted up with water-tight compartments in which to coil the cable. This will have the double advantage of enabling efficient electrical tests to be taken during the voyage and to insure that the cable shall remain at the temperature of the water in which it is coiled. Dr. Miller is decidedly of opinion that the heat is due to the oxydation of the iron; but whatever the cause, the heating has been kept under control, and the cable will not be sent out until arrangements have been made for keeping it continually under water. The water-tight cable tanks will be constructed with plate-iron, riveted together in the same manner as the plates in an iron ship, and will be constructed in the hold of the vessel. The steamers *Rangoon* and *Malacca* will undergo the same process, which will of course occupy some time. The injunction obtained by Messrs. Newall and Co. against the use of certain instruments in laying this cable, noticed in our last, has, on a new trial, been dissolved.

A new steam company has been formed under the title of the East India and London Shipping Company, the object of which is to establish a direct first-class auxiliary steam line of packets to India monthly, touching at Madras and Calcutta. The capital is to be £300,000, in 30,000 shares of £10 each. These shares will be divided into two classes—£100,000 marked A, upon which no dividend will be paid until the remaining £200,000, marked B, have been paid preferentially 7 per cent.; after that, the A shares are to receive any surplus up to 10 per cent. between the two series. The directors have purchased the steam-ships *Golden Fleeca*, *Jason*, *Queen of the South*, *Lady Jocelyn*, *Calcutta*, *Indiana*, *Hydaspes*, at about one-third of their cost for the service, and the undertaking, which is under most respectable auspices, appears likely to realise all the expectations formed of its success.

The shipment of specie for India and China, by the steamer *Indus*, amounts to £203,415, the particulars of which are as follows:—Alexandria, £15,500 gold; Mauritius, £25,000 gold; Ceylon, £2,000 gold; Madras, £5,996 gold; Calcutta, £90,210 silver; ditto, £3,040 gold; Singapore, £2,000 gold; ditto, £47,600 silver; Hong Kong, £3,200 silver; Shanghai, £8,867 silver; total, £203,415.

ARTICLES OF IMPORT.

TEA.—During the past fortnight our market has been extremely quiet, transactions having been more curtailed than usual at this time of year. The news of the occupation of Peking by the Allied armies, and, subsequently, of the Treaty of Peace being signed, has had little or no effect, the question of supplies not being generally regarded as much influenced by peace or war, but more by the internal state of the country. The arrivals of new tea have been considerable, but the importers generally have refrained from offering them on the market, and prices, consequently, show but little alteration, except in the new Monings and Wopaks, which show a decline of fully 2d. per lb. from the opening rates, ex *Northfleet*. The business in Congou has been so limited as to leave no subject for remark under the different kinds, but prices have generally ruled fully ½d. per lb. lower for teas under 1s. 7d. per lb., whilst finer kinds of old season have not been inquired for, prices remaining nominally as before. In fancy teas transactions have been moderate, without material alteration in prices. Scented teas also remain much as last advised. In green teas the market has been firmly supported, owing to the favourable position of supplies and exports. The *Challenger* arrived on the 10th, with the first of the new Ping Sueys, which were immediately placed on the market, and a fair proportion has been already realised at full prices; the quality of these teas is good, but the leaf hardly equal to those of last season. In old seasons the few sales made have been at full prices. Some good quality Canton gunpowders have realised fair prices.

SILK.—A fair amount of business has been done at previous quotations. Sales to some extent have been made ex *Challenger*, and the cargo per *Buller* will shortly be placed on the market.

SUGAR.—Sales of foreign sorts have been made at a reduction. The sale of 2,083 bags of Penang sold at 38s. 6d. to 37s. for common to fine brown; 37s. 6d. to 40s. for low and middling yellow. Of a parcel of 1,600 baskets of Java sales of a portion have been made at 46s. 6d. for midd. greyish white; 44s. for midd. gray. Unclayed Manila, 33s. 9d., and 2,500 bags of clayed, at 38s. 6d.

COFFEE.—Market more steady, but demand small. Prices about as last quoted.

RICE.—The demand is still small. Sales of Rangoon have been made to arrive at 11s. 3d.; Old Rangoon and Nercranzie, 10s. to 10s. 6d. for delivery.

PEPPER.—At public sale 940 bags good black Singapore were taken freely at 3½d. to 4d.; but privately nothing of consequence has occurred. White continues rather difficult to sell, and of 376 bags fair Singapore, in auction, little more than one-half was sold at 5½d.; 119 bags Penang, meeting low offers, were withdrawn at 5½d. to 6d.; 18 bags good Batavia fetched 7½d. per lb.

SAGO.—Sales are still difficult. Of 1,800 boxes only 1,100 were sold, at a decline of 6d. to 1s.

SPICES.—Cinnamon: Transactions have been very limited at 1s. 6d. to 2s. 2d. for first sort. Cassia Lignea: Of 380 cases offered at auction, about three-fourths sold at 87s. to 92s. for second to first quality. Cassia Buds: Sales at auction, at £9. 10s. to £9. 12s. 6d. Cloves: Small sales of Penang, at 1s. 1d. Mace: Prices have further receded, and sales made at 10d. to 1s. 4d. for ordinary dark red to middling paleish. Nutmegs: Sales of 89 cases Penang and 32 Batavia, sold at 1s. 1d. to 1s. 10d. for ordinary to good medium; one case of fair bold, at 2s. 3d.

HEMP.—Of 350 bales Manila offered at auction about 50 were sold at £24 per ton for fair roping.

COTTON.—Rates have advanced and market active, at 3d. to 5½d. for Surat.

JAPAN WAX.—Market dull, and no sales to report.

TOBACCO.—No change to notice.

TIN.—Market firm at previous quotations. Antimony ore at £16 2s. 6d.

GAMBIER.—Small sales at 17s. 3d. to 17s. 6d. **CUTCH:** Of 2,100 bags at auction, a few only sold at 25s.

MISCELLANEOUS.—India rubber. Of 528 packages at auction nearly all were retired, rates for the best pure are quoted at 1s. 5d. to 1s. 6d. Camphor: Market active at 160s. to 175s. for China and Japan. Sapanwood: Small sales on previous terms. Market flat. Soy: No transactions to report. Rhubarb: Market flat, and no sales. Mother-of-Pearl-Shell. Market firm, no sales reported. Star Aniseed: Firm at 75s. to 80s. Sticklac: Sales of Siam at 90s. to 92s. 6d. for good. Gum Benjamin, Gambouge and Damar: No sales to report. Rattans: Sales of 10,000 bundles of Straits and Batavia at 2s. 5d. to 5s. 6d. per 100. Elephants' teeth: The fine sorts are in demand. Vermillion: 20 boxes at auction retired at 3s. Galangal root: No sales. Cubebs: Large arrivals; 91 bags at auction sold at £8 5s. to £8. 7s. 6d. Dragons' blood: Market quiet. Galls: Market dull. 190 cases of Japan at auction, all retired. Rum: No sales.

EXPORT OF BULLION TO CHINA, &c.

GOLD AND SILVER.

Bar Gold (per ounce)		£3 17 9
Spanish Doubloons		3 17 6
United States Gold Coin		3 16 3
Silver in Bars		0 5 1½
Mexican Dollars		0 5 2½
Carolin Dollars		0 6 2

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 10s. to £6. 12s. 6d.; nail rods, £7 5s. to £8. 10s.; hoops, £9. to £9. 10s.; sheets, single, £9. 10s. to £10; Staffordshire bars, £8 to £8. 10s.; rails, £5. 10s. to £7.

STEEL.—Swedish keg, £17. 10s. to £18.

COPPER.—Sheet and sheathing, 11½d.; yellow metal, 9½d.

TIN.—136s. for block; 137s. for bar. Tin plates, best charcoal, L.C., 31s. to 32s. per box.

LEAD.—English pig, £21. 5s. to £21. 10s.; shot, patent, £25; sheet, £22. 2s. 6d. to £22. 5s.; spelter, £20 to £20. 5s.; zinc, English sheet, £23. 10s. to £26; quicksilver, £7 per bottle.

MANCHESTER MARKETS.

The market fully sustains the improvement caused by the demand which sprang up for China on during last week, owing to the news that the war was at end, but there is rather less business in cloths for that quarter. For 40-inch shirtings and for T-cloths suited to that market prices are now

14d to 3d. per piece dearer, and, the rise in these goods having induced some buyers for other markets to place orders which had been kept back in expectation of a further depression in prices, there is rather more strength in the value of most kinds of cloth. Domestic for export have been in demand, and are 1-16d. per yard dearer. Longcloths are still much neglected, and only a moderate business has been effected in printers. Yarns have more advantage from the improved demand than cloth, the prices of 16's to 32's water for China being 1/4d. per lb. higher, with some difficulty in placing orders. The home trade have also given out orders with more freedom, especially for counts entering into the make of China shirtings.

Shipping Intelligence.

(The Reports for America will be found in our Correspondent's Letter.)

From BATAVIA.—At outports: Chili, Eberhard, Epsom, Albert Borsig, Heno. At Falmouth: Koning Willem III.

CASUALTIES.

The Christiaan Louis, v. d. Brink, which arrived at Falmouth, Dec. 8, from Batavia for Amsterdam, was leaky, had thrown part of cargo overboard, lost sails, bulwarks, &c., had boats damaged, and five feet water in her hold.

The Ida Willemina, Van Weyland, from Batavia to Dozdt, which put into Mauritius Oct. 23, leaky, had thrown part of cargo overboard.

The Mercator v. d. Woude, which arrived in the Downs Dec. 15, from Batavia for Rotterdam, was assisted into Ramsgate on the following day, being leaky, and with loss of jibboom and spritsail, and damage to hull.

The American ship Mary, Nicholson, arrived at Liverpool Dec. 15, reports having been in company with the Queen Mab, from Singapore to London, and assisted her off a sand bank.

The Malacca (s.), built to lay down a portion of the telegraph cable between Rangoon and Singapore, in leaving Sijelds Dec. 11, is reported to have been in collision with an Italian barque, but the damage sustained was trifling.

The Christiaan Louis, v. d. Brink, from Batavia to Amsterdam, which put into Falmouth Dec. 8, with five feet water in her hold, has been surveyed, and commenced discharging.

The Philip van Manix, Duinker, which arrived in the Texel Dec. 16, from Batavia, had damaged part of her cargo, having experienced bad weather.

FREIGHTS AND CHARTERS.

The news from China has this week completely altered the tone of the freight market, the conclusion of peace having put an end to all the speculations arising out of a prolonged occupation of Peking by the Allied armies. It is now pretty certain that the transports will be speedily released, and the effect of this addition to the available tonnage in India occasions some apprehension as to the stability of homeward freights. The rice crop of next season promises to be very abundant, and will absorb a large number of ships; but, nevertheless, it is probable that for a time great weakness will be experienced in rates. In outward freights operations have been entirely suspended until the receipt of letters by the next mail.

Rates of freight current for vessels on berth to Shanghai, 50s. to 60s. per ton, weight and measurement. To Hong Kong, 50s. weight and measurement. To Singapore, 35s., and Penang, 45s., weight or measurement (nominal). To Manila, 35s. and 40s. To Japan, 45 weight, 90s. measurement. To Batavia, 50s. weight, 40s. measurement.

INSURANCE.

The following are the current rates of premium at Lloyds, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Nominal quotation for Yedo, 70s. to 80s.

At Hamburg, for Batavia and Singapore, 40s. to 50s. China and Manila, 50s. to 60s.

ASTOR HOUSE.

SHANGHAI.

THIS PRIVATE HOTEL is admirably suited for Commercial Purposes. It is between the English and French Legations, and commands an entire view of the river.

The same Premises in which the business has been carried on for upwards of half a Century.

IMPORTANT TO INDIAN RESIDENTS.

TESTIMONIAL RECEIVED BY

TUCKER AND SON,**MANUFACTURERS OF IMPROVED INDIAN LAMPS.**

"Messrs. TUCKER & SON.

"Edinburgh, Sept. 11, 1856.

"Sir,—I have much pleasure in bearing my testimony to the excellence of the Lamps supplied by you to me when in India last year. They give a brilliant light, are not affected by the punkah, and are in every way suited to the Indian climate. In short, they are the best lamps I have seen in the country.

(Signed)

"A. Ross, Bengal Civil Service."

MANUFACTORY, 190, STRAND, LONDON.

Established 40 Years. Designs and Price Lists sent free by post to India.

NOTICE TO PASSENGERS BY THE OVERLAND ROUTE via EGYPT.

PHILIP ZECH, Proprietor of the two well-known Hotels in Alexandria, the Hotel d'Europe, and the Peninsular and Oriental Hotel, begs to inform his friends, and Travellers in Egypt in general, that he has purchased **SHEPHEARD'S HOTEL** in CAIRO, which will still continue to bear the same name; and in returning thanks for the extensive patronage enjoyed by his two houses in Alexandria, hopes that the preference may likewise be extended to his house in Cairo, which will be managed in first-rate style, and in a manner intended to give every satisfaction to its frequenters, both as far as table, wines, internal and external service are concerned. Many alterations and ameliorations are being carried out at the present moment.

FIRE.—DESTRUCTION OF THE PLANT, STOCK, and PROPERTY of the Largest Rope and Ship Chundlery in the Country. Messrs. Frost, Brothers, of Shadwell, London. PRESERVATION of Books, Papers, and Cash, in MILNER'S SAFE, standing by the side of two other safes, (not Milner's) the contents of which were consumed. See "Times," Sept. 7, 1860.

TO MESSRS THOMAS MILNER AND SON,

Liverpool, and 47A, Moorgate-street, City, London.

Gentlemen.—We have very great pleasure in bearing testimony to the efficiency of your "Patent" Fire-resisting Safe. In the destructive fire which destroyed the whole of our premises on Sunday morning last, our books, papers, and cash, which were in the safe we purchased from you in March last, were all preserved; and this is the more remarkable because the contents of two other safes, not of your manufacture, standing in the same office within two feet of your safe, were consumed. Our most sanguine hopes have been realised in this severe test, and we leave you at liberty to make use of this letter in any way you may wish.—We are, Gentlemen, yours, &c.

FROST, BROTHERS.

Shadwell, London, Sept. 8, 1860.

SUGAR MAKING MACHINERY.

TO SUGAR PLANTERS, MERCHANTS, & OTHERS

CONNECTED WITH THE

SUGAR COLONIES.**G. BUCHANAN & CO.,**

An Index, containing the Names of nearly all persons entitled to use Arms, as extracted from the British Museum, Tower of London, Herald's College &c. &c. The Manual of Heraldry, 400 Engravings, 3s. 6d., post free, by T. CULLETON, Genealogist, Lic. in Heraldry, at the Mechanic's Institute, 25, Cranbourn-street, corner of St. Martin's Lane, London, W.C. The Heraldic Colours for Servants' Livings, 5s.

STAMP YOUR OWN PAPER.—with Arms, Crest, Initials, or Name and Address, by means of CULLETON'S PATENT EMBOSSENG PRESS, 15s. Best Make 21s. Any person can use them—T. CULLETON, the Sinker to the Board of Trade, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

WEDDING CARDS.—For Lady & Gentleman—5s. each. 50 Embossed Envelopes, with Maiden Name printed inside, 1s. Visiting Cards—A Copper Plate engraved in any style, with name and 50 Cards, printed for 2s. post free. N.B.—All orders executed by return of post, for stamps or cash. T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

FAMILY ARMS, &c., Embazoned for Pairts. In Carriages or Needlework, 6s.; Best Style, 12s.; Gothic and Modern Monograms Designed, 5s. Arms Quartered, Impaled, and Painted on Vellum, according to the laws of Heraldry. By T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

ARMS, CRESTS, &c., Engraved in the Best Style. Crest on Seals or Rings, 7s. On Steel Die, 6s. Initials, 1s. 6d. per Letter. Book Plate, Engraved with Arms, 10s.; or Crest, 5s. 1s. stage and Registered Letters 1s. extra.—T. CULLETON, Heraldic Engraver by Appointment to the Queen, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

SOLID GOLD RING (18 Carat, Hall Marked) Engraved with Crest, 42s.; Large Size, for Arms, 75s. On receipt of P.O. order the size will be sent to select from.—T. CULLETON, Seal Engraver, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

THE PEN SUPERSEDED.—Mark your Linen. The best and only method of Marking Linen, Silk, Stockings, Coarse Towels, or Books, so as to prevent the Ink washing out, is with CULLETON'S PATENT ELECTRO-SILVER PLATES. By means of this novel invention a thousand pieces of linen can be marked in a few hours. Initials, 1s. each; Name, 2s. 6d. Set of Moveable Numbers, 2s. 6d.; Crest Plate, 5s., with the necessary directions for use. Post free. Certificate from the eminent Dr. Sheridan Muspratt, F.R.S., Professor of Chemistry, &c.

"Several trials with Mr. Culleton's Patent Electro-Silver Plates, for marking linen, induce me to pronounce them excellent; the letters are beautifully marked in a deep black colour, without blotting, and after a long boiling, with either potash or soda, they remain unaltered. Other pieces which I tried decomposed the ink, and in many cases burned holes in the linen. I can testify Mr. Culleton's Plates are incorrodible and will not hurt the finest fabric.—(Signed) SHERIDAN MUSPRATT, College of Chemistry, Liverpool.

"May, 15, 1854."

All orders to be sent to the Patentee and Sole Maker, T. CULLETON, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

All Orders executed by Return of Post.

find it most profitable to order their goods to be so packed
in future.

SEYMER & CO., 37, Eastcheap, E.C.

**TWINBERROW'S DANDELION, CAMO-
MILE, and RHUBARB PILLS,** an effectual cure of
indigestion, all stomach complaints and liver affections.
In cases of constipation these pills never fail in producing
a healthy and permanent action of the bowels, so that in
a short time aperients will not be required, and, being
quite as innocent as castor oil, they may be given to chil-
dren.

From Dr. Dick, Lansdown-terrace, Kensington.
"Sir,—Send me another bottle of your Dandelion,
Camomile, and Rhubarb Pills for my own use. I lose no
occasion of recommending these Pills, as I can conscien-
tiously do so."
Prepared by TWINBERROW, Operating and Dis-
pensing Chemist, 2, Edwards-street, Portman-square,
London; and may be had of all Patent Medicine Ven-
dors.

TO CHEMISTS, STATIONERS, AND CONFECTIONERS.—AGENTS WANTED.

PLUMBE'S GENUINE ARROW-ROOT
should be used in preference to any other. It is
greatly preferred by the most eminent Physicians in
London for invalids, and as the best food for infants.
REPORT ON PLUMBE'S ARROW-ROOT, BY DR. HASSALL.
"I have subjected Plumbe's Arrow-root to careful ex-
amination, microscopical and chemical. I find it to be
perfectly genuine, and of superior quality; equal in all
respects to the best Bermuda, for which so high a price is
usually charged. (Signed) ARTHUR HILL HASSALL, M.D."
Directions and testimonials with each packet, which
bears the signature of A. S. PLUMBE, 3, Abbe-place.
Retail in London by Snow, Paternoster-row; Ford,
Islington; Morgan, Sloane-street; Williams and Lloyd,
Moorgate-st.; Starling, Islington; Weatherley, Peckham.

LEA AND PERRINS' CELEBRATED WORCESTERSHIRE SAUCE.

PRONOUNCED BY
CONNOISSEURS
TO BE THE
ONLY GOOD SAUCE,
AND APPLICABLE TO
EVERY VARIETY OF
DISH.

EXTRACT of a LETTER
from a MEDICAL
GEN'L LEMAN, at Madras,
to his Brother, at
WORCESTER, May, 1851.
"Tell LEA and PERRINS
that their Sauce is highly
esteemed in India, and is, in
my opinion, the most palat-
able as well as the most
wholesome Sauce that is
made."

EXTENSIVE FRAUDS.—Lea and Perrins having dis-
covered that several of the Foreign Markets have been
supplied with spurious imitations of their "Worcestershire
Sauce," the labels of which closely resemble those of the
genuine Sauce, and in one or more instances with the
name of L. and P. forged, they have deemed it their duty
to caution the public, and request purchasers to see that
the names of Lea and Perrins are upon the Wrapper,
Label, Stopper, and Bottle.

L. and P. further give notice that they will proceed
against any one who may infringe upon their right, either
by manufacturing or vending such imitations, and have
instructed their correspondents in the various parts of the
world to advise them of such infringements.
Wholesale and for Exportation by the Proprietors, Lea
and Perrins, Worcester; Crace and Blackwell, and other
Oilmen and Merchants, London.

RIMMEL'S TOILET VINEGAR super-
seded EAU DE COLOGNE, as a TONIC and BRAC-
ING LOTION, a reviving scent, and a powerful disin-
fectant. 1s., 2s. 6d., and 5s. Sold by all the trade.
E. RIMMEL, Perfumer, 86, Strand, and 24, Cornhill
London, and 17, Boulevard des Italiens, Paris.

**HOLLOWAY'S PILLS.—FOGS, FEVER,
INFLUENZA.**—In all large and populous cities the
air is more or less vitiated, and malaria always causing
disease. To combat the maladies arising from these
pestiferous vapours, nothing is so safe and certain as Hol-
loway's Pills. They act on the human blood as a filter
acts on dirty water, and thus remove mechanically all
gaseous or fluid impurities, and all noxious matters.
These admirable Pills possess every attribute requisite for
a purifying, preservative, and restorative remedy. They
successfully grapple with indigestion and fever, and what
is still more astonishing, while they thoroughly cleanse the
entire system, they regulate and strengthen every indi-
vidual organ. Holloway's Pills suit either sex, all ages
and every climate.

PATRONISED BY THEIR MAJESTIES

QUEEN VICTORIA,

NAPOLEON III.,

AND THE PRINCIPAL CROWNED HEADS OF EUROPE.

DEBAIN'S HARMONIUMS AND PIANOS-MECANIKES.

WAREHOUSE, 43, WATLING-STREET, CHEAPSIDE, LONDON, E.C.

REPRESENTED BY C. GENTILE.

DEBAIN'S PIANO-MECANIQUE.

PERSONS without the least knowledge of MUSIC can, on this Piano execute any and the most difficult compositions in the style of a finished Pianist, producing the varied kinds of expression, &c., as indicated by the Composer, with a truthfulness not attained by any other mechanical means. It is also provided with a Full Grand Key-Board (7 Octaves), which can be played on in the ordinary manner. These Instruments have three strings to each note and check action, and are well adapted for Exportation, being strongly made, to resist the action of extreme climates. Price from 80 Guineas to 200 Guineas.

DEBAIN'S ANTIPHONEL, OR SUBSTITUTE FOR AN ORGANIST.

This Instrument can be placed on the Key-Board of any Organ or Harmonium, and is admirably adapted for Churches that have not an efficient organist, as by it a person without the slightest knowledge of music can, with equal facility, play the common chant or hymn tune and the mass or oratorio chorus. Price from 12 Guineas.

DEBAIN'S HARMONIUMS.

These celebrated Harmoniums, for Power, Sweetness of Tone, and Superior Construction, stand unrivalled. Price from 6 Guineas.

DEBAIN'S HARMONICORDE.

(TESTIMONIAL FROM THE GREAT MAESTRO ROSSINI.)

MR. DEBAIN,—I have heard with extreme pleasure your new instrument, the Harmonicorde. It is a beautiful invention, and cannot fail to be well received in the musical world.—G. ROSSINI.

PRICE FROM SEVENTY GUINEAS.

PRICE LISTS FORWARDED ON APPLICATION.

CAN BE HEARD DAILY AT

DEBAIN'S WAREHOUSE, 43, WATLING-STREET, CHEAPSIDE, LONDON, E.C.

OVERLAND ROUTE.

At Foo-Chow-Foo.—For London: Ceylon, Earl of Windsor. For Melbourne: C. Lackmann.
At AMOY.—For New York: Ann, N. B. Palmer, North Wind.
At HONG KONG, MACAO, and CANTON.—For London: Patrioteas, Crystal Palace, Fort George, Jaa. Vinncombe, Janet Willis, Kelsa, Mary Lee, War Eagle. For Liverpool: Jessie Beazley. For Continent: Thetia. For New York: Fleet Wing, Sea Serpent, Hotspur, Ocean Stead. For Havana: J. Wakefield. Live Yankee. For San Francisco, Coquimbo: H.V. der Lühi.

At MANILA.—For London: Menam. For Liverpool: Matilde, Monsoon. For Cork: Clifton. For New York: Fearless. For Boston: Boston, Golden City. For Havana: R. del Oceano. For Melbourne: Olympia.
At SINGAPORE.—For London: Capt. Cook.
At PENANG.—For London: Three Bella, Benclench, Toronto. For New York: Bevely. For Boston: Versailles.

FREIGHTS AND CHARTERS.

At SHANGHAI.—Rates as in our last. The amount of disengaged tonnage was fastly increasing. The panic being over the demand for living up has ceased.—The settlements are: Earl of Chester to Swatow at \$1,750 per month. Eggle to Foo-Chow-Foo, 25 days at \$2,800.
At Foo-Chow-Foo.—To London, £3. To Australia, £3 10s. The Balnaguish and Queen of the Ocean for London, have been laid on at £3 and the Oscar and Norma for Australia, at £3 10s. The Metaris, at £3 15s. for two ports.
At AMOY.—A good demand is still experienced for vessels, with rates a little higher. I. Martinus has been chartered to Shanghai and back 40 lay days at \$2,300. The Podesta 35 lay days at \$2,200.
At HONG KONG, MACAO, and CANTON.—To London, £3; New York, \$10. A good business has been done since last mail. There will soon be a superabundance of shipping disengaged, as the transports are now being discharged. There are about eighty vessels in harbour, and of these fully twenty are steamers, under the Siamese flag; as many more are discharging. Thirty have their destinations fixed, leaving from ten to fifteen vessels of all classes available for the wants of the market. The transactions during the interval of the mail have, of necessity, been limited. A few charters to Siam have been closed at 10 cents. The settlements are, Crystal Palace, Janet Willis, K-iso. Mary Lee, and War Ka le to London, and the Jessie Beazley to Liverpool, at £3. The Fleetwing to New York, at \$9 50c.; Sea Serpent, at \$10.
At MANILA.—For New York: sugar and hemp, \$8. The Fearless loads at this rate, and the Golden City, for Boston.
At SINGAPORE.—For London: £2 10s to £2 15s. An upward tendency is experienced in homeward freight, owing to the few vessels of moderate size in port, who, for the most part, prefer country employment to the low rates current for home. The charters are, Captain Cook, for London, at £2 10s. for tin, &c., and £2 15s. for sago, &c. The Atalanta at same rates. The Julie, for Whimpoa, for \$7,000; and the John Buchanan at \$1,250 to Labuan, to bring sapanwood from the Gulf of Siam, at 50c. per picul.
At PENANG.—For London: £2 15s. dead weight, £3 5s light, and £3 10s. for measurement, at which rate the Three Bella, Toronto, and Benclench are loading.

CASUALTIES.

SINGAPORE.

The steamer Sir James Brooke, on her return trip from Siam, became a total wreck on the 17th September at Point Romagna, on the Malayan coast. All lives and six boats of rice, and about two of a gear, have been saved; the rest, it is feared, will be entirely destroyed. She is insured.

PENANG.

The Marquard Family was capsized in a squall while being hove down in the harbour, and on the 11th September was half filled with mud and water, laying on the edge of a sand flat.

The Dutch barque Juno, from Japan, with a cargo of coals, camphor, and silk, was wrecked on Aug. 8 near that place.

The Dutch schooner, Adriana Jacoba, was totally lost within about 15 miles from Makassar. The crew were saved. She was from Makassar bound to China.

MANILA.

The Hamburg barquentine Cito was totally lost on a reef on the 2nd Aug. not down in the charts, about twelve miles north of the Cagnan islands in the Mindoro sea; all hands saved, who arrived here on the 27th Aug.

JAPAN.

The Forest Eagle, (Am) Kanagawa for Talien-whan with horses and provisions for the British Government, was out 18 days and then obliged to put back. She lost 146 horses out of 206 on board, and the pens were much damaged with water. The vessel is said to be only half manned.

HONG KONG.

The Friar Tuck (br.), from London, shipped a tremendous heavy sea on the 21st July, which carried away bulwarks stanchions, and swept the decks of everything, and washed the man from the wheel along the deck and the chief mate overboard, who was saved; lost several sails. The cabin was filled with water, which washed away all the furniture, sofas, &c. The Lord of the Isles (br.), from London, encountered a very heavy hurricane on the 22nd July, which carried away bulwarks on both sides, broke several stanchions, filled the cabin with water for thirty hours, smashed the wheel to pieces, washing the two men along the deck, and cleared it of everything. Several sails lost.

PASSED STRAITS OF SUNDA.

From England and Continent to China. Aug. 24, Columbine; 28, Florence; 29, Weymouth, Great Britain, Africa; 30, Cornelius Anthony, Cleveland; 31, Minerva; Sept. 1, Clara; 4, J. W. White 8, Kathay; 10, Silvery. From New York: Aug. 29, Nabob. From Boston: Aug. 30, Sancho Panza. From China to England and Continent: Aug. 22, Robin Hood, Northfleet; 27, Jubilee; 30, Fairy, Romeo; 31, Veronica; Sept. 3, Hero; 5, De a Gungdunur; 6, Langdale. To New York: Sept. 5, Howqua; 9, Penguin. From England and Continent to Singapore. Aug. 24, Hen'edi; 26, Eugenie; 28, Maury; 29, Jules Cezard, West Kapella, senior; 30, Edwin Flye, Stad Middelburg, Niuroland, Hendria; 31, Solent. Sept. 5, Laura and Adele; From Singapore to England and Continent: Sept. 3, Hawthorn; 4, Medora; 7, Victor. From Manila to New York: Aug. 26, E. P. Stringer. To Boston: Sept. 5, Kate Howe. From Liverpool to Batavia: Aug. 31, Acadia; Sept. 14, Argo, Pauline Constance. From Batavia to Falmouth: Aug. 23, Chili. From Bankok to London: Sept. 8, Rangoon.

MALACCA STRAITS—(Continued.)

The Submarine Cable from Batavia is still hopelessly broken, and there are rumours of laying a new one.

Serious disturbances have broken out in Sungie Ujong, a native state lying to the westward of the Malacca territory, and from which a large quantity of tin is procured.

BORNEO.

LABUAN.

A correspondent of the *Straits Times* give the following particulars of this place:—

The trade of the island for the last three months may be estimated from the fact that of native boats manned by from 5 to 25 men each, 125 arrived. These came from the mainland of Borneo, and the Sooloo Archipelago, and imported rice, paddy, pepper, sago, beeswax, raw sago, cocoanuts, camphor, gutta-percha, birdnests, native sarongs, ivory, pearl, cattle beche-de-mer, horses and coffee. These articles are exchanged for European goods, supplied during the three months from May last, by twelve Singapore trading craft. Blaju is the chief commodity of exchange. Gunpowder, brass wire and opium are eagerly sought after. The Native boats, like those in Singapore, are, on their arrival, immediately surrounded by Chinese and Kling brokers, whose trade is conducted on the barter system. They remain from three to ten days, and depart laden with European goods for their homes. The island of Labuan is tolerably healthy, and its salubrity must increase as the jungles in the interior are cleared away. To facilitate this, Governor Edwards has lately opened the lands to enterprising agriculturists free of tax of any kind for seven years. The soil is said to be rich, and, if properly managed, remunerative. We fancy if H.E. the Governor were to make this order known in Singapore, many Chinese gardeners would flock to Labuan.

The staff of officers who lately left England for the mines and possessions of the Labuan Coal Company would proceed from Singapore to this place on the 21st-Sept. in the barque *John Buchanan*, chartered for that purpose.

SARAWAK.

Captain Brooke had gone up to Muka with a force to demand an explanation for indignities offered to the Sarawak flag, but had been obliged to return without accomplishing his object, in consequence of the undue interference of a British man-of-war.

It is announced that the trade between Sarawak and Muka had altogether ceased since the abandonment of the blockade by Captain Brooke, under orders from Governor Edwards, of Labuan.

JAVA.

In reference to the late mutiny of the Swiss troops it is reported that they have *en masse* demanded an explanation from Government, and are desirous to know what cause they have given to be watched and guarded, as they are at present, under the *espionage* of the Barrisan—a native militia regiment.

PHILIPPINES.

MANILA.

The Governor-General of these possessions died on Aug. 30 of fever.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

- HARPER**—On the 18th Aug., at Victoria, Hong Kong, the wife of Patrick Rose Harper, Esq., banker, of a daughter.
HANCE—On the 8th Sept., at Whampoa, the wife of Dr. H. F. Hance, H.B.M. Acting Vice-Consul, of a daughter.
HAPPER—On the 28th August, at Canton, the wife of the Rev. A. P. Happer, M.D., of a daughter.
LAMBRIK—On the 10th inst., at Stonehouse, the wife of Lieut.-Col. Lambbrick, R.M. Light Infantry, of a son.
LE CERF—On Tuesday, the 21st of August, Mrs. G. W. Le Cerf, of a son.
ROBINSON—On the 16th August, at Government House, Hong Kong, the Hon. Lady Robinson, of a daughter.
SOLANO—On the 30th August, at Manila, of fever, His Excellency General Solano, Acting Governor-General, aged forty-six.
STEPHENS—In Singapore Harbour, on board the British barque *Rose*, of Montrose, the wife of Captain Stephens, of a daughter.
WOODFORD—At Singapore, on the 29th of August, Mrs. W. Woodford, of a daughter.

MARRIAGES.

- HARSANT-GARRET**—On the 30th Octob-r, at Lewisham Church, by the Hon. Rev. Henry Legge, William Frederick May Harsant, to Eliza, second daughter of the late Mr. William Garret, of Greenwich.
OUTRAM-DAVIDSON—On the 20th instant, at Inchmarino, Kincardineshire, by the Rev. G. Hutchison, of Banchory Ternan, Francis Boyd Outram, Esq., of the Bengal Civil Service, only son of Lieut.-General Sir James Outram, Bart., G.C.B., to Jane Anne, eldest daughter of Patrick Davidson, Esq., of Inchmarino.
PHILPOTTS-HOLE—On the 9th instant, at St. Mark's Church, Torwood, Torquay, by the Rev. George Bethune, Charles Edward Philpotts, sixth son of Henry, Lord Bishop of Exeter, to Jane, second daughter of the late Rev. George Hole, p. ebendary of Exeter.
SCHMIDT-BLUNDELL—At Singapore, on the 18th Sept., by the Rev. T. D. Nicholson, M.A., Mr. R. A. Schmidt, of the firm of Rautenberg, Schmidt and Co., to Miss A. Blundell.

DEATHS.

- ALFRED**—On the 6th inst., at Queen-street, Singapore, after a lingering illness, Edward Alfred, aged 16 years and ten month, second son of Mr. P. A. Peterson.
COOPER—On the 17th Sept., Mr. W. B. Cooper, of Swan River, printer and publisher of the *Straits and Daily Times*.
FIRTH—On the 19th inst., Hubert infant son of James Firth, Esq., Spring House, Heckmondwike, aged three weeks and four days.
HOGG—On the 20th inst., at The Terrace, Turnham-green, of acute rheumatism and jaundice, George William (late of Shanghai), third son of Edward Hogg, Esq., of Norland-square, Notting-hill, aged 38.
LEICESTER—At Singapore, on the 25th of August, Mrs. W. S. Leicester, aged 30 years.
MAC CROHON—On board the P. and O. steamer *Colombo*, in the Red Sea, on his passage to Manila, General Mac Crohon, Captain-General of the Philippines.
MAC LAREN—On board the P. and O. steamer *Colombo*, in the Red Sea, on his passage to Labuan, J. Mac Laren, Esq., agent of the Labuan Coal Company.
MARTIN—At Manila, on the 23rd of July, Mr. Archibald Douglas Martin.
PITCHER—On the 22nd inst., at the Terrace, Northfleet, Kent, William Pitcher, Esq., in his 79th year.
STYLES—On the 30th Aug., Capt. W. Styles, late commander of the *schr Dido*, of this port, of dysentery.
VETRIANO—At Singapore, on the 21st of August, Mr. Joseph Vetrano.

TEAS.—The same general remarks which applied last mail may be repeated, namely, the stoppage of supplies to Shanghai by reason of the rebellion; the same effect at Canton, whether by marauders or mandarins is not quite clear; and an augmented supply to Foochow, by reason of the communications being open, and the adjacent districts being free from marauders.

EXPORTS FROM CHINA.

- Per *Crest of the Wave*, from Foo-chow-Foo, Aug. 20, for London, 913, 200 lbs. tea.
 Per *Broadwater*, from Foo-chow-Foo, Aug. 20, for London, 727,900 lbs. tea.
 Per *Peterborough*, from Foo-chow-Foo, Aug. 20, for London, 607,800 lbs. tea.
 Per *Ukko*, from Foo-chow-Foo, Aug. 25, for London, 923,300 lbs. tea.
 Per *Argonaut*, from Foo-chow-Foo, Aug. 22, for New York, 588,600 lbs. tea.
 Per *W. Racer*, from Foo-chow-Foo, Aug. 24, for New York, 1,000,600 lbs. tea.
 Per *Windover*, from Foo-chow-Foo, Aug. 21, for Sydney, 236,400 lbs. tea.
 Per *Gazehound*, from Foo-chow-Foo, Aug. 21, for Melbourne, 397,100 lbs. tea.

 Per *Anne Pucknam*, from Whampoa, Aug. 27, for New York.—Tea 136,700 lbs.; 1000s, 1,900 pieces; levantine hand. chiefs 100; sarunets

SHIPPING INTELLIGENCE—Continued from page 481.

CASUALTIES.

HONG KONG.

The British barque *Keepsake*, from Shields, when in 38 S. and long. 64 W., on the 19th of July, scudded in a gale of wind with a heavy cross sea running, shipped several heavy seas, which broke the starboard main rail, stove in bulwark on both sides, also three boats, and washed away the galley; was compelled to heave overboard all the movable articles on deck, and was obliged to stop at Anjer to get water, having been on short allowance about a week before arriving there. Left Anjer on the 19th of July, and had fine weather up the China sea.

The steamer *Castiz*, on the 26th July, when off Saddle Island, encountered a typhoon, in which the third officer was washed overboard and drowned.

The British ship *Art Union*, from London, when scudding in a heavy sea, off the Cape of Good Hope, stove in cabin windows and filled it with water, and during the voyage lost three topsails, foresail, two topgallant sails, jib and fore channels.

The American ship *Contest* has put back in consequence of making one foot per hour of water. She returned from the Paracels in 26 hours. The British ship *Hoang-Ho* in going out of Foochow struck on Sharp Peak. She has consequently been discharged, and 800 chests of tea are said to be damaged. She will have to be hove down and repaired.

MAGASAKI.

The Templeman had been on the rocks in the outer harbour, and had returned so seriously damaged that it is expected she will be condemned.

SINGAPORE.

The Hamburg barque *Helene* struck on a rock off the coast of Cochinchina and became a total wreck on the 28th June. She was bound from Saigon to Hong Kong.

PASSED STRAITS OF SUNDA.

From England and Continent to China: July 21, *Foam*, *Queen of May*; 24, *Thor*, *Wynaud*, *Ocean Gem*; 25, *Gange*; 26, *Rizbeth*, *Beemah*; 27, *Rosina*, *Jessie Beazley*; 29, *Eva*; 30, *Meliora*, *Pearl*; 31, *Wandering Jew*; Aug. 2, *Sarah Scott*; 3, *St. Esprit*; 7, *St. Imperatrice* (Pi.), *Lord of the Isles*; 8, *Pomone*, *Lauderdal*, *Valdivia*, *Premier*; 9, *Fraser Tuck*, *Jumna*. From New York: Aug. 1, surprise. From Melbourne: July 26, *Beatrice*. From Sydney: July 28, *Algernon*. From China to England and Continent: July 25, *Carnatic*; Aug. 5, *Chrysolite*, *Glenclyne*. To New York: July 6, *Waverley*. From England and Continent to Singapore: July 21, *Julie*; 26, *Venezuela*; 31, *Johanna Wagner*, *Toronto*; Aug. 10, *Graham*. From Hamburg: July 18, *Overmann*; 27, *Argus*. From Singapore to England and Continent: July 27, *Imina Brons*; Aug. 9, *John and Isabella*. From Newcastle to Batavia: July 19, *Cæsar*. From Liverpool: 31, *Albert Borsig*. From Manila: 23, *Romance of the Seas*. From Glasgow: 26, *Daniel Jeffreys*. From Batavia to England and Continent: Aug. 4, *Oscar I.*; 9, *Cecrops*, *General Jacobi*; 10, *Success*, *William Simpson*. From Manila to Liverpool: July 30, *Cervantes*.

CHINA.

NINGPO.

The city and suburbs are now quiet, but business is conducted on a very restricted scale owing to the alarm of rebels. Great complaints are made by the foreign residents of the want of men-of-war in case of any emergency.

The gun-boat *Kestrel*, which was stationed there, left to engage some piratical craft at Wanchew, and it is expected killed some 200 and captured two of the European leaders, who will be sent to Hong Kong for trial. Lieut. Huxham, in command of the *Kestrel*, was wounded.

FOO-CHOW-FOO.

The celebration of the 30th birthday of the Emperor passed off quietly. A thunderstorm broke over the town on that day, when a flash of lightning set the Model-tower on fire, and it was soon reduced to ashes. The Model-tower was situated a few miles out from the city, and was one of the sights to be seen by foreigners. The fact of its being burnt down on the Emperor's birthday was regarded by the natives as rather ominous.

AMOY.

There is nothing of any consequence from this port. Business proceeds on a fair scale.

SWATOW.

The British Consul announced his intention to visit the Taoutai, which had caused alarm, and the feeling against foreigners and the Custom-house was growing.

HONG KONG.

The London mails of the 26th June had not arrived on the 10th August, although forty-four days out and overdue.

The anxiety for news from the North was very great.

An ordinance had been introduced authorising the raising of £30,000 for the new water-works. The following notification had been issued by Government, but was considered to be simply *pro forma*:

GOVERNMENT NOTIFICATION.

In compliance with instructions received from His Grace the Duke of Newcastle, Her Majesty's Secretary of State for the Colonial Department, directing that "an inquiry should be instituted into the abuses which have been alleged to exist in the Civil Service of Hong Kong generally, and especially into the alleged tampering of some of the subordinate departments

in that service with the malversation, corruption, and piratical practices, of part of the Chinese community in or frequenting the colony," his Excellency the Governor has determined that such inquiry shall take place before the Governor in Executive Council, who will sit for that purpose in the Council Chamber on the 13th day of August next, at noon, and on such subsequent days as may then be determined on. All persons capable of giving information in furtherance of the proposed investigation, are desired to attend the sittings of the Council, which will be held with open doors.

The subscription to release Mr. Tarrant from gaol has, we are happy to say, been completed, and that gentleman was discharged on the 4th of August. We trust he may be the last.

Satisfactory accounts have been received of the condition of the Chinese emigrant in the West Indies.

The public clock is to be erected on a piece of ground placed at the disposal of the city, by Messrs. Dent and Co., opposite Pedder's Wharf. The tower will be 80 feet high, 20 at the base, and will have drinking fountains attached. It is also proposed to have a time ball, a fire alarm bell, and the clock lighted at night. It will be sufficiently high to admit of its being seen from the harbour. A committee was formed consisting of Mr. Brodersen, Mr. Beckwith, Mr. Douglas Lapraik, the Hon. Mr. Lyall, and the Hon. Mr. Cleverly, to carry out the wishes of the meeting, by fixing the site, and collecting subscriptions towards the erection of the tower.

The steamer *Zenobia* left on the 6th August, in search of the vessel, lately reported off Manila, as in a state of mutiny. Her name has not yet been announced, but she is said, to be under American colours.

The steamer *Feisoong*, late *Fanqui*, which arrived from Glasgow for Messrs. Douglas, Lane, and others, has been chartered by the French Government at \$8,000 per month. At this rate she will soon clear her first cost.

CANTON.

The rebels are again announced as in possession of passes through which produce usually passes.

The health of the troops is announced to be indifferent. The Governor and Tartar General congratulated the new French Commissioner by paying an official visit.

SIAM.

BANKOK.

War has been declared against Cambodia; the King is to invade with 60,000 troops. The second King starts to-day with a small fleet for the Siamese territories on the Malayan Peninsula.

The white elephant has been caught, and brought down the country in great state. Ten days were devoted to feasting after its arrival. Body guards and servants are appointed specially to attend it, and it is augured that the capture will bring great prosperity to the country.

The decline in the price of rice in China causes little activity in the market for this article, but horns or hides are much in demand, the first selling at 11½ and 11¼, taking them as they come without selections. Hides, 8¼ to 9¼; deer horns, 7½ to 7¼; sugar, 8½ to 9½; brown ditto, 4¼ ½ sticac, 16 to 17, this article can no longer be found; other produce without change. The quantity of imports increase.

There have been no arrivals from England since our last.

The departures have been July 7th *Gualior*, 8th August, 10th *Walter*, all for England, and 22nd, *Magnipert* for New York.

The vessels loading were *Rangoon*, Capt. Stapleton, *Sarah Lucy*, Capt. Wilson, both for Europe.

The Exports from 30th June, 1860, have been to England 8,252 piculs white sugar, and 306 piculs sapanwood. To New York 8,312 piculs white sugar, and 500 piculs of sapanwood.

BORNEO.

LABUAN.

Advices from this place to the 25th state that the notorious Mah-chow-Wang, from Hong Kong, made an effort to lead the convicts to murder all the Europeans. The Governor proceeded in the steamer *Victoria* to visit Sarawak and other places.

SARAWAK.

Capt. Brooke's party, it is said, has been fighting the Dyaks for 10 days without gaining any victory.

COCHIN CHINA.

The condition of the French forces are the same as reported in our late numbers. The steamer *Francis* left Hong Kong with 200 troops for Saigon.
